Gilway Technical Lamp

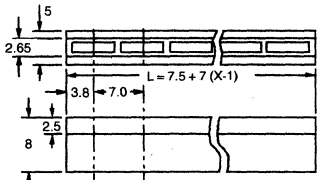
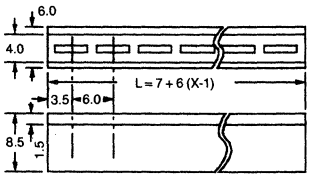
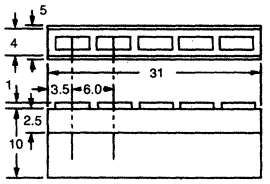
IDEA, Inc.
1300-B Pioneer Street, Brea, CA 92621-3728



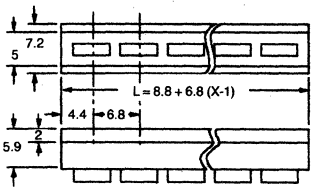
G20B (1.3 x 6.1 mm Lamp)



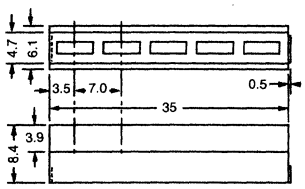
G22B (1 x 4.8 mm Lamp)



G24B (2 x 5 mm Lamp)

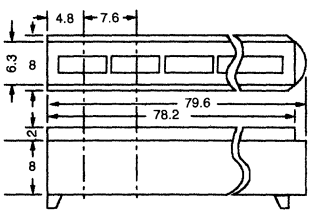


G26B (1.8 x 5.3 mm Lamp)

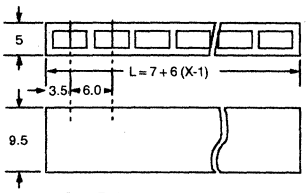


G28B (1.8 x 5.3 mm Lamp)

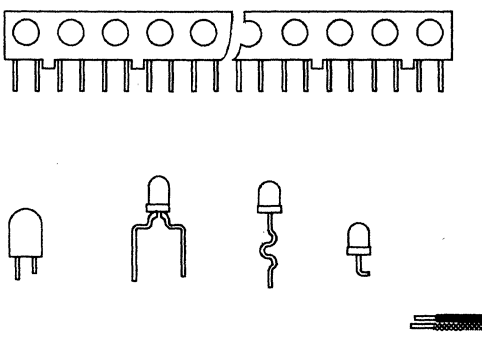
We will furnish:
Custom designed indicators,
assemblies, and displays to your specifications.
We also provide:
custom lead-forming using in-house design and
fabrication of tooling,
scheduled or just-in-time (JIT) delivery,
and applications assistance on any of your LED ideas.

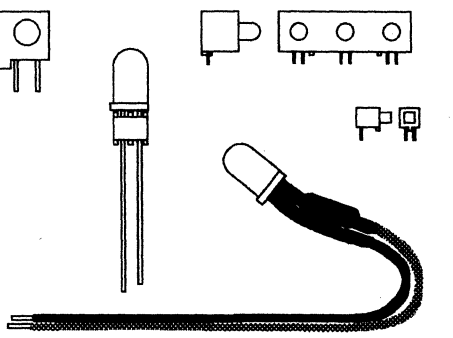


G30B (2.4 x 7.1 mm Lamp)

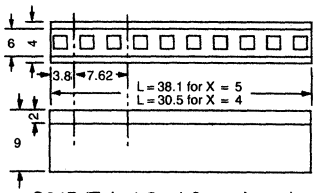


G32B (2.5 x 5 mm Lamp)

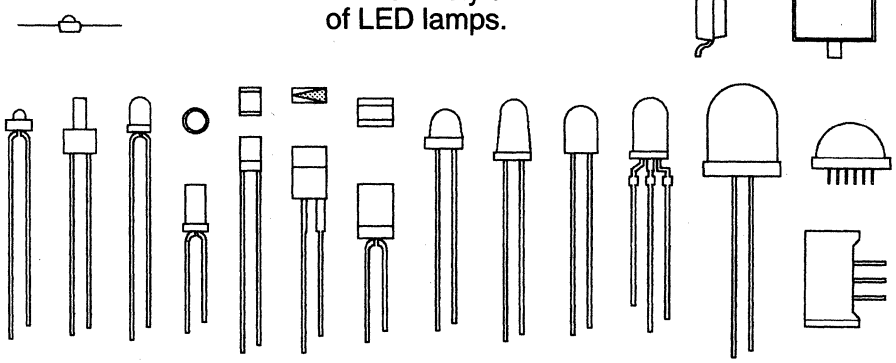


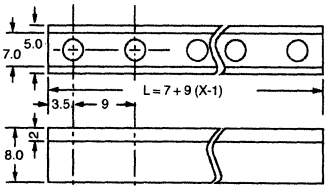


And, of course, we carry almost every
size and style
of LED lamps.

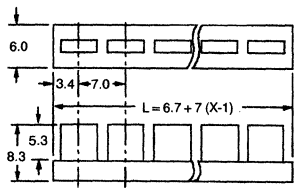


G34B (Twin 1.9 x 1.9 mm Lamp)

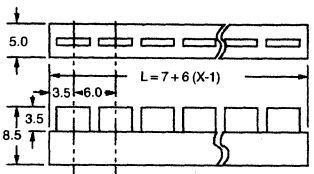




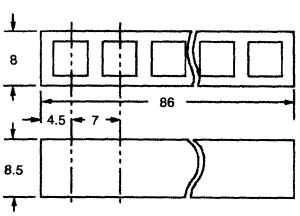
G36B (3 mm ϕ Lamp)



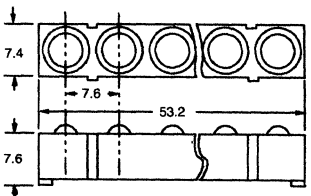
G38B (1.8 x 5.3 mm Lamp)



G42B (1 x 4.8 mm Lamp)



G52W (5 x 5 mm Lamp)



G57W (5 mm ϕ Lamp)

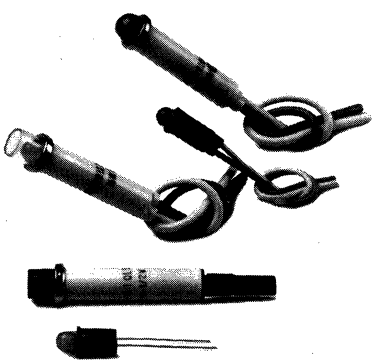
No one gives you more ways to see the light.

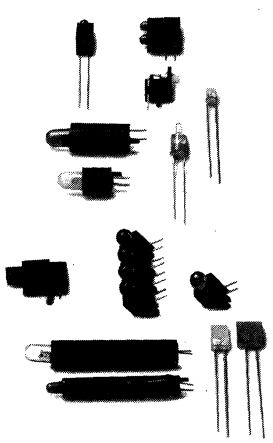
Neon and Incandescent Panel Indicator Lights.

When it comes to line voltage applications, our rugged neon lamps are designed to outlast the equipment they're used in. Available in unique packaging, colors and voltages, they offer you a wide range of options. IDI Incandescent Panel Indicator Lights are ideally suited for low-voltage applications which require higher light output. These incandescent indicators have replaceable lamps and are extremely cost effective. A wide variety of lens shapes and colors add to their versatility.



LED Panel Indicator Lights.

Featuring quick, snap-in panel mounting, wide angle visibility and attractive appearance, IDI LED Panel Indicator Lights are available in both SUPER BRITE and ULTRA BRITE configurations.

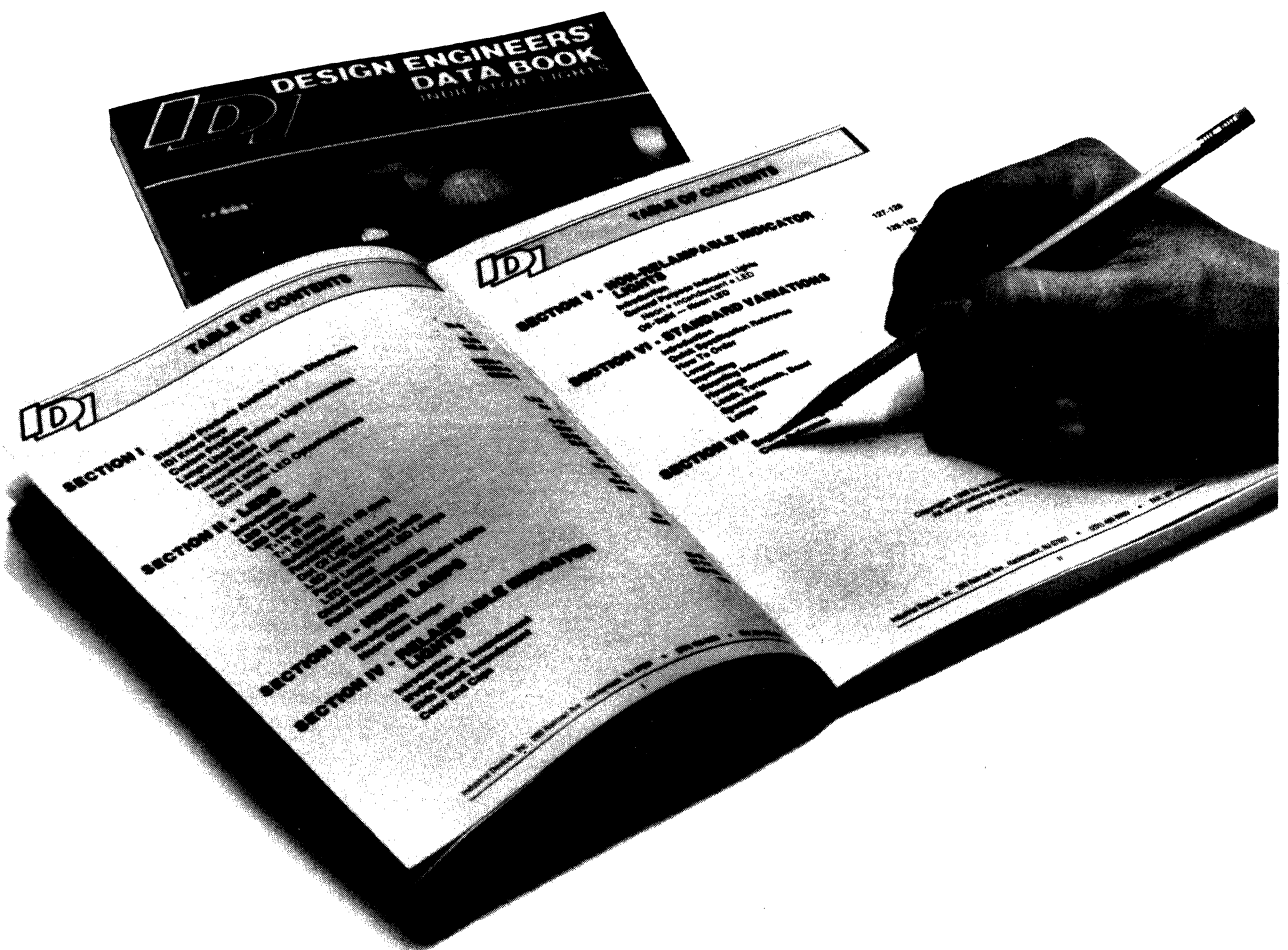


PC Board Mount LED's.

IDI PC board mount LED's are a dream come true for design engineers because they do away with a host of problems. IDI PC board assemblies saves manufacturing cost by installing quickly, assuring proper spacing and insulation, and at the same time provide uniform and secure mounting. Available in a wide variety of colors, voltages and brightness levels.

Industrial Devices, Inc.
260 Railroad Avenue, Hackensack, NJ 07601
Phone: (201) 489-8989 FAX: (201) 489-6911

Presenting over 50,000 bright ideas from IDI.



Where can you find the world's largest, most complete selection of "off the shelf" indicator lights in every shape, size and configuration imaginable? It's easy. Just do some light reading in IDI's all-new Data Book.

IDI has been supplying millions of incandescent, neon & LED indicator lights to designers and manufacturers for use in a wide array of panels and printed circuit boards. From simple LED solid state lamps to custom designed modules.

For your free 224-page IDI Data Book call or write today.

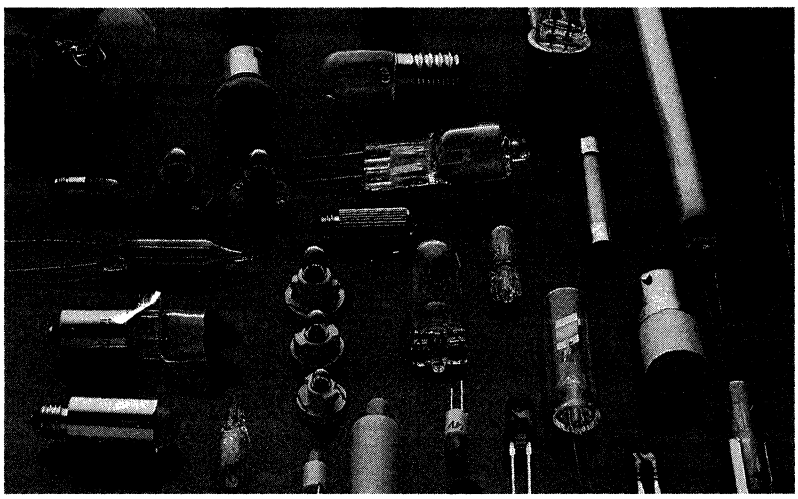
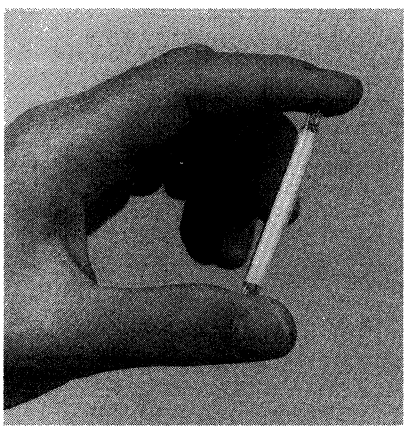
LEECRAFT

JKL: The Industry's Most Comprehensive Source For Lamps & Lighting Accessories

JKL Components Corporation is at the forefront of new product innovation, providing thoughtfully-engineered solutions to the changing needs of the dynamic industries it serves.

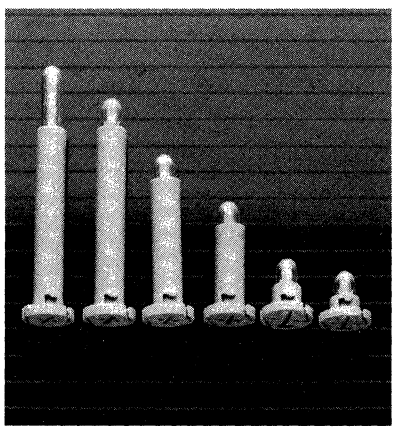
JKL offers the broadest selection of standards in the industry, available for delivery from stock. That's why we say, *if it lights and you need it, we have it.* More important, you can have it faster—with assured quality—at the right price. Call today and make us prove it!





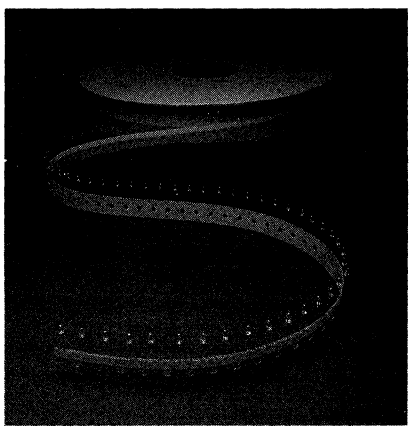
WORLD'S SMALLEST FLUORESCENT LAMP

Only .250″ (6.5mm) in diameter, and available in 2″, 4″ and 8″ standard lengths, this unique line is offered in a variety of colors, and provides a minimum of 20,000 hours operating life. A new, narrow spectrum RBG series is also available, as well as the Ultra-Violet Line in diameters as small as 3/8″ (9.5mm).



JKL NEO-WEDGE™ PCB LAMP SYSTEM

This patented design allows direct mounting of lamp assemblies to a PC board with a quarter turn twist, reducing labor costs and eliminating all secondary assembly operations. It is also available in a double-contact version for single sided boards that assures electrical contact whether lamp is pointing top or bottom, as well as a new gas filled line *guaranteed* for 2500 hours lamp life.



HIGH PRODUCTION TAPE & REEL LAMPS

This revolutionary concept permits utilization of leaded lamps with automatic insertion equipment, providing a practical and cost-effective solution to the problems of manual lamp insertion in what is otherwise an automatic operation. Available in high volume quantities on special order, to exacting customer specifications. Compatible with most auto-insertion systems. Consult factory.

STANDARD JKL LIGHTING PRODUCTS

- Miniature Fluorescent Lamps
- Wedge Base Lamps
- LED Indicators
- Miniature PC Board Lighting
- Quartz Halogen Lamps
- Silicone Lamp Filters in Colors
- Miniature LED Devices
- Neon Glow Lamps
- Sub-Miniature Indicator Lamps
- Incandescent Lamps
- Xenon & Krypton High Intensity Lamps
- Narrow Spectrum Ultraviolet Lamps
- Medical & Optical Lamps
- Aircraft Lamps
- Automotive Miniature Lighting

Minelco Non-Volatile Avionics Indicators

MI57D Series
M83287/02-Electrical Reset, Panel Mount. Highly visible, internal flag display features magnetic latching for positive indication. Non-volatile memory produces effective warning of system faults. Electrical reset available in 3-28 volt DC versions.

BHG, BGHD Series
M83287/03-Panel Mount Ball. Small and lightweight, this highly reliable unit features excellent visibility and is available in a variety of display color combinations. Positive magnetic latching with single or dual coil construction, from 1.5-28 volts DC.

MI61S, MI61R Series
M83287/01-Panel Mount Flag. Most popular manual resettable unit, with magnetic latching and positive indication. MI61R is designed to withstand high random vibration. Both units are environmentally sealed. Available in a range of DC voltages.

MB25 Series
M83287/05-P.C. Board Mounting. Small and lightweight, features low power 180 mw@ 20ms pulse. Non-volatile, wide angles display, dual coil and environmentally sealed construction. Available in 5 and 12 volts DC.

MI51LP Series
M83287/04-Low Power, Dual Drum. Requires only 50 mw pulse power for 25ms for positive latched fault indication. Available from 1.5 to 28 volts DC. Features manual reset and excellent shock and vibration characteristics.

The *only complete* line of Mil Qualified Fault Indicators.

- Magnetic latching type indicators require only pulse power for fault identification.
- When fault occurs, signal ball, flag or drum positively held in magnetic locked position without further application of power.
- Family of five indicators are manually or electrically resettable, panel mounted or designed for PC mount.
- All indicators available in several types, most at more than one voltage level.
- Operating life up to one million cycles.

Customized Lights
Specialized for Military and Avionic applications. Packaged LED and incandescent indicators in discrete or multiple array annunciators. Available in sunlight readable, secured lighting, NVG compatibility, or custom legend rear projection annunciators.

Custom Applications
Whatever your requirements for fault monitoring systems, Minelco can provide an indicator to meet your needs, illuminated or electromagnetic. Custom interfaces, legends, and colors are available in discrete or integrated modules tailored to your specifications. Standard units can be modified to exceed MIL-STD requirements in many areas such as shock, vibration, EMI-RFI shielding and environmental seals.

Minelco's high standards are reflected in a quality program maintained to MIL-Q-9858A and inspection system to MIL-I-45208A. The military and aerospace industry has relied on Minelco's quality design, production, and service for over 30 years. Minelco's sales and technical staff are ready to handle all indicator needs.

OXLEY SEALED MILITARY & PROFESSIONAL LED INDICATOR LAMPS

With Sunlight Viewability, NVG Compatibility, EMC, and Secure Lighting Features

Approved for MILITARY APPLICATIONS to DESC Selected Item Drawings 85122 and 87019

Series		STR/LH/8	STR/LH/8/RAF	STR/LH/8/RAPP	2/STR/LH23/10 3/STR/LH23/10	OXL/MIL/50	STR/LH23/10/—
	Panel and front sealing	PS/LH/8	PS/LH/8/RAF	PS/LH/8/RAPP			
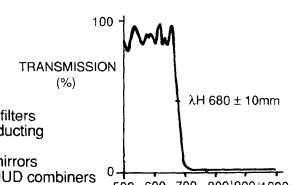
Outline Dimensions (mm)							Mounting Details (mm)		 Panel thickness 3 max.	 Panel thickness 3 max.	 Panel thickness 3 max.	 Panel thickness 6.5 max.	 Panel thickness 1 to 4	 Panel thickness 6.5 max.
Special Features		Plano-convex lens to provide even illumination over a large area of emission. Special functions available:— Low current (Type—/LC) Flashing (Type—/5/Z) Bi-color (Type 2/—) Integral resistor types for operation from 5, 12, 15, 24 or 28Vd.c. supplies available.	Sunlight viewable up to 100,000 lux. Focused light source for optimum forward viewing. Contrast ring. Optional anti-reflection coating. NVIS/NVG compatible types available.	Sunlight viewable up to 100,000 lux. Pin-point light source for very wide angle viewing. Contrast ring. Optional anti-reflection coating. NVIS/NVG compatible types available.	Multicoloured 2 in 1 and 3 in 1 lamps with segmented display areas. Standard segment colors shown in front views above 2 in 1 lamp has two LED's independently terminated. 3 in 1 has common cathode configuration as standard.	Miniature Lamps, high brightness LEDs (100% screened and burnt-in) in a 7.5 mm diameter aluminum package, similar in construction to the STR/-series lamps, MIL/50 fits a 5mm diameter hole for applications where panel space is limited.	Replacement for obsolescent incandescent types. Integral current limiting resistor and protection diode for operating from 5, 12, 15, 24 or 28 V d.c. supplies. Domed lens fitted as standard to give wide viewing angle.
Electro-magnetic Screening Mesh (Type-/-/-/SES)		Option on STR/LH/8 only	Option on STR/LH/8/RAF only	Option on STR/LH/8/RAPP only	Not Available	Available	Not Available
Standard Features		Rugged construction with sealed glass lenses. Panel sealing to a depth of 20 meters of sea water. High brightness LED's. 100% burnt in to optimize reliability. Black anodized shroud to enhance visual appearance, all metal construction for grounding when panel mounted. Nut mounted. STR/-types have sealed rear terminations. Pigtail terminations available for STR/-types.					

OTHER OXLEY DISPLAY PRODUCTS

OMITEC THIN FILM COATINGS



- NVG compatible filters
- Transparent conducting windows
- Ring laser gyro mirrors
- Laser selective HUD combiners
- Thin films onto plastic optics
- Anti-reflection coatings

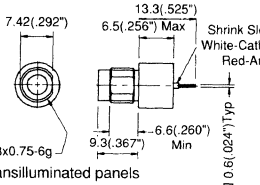
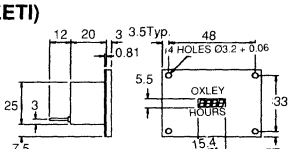
REAR MOUNT INDICATOR FOR AVIONICS



- Compatibility with transilluminated panels
- High panel density
- Flush/recessed mounting using sub-chassis
- Improved maintainability-panel removal is possible without disconnection.
- Panel engraving possible to within1mm of viewing aperture

OXLEY ELECTRONIC ELAPSED TIME INDICATOR (EETI)



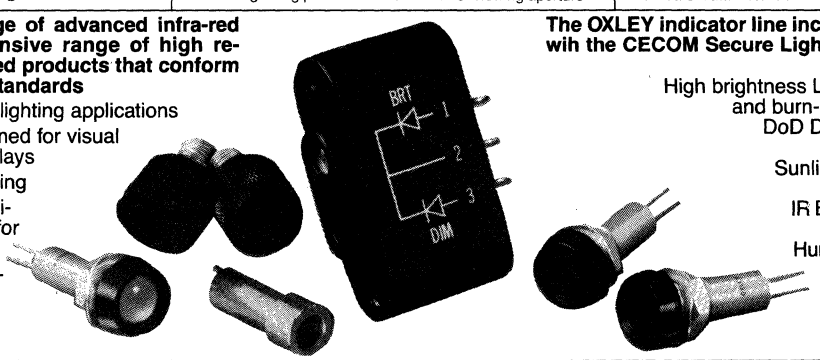
FEATURES

- Fully Solid State Circuitry
- Data-bus Readout
- Contrast Enhanced LED Readout
- EEPROM Non-Volatile Memory
- 10 Years Data Retention

Oxley meets the challenge of advanced infra-red technology with an extensive range of high reliability and quality assured products that conform to exacting U.S. military standards

- NVIS compatible cockpit lighting applications
- Color discrimination retained for visual warning and caution displays
- NVG Visible Covert Lighting
- Spectoradiometrically calibrated infra-red emitters for avionic formation lights.
- Custom NVG/NVIS Compatible Lighting

NVIS/NVG COMPATIBLE LIGHTING



The OXLEY indicator line includes parts complying wih the CECOM Secure Lighting Program.

OSHINO LAMPS LIMITED has been in business since 1931. We are a leading supplier of Sub-Miniature Lamps to the U.S. and European Aerospace, Automotive, Telecommunication and Computer Industries. We have a NATO Code Number S3774 and will certify lamps where applicable to U.S. Military Standards and Specifications and other international norms such as DIN, IEC and JIS. Our "OL" trademark stands for dependability, quality and reliability.

sub-miniature lamps - off-shore high quantity

Over years of experience in lamp, business, **SUB-MINIATURE LAMP INDUSTRIES. (SLI)** has continuously developed newest technology and equipment in the manufacturing of high quality miniature and subminiature incandescent lamps.

Our subminiature lamps are designed to meet extremely small sizes (from T-5/16 0.04" dia. to T-4 0.5" dia.), extra long life and low cost requirements. They are also available with a wide variety of filament constructions, bases and wire terminal leads.

We supply all lighting needs for panel industry, indicators, computers, medical instrument, automobile, aircraft, electronic, telephone and other industries.

We also offer application engineering assistance to all customers in applying subminiature lamps in production design. Any inquire or new design is welcomed by our R&D Dept. Please contact us for additional information. We can assure you will get the complete satisfaction with our high quality, competitive price and speedy deliveries.

lamp types available

- T-3/8 Micro Lamps - Wire Terminal
- T-3/8 Micro Lamps - Axial Leads
- T-1/2 Micro Lamps - Wire Terminal
- T-3/4 Miniature Incandescent Lamps
- T-3/4 Integral Bi-Pin Lamps (IBP)
- T-1 Miniature Incandescent Lamps
- Short T-1 Incandescent Lamps
  O.L.. .145" (3.68mm) MAX.
- Super Short T-1 Incandescent Lamps
  O.L. .130" (3.30mm) MAX.
- T-1 Helium Retardant Incandescent Lamps
- T-11/4 Miniature Incandescent Lamps
- T-1 Integral Bi-Pin Lamps (IBP)
- T-13/4 Incandescent Lamps
- Line Filament Lamps
- T-11/4 Lens-End
- Special Incandescent Lamps
- Telephone Slide Lamps
- Neon Indicator Lamps

LEDs

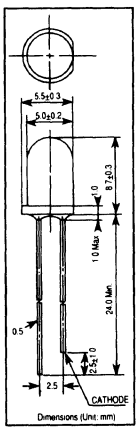
We turn it on for you.

Quality is our passion. We breathe it. We live it. And we believe that rigorous, uncompromising product quality results in the greatest possible economy for you.

ROHM optoelectronics offer you the highest guaranteed minimum brightness (3.6 mcd) in the industry. Our LEDs deliver absolutely consistent luminescence, uniformly matched colors, and a level of reliability unequaled anywhere.

New Products. Our new T 1-3/4 red lamps (SLA-580LT3 Series) using GaAlAs technology offer true sunlight visibility. Luminous intensities as high as 2000 mcd make them ideal for outdoor use.

New ROHM SLM-125 (red) and SLM-245 (red/green) surface mount LEDs are the brightest available, thanks to a new package created especially by ROHM for this application.



Standard T1 & T 1-3/4

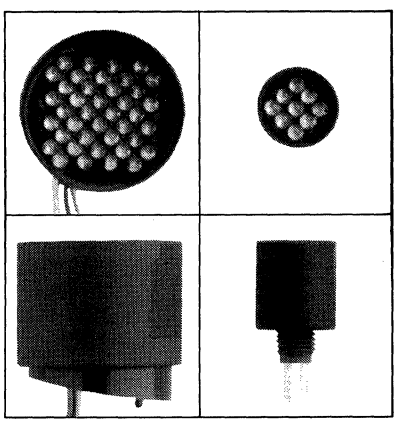
Colors:	Red, green, yellow, orange—all available in selectable wavelengths
Brightness:	10 - 1000 mcd
Viewing Angle:	12° - 50°

SuperBright T 1-3/4

Color:	Red
Brightness:	1 - 3 candlepower
Viewing Angle:	12°

Large, 2-Color, Outdoor Modules

Featuring exceptionally intense, clear illumination and a wide viewing angle, these large (50mm & 24mm diameter), red/green LED modules offer much longer life and lower power consumption than incandescent lighting. With resin-sealed polycarbonate casings, these modules are ideal for applications such as outdoor billboards, traffic signs, airport runway indicators and railroad directionals.

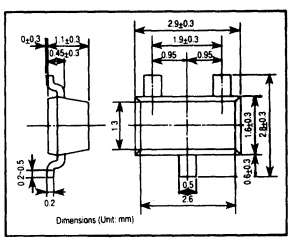


SLL-5080ML **50mm**

SLL-2518ML **24mm**

Surface Mount LEDs

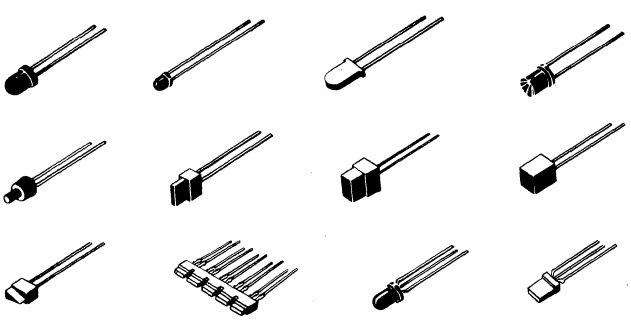
Colors:	Red, green, yellow, orange
Brightness:	5 - 25 mcd
Applications:	Status indicator Board level indicator Front panel illumination



Assorted Shapes, Colors & Viewing Angles

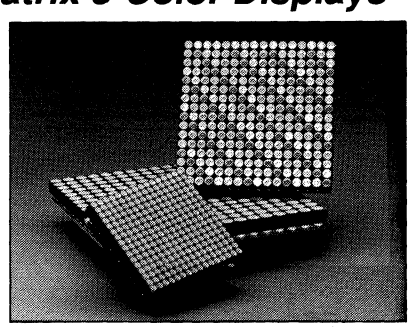
(Characteristics Similar to T 1-3/4)

■ Standard lamps can be modified to meet your specifications.

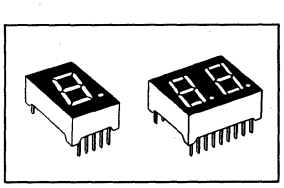


16x16 Dot Matrix 3-Color Displays

Each of the 256 dots in this module contains both red and green dies which may be switched for individual colors or combined to create orange. IC drivers for CPU interfacing are PCB-mounted on the back of each module. Modules may be laid as "seamless tiles," creating large, colorful, moving displays that outlast incandescent bulbs many times over.



LU Series	**64x64mm**
T1 & T1-3/4 LEDs	**96x96mm**
Red/Green	**144x144mm**



Single & Dual Digit Displays

Color: Red, green, yellow, orange

High luminosity

Sharp's leading-edge opto-electronics technology is incorporated into its LED chips to provide amazingly high light emission. Thanks to our unique assembly technology, these units provide enough luminosity to even be used outdoors.

3 color display capability offers more creative freedom

Allowing you to display red, yellow-green and orange (by mixing the first two) makes the information more colorful and thereby more effective.

Reduced power consumption

Sharp's LED chips have superior luminous efficiency and provide a practical luminosity level at low current, reducing power consumption for the entire system.

Thin and light weight design

A thin and light weight body has been realized through our unique high-density design. It allows flexible unit configuration of just about any size, to best suit the available space in shops, offices, even outdoor locations.

High-speed operation

The response time is fast enough to cope with personal computers or various other forms of communication equipment. Graphics and other complex displays can be also shown, expanding the range of applications as an intelligent message board.

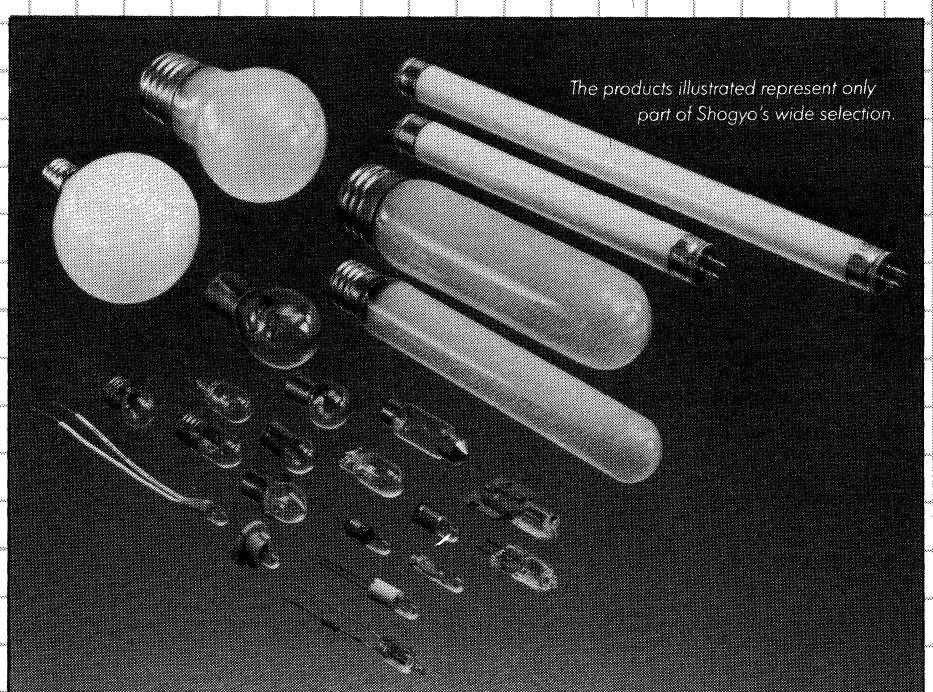
SHOGYO LAMPS AND BULBS

Your design deserves Shogyo quality and reliability.
You deserve...
Shogyo Service... comprehensive, responsive and fast
Shogyo Professionalism... the helpful experience you need
Shogyo Prices... always competitive, usually better
and...
Shogyo Selection... with complete custom design capabilities

Including a diverse offering of:
- *Incandescent lamps*
- *Standard voltage lamps*
- *Fluorescent lamps*
- *Neon lamps*
- *Xenon flash tubes*
- *Bulbs*
- *Filaments*
- *Bases*

And featuring:
- *A comprehensive variety of styles, sizes, shapes, volts, amps, watts, filament shapes, and terminals (wire, bi-pin, flanged, wedge, knerled, midget grooved, bayonet and slide base).*



The products illustrated represent only part of Shogyo's wide selection.

For immediate assistance and specific information on the product(s) you require:
Dial 516-466-0911 or
FAX 516-466-0922

For complete product listings and specifications, request our free catalog.

SPECIFY SHOGYO. ELECTRONIC COMPONENTS AS GOOD AS YOUR DESIGN.

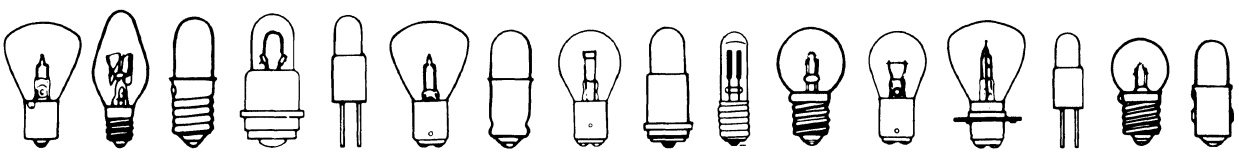
SHOGYO

Miniature, Subminiature, Microminiature, and LED Lamps

SHOKAI GUARANTEED PERFORMANCE AT THE WORLD'S LOWEST PRICES!



- **Engineered and Tested for Longer Lasting, Perfect Performance in Every Project**
- **All Voltages . . . Shapes . . . Sizes—Standard Types or to Your Specifications**
- **On-Time Deliveries—Direct from Our Overseas Factory**
- **Also Available—Halogen, Xenon, Neon, Krypton, Fluorescent, Germicidal, Auto, Aircraft and Telephone Lamps for All Applications**

When you need OEM quality components, specify SHOKAI. The name you can depend on!

Our proven record of reliable customer service and on-time delivery is no accident. We control every aspect in the manufacture of our products. We selectively review and test each category of components. And we consistently ensure the highest standards of production and design. All resulting in an assortment of quality components designed to meet every customer need. That's why more and more component purchasers have turned to SHOKAI.

And even if we don't have exactly what you need, we can custom make it for you, to your exact specifications, in our own facilities.

Insist on SHOKAI. For consistent quality, competitive pricing, and unbeatable values.

We can also furnish other quality components, such as antennas, battery holders, buzzers, cables and cord sets, capacitors, connectors, microphones cartridges, potentiometers, speakers and tape heads.

Give us a call today for all your electronic needs.

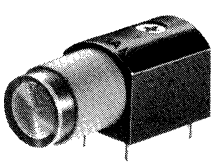
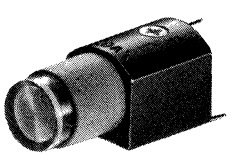
The Sloan Company

Indicator Lights

"The Touch of Brilliance in Panel Design"

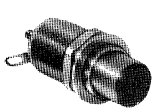
You need a solution!
You need it soon!
We can help you and we will.
You need well packaged LED's.
Standard bright? Super bright?
Ultra bright? Multi chip?





For the last 30 years The Sloan Company has been providing the finest indicator lights available.

For military applications, it's important to know that all of our material and processes meet or exceed military specs.



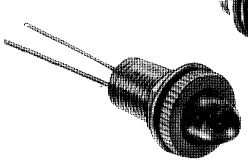
We got'em!

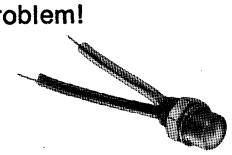
High Rel?

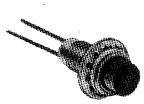
Waterproof?

Oiltight?

No Problem!







Maybe you have a high voltage circuit in a Radio Frequency sensitive environment. We handle that in every shape and size.

In the event that you don't see what you are looking for here, call us, you will find our staff most obliging. You will be pleasantly surprised to find how few you may have to order and how fast you can get them.

Free samples and prototypes available.

We will be glad for the opportunity to help you to find or develop the product you envisioned.

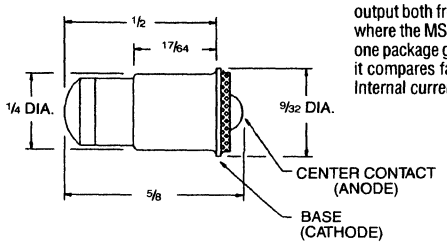
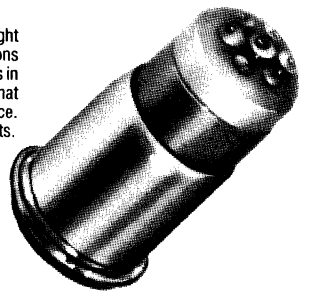
T-1¾ MIDGET FLANGED BASE LED

MODEL 510

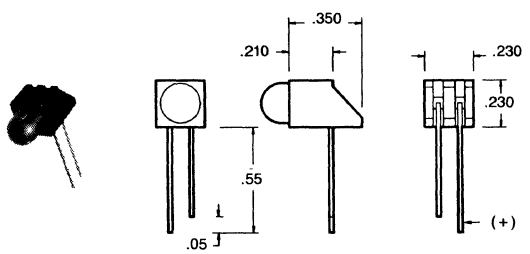


The Model 510 six chip LED T1¾ Midget Flange Base lamp has abundant light output both front and side viewing, for use in indicator lights and other applications where the MS25237 (327, 328, etc.) incandescent lamps are used. The six chips in one package give far greater light output totally than earlier single chip LEDs so that it compares favorably in use with the incandescent lamp it is intended to replace. Internal current limiting resistors allow for supply voltages from 5 up to 28 volts.



CIRCUIT BOARD MOUNT LED

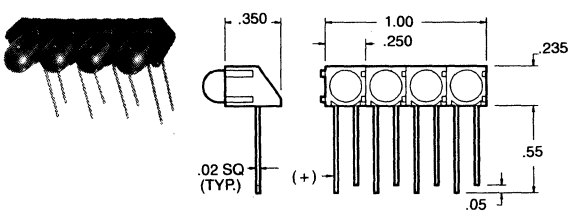
MODEL 210



Designed specifically for parallel mounting to printed circuit boards. Used as single indicator lights mounted in various places along the edge of the printed circuit board on any center-to-center distance.

CIRCUIT BOARD MOUNT LED

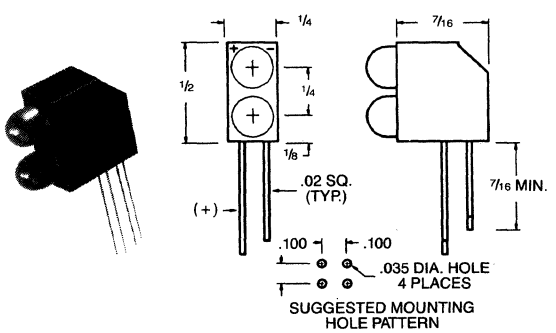
MODEL 211



Designed specifically for parallel mounting to printed circuit boards. Used where two or more indicator lights are needed in arrays of virtually any number. Close tolerance spacing makes assembly of the board with the front panel easy and trouble free.

CIRCUIT BOARD MOUNT LED

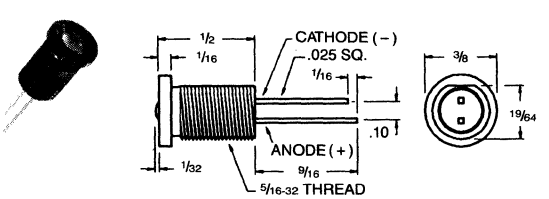
MODEL 220



This is an extremely versatile device for a wide range of applications and space saving status indicator for horizontal mounting in printed circuit boards. The bi-level feature saves board space by cutting space requirements in half. Standard .100 inch center to center distance of the leads make it easy for both assembly and servicing of the circuit board.

PANEL MOUNT LED

MODEL 250

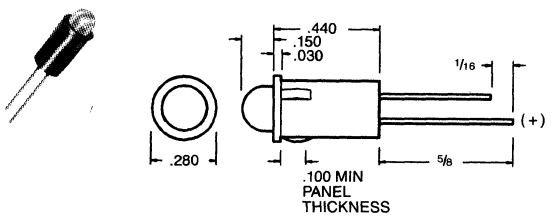


Utilizes hermetically sealed solid state LEDs with high brightness and wide viewing angle. Can be supplied with standard, JAN Qualified, or JANTX LEDs. It can also be supplied with a current limiting resistor depending on your particular requirement. The Model 251 is supplied with an O-ring for proper panel sealing.

The Sloan Company
"THE TOUCH OF BRILLIANCE IN PANEL DESIGN"
7704 San Fernando Road, P.O. Box 367, Sun Valley, CA 91353
(213) 875-1123 • TWX 910-498-2250 • FAX: (818) 768-8326

PANEL MOUNT LED

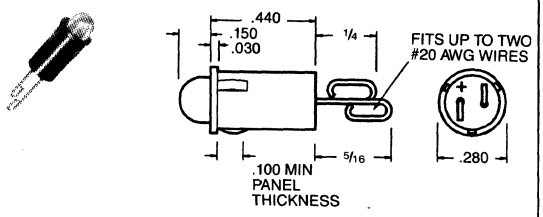
MODEL 240



This model uses high brightness LEDs mounted in easy press to fit bodies. Ideal for fast production, this model presses into place permanently, eliminating the need for mounting hardware. Uses straight terminal leads to which wires can be soldered directly or the leads can be hand soldered into PC boards either vertically or horizontally by bending the leads.

PANEL MOUNT LED

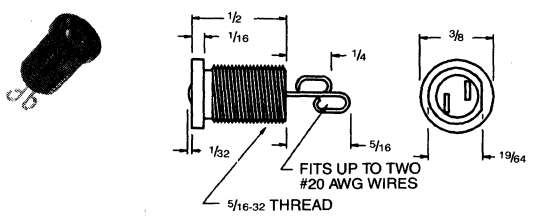
MODEL 241



Identical to Model 240 but has solder loops in the terminal leads to accommodate up to two #20 AWG or smaller wires. Robust terminal leads are formed with the loops in opposite directions to keep the wires apart from each other.

PANEL MOUNT LED

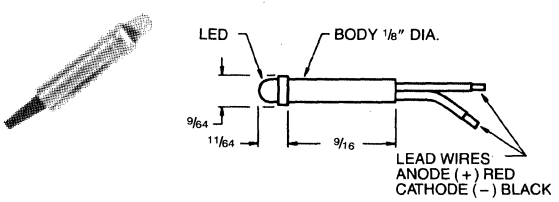
MODEL 252



Identical to the Model 250 except this model incorporates a standard package high bright LED. The Model 253 is supplied with an O-ring for proper panel sealing.

PANEL MOUNT LED

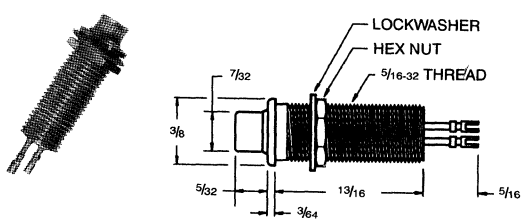
MODEL 5L3



The mini-cartridge provides front panel indication in applications where space is at a premium. The Model 5L3 is one of the smallest panel mount LED on the market. A series resistor is available allowing operation from sources up to 28 volts. Lead wires are color coded for polarity and provide simple solder connections. A speed clip permits easy and positive panel installation.

PANEL MOUNT LED

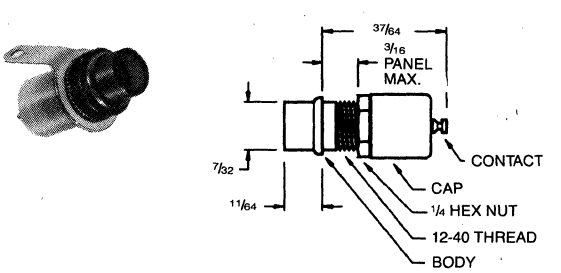
MODEL 3L5



This rugged unit houses high bright T1¾ LEDs in an all metal threaded housing. Termination is by wire wrap posts or solder lugs. Built in current limiting resistors allow these units to be powered from sources up to 28 volts.

PANEL MOUNT REAR RELAMP
INCANDESCENT OR LED

MODEL 107



Designed for rear replacement of T-1 size midget flanged base incandescent or LED lamps. Rugged construction allows operation at severe conditions. Available in different lens configurations. The two terminal version is the 107SI.

The Sloan Company

"THE TOUCH OF BRILLIANCE IN PANEL DESIGN"

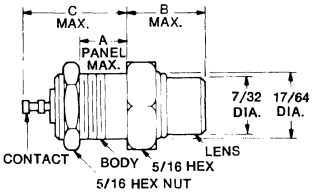
(213) 875-1123 • TWX 910-498-2250 • FAX: (818) 768-8326

PANEL MOUNT FRONT RELAMP INCANDESCENT OR LED

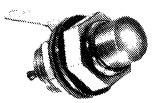
MODEL 102S

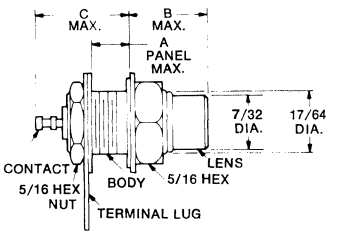


Utilizes the T-1 flanged-based incandescent lamp or LED. An internal silicone rubber pressure pad maintains electrical contact with the lamp and is an effective front-to-back of panel moisture seal.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290 Delrin per LP-392
LENS—Lexan LP-393 Nylon MIL-M-20693 Aluminum 2024-T4 Anodize MIL-A-8625
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
HDWE—Brass SAE 72 Nickel Plate QQ-N-290 Phenolic per MIL-P-15035 Nylon MIL-M-20693

MODEL 102SI



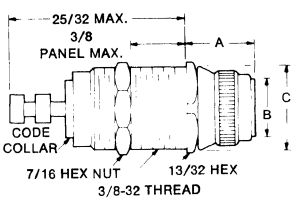


This is the two-terminal version of the basic 102S Model. It is created by the addition of special insulating hardware (above) which includes a solder lug as the second terminal.

NOTE 1—Both the 102S and the 102SI are available in four body styles: S-(above) provides a bright hex flange on the panel, SK-is a knurled flange, SS-a short low-profile hex, and SR-(above left) a small, plain flange.
NOTE 2—The 102S and 102SI are available in several lens styles: Q, QB, DSC, DS, STD. (Contact Factory)
NOTE 3—The 102 series can be furnished in a waterproof version, and can be RF shielded. (Contact Factory)

PANEL MOUNT FRONT RELAMP INCANDESCENT OR LED

MODEL 855S



Among the features of the 855 Series are • Small Mounting Size • Front Relamping • Interchangeable Lens Assemblies. Contact pressure is maintained by a silicone rubber pressure pad which seals out moisture front to back of panel. Uses T-1¾ Flanged Base lamp, incandescent or LED.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290

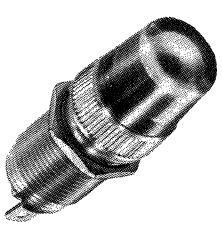
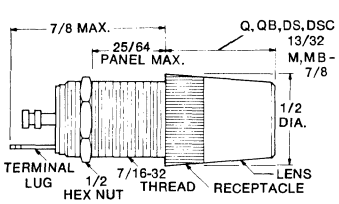
PANEL MOUNT FRONT RELAMP INCANDESCENT OR LED

MODEL 856





A two-terminal, front-relampable indicator light designed to use the T-1¾ midget flange based incandescent bulb or LED. An internal silicone-rubber pressure-pad maintains electrical contact inside the lamp body. It also provides an effective moisture seal front to back.
NOTE: Available in lenses styles: Q, QB, DSC, DS, M and MB.

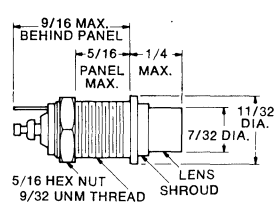
HDWE.—Brass SAE 72 Nickel Plate QQ-N-290
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727

MODELS—121, 122—123, 124



The 121 Model lamp holder is a two terminal, front relampable indicator light specifically designed for use with T-1 Midget Flange Based incandescent or LED lamps. The 122 is a waterproof version of the 121. The Model 123 is the same but with the more conventional 5/16-32 screw body. The 124 is the waterproof version of the 123.
Available in lens styles: STB, STC, DS, DSC, QB, Q.

MATERIAL & PROCESSES

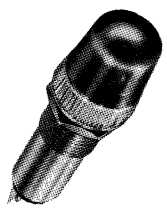
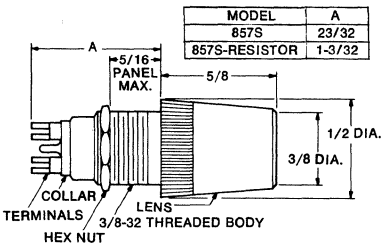
PANEL MOUNT FIXED LAMP

MODEL 857



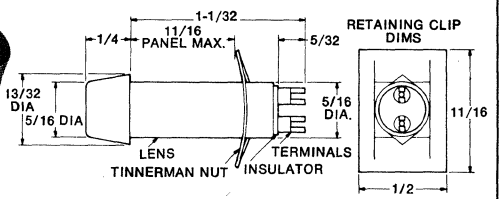


A sub-miniature fixed neon, offering optimum light dispersion and direction. Uses, Hi-Brightness or other NE-2 Series unbased bulb with or without resistors. Mounted in a ⅜ dia. hole with resistor, the Model 857 can be used directly on commercial line currents (115 VAC).

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290 General Purpose Phenolic
LENS—Butyrate LP-349
TERMINALS—Brass SAE 72 Tin Plate per MIL-T-10727
HARDWARE—Brass SAE 72 Nickel Plate QQ-N-290

PANEL MOUNT FIXED LAMP
NEON OR INCANDESCENT

MODEL 858



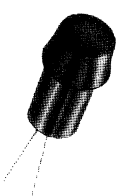
Uses the T-2 unbased neon lamp or can be supplied with the T-1 or T-1¾ unbased incandescent lamp. It accommodates long neon lamps (C2A Type) without dropping resistor built-in, as well as short neon lamps (A1C Type) with dropping resistor built-in. When resistor is built-in it can be used directly on commercial line current (115 volts A.C.). For LED applications see note below.

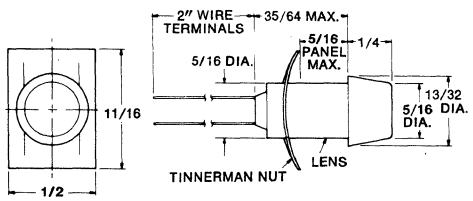
FOR LED APPLICATIONS LED can be supplied as a special in red, green and amber with or without built-in resistor. Voltage up to 28 volts available. (Contact factory).

MATERIAL & PROCESSES
LENS—Butyrate LP-349
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
TINNERMAN NUT—Carbon Steel Phosphate Oil Finish
INSULATOR—General Purpose Phenolic

PANEL MOUNT FIXED LAMP
NEON OR INCANDESCENT

MODEL 859



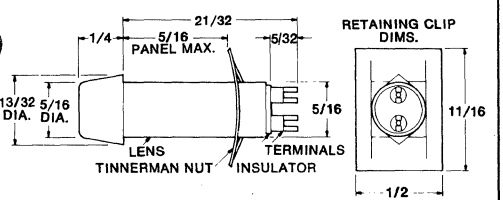


Uses the T-2 unbased neon lamp and long neon lamps without dropping resistor or with dropping resistor. It can also accommodate short neon lamps (A1C type) with or without resistor. With resistor the 859 Series can be used directly with commercial current (115 volts A.C.). Incandescent unbased lamps (T-1 or T-1¾) can also be furnished.

MATERIAL & PROCESSES
LENS—Butyrate LP-349
TINNERMAN NUT—Carbon Steel Phosphate Oil Finish

PANEL MOUNT FIXED LAMP
NEON OR INCANDESCENT

MODEL 862

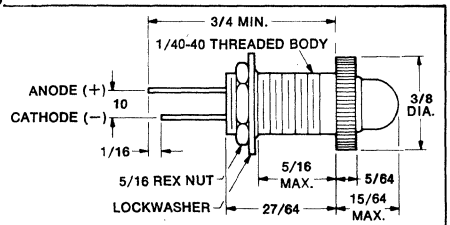


The 862 series accommodates short (A1C) neon lamps only with no resistor built in. Useful where space is limited behind the panel and offers wire wrap™ terminals for soldering.

MATERIAL & PROCESSES
LENS—Butyrate LP-349
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
INSULATOR—General Purpose Phenolic
TINNERMAN NUT—Carbon Steel Phosphate Oil Finish

PANEL MOUNT FIXED LAMP
LED

MODEL 1L3

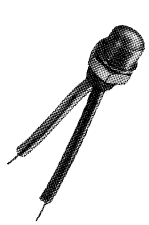


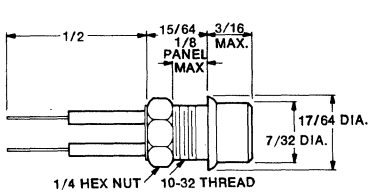
Designed for applications requiring LED indication without a lens. The 1L3 Model provides high brightness in the smallest threaded metal body available in the industry. Termination is by wire leads. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
HDWE—Brass SAE 72 Nickel Plate QQ-N-290
TERMINALS—.02 Sq. Solid Cu. Tin plated for solderability

PANEL MOUNT FIXED LAMP
INCANDESCENT/LED

MODEL 105S/1L5S





Featuring a T-1 unbased commercial or MIL-Spec. lamp. Standard unit has two ½" long leads. Longer leads furnished upon request. RFI shielding and waterproofed version available. The 1L5S is the LED indicator model.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
LENS—Lexan LP393 Nylon MIL-M-20693 Aluminum 2024-T4 Anodize MIL-A-8625
HDWE.—Brass SAE 72 Nickel Plate QQ-N-290

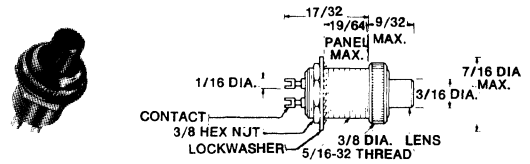
PANEL MOUNT FIXED LAMP
INCANDESCENT/LED

MODEL 106S/1L6



Specifically designed for use with T-1 unbased MIL-Spec., commercial incandescent or LED light source. Can be installed from front or rear of panel.

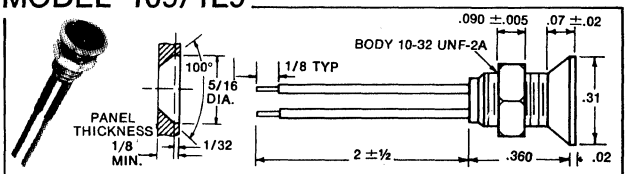
The light source in Model 1L6 is a special high bright T-1¾ LED protruding from a metal body. No lens is provided. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC.

NOTE: The 1L6 is available in red only.

MATERIAL & PROCESSES
BODY/HEX NUT/RD NUT—Brass SAE 72 Nickel Plated QQ-N-290
TERMINALS—Brass SAE 72 Tin Plate MIL-T-10727
LENS—Lexan LP-393 Nylon MIL-M-20693

T-1 UNBASED INCANDESCENT/LED PANEL MOUNT FIXED LAMP

MODEL 109/1L9



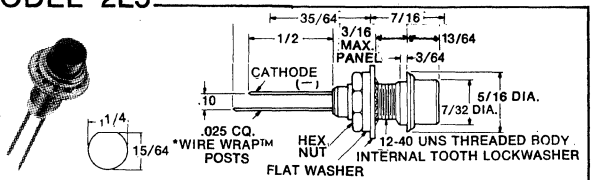
The new flush mount design can be used only with any T-1 size LED or incandescent lamp, including the new super bright LED which gives luminous intensity and color never before possible in the T-1 size. LED colors include red, green and amber with red, green amber, clear and white transparent and translucent lens, and are available with or without a resistor and RFI shielding.

The incandescent models offer the brightness and variety of incandescent colors, including red, green, amber, blue, white and clear with either transparent or translucent lens, and the option of RFI shielding.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate QQ-N-290
LENS—Lexan LP-393
TERMINALS—26 AWG Stranded Cu. MIL-W-16878 24 AWG Solid Cu. **MIL-W-16878**
HARDWARE—Brass SAE 72 Nickel Plate QQ-N-290

PANEL MOUNT FIXED LAMP
LED

MODEL 2L5



This Series incorporate a red, green or amber T-1 size LED in an all-metal threaded body. Available with wire leads or wire wrap™ terminals. Two kinds of color contrast lenses are provided. When unlit, the white or clear lens material alone is visible. When lit, the color LED shows through plainly, giving the appearance of a lens which changes color.

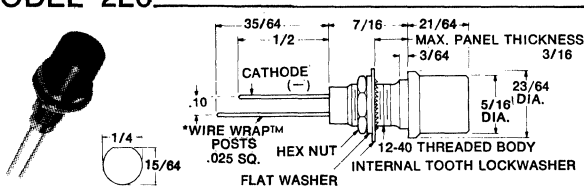
Built-in dropping resistors allow these units to be powered from sources up to 14VDC. Model 2L501 available with superbright LED.

Available with either a round body or flat sided "D" body for consistent terminal location and ease of tightening. *Gardener—Denver

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate per QQ-N-290
LENS—Lexan LP-393 Nylon MIL-M-20693
TERMINALS—Phosphor Bronze ¾ Hard Tin Plate per MIL-T-10727
Wire per MIL-W-16878 24 AWG Solid Cu. 26 AWG Stranded Cu.
HDWE.—Brass SAE 72 Spring Steel per MIL-W-6986 Nickel Plate per QQ-N-290

PANEL MOUNT FIXED LAMP
LED

MODEL 2L6



The 2L6 Model incorporates a red, green or amber T-1¾ size Hi-Bright LED in an all-metal threaded body, suitable for panel mounting. Large lens permits 180° visibility, up to 50 mcd. Termination is by wire-wrap™ posts, or wire leads. Lenses available in transparent material for head-on viewing or translucent material for side viewing. Built-in dropping resistors allow these units to be powered from sources up to 14 VDC. Bodies come round or in flat sided "D" for ease of tightening and consistent terminal location. *Gardener—Denver

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate per QQ-N-290
LENS—Nylon per MIL-M-20693 or Lexan per LP-393

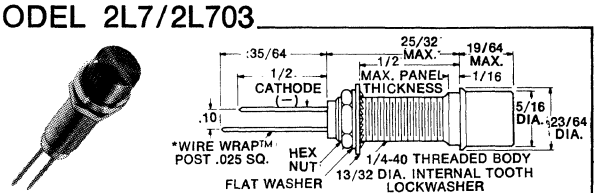
Wire per MIL-W-16878 24 AWG Solid Cu. 26 AWG Stranded Cu.
HDWE.—Brass SAE 72 Spring Steel per MIL-W-6986 Nickel Plate per QQ-N-290

PANEL MOUNT FIXED LAMP
HI-BRIGHT LED

MODEL 2L7/2L703



Utilizes a T-1¾ Hi-Bright LED. Permits 180° visibility, up to 50 mcd. The lens incorporates Fresnel rings and flutes which allow maximum distribution of light output. Also available with plain lens (no flutes or rings). Termination is by wire leads or wire-wrap™ post. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC. 2L703 is waterproof version. Bodies can be round or "D" type.

MATERIAL & PROCESSES
BODY—Brass SAE 72 Nickel Plate per QQ-N-290 Nylon per MIL-M-20693

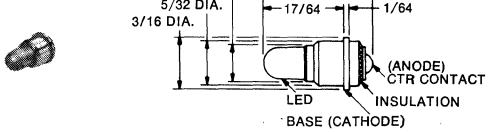
T-1 SUB-MIDGET FLANGED BASE LED

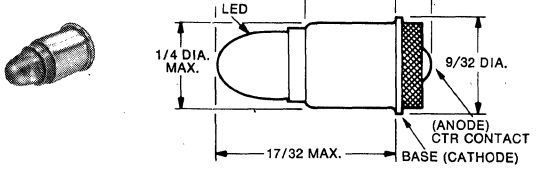
MODEL 4L001



The 4L001, available in diffused lens material is the Sloan T-1 based LED designed to offer diode reliability as a replacement unit in T-1 hardware. When maximum light output is desired using based LEDs in indicator applications, it is recommended that the lens be of transparent material with Fresnel rings. If translucent material is desired, then the lens should be without Fresnel rings.

T-1¾ MIDGET FLANGED BASE LED

MODEL 5L001



The versatile T-1¾ based LED is available in red, green or amber. Viable voltage range is 2.1 volts to 28 volts with power dissipation up to 400mW. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC. The higher voltage capability permits the Sloan T-1¾ based LED to be used as direct replacement for incandescent bulbs in applications where light intensity is not critical but diode reliability is required.

The Sloan Company

"THE TOUCH OF BRILLIANCE IN PANEL DESIGN"

7704 San Fernando Road, P.O. Box 367, Sun Valley, CA 91353
(213) 875-1123 • TWX 910-498-2250 • FAX: (818) 768-8326

GENERAL INFORMATION:

- RFI shielding available with virtually all models.
- It is wise to avoid using blue or green lenses with neon lamps.
- It is also wise to avoid using blue lenses with LED lamps.
- Ultra-bright, multichip and other exotic lamps available.
- All materials meet or exceed applicable military specs.

LED LAMP INFORMATION

We have virtually any LED you want. The two basic sizes are T-1 and T-1¾ with flanged bases. The brightest varies with color, with green lowest to red highest. To order extra or super bright lamps simply add 01 or 04 to the model number. One more suggestion do not order LEDs with blue lenses.

NO.	LAMP TYPE	T-1	T-1¾
—	Standard-Bright	2 mcd	3-8 mcd
01	Extra-Bright	8-18 mcd	15-18 mcd
04	Super-Bright	20 mcd	60-80 mcd

IMPRINTING

Lenses may be hot stamped, engraved, or opaqued and engraved so that the character only is displayed.

The chart below designates type size available for hot stamping. Size of lens determines size of type that can be used.

TYPE	ACTUAL SIZE	
	WIDTH	HEIGHT
2 Pt	.050	.060
6 Pt	.060	.080
8 Pt	.080	.110
10 Pt	.090	.120
12 Pt	.110	.160
NOTE: For other size type, contact factory.		

LENS STYLE

STYLE		DESCRIPTION
Q		Clear anodized bezel allows 180° visibility.
QB		Same as Q lens except with black anodized bezel.
DSC		Clear anodized bezel prevents sidelight emission.
DS		Same as DSC lens except with black anodized bezel.
STD		Full 180° visibility. Maximum illumination.
M		Large lens for maximum visibility from all angles. Engineered to offer the most uniform light distribution. Full 180° visibility.
MB		Same as M lens except with black anodized bezel.
D		Skirted lens covers metal parts for neat panel appearance. Large lighted surface assures positive indication.
SE		Edgelight for plastic panels. Small diameter light gasket minimizes wasted panel space.
DDS		DIMMER: Rotating outer collar changes light output from full to minimum. Rotation to dim can be clockwise or counter-clockwise. Easy adjustment with gloved hand.
U		UNLIMITED: Has no lens to diminish light output. Specifically suited to T-1¾ flanged based LED for maximum light output.

120 SERIES

STB		Full 180° visibility. Maximum illumination. Black bezel.
STC		Full 180° visibility. Maximum illumination. Clear bezel.
QB		Black anodized bezel allows 180° visibility.
Q		Same as QB lens except with clear anodized bezel.

STYLES

FLAT		NOTE: Lens style may be flat or domed, plain or lensed, meaning that the lens is provided with internal concentric rings on the inner face and flutes on the sides, thus giving better light distribution.
DOMED		

OPTO ELECTRONIC COMPONENTS/HI-SUPER BRIGHT LED LAMP

Stanley Opto Electronic Components

Stanley has attained the position of world's leader in bright LEDs, including the H-3000 (3000 mcd) and H-2000 (2000 mcd) GaAlAs (galium-aluminum-arsenide) red LEDs, a high-intensity pure green LED with a peak wavelength at 555 nm, and attractive bright yellow and orange LEDs to complete a series of 4 colors.
For the infrared region as well, Stanley Electric has captured the position of world leader with super-bright GaAlAs infrared LEDs, four types being available, having wavelengths of 850, 880, 925 and 950 nm. For use as light-receiving elements, a full Stanley line of phototransistors and PIN photodiodes is available, covering requirements in a wide range of applications.
Stanley is ready to respond to requirements for photosensors consisting of combinations of high-reliability light-emitting and light-receiving elements. Consult us on what these products can do for yours.

- Our super bright light emitting diode is the result of joint development by Stanley and the Semiconductor Research Promotion Association under the leadership of Professor Jun-ichi Nishizawa of Tohoku University.
- The LED won the 26th Ohkochi Memorial Prize, the 7th Harushige Inoue Award and the 1983 Nikkei Annual Award.
- Stanley's high-output infrared LED, DN series won the 1985 Nikkei Annual Award.

Stanley Liquid Crystal Display—Meeting Tough Requirements with Technology and a Proven Track Record of Performance

Liquid crystal displays are proving to be the frontrunners in keeping up with the diverse requirements of modern society and industry. To provide answers to your display requirements, Stanley has developed GMF series capable of graphic display and available in a wide range of sizes, and GMD series capable of displaying characters and messages. The Stanley product line includes guest-host LCDs that provide a colorfully attractive panel display and wide viewing angle, multicolor LCDs which feature individual color control, and high-contrast, high-reliability twisted-nematic liquid crystal. The bottom line is an LCD solution for virtually any display problem. These diverse LCD products are ready for immediate use in applications such as automotive displays, office-automation equipment, communications equipment, audio and home appliances.

Okochi Memorial Technology Prize

- *Stanley LCDs have been developed under the technical guidance of the late Prof. M. Wada of Tohoku University and Prof. T. Uchida (Dr. of Engineering). Stanley GH (guest-host) LCD was awarded in 1986 the 32nd Okochi Memorial Technology Prize.*

ANNUNCIATOR LAMPS AND COLOR CAPS

Long life annunciator lamps are designed for use in elevator panels, pushbutton stations, indirect decorative lighting and general signalling applications where a relatively high candlepower miniature light source is necessary. A high degree of light control is made possible by a self-contained aluminized reflector. Unique lighting and signalling effects are attainable using pyrex color caps shown in the chart. Ordering Data: For clear lamps, specify lamp number. For colored lamps, specify color as follows: 6RB/Red, etc. Caps are cemented to lamps when ordered in this manner. Caps may also be ordered separately.

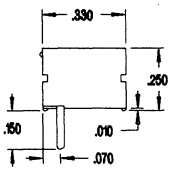
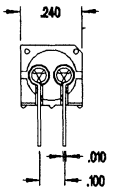
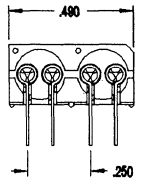
P-C-LITE™ PCB Socket for LED, Horizontal Mount, THT.*

Socket, 6/6 nylon U.L. 94 V0, allows right angle installation of LEDs on printed circuit boards, LED can be inserted from either end of socket. LEDs are replaceable. Component also accommodates other opto-electronic devices. Single and multiple sockets available. 10K piece price 28 to 65 cents.

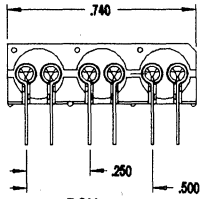




PCH 330



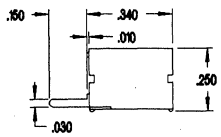
PCH 660

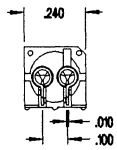


PCH 990

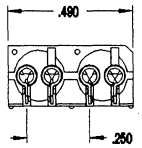
P-C-LITE™ PCB Socket for LED, Vertical Mount, THT.*

Socket, 6/6 nylon U.L. 94 V0, allows vertical installation of an LED on either side of a printed circuit board. Clearance holes thru the PCB allow the LED to be installed on one side while the socket is attached to the opposite side of the PCB. LEDs are replaceable. Component also accommodates other opto-electronic devices. Single and multiple sockets available. 10K piece price 28 to 65 cents.

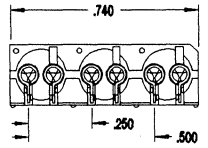




PCV 220



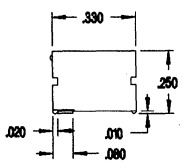
PCV 440

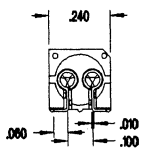


PCV 880

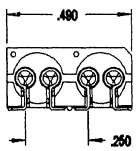
P-C-LITE™ Surface Mount Socket for LED, Horizontal Mount, SMT.*

Socket, 6/6 nylon U.L. 94 V0, allows surface mounting of socket to the PCB along with other components. Heat sensitive LEDs can be installed after IR oven operations have been completed. Unit also accommodates other opto-electronic devices. These devices as well as the LEDs are replaceable. Single and multiple sockets available. 10K piece price 28 to 66 cents.

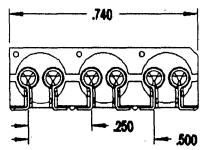




SMD 330



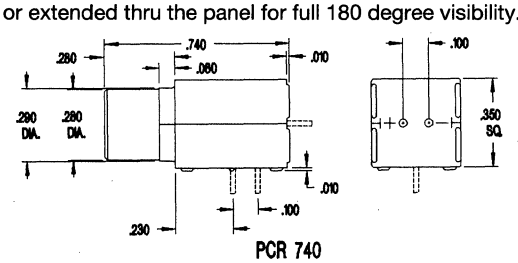
SMD 660



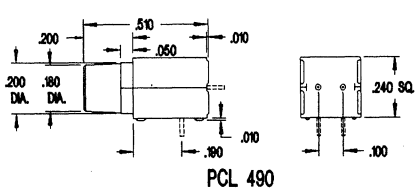
SMD 990

P-C-LITE™ PCB Mounts for T1 & T1 3/4 LEDs*

Mount, 6/6 nylon. Lens, polycarbonate. The mounts, combined with Cliplite lens series, permit either horizontal or vertical mounting of standard T1 or T1 3/4 LED to a PC board. See Cliplite data on lenses. The PCB mounted unit permits the lens to be flush mounted with front panel or extended thru the panel for full 180 degree visibility. 10K piece price 21 to 24 cents.



PCR 740



PCL 490

P-C-LITE™ PCB LED & Passive Component Standoff

Standoff, 6/6 nylon. Cylindrical body, dual-tapered lead entry ports, lead separation center barrier and raised clearance pads. Body protects the leads from damage by outside agencies. The center barrier protects the leads from possible internal shorting. Clearance pads allow thorough removal of contaminates resulting from the soldering process. Available in heights varying from .120 to .990 inch in increments of .010 on an inch. 10K piece price 3 to 4 cents.

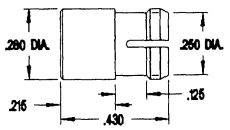
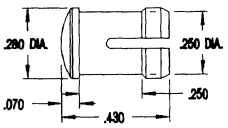
CLIPLITE **Lens/Mounts for T1 & T1 3/4 LEDs***

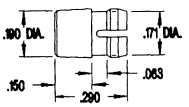
Lens, polycarbonate, standard height or low profile. Mounts LED thru front of panel, 180 degrees viewing angle, 125% apparent brightness increase, provides ESD protection. Easily installed in panels from 1/32 to 1/4 inch thickness, no tools required. Colors available red, green, amber, yellow clear and blue. 10K piece price 10 to 11 cents.



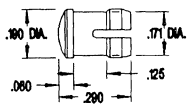
CLF 280



CLB 300



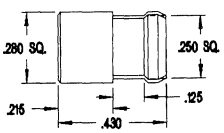
SML 190



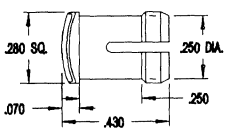
SMB 200

CUBELITE **Square Lens/Mounts for T1 & T1 3/4 LEDs***

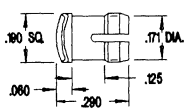
Lens, square, polycarbonate, standard height or low profile. Mounts LED thru front of panel, 180 degrees viewing angle, increases apparent brightness, provides ESD protection. Easily installed in panels from 1/32 to 1/4 inch, no tools necessary. Colors available red, green, amber, yellow, clear and blue. 10K piece price 10 to 12 cents.



SQL 360



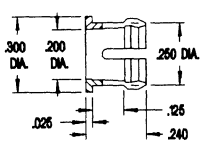
SQB 400



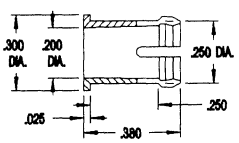
SMQ 250

CLIPMOUNT **Black or Chrome for T1 3/4 LEDs***

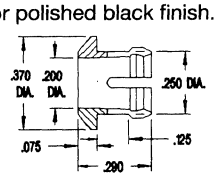
Mounting clips, polycarbonate, for panel mounting T1 3/4 LEDs. Panel thickness from 1/32 to 1/4 inch. Available in standard clip & ring style or reflector type. Inner or outer reflector clip mounts in either chrome or polished black finish. 10K piece price 8 to 22 cents.



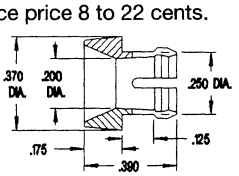
CLP 125



CLP 250



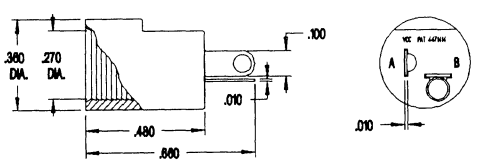
CLP 127



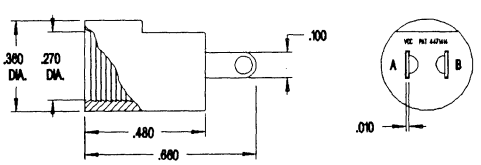
CLP 129

CONXRITE **Solderless Connector for Panel Mounting T1 3/4 LEDs***

Solderless connector, polypropylene, allows for mounting or replacement of panel mounted T1 3/4 LEDs. Resistors for current limiting to 28 volts. Mates with CLF 280, CLB 300, SQB 400 lens mounts and CLP series clip mounts. No assembly tools required. 10K peice price 32 to 42 cents.



CNX 310 W/RESISTOR



CNX 310 W/O RESISTOR

INCANDESCENT LAMP **Assembly for Panel & PCB Mounting**

Subminiature lamp assemblies, for panel and PCB mounting. Aged and selected, 5 thru 28 volts. Mates with CLF 280, CLB 300, SQL 360, SQB 400 lenses, CNX 310 connectors, PCH, PCV, PCR, and SMD circuit board sockets. Available in bi-pin or with 6 inch wire leads.

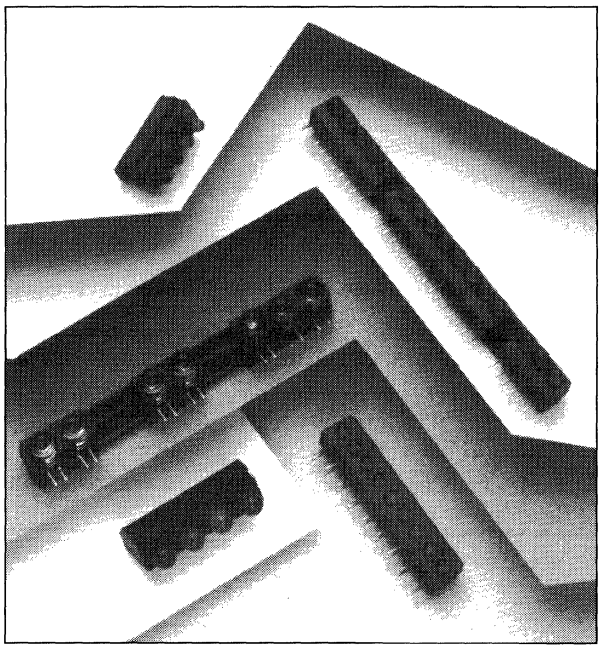
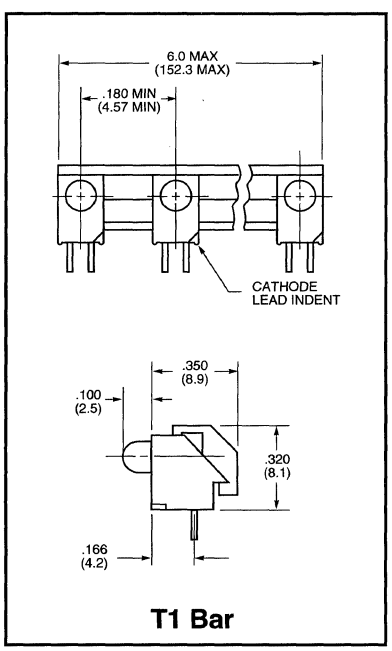
RA Series
Right Angle LED Bars

Special Features

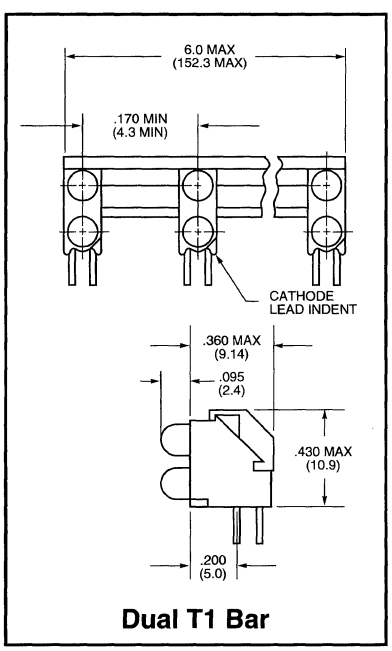
- One-step PC board mounting
- Available with 2 to 33 T1 or 2 to 24 T1 3/4 LEDs in one convenient assembly
- Bar provides consistent alignment for multiple LED mounting
- Customized to your specifications
  - Variable LED spacing – Minimum .180" for T1,
    – Minimum .245" for T1 3/4
  - Maximum bar length – 6"
  - Color combinations available at no extra cost
- Available in high-efficiency red, green, yellow, orange; ultrabright red; bicolor; 2mA and 5V internal resistor LEDs
- Lead pinout compatible with industry standards
- Can be supplied with single-in-line or dual-in-line leads
- Bottom standoff facilitates board washing



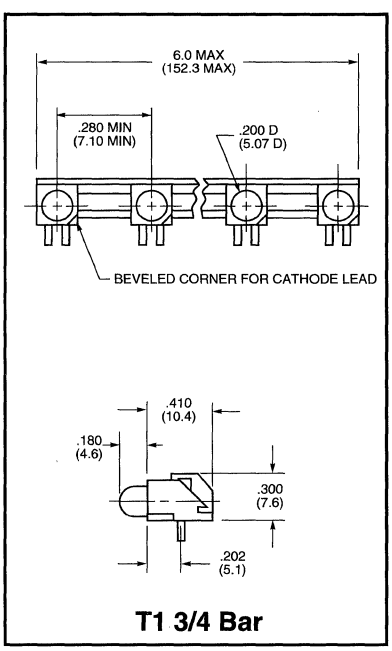
Right Angle LED Bars



T1 Bar



Dual T1 Bar



T1 3/4 Bar

The quality program in our Huron, South Dakota factory, where these parts are manufactured, meets or exceeds MIL-Q-9859A. Call or write for our complete catalog.

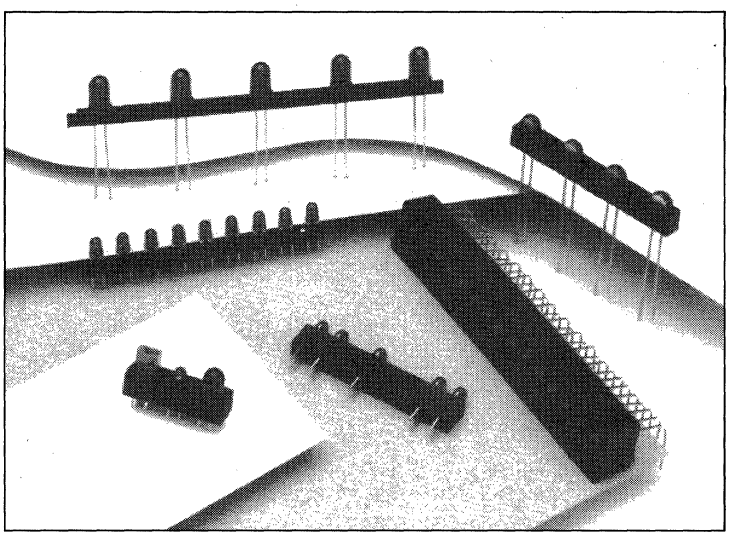
PC Board Mount
Vertical LED Bars – No assembly required

Special Features

- One-step PC board mounting
- Customized to your specifications
  - Variable LED spacing
  - Color combinations available at no extra cost
  - Assembly heights built to your specifications without tooling charges
- Bar provides consistent LED alignment
- Polarity identification on bar
- Wave solderable and chemically cleanable
- Any size, color or type LED can be used – Hi-efficiency T1 and T1 3/4 LEDs, 2mA T1 and T1 3/4 LEDs and 2mm x 5mm rectangular LEDs are standard



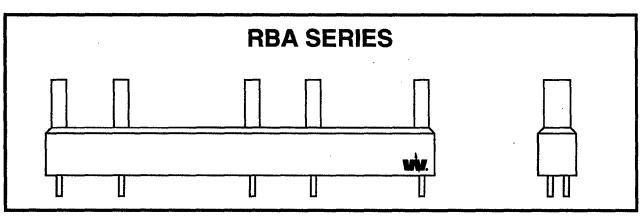
Bar Mounted LEDs

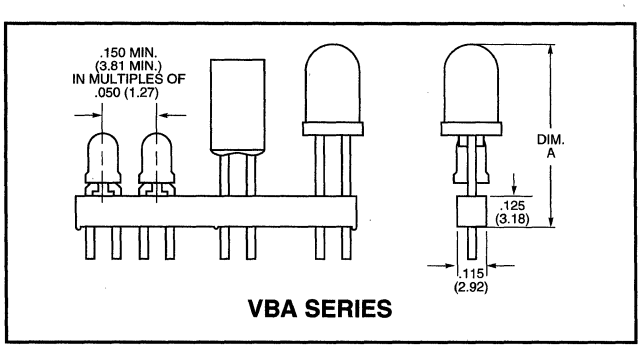
RBA Series:

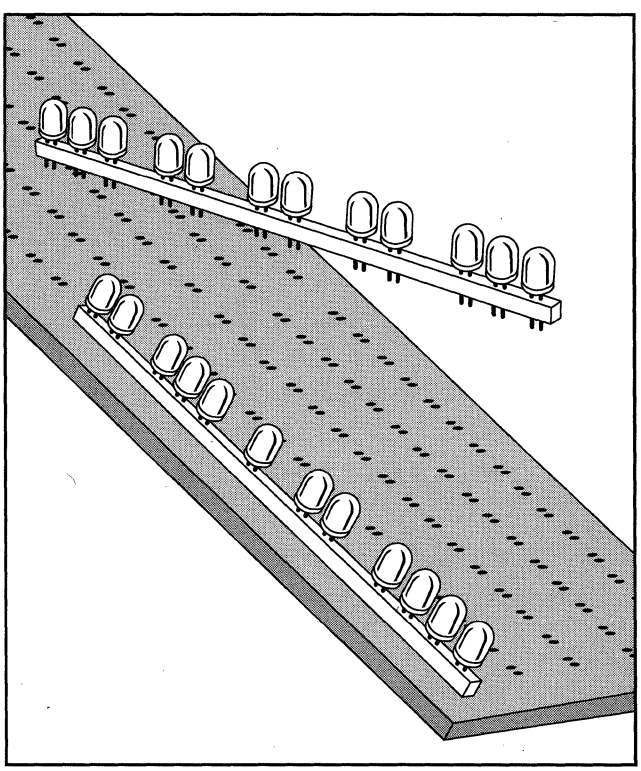
- Can be supplied with single-in-line or dual-in-line leads

VBA Series:

- Bottom standoff facilitates board washing
- Removable stabilizing foot available
- Can be supplied with single-in-line or dual-in-line leads
- Can be supplied in lengths up to 3 inches







The quality program in our Huron, South Dakota factory, where these parts are manufactured, meets or exceeds MIL-Q-9859A. Call or write for our complete catalog.

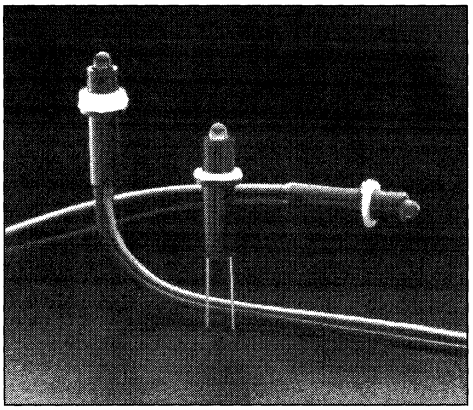
L41 T1 Rear Mount LED Indicator

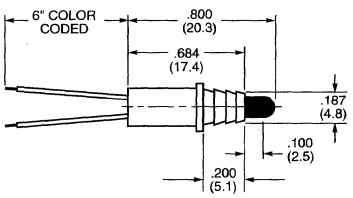


Panel Mount LED Assemblies

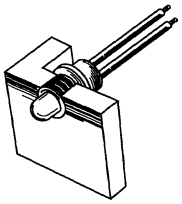
Special Features

- Rear mounting, friction-fit — no mounting hardware required
- Simplified one-piece construction
- Optional internal resistor
- Sealed against moisture and dust
- Available for panel thickness .062", .125", .187" and .220"
- Custom body lengths available without tooling charges
- Wide variety of LEDs available
- Easily wired into pre-assembled harness

Package Dimensions



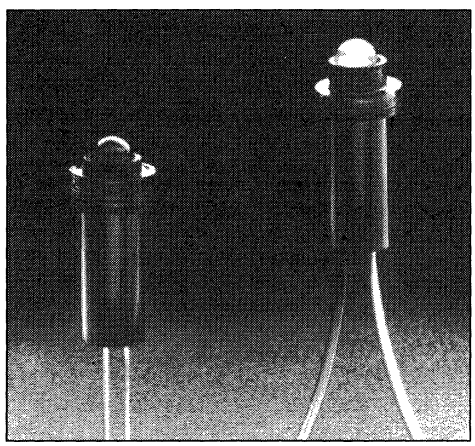
Mounting



Specifications

Mounting hole: .....187" (3/16")
Termination: .....22 AWG 6" color coded leads stripped to 1/4" standard; Optional bipin available
Body Material:.....Black butyrate plastic
Operating & Storage Temperature range:.....-55°C to 100°C

L61 T1 3/4 Rear Mount LED Indicator

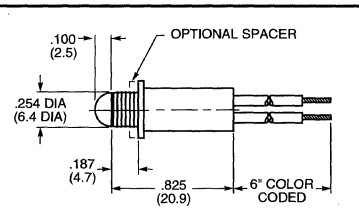


Panel Mount LED Assemblies

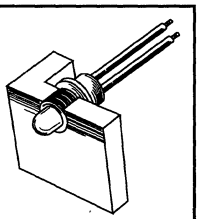
Special Features

- Rear mounting, friction-fit — no mounting hardware required
- Simplified one-piece construction
- Optional internal resistor
- Sealed against moisture and dust
- Available for panel thickness .062", .125" and .187"
- Custom body lengths available without tooling charges
- Wide variety of LEDs available
- Easily wired into pre-assembled harness

Package Dimensions



Mounting



Specifications

Mounting hole: .....250" (1/4")

MINIGLOSSARY FIBER OPTICS

Acceptance Angle
The maximum angle within which light will be accepted by an element such as a detector or waveguide. In the latter, it is quantified as half the vertex angle of the cone within which optical power may be coupled into bound modes of a fiber.

Aligned Bundle
An assembly of fibers in which the coordinates of each fiber are the same at the two ends of the bundle, also called *Coherent Bundle*.

Bend Radius
The radius of curvature that an optical fiber can bend without breaking.

Bundle
Multiple optical fibers in a single housing used to transmit light or images.

Cladding
The low refractive index material that surrounds the core of the fiber to contain core light while protecting against surface contaminant scattering. In all-glass fibers, the cladding is glass.

Effective Numerical Aperture
The real numerical aperture of a fiber when the computed NA is not valid due to a change in the glass indices during the drawing and fusion process.

Fiber Bundle
A rigid, or flexible, concentrated assembly of glass or plastic fibers used to transmit optical images or light.

Fiber Optic Light Guide
A bundle of optical fibers arranged randomly for the purpose of transmitting energy, not images.

Fiber Optic Probe
A flexible optical probe having a bundle of glass fiber arranged to transmit an image

Gap Loss
The optical power loss caused by space between axially aligned fibers.

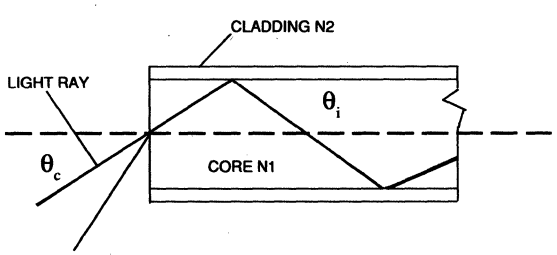
Image Transducer
Any arrangement of a bundle of optical fibers that alters the shape of the image. For example, by a systematic regulation of the spacing of the fibers from the entrance end to the exit end, a distortion of the image can occur that may be used to neutralize or compensate for the distortion introduced by the lens, prism or mirror components in an optical system.

Large-Core Fiber
Optical fiber with a large core, often a step-index fiber. "Large" is sometimes defined as greater than 85 μm.

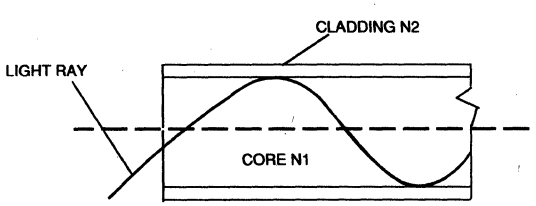
Multifibers
An array of optically distinct fibers that are fused into one strand. They are used to keep the resolution efficiency of the smaller single fibers and eliminate difficulty in handling. Their specific usage is determined by their flexibility or rigidity.

Packing Fraction
The ratio of the active core area of the fiber bundle to the total area at its light emitting or receiving end.

Plastic Fiber
Fiber in which both the core and cladding are made of plastic.



(a) Light propagation in a step index fiber.



(b) Path of light rays in a graded index fiber.

INTEROPTICS

ONE OF THE **PURDY** GROUP OF COMPANIES

OPTO/LINK

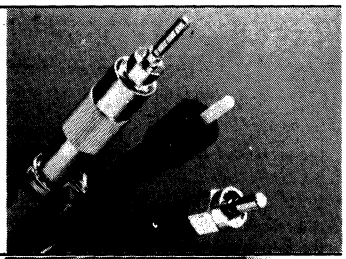
INTEROPTICS offers a wide range of fiber optic products for telecom, datacom, precision instrument, industrial, medical, and military applications.

Here are just some of the products INTEROPTICS can supply for your fiber optic needs:

CONNECTORS, ADAPTERS, AND RECEPTACLES

Diamond	DIN-47256
FC/NTT	ST
SMA	Biconic
FDDI	SC

Amphenol®
3M
DIAMOND®



CABLES AND CABLE ASSEMBLIES

Standard pigtails and patchcords.
Custom versions on cable or fiber.
Special assemblies on customer supplied devices.

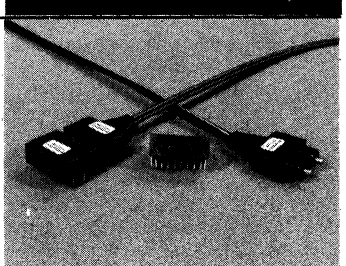
Buffered fiber	Multifiber
Simplex	Singlemode
Duplex	Multimode

NETWORKING PRODUCTS

RS 232 and RS 422 modems
RS 232 master/slave port expander systems
RS 232 to GPIB converters
GPIB IEEE488 Bus expander systems
Centronics Bus extenders

DATA LINKS

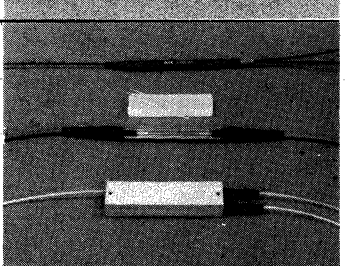
TTL transmitters, receivers, and transceivers
Data rates from DC to 40 Mb/s.
Systems from connectorless plastic fiber to connectorized glass cable.
Distances from 5 to 3500 meters.



SPECIALTY PRODUCTS

A complete line of couplers from 1 x 2 to 32 x 32
A compete line of splicing systems.
WDM's—wavelength divisional multiplexers (800/1300 nm and 1300/1530 nm).

Amphenol®
3M
DIAMOND®



TERMINATION EQUIPMENT

A complete line of termination tooling.
Available as parts or in a complete kit.
Convex polishing machines and special ferrule viewing systems.

Amphenol®
3M
DIAMOND®

INFORMATION Let us supply you with our expertise in fiber optics.

If you have any comments or questions, or if you just want to know how fiber optics can work for you, please contact us at INTEROPTICS.

From Fiber Optic Components to Complete System Engineering Capabilities... We Speak the Language of Light

Litton Poly-Scientific has become a recognized supplier for a broad range of fiber optic components and systems. From simple point-to-point links to complex data bus or LAN networks, our expertise covers a wide variety of digital and analog data transmission systems for military, industrial and commercial applications.

We can work to your specifications or design and manufacture systems or sub-systems to meet your specific requirements.

Our active components include transmitters, receivers, transceivers and repeaters in traditional, hybrid and rack-mounted versions. Passive components include WDMs, low loss couplers, fiber optic rotary joints and extensive experience with various fiber types, cable harnesses and connectors.

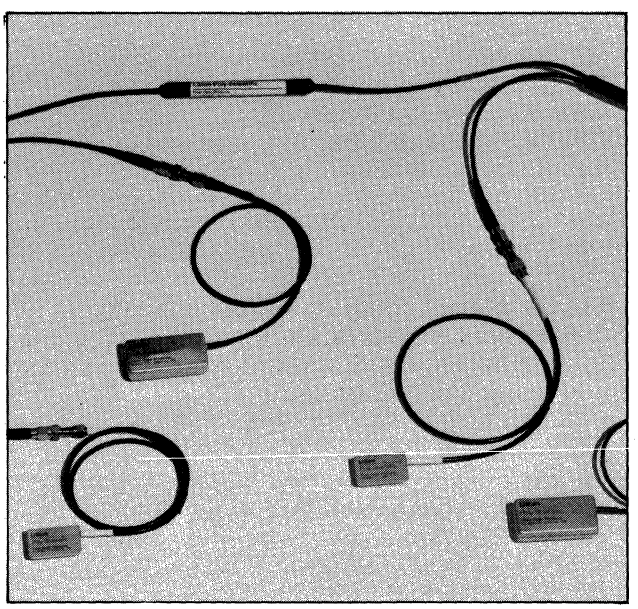
The following pages are designed to give you an overview of our product and systems capabilities.

Fiber Optic Data Bus and Sensor Systems for Land, Sea, Air and Space Applications

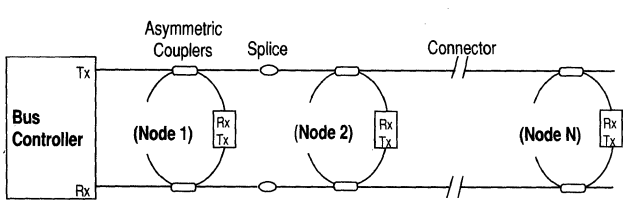
Litton has pioneered the research and development of single and dual fiber linear data bus technology. Recent progress in improving both active and passive components for access on and off the bus has resulted in the viability of this topology for a variety of large system applications. For each node, our hybridized digital transmitters and receivers feature high launch power, superior sensitivity and wide dynamic range. The extremely low excess loss of our bi-directional couplers has dramatically increased the number of system taps.

When compared to token ring or star topologies, a linear bus offers many unique advantages. From the standpoint of installation, modification and future growth, the simple architecture of the linear bus makes it a more cost-effective option. The star requires home-runs of fiber from a central location to each node. If the star is damaged, it is highly probable that a significant portion of the bus will become inoperative. In addition, the star is labor and material intensive. Although the ring (particularly those involving token passing protocols) addresses these concerns, it retains the potential for data transfer problems. These include accumulated jitter, additive effects of error and bypassing failed devices on the bus.

We are familiar with a wide variety of data bus topologies including MIL-STD-1773, ARINC 629 (DATAC), and HSDB. Let us put our experience and expertise to work for your next system application.



MIL-STD-1773 Single Fiber Linear Data Bus



Dual Fiber Linear Data Bus

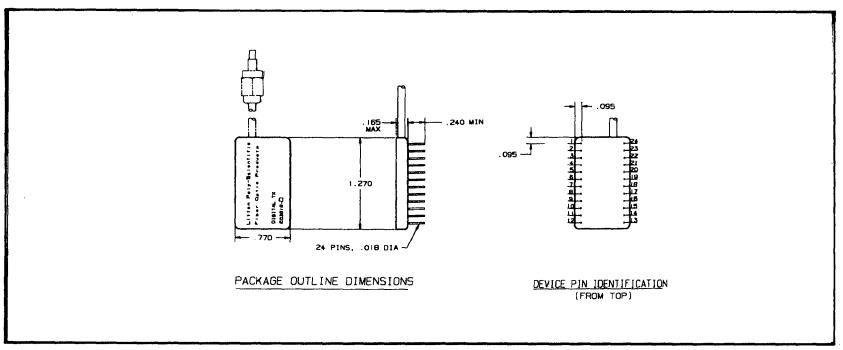
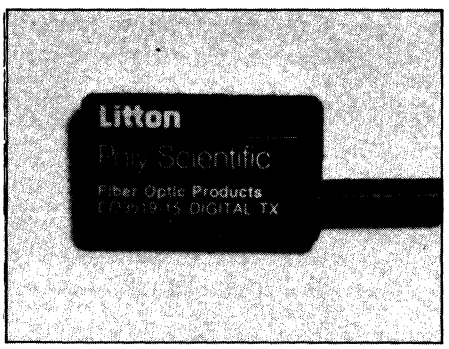
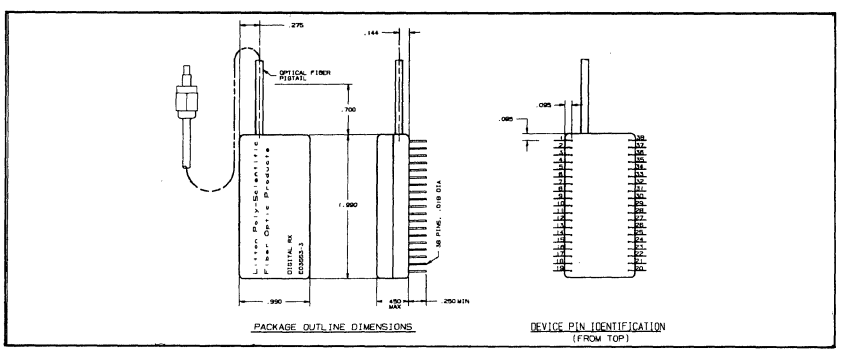
Miniature, Hybridized Transmitters and Receivers for Point-To-Point and Data Bus Applications

AC or Edge-coupled with data rates up to 50 Mbps Manchester. Transmitters with high launch power, and receivers with superior sensitivity and broad dynamic range. TTL and ECL compatible (interface circuits may be required). Qualifiable to MIL-STD-883. Due to ongoing development, specifications are subject to change.







Type	Data Rate	Part No.	Electrical Interfaces	Dynamic Range (min)	Peak Launch Power Into 100μ Fiber	Peak Rx Sensitivity (min)	Wavelength	Supply Voltage Requirements	Special Features
Hybrid Digital Tx	DC to 100 Mb/s NRZ	TX5000*	ECL	N/A	-7dBm	N/A	850nm	+5 or -5	• Single Voltage • Can be used with any receiver below
Hybrid Digital Rx AC coupled	1MHz to 25Mb/s NRZ	RX5237*	TTL or ECL	16dB	N/A	-28dBm 10^{-9} BER	850nm	+5 or -5	• Single Voltage
Hybrid Digital Rx AC coupled	50 Mb/s Manchester Encoded	RX5418*	ECL	20dB	N/A	-34dBm 10^{-9} BER	850nm	+/- 5 +15	• 16 bit preamble required for Burst Manchester
Hybrid Digital Rx AC coupled	20 Mb/s Manchester Encoded	RX5447*	ECL	20dB	N/A	-36dBm 10^{-9} BER	850nm	+/- 5 +15	• 16 bit preamble required for Burst Manchester
Hybrid Digital Rx Edge coupled	Up to 1 Mb/s Manchester Encoded	RX5326*	TTL	20dB	N/A	-42dBm 10^{-9} BER	850nm	+/- 5 +/- 15	• Fanout 5 LS loads • Burst Manchester
Hybrid Digital Rx Edge coupled	Up to 2 Mb/s Manchester Encoded	RX5346*	TTL	20dB	N/A	-42dBm 10^{-9} BER	850nm	+/- 5 +/- 15	• Fanout 5 LS loads • Burst Manchester
Hybrid Digital Rx Edge coupled	Up to 20 Mb/s Manchester Encoded	RX5347*	TTL	20dB	N/A	-35dBm 10^{-9} BER	850nm	+/- 5 +15	• Burst Manchester
Hybrid Digital Rx Edge coupled	Up to 50 Mb/s Manchester Encoded	RX5318*	ECL	20dB	N/A	-28dBm 10^{-9} BER	850nm	+/- 5 +15	• Burst Manchester

* All part numbers are with 100/140μ fiber less optical connector.

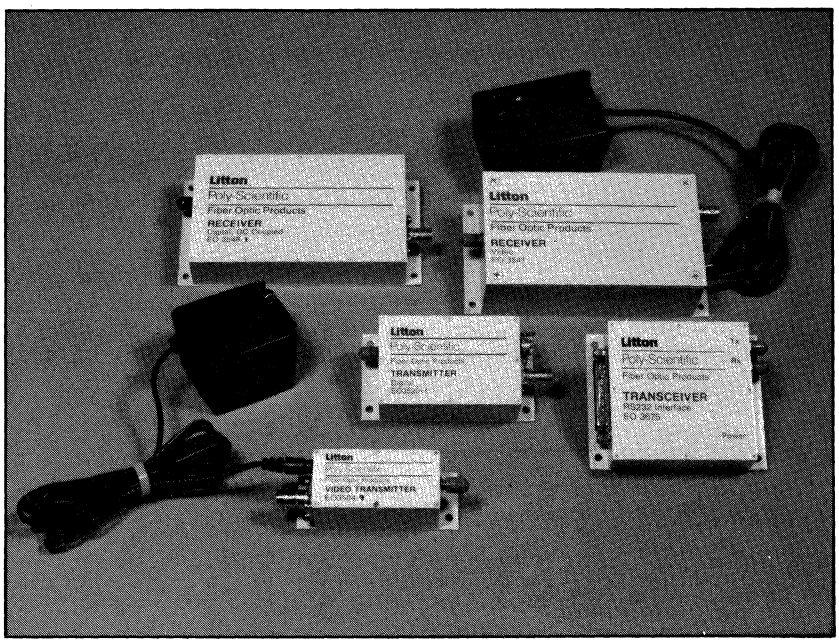
Traditional Transmitters and Receivers for Standard or Custom Applications

Many of our transmitters and receivers are custom-built according to the special needs of our customers. Listed below are representative examples. A variety of packaging and connector options are available. Transmitters and receivers available with 1300nm sources and detectors.

- **Analog systems**
- **Digital systems**
- **Video systems**
- **RS 232 and RS 422**



Type	Data Rate	Part-No.	Electrical Interfaces	Dynamic Range (min)	Peak Launch Power Into 100μ Fiber	Peak Rx Sensitivity (min)	Wavelength	Supply Voltage Requirements	Package Dimensions	Special Features
Video Tx	Link Bandwidth 5Hz≥ 10 MHz	EO3504-9	RS 170	N/A	-12dBm Flat Field	N/A	850nm	110 VAC power supply included	1.25"x3.25"x1.12"	For use with EO3541-1 or EO3541-9
Video Rx		EO3541-1	RS 170	8dB	N/A	-32dBm	850nm	110 VAC power supply included	1.12"x5.75"x3.0"	For use with EO3504-9
Video Rx		EO3541-9	RS 170	12dB	N/A	-24dBm	850nm	110 VAC power supply included	1.12"x5.75"x3.0"	For use with EO3504-9
Digital Tx	DC-50Mb/s NRZ	EO3520-8	50 ohm Terminated 3V max	N/A	-10dBm	N/A	850nm	+/- 5	1.12"x3.75"x2.0"	For use with EO3560 or EO3548
Digital Rx	100 Kb/s to 50 Mb/s NRZ	EO3560-7	TTL	15dB	N/A	-32dBm 10^{-9} BER	850nm	+/- 5	1.12"x5.75"x3.0"	For use with EO3520-8

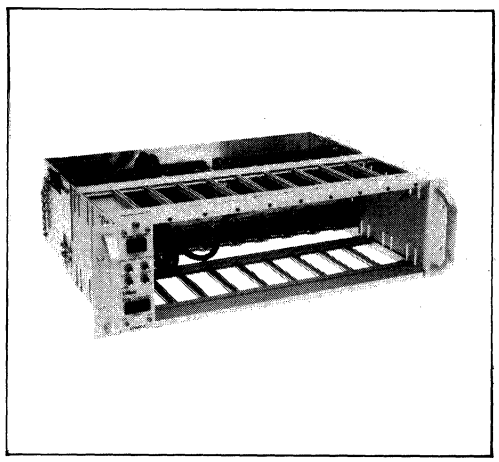
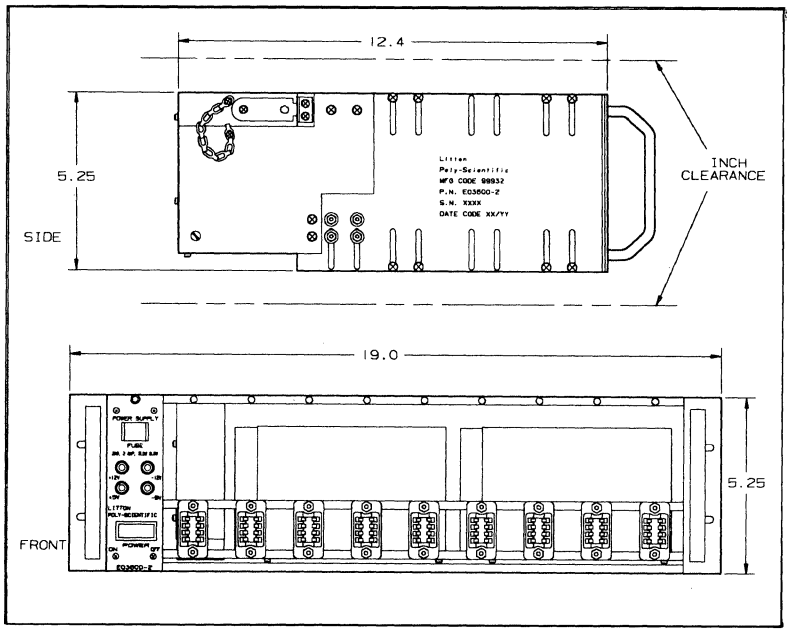
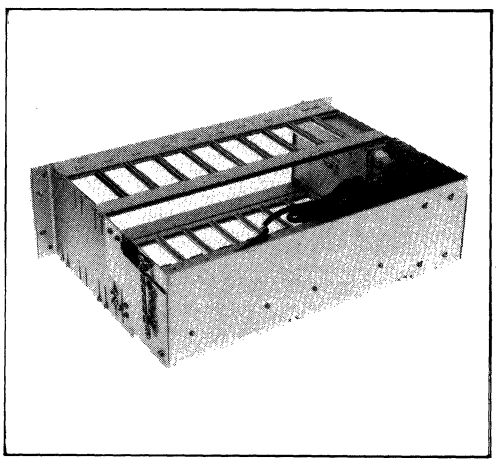
Rack-Mounted Transmitter and Receiver Systems

Many of our traditional components are available in modular, 19" rack-mounted versions.Ten bays can accommodate up to eighteen standard transmitters and receivers plus a common power supply. Connected to a 110 VAC outlet, it has a master on/off switch and a fuse for protection from overloads.

All connections (electrical and optical) are on the backplane of the modules. SMA receptacles for optical interfaces and BNC connectors for the electrical interface are standard. Other connector interfaces are available upon customer request.







Type	Data Rate	Part No.	Electrical Interfaces	Peak Launch Power Into 100μ Fiber	Peak Rx Sensitivity	Dynamic Range	Wavelength	Special Features
Digital Tx/Rx Edge Coupled	DC - 12Mbs NRZ	EO3603-1	50ohm terminated 3V max	-10dBm	-35dBm	20dB	850nm	1 Tx + 1 Rx per module
Video Tx	Link Bandwidth 5Hz ≥ 10MHz	EO3606-1 *	RS 170	-10dBm Flat Field	N/A	N/A	850nm	
Video Rx		EO3608-1 *	RS 170	N/A	-32dBm	8dB	850nm	
Digital Tx/Tx	DC - 50Mb/s NRZ	EO3609-1 *	50ohm terminated 3V max	-10dBm	N/A	N/A	850nm	2 Tx's per module
Digital Rx/Rx Edge Coupled	50Mb/s Manchester	EO3633-1	TTL	N/A	-28dBm	15dB	850nm	2 Rx's per module
Digital Tx/Tx	DC - 50Mb/s Manchester	EO3635-1	50ohm terminated 3V max	-10dBm	N/A	N/A	850nm	2 Tx's per module
Dual Channel RS 232	DC - 100Mb/s NRZ	EO4304-1	RS 232	-16dBm (50 μ)	-38dBm	25dBm	1300nm	DB25 Pigtailed connectors

* 1300nm options available. Consult factory.
Note: EO3600-2 Rack Enclosure/Power Supply required for above modules.

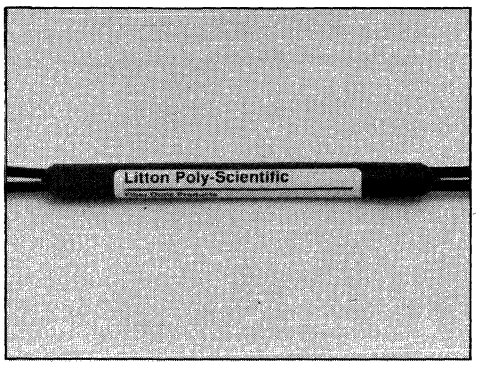
Low-Loss, Bi-Directional Couplers

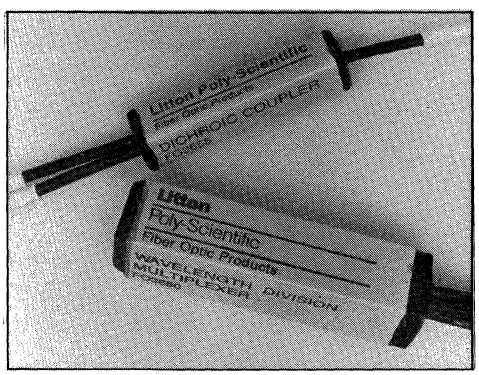
Our multi-mode symmetric and asymmetric couplers can be used in stand-alone or linear data bus applications. Designed for use in harsh environments, couplers without connectors will operate in temperatures ranging from -60° to 200° C. Various fiber sizes and types in a variety of split ratios are available.



Part No.	Type	Pigtail Length	Excess Loss	Split Ratio Tolerance	Package Size	
					Length	Diameter
FO3666	Asymmetric	≥ .5 meter	Typically ≤ .2dB	N/A	4.0"	.375"
FO3668	Symmetric 50/50	≥ .5 meter	≤ 1.0dB	+/- 5%	4.0"	.375"
FO3669	Symmetric 90/10	≥ .5 meter	≤ .5dB	+/- 3%	4.0"	.375"
FO3662	Symmetric Custom	Please call for more information.			4.0"	.375"

Wavelength Division Multiplexers

As their name implies, WDMs enable multiple channels of analog and/or digital data to be multiplexed, transmitted over a single fiber and demultiplexed at the other end of the data link. Our standard WDM configurations will perform either as multiplexers or demultiplexers.



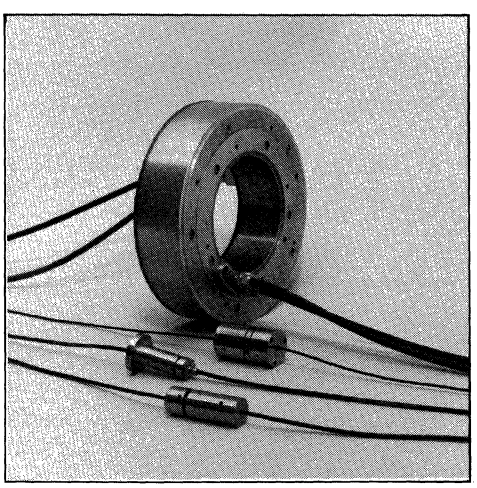
Part No.	Type	Fiber Size	Pigtail Length	Channel Capacity	Wave-length Range	Typical Insertion Loss	Crosstalk Isolation	Operating Temperature Range	Package Size		
									L	W	H
FO3650	Diffraction Grating	100/140 standard; others available	1 meter standard	15	400-1600nm	4dB	30dB	-55° to 125°C	3.01"	0.75"	0.75"
FO3655	Dichroic Filter	100/140 standard; others available	.5 meter standard	2	400/1600nm	1.5dB	≥30dB	-55° to 125°C	4.0"	Diameter .375"	

Fiber Optic Rotary Joints (FORJ)

A FORJ provides the same unlimited rotational freedom for fiber optic systems that the slip ring has long provided for electrical systems. Custom built and standard FORJs are available in two distinct types:

On-Axis FORJ: a compact totally passive single fiber device which occupies the centerline of rotation.
Off-Axis FORJ: a multi-channel active/passive device with 4" bore. Our own special repeaters are required. Data rate up to 50 MBits/sec.

In addition to the standard parts below Poly-Scientific specializes in custom designs to meet your requirements in fiber size, wavelength, pigtail lengths, connectors and mounting requirements.



FORJ Type	Part No.	Outside Diameter	Length	Fiber Size (μm)	Wavelength (nm)	Pigtail Length Each End (m)	Connec-tion	Insertion Loss
On-Axis Multi-Mode	FO3585-1	.75"	2.16"	50/125	800 - 900	1	None	50/125 is 2.5 ± .5dB
	FO3585-2	.75"	2.16"	100/140	800 - 900	1	None	100/140 is 1.75 ± .25dB
	FO3585-23	.75"	2.16"	50/125	800 - 900	1	906 SMA	200/230 is 1.75 ± .25dB
	FO3585-24	.75"	2.16"	100/140	850, 1300, 1550	.1	906 SMA	
	FO3585-22	.75"	2.16"	200/230	800 - 900	1	906 SMA	
On-Axis Single-Mode	FO3588	1.26"	3.68"	10/125	1180 - 1580	10	None	10/125 is 2.5 ± .5dB
Off-Axis	FO3595 (1-5 Channels)	7.8"	1.5" to 3.0"	N/A	N/A	1 to 10m	906 SMA BNC	N/A

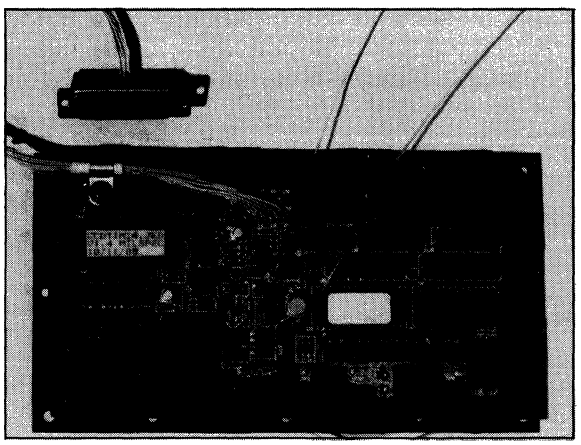
Fiber Optic Sensor Systems Using a Common Sensor Interface

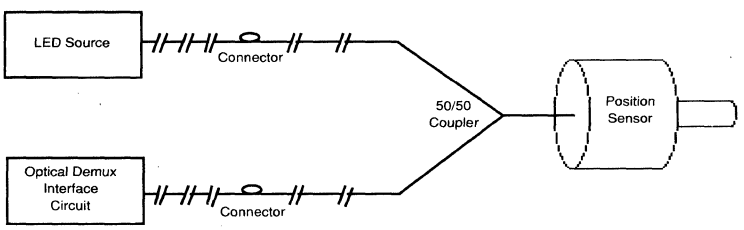
Our system uses passive fiber optic sensors based on the principle of wavelength division multiplexing. WDM sensors can be adapted to measure position, pressure, temperature and small displacements.

The system consists of a broadband source, power splitter, sensor, optical demultiplexer, and detection and decode electronics. Connected by dual fibers, the interface electronics may be located some distance from the sensor(s).

As much of our current development efforts focus on aircraft networks, we are familiar with harsh environment and MIL-SPEC system applications.

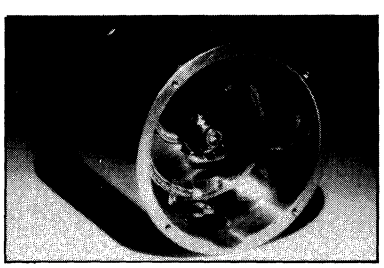


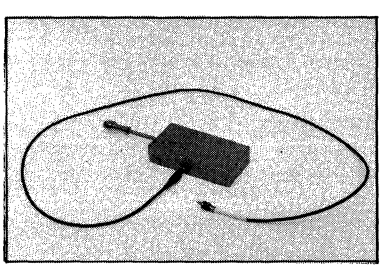
Fiber Optic Sensor System Block Diagram



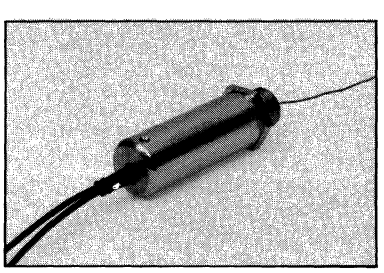
Optical Sensors

Environmental (pressure, temperature, etc.) and position (rotary and linear) sensors are available or can be designed and manufactured to meet your specific needs. Please contact us with your requirements for additional information on components or complete sensor systems.





Part No.	Type	Max Insertion Loss	Min On/Off Ratio	Light* Source Wavelength Range	* Channel Pitch Nominal	* Channel Width Nominal	* Fiber Type	Coding Type	Coding Format	* Resolution/ Travel	* Package Size
FO3571	Linear Position Transducer	11dB	10dB	750-900nm	5nm	2nm	50/125 step index NA .22	absolute	Gray Code	Up to 12 bits / Up to 7 inches stroke	2" x 4" x .87"
FO3577	Rotary Position Transducer	11dB	10dB	750-900nm	5nm	2nm	50/125 step index NA .22	absolute	Gray Code	Up to 12 bits / Up to 360°	1.4" x 1.86" (OD)



*** Note:** Values given for these parameters are application-dependent. Other values are possible. Consult factory for custom designs and latest improvements, and for custom pressure, temperature sensor systems.

MINIGLOSSARY FIBER OPTICS

Acceptance Angle
The maximum angle within which light will be accepted by an element such as a detector or waveguide. In the latter, it is quantified as half the vertex angle of the cone within which optical power may be coupled into bound modes of a fiber.

Aligned Bundle
An assembly of fibers in which the coordinates of each fiber are the same at the two ends of the bundle, also called *Coherent Bundle.*

Bend Radius
The radius of curvature that an optical fiber can bend without breaking.

Bundle
Multiple optical fibers in a single housing used to transmit light or images.

Cladding
The low refractive index material that surrounds the core of the fiber to contain core light while protecting against surface contaminant scattering. In all-glass fibers, the cladding is glass.

Effective Numerical Aperture
The real numerical aperture of a fiber when the computed NA is not valid due to a change in the glass indices during the drawing and fusion process.

Fiber Bundle
A rigid, or flexible, concentrated assembly of glass or plastic fibers used to transmit optical images or light.

Fiber Optic Light Guide
A bundle of optical fibers arranged randomly for the purpose of transmitting energy, not images.

Fiber Optic Probe
A flexible optical probe having a bundle of glass fiber arranged to transmit an image

Gap Loss
The optical power loss caused by space between axially aligned fibers.

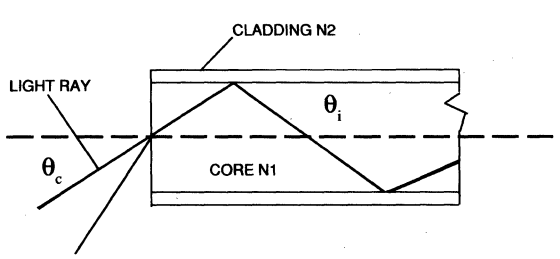
Image Transducer
Any arrangement of a bundle of optical fibers that alters the shape of the image. For example, by a systematic regulation of the spacing of the fibers from the entrance end to the exit end, a distortion of the image can occur that may be used to neutralize or compensate for the distortion introduced by the lens, prism or mirror components in an optical system.

Large-Core Fiber
Optical fiber with a large core, often a step-index fiber. "Large" is sometimes defined as greater than 85 μm.

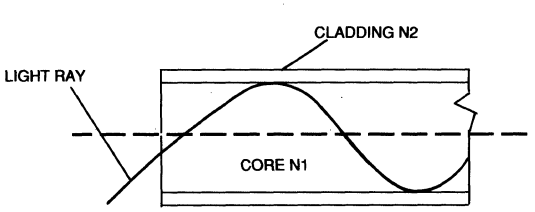
Multifibers
An array of optically distinct fibers that are fused into one strand. They are used to keep the resolution efficiency of the smaller single fibers and eliminate difficulty in handling. Their specific usage is determined by their flexibility or rigidity.

Packing Fraction
The ratio of the active core area of the fiber bundle to the total area at its light emitting or receiving end.

Plastic Fiber
Fiber in which both the core and cladding are made of plastic.



(a) Light propagation in a step index fiber.



(b) Path of light rays in a graded index fiber.

WHO GOES THE DISTANCE IN FIBER OPTICS?

The answer is . . . MERET.

Fiber optics are the clear choice for high performance communications with the absolute maximum in signal quality. For fiber optics to meet your most demanding applications today and tomorrow – the answer is Meret Optical Communications.

At Meret, we set the benchmark for performance in fiber optics. Our rugged, cost effective, dependable components and systems are found in over 2,000 government and commercial installations. A subsidiary of Amoco Technology, we have perfected fiber optic products for Government & Military, Digital, Analog, Closed Circuit TV, High Definition TV and High Resolution Imaging applications.

Meret has cost effective answers to your fiber optic communication needs.

CALL ON MERET FOR YOUR DEMANDING APPLICATIONS

CLOSED CIRCUIT TELEVISION

APPLICATION	KEY FEATURES
• Security • Access Control • Surveillance • Teleconferencing	• Short and Long Distances • Color or B&W • PTZ/Audio • 820 or 1300 nm Systems • Stand Alone or Rack Mount • Possible 24 Channels per 3U-High Chassis

HDTV BROADCAST

APPLICATION	KEY FEATURES
• Studio Production • Electronic News Gathering • Sporting Events • Electronic Field Production	• One Fiber for Three 30 MHz Channels of Video • CD Quality Audio and RS232 Data Planned • Bidirectional/Unidirectional • S/N 55 dB - 60 dB • Fits in 19" Rack (3 R/U Hgt.)

HIGH RESOLUTION IMAGING

APPLICATION	KEY FEATURES
• Remote Imaging For: CAD/CAM/CAE Medical Displays Flight Simulation Air Traffic Control Seismic Displays • Supercomputer Imaging • Military C³I	• 35-150 MHz RGB (LED) 0-500 MHz (Laser) • 820 or 1300 nm Systems • DC Restore/AGC • Up to 2048 x 2048 Pixels • Stand Alone or Rack Mount • RS232 and RS422 Options

GOVERNMENT & MILITARY

APPLICATION	KEY FEATURES
• Command and Control • Security, Surveillance and Access Control • Flight Simulation • Radar and Imaging Remoting • Tactical 2-Way Communications • Ship Communications • Air Traffic Control	• RGB, Monochrome, Digital Combinations • Video, Audio or Data • Complete Turnkey System Integration: Fiber Links, Switchers, PC's • High Bandwidth Laser • Automatic Switchover • Custom Packaging of Video Links

DIGITAL

APPLICATION	KEY FEATURES
• Supercomputer Interconnects • Data Communications	• Gbps Links • MUX Up to 96 Channels, Audio, TTL, RS232, RS422, RS485 & RS423

ANALOG

APPLICATION	KEY FEATURES
• Instrumentation • IF/RF Communications • EMP Testing • Timing/Delay Lines	• Remote Controlled Transmitters • Links with DC Response • Telemetry Remoting to 1.5 GHz • High Linearity Links

62 CROSS REFERENCE CARDS

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

645 stewart ave., garden city, ny 11530

OPTELECOM'S FIBER OPTIC COMMUNICATIONS PRODUCTS ARE THE FIRST CHOICE AMONG ENGINEERS.

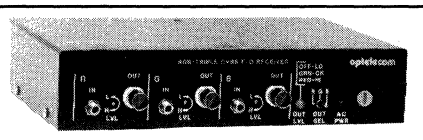
optelecom
The Fiber Optics Company that Goes the Distance

Optelecom is the first stop engineers make for fiber optic communications products. That's because the first time engineers purchase products from Optelecom, they realize it's the last time they will ever have to search for a company that delivers reliable, durable and flexible products each and every time.

For nearly 20 years, Optelecom has consistently provided innovative, high performance fiber optic video, audio, and data communications products. Optelecom's extensive product line is available with a wide selection of options that deliver the benefits of customized products at off-the-shelf prices. And due to the benefits of fiber optics, all transmissions from Optelecom's Communications Products are free of EMI and RFI interference.

For fiber optic communications products with far reaching capabilities, look to Optelecom, the fiber optic company that goes the distance. For details contact: ***OPTELECOM, Inc., 15930 Luanne Drive, Gaithersburg, MD 20877, 301-840-2121, FAX 301-948-6357***

FIBER OPTIC HIGH RESOLUTION MONOCHROME & RGB VIDEO TRANSMITTERS AND RECEIVERS



3252RRR

EGA & VGA VERSIONS AVAILABLE

These fiber optic video communications products use AM techniques to cost effectively transmit flawless high resolution monochrome and RGB video. Images can be generated from a centrally located graphics controller or camera and transmitted to a remote monitor located up to 6km away, depending on the transmitter/receiver model selected. All models have built-in gain adjustment aid circuitry that takes the guesswork out of balancing colors. Options include 50 MHz or 75MHz bandwidth, external sync, and bi-directional data. The models with 75MHz bandwidth are able to support up to 115MHz pixel clock rates. Currently available models have the following features:

SERIES 3252/5052 Transmits 75MHz bandwidth RGB video over 3 optical fibers. 3252 is stand alone and 5052 is the System 5000 rack mount card.

SERIES 3650 Single channel, 50MHz or 75MHz bandwidth, stand alone model.

SERIES 5650 2 or 3 channels (3 channels for RGB video), 50MHz bandwidth, System 5000 rack mount card.

SERIES 3150T Mini 50MHz transmitter attaches directly to video source BNC. Low cost, easy to install. Ideal for camera mounting.

FIBER OPTIC RGB VIDEO AND DATA WORKSTATION EXTENDER

3453R

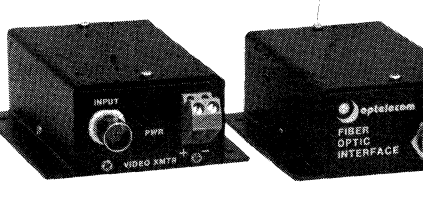
The Fiber Optic RGB Video and Data Workstation Extenders increase the video transmission distance capabilities of existing workstations so they can operate in process control, financial trading floor, and command center environments where the monitor is located up to 6km away from the central computing facility. Features include:

- Support for up to 115 MHz pixel clock rates.
- Multiple data channels up to 64kBps.
- Fast, easy and accurate color balancing initiated at the workstation end via built-in test circuitry.
- **SYNC and LOOP** indicators that provide continuous information on the status of the data multiplexer link
- Low profile (1-3/4") 19" rack mount package and desktop versions.

SERIES 3452 RGB video plus optional external sync, 2 multichannel RS232 data ports. Uses 5 to 7 fibers.

SERIES 3453 RGB video plus external composite sync, SUN Microsystems keyboard and mouse port, and 2 multichannel RS232 data ports. Uses 6 fibers.

FIBER OPTIC PFM VIDEO, AUDIO, AND DATA TRANSMITTERS AND RECEIVERS FOR MONOCHROME AND COLOR



3253T Front & Rear

Optelecom's FM video, audio, and data transmitters and receivers transmit over single mode or multi mode fiber using PFM (square wave FM) techniques. These products are designed for CCTV and broadcast applications. Depending on the version selected, units can transmit from 4km up to 25km with the output unaffected by LED variations and fiber attenuation changes. The models provide adjustment free operation and transmit the following:

SERIES 3253/5253* Video only, simplex.

SERIES 5054* Video only with visual and electric "loss of video" alarms. Rack mount only.

SERIES 3256/5056* High fidelity audio, full duplex, over 2 fibers.

SERIES 3257/5057* Video and audio in one direction over one fiber.

SERIES 3710/5710** Video in one direction and audio and data in both directions over one fiber. Supports PTZ and robotics applications

SERIES 3715/5715** Video in one direction and audio or data in the opposite direction over one fiber. Supports PTZ and robotics applications.

SERIES 3153T Mini PFM transmitter that attaches directly to video source BNC. Low cost, easy to install. Ideal for camera mounting.

* *System 5000 Rack Mount Version, 24 channels per chassis*
** *System 5000 Rack Mount Version, 12 channels per chassis*

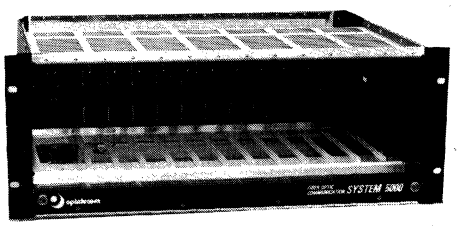
OPTELECOM'S FIBER OPTIC COMMUNICATIONS PRODUCTS ARE THE FIRST CHOICE AMONG ENGINEERS.

optelecom
The Fiber Optics Company that Goes the Distance

SYSTEM 5000 CHASSIS

The Model 5000 chassis is the heart of the System 5000 line of rack mountable fiber optic video, audio, and data interface cards. The System 5000's unique design permits fast, easy installation and servicing of fiber and components. Features include:

- Dimensions that fit a standard 19" rack (19"wide, 13-1/2" deep, and 7" high).
- Optical cabling to the plug-in cards, accessible via a fold-down door on the front panel, lets operators totally service the unit from the front.
- Electrical cabling that remains attached at the chassis rear allows operators to quickly replace cards.
- An optional card extender that permits on-line servicing of a card.



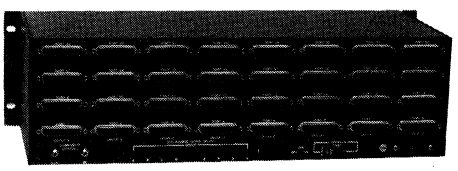
System 5000 Chassis

- Capacity for up to 12 cards and one Model 5031/4A power supply, or 10 cards and two Model 5031/4A power supplies (diode OR'ed for redundancy).

ECONOMUX

Optelecom's Economux models are top of the line fiber optic multiplexers designed to make your bottom line look good. These units are compact and can transmit up to distances that range from 3km to 25km, depending on the model. Proper two-way operation is continually monitored and verified via a front panel "LOOP-UP" indicator. Available versions include:

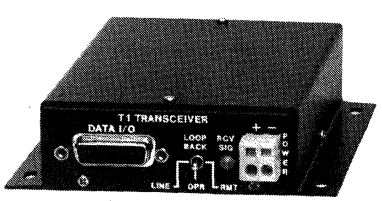
- RS232, 8 to 32 ports, 2 or 4 channels per port, asynchronous or synchronous.
- RS422, 8 ports, 8 channels per port.
- 20 milliamp current loop, 16 or 32 ports, one channel per port.
- Fiber optic subchannels, 8 or 16 full duplex fiber ports, compatible with Optelecom's Series 41XX modems.



4432/2A

FIBER OPTIC T-CARRIER INTERFACE

Optelecom's Fiber Optic T-Carrier Interface is a small, reliable, and inexpensive fiber optic transmitter/receiver set that transmits AMI or B8ZS data using analog techniques and does not alter or manipulate data. The Series 4231 is the stand alone unit and Series 5631 is a plug-in card compatible with the System 5000 chassis. These products transmit full duplex T-1 compatible signals via two optical fibers. And depending on the version, these units can transmit up to 12km via multi mode fiber and up to 9km via single mode fiber. Each unit contains built-in local (line) loopback and remote loopback test circuitry and visible LED signal indicators to verify proper operation.



4231

All **Optelecom's** Video, Audio, and Data Communications Products Are Available with These Options:

- ▼ Short or long distance capability,
- ▼ 850nm or 1300nm,
- ▼ Multi mode or single mode fiber operation,
- ▼ SMA or ST™ connectors.

Call Optelecom for all your data communications needs at 301-840-2121

OPTELECOM'S FIBER OPTIC COMMUNICATIONS PRODUCTS ARE THE FIRST CHOICE AMONG ENGINEERS.

optelecom
The Fiber Optics Company that Goes the Distance

FIBER OPTIC DIGITAL COMMUNICATIONS MODEMS

Optelecom's modems go the distance with transmission capabilities that range from 1km to 25km. The selection includes, but is not limited to the following models, which have these features:

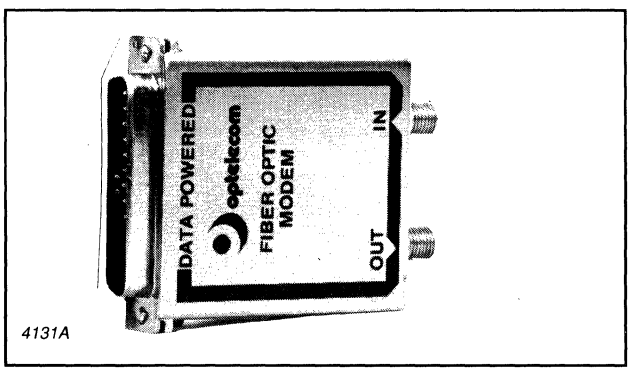
SERIES 4131A Asynchronous RS232, full duplex.
Extremely low power requirements, operates via existing RS232 data and control lines.
Small and light weight (2.1"W x 2.6"L x .6"D and 3.5oz).
DC to 56kBps.

SERIES 4131T TEMPEST version of 4131A.

SERIES 414X Externally powered, RS232, RS422 or current loop versions available.
DC to 56kBps.

SERIES 4245/5054* RS422 or TTL clock and data, full duplex over 2 fibers.
Transparent to data rate, no frequency tuning required.
Near DC to 5MBps.

SERIES 4260/5060* Multichannel asynchronous or synchronous RS232 or RS422, full duplex over 2 fibers.
DC to 64kBps.



4131A

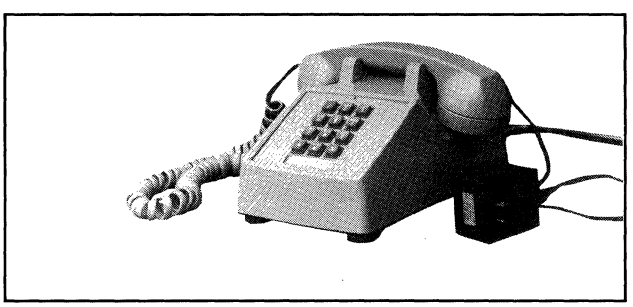
SERIES 4642/5642** High speed TTL or RS422, asynchronous.
Simplex or full duplex.
Ideal for continuous or burst mode operation.
Near DC to 20 MBps.

** System 5000 Rack Mount Version, 12 channels per chassis.*
*** System 5000 Rack Mount Version, 24 channels per chassis.*

FIBER OPTIC TELEPHONE SET AND ANALOG OPTICAL MODEM

When all lines need to be secure, Optelecom's Fiber Optic Telephone Set (FOTS), fitted with a small Analog Optical Modem (AOM), is designed to satisfy TEMPEST requirements. The telephone set can be either a modified industry standard type Model 2500 touch-tone telephone or Model 500 pulse-dial telephone with these features:

- Built-in rechargeable battery that permits 24-hour continuous operation.
- Connections via 2 optical fibers to either another FOTS for a hot ringdown dedicated line or to an AOM with an internal 2 or 4 wire Central Office Interface (COI) personality card for communicating with a PABX.



- Transmission distances, 3 or more kilometers.
- Support for full duplex audio and 4 data lines.

- *OPTELECOM's versatile System 5000 allows engineers to configure a system with countless combinations of video, audio, and data interfaces. The result is a clean, compact, high performance fiber optic communications system designed to your specifications.*
- *In addition, OPTELECOM manufactures fiber optic transmitters and receivers for local area networks including ETHERNET, Token Ring, Token Bus, Omninet, APOLLO, IBM 3270, and Mil-1553.*
- *Optelecom's commitment to providing innovative, high performance fiber optic communications products extends to designing and manufacturing customized high quality products for companies that have unique requirements and special needs.*

FIBER OPTIC AMPLIFIERS AND TRANSMISSION SYSTEMS ANALOG WIDEBAND DC-1MHz & DC-10MHz

SPECIFICATIONS

INPUT VOLTAGE RANGES:
Switch selectable with 1 megohm 30 PF input.
0-±1VPK, ±10VPK, ±100VPK, ±1000VPK,
or ±0.1VPK, ±1VPK, ±10VPK, ±100VPK

OUTPUT VOLTAGE

DC-1MHz	DC-10MHz
0-±10VPKDC-1MHz into 10 Kohms or more	0-±10VPK into 50 ohms

BASIC ACCURACY:

DC-1MHz	DC-10MHz
0.3%DC	0.25%DC
0.5%1Hz-400Hz	0.5%1Hz-400Hz
3%400Hz-100KHz	3%400Hz-5MHz
10%100KHz-1MHz	-3db 10MHz

TRANSMISSION DISTANCE:

DC-1MHz	DC-10MHz
1Kilometer	Over1000feet

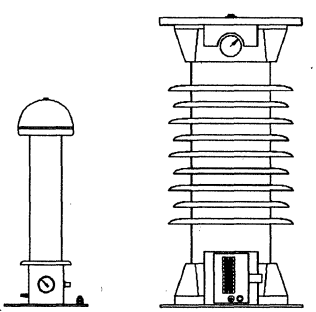
Signal transmission not affected by shock, vibration or change in light intensity.

POWER REQUIREMENTS:

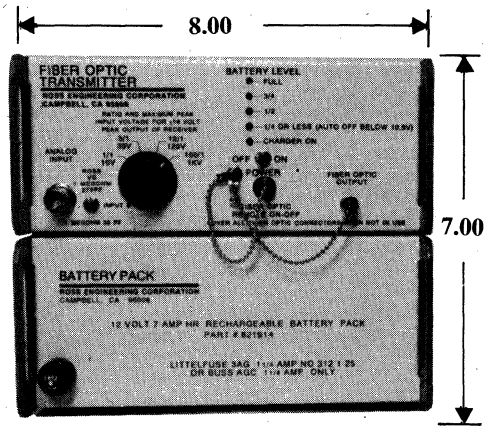
Transmitter:
115V/230V 50/60Hz and 12V DC powered, with integral charger. Optional remote on/off controlled by fiber optic cable.
Standard battery provides 8-15 hours of operation between charges, longer available.
Also isolated power source available for continuous operation without integral battery from power source at ground potential.

Receiver:
115V/230V 50/60Hz or 12V DC powered.

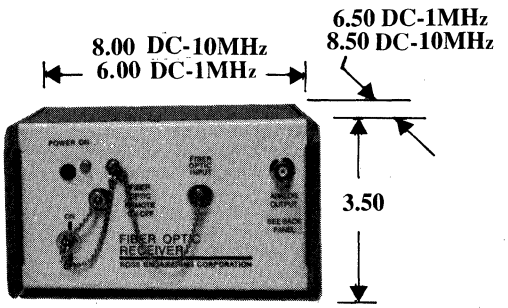
Voltage input range can be extended in 15KV increments to 900KV PK by Ross Engineering Corporation's wide band voltage dividers.



VD60 KV INDOOR **VD120 KV OUTDOOR**

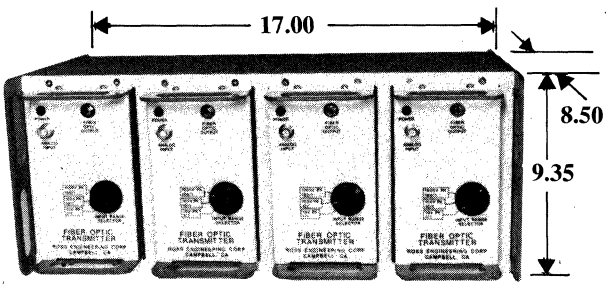


AC/DC POWERED TRANSMITTER WITH 12V DC 8-15HR. BATTERY PACK



AC POWERED RECEIVER

DIMENSIONS IN INCHES



4 CHANNEL FIBER OPTIC SYSTEM ALSO AVAILABLE :

Each channel is independent, self-contained, and removable for separate operation. Powered by 115V/230V 50/60Hz.

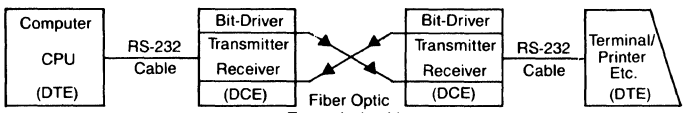
S.I. TECH Fiber Optic Modems & Multiplexers

PO BOX 609, Geneva, IL 60134 • TEL: 708/232-8640 • FAX: 708/232-8677

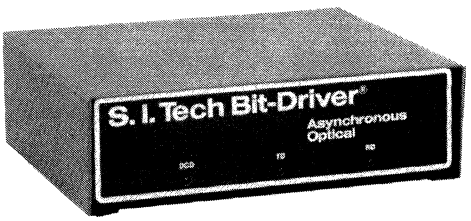
TYPICAL APPLICATION



DTE: Data Terminal Equipment
DCE: Data Communication Equipment

Designed to convert various computer interfaces to optical and reconvert at remote end. Typical applicaton shown in the diagram at left. Fiber optic communication is immune to EMI/RFI, lightning, ground loops and can be used for secure data. Cables are small, lightweight, lower loss over large transmission distances, and provide error free data communications. Glass fibers of various sizes such at 50/125, 62.5/125 & 100/140 can be used. Most have a range of 6600 ft. (2 Km), 15000 ft. (5Km) optional.

STAND ALONE FIBER OPTIC MODEMS



Bit Driver is a simplex or full duplex system capable of transmitting data up to 56K bps over fiber optic cable. Stand alone component with RS-232 interface and input/output transmision connection. LEDs indicate status. 6000 ft maximum distance capability. Operating temperature is from 0° to 50°C. AMP Optimate connector receptacles with SMA/ST connections optional. UL & CSA listed.

S.I. TECH #	Enclosure	Operating Mode	Price ea.
2001	Metal	Asynchronous	100
2004	Metal	Synchronous	400
2005	Metal	Asynchronous	300

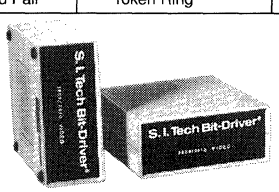
*These modems can be obtained in card style to fit Model 3000 Card Cage.

LOCAL AREA NETWORK - FIBER OPTIC MODEMS

Each modem is designed to operate with various networks (see table). Fiber optic bit drivers eliminate many disadvantages of standard transmission lines. All types are stand alone and allow easy change from existing lines to fiber optic line using 2 SMA (ST-option) connector fiber optic receptables. Also comes with power supply and status indicators. 2 KM standard, 5 KM & 1300 nm options.

S.I. TECH Number	Interface	Network	Data Rate/MBps
2105 mini	RS-232	RS-232 Ring	0.1
2836	Twinax	IBM 34/36/38 AS/400	1
2852	RS-485 Twisted Pair	OMNINET	1
2853	Coax	ARCNET	2.5
2870	Coax	IBM SNA	2.35
2875	IBM	IBM	4
2876	IBM Twisted Pair	IBM Token Ring	4

FIBER OPTIC VIDEO SYSTEM

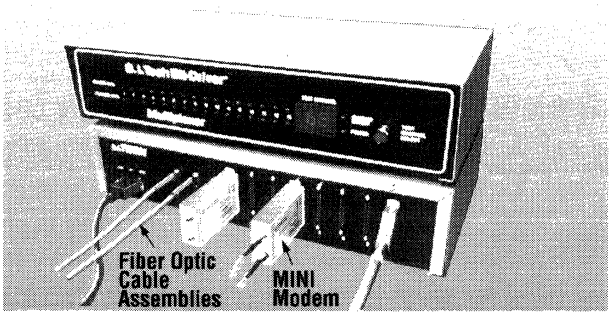


Designed for CCTV with color or black & white video. Can be applied to TV monitors, security system, surveilance and industrial applications. Has BNC bulkhead jack with 75 ohm impedance, with an input voltage of 1Vpp. SMA or ST connectors. Maximum operating distance to 5000 ft. in temperature range of 0° to 50°C. Plastic case is 6" x 6.5"

S.I. TECH Number
2809 Transmitter
2810 Receiver

Rack mounted, mini & card types available. 1300 nm option for long distance.

MINI OPTICAL BIT DRIVERS



Features simplex or full duplex operation, SMA (ST-option) receptacles, DTE, or DCE switch selectable, LED Indicator for transmit and receive data and RS-232C connectors (cable not required). 2505 is 0 to 56K bps asynchronous operation up to 5000 ft. maximum operating distance. Requires Type 2101 external transformer. 2507 is 50 to 19.2K bps asynchronous operation up to 3000 ft. maximum operating distance. Powered by DTE. See picture above.

S.I.TECH Number	Data Rate/MBps	Distance	Features
2320	19.2	5000	PC XT or AT bus-board level
2505M	56	5000	2101 or pin 9
2505F	56	5000	2101 or pin 9
2506	19.2	3000	2101, Hanshake Lines
2106	19.2	3000	2101, RS-422
2507M	19.2	3000	DTE powered
2507F	19.2	3000	DTE powered
2101	—	—	Power Transformer

FIBER OPTIC MULTIPLEXERS

Time division multiplexers with various interfaces. Status indicators show activity of each channel & the integrity of fiber link. Standard models 6600 ft. (2Km) with 5 Km optical, SMA connectors are standard with ST optional UL, CSA, FCC certified. See picture above.

FIBER OPTIC MULTIPLEXERS

S.I. TECH Number	Key Feature	No. of Channels
2006	RS-232, Async/Sync	Up to 8
2016	RS-232, Async	16
2017	RS-232, Async	4
1000	RS-232, Async/Sync	Up to 48
9304	IBM Twinax/AS 400	4
9308	IBM Twinax/AS 400	8
3700	IBM Coax 3174 & 3274	4 to 32

FIBER OPTIC CABLE, 1 & 2 FIBER, PRETERMINATED ASSEMBLIES

These Slip Ring Assemblies have found wide use in gyro gimbal and instrument applications. The fully enclosed and tested assemblies feature fine diameter gold alloy brushes mated to compatible gold alloy rings for excellent noise characteristics at low torque levels. Although miniature in size, the assemblies are surprisingly rugged and are able to withstand most military environmental specifications.

Units have been fully tested to the environmental parameters listed below, proving their ruggedness and reliability. All units are factory tested before shipment and a copy of the test data is available with each unit upon request.

The units shown here are only a sample of those available which include a 50 ring capsule of .685 diameter.

SPECIFICATIONS

MECHANICAL

1. Rings: Gold alloy
2. Brushes: Gold alloy wire, spring temper
3. Ball Bearings: Stainless steel, shielded
4. Shaft: Stainless steel
5. Housing: Anodized aluminum
6. Rotation: Bi-directional

ELECTRICAL

1. Current: Signal level to 1 amp maximum
2. Voltage: Micro-volts to 110 volts rms
3. Dielectric Strength: 500 volts rms (all combinations)
4. Leadwire: #30 AWG teflon insulated, 15″ long minimum
5. Noise: ±5 micro-volts per ma

ENVIRONMENTAL

1. Temperature Shock: +85°C for 1 hour and immediately transferred to −55°C for 1 hour
2. Shock: 18 shocks, 20 "g" with duration of 11 ±1 ms (MIL-E-5272C, Procedure V)
3. Vibration: MIL-STD-202B, Method 204, test condition B
4. Altitude: 50,000 ft. and −55°C
5. Humidity: MIL-E-5272C, Procedure III (95% R.H. @ 120°F for 360 hours)

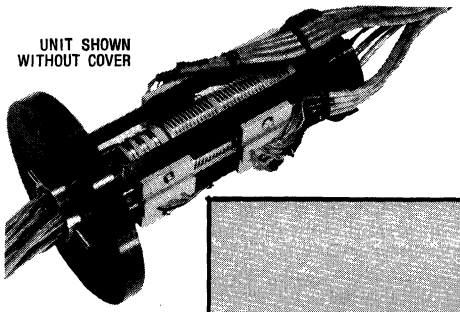
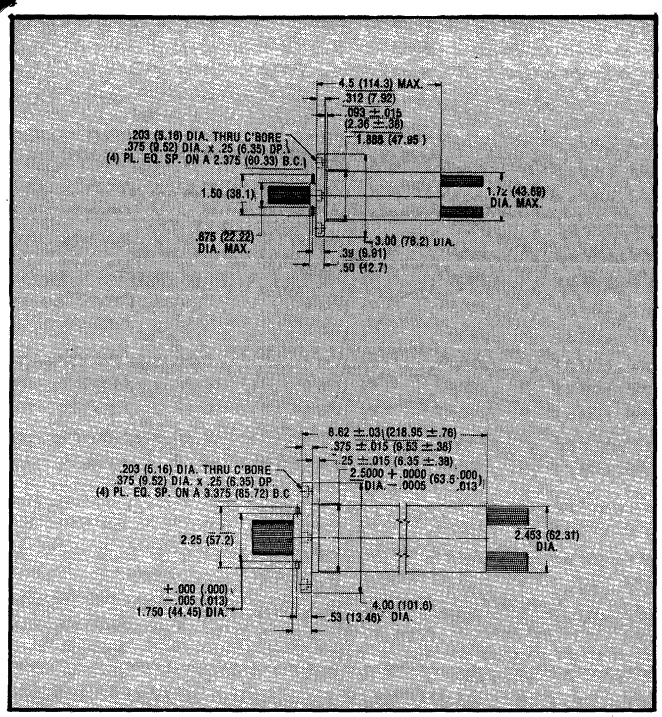
CAPSULE SLIP RING ASSEMBLIES



CAY-150
UP TO **48** RINGS



CAY-1120
UP TO **90** RINGS

These assemblies, specially designed for gyro-rate table and centrifuge applications, have found wide use because of their versatility and compact size. The standard assembly, can be supplied (at slight extra cost) with internally shorted rings for double and triple current ratings, and with single, double and triple shielded wire. Featuring gold alloy wire brushes and compatible gold alloy rings, these assemblies are manufactured from proven production tooling at a very nominal cost. Special assemblies with switching circuits and others with non-standard materials for use in severe environments are available.

SPECIFICATIONS

MECHANICAL

1. Rings: Gold alloy

DAY-705

These slip-rings are built to your order using many standard components which have proven themselves over many years of reliable operation. The "platter-type" design includes one coin silver ring on each side of each molded sub-assembly; and, leaf type silver graphite brushes which are molded in an insulating block and perfectly matched to the face of each ring. Inasmuch as the assemblies are the stack-up type, we are able to custom build them to your specifications—using our standard components—with a very minimum lead time required.

DAY-710

Similar in construction to our DAY-705, this platter type unit features two coin silver rings on each side of each platter for greater package density, and a "through bore" design which can be used for the passage of fluid or gas lines.

SPECIFICATIONS

MECHANICAL

1. Rings: Coin silver

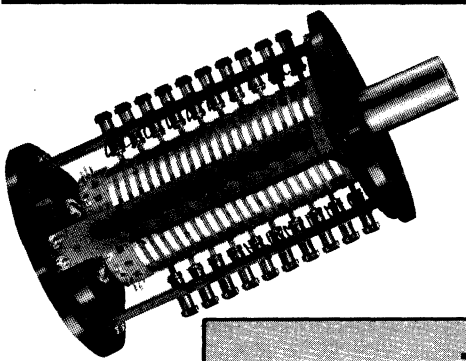
POWER CAPSULE SLIP RING ASSEMBLIES



CAY-125

A general purpose, off-the-shelf slip ring assembly especially applicable for strain gage and thermocouple measurements where rotating detector circuits must be brought out to stationary measuring equipment.

CAY-755

The standard cartridge, (AHW-16), has been used for many years on our CAY-125 assembly and is now available with the CAY-755 which is also drawn, or individually, for use on any ring which is a minimum of 1/8" wide. The silver graphite brushes, coil springs, caps and holders may be purchased individually or as an assembly and are all available from stock.

CAY-125
UP TO **30** RINGS

CAY-755

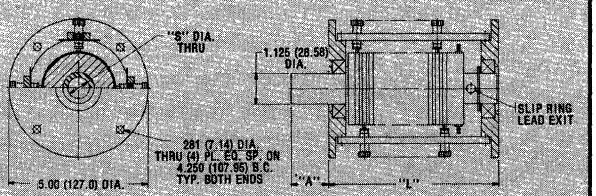
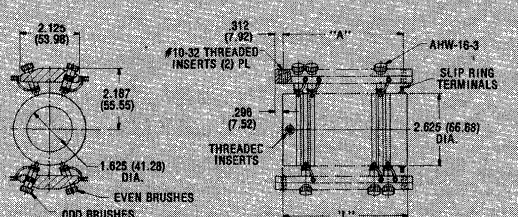
. . . AS AN ASSEMBLY



NOTES:
To determine "L" dimension use the following formula:
"L" = 2.62 (66.55) + $\frac{\text{(NO. OF RINGS)}}{4}$

"S" = .750 (19.05) or 1.000 (25.4)
"A" = .750 (19.05) or 1.000 (25.4)

. . . OR AS SEPARATES



NOTES:
To determine the "L" and "A" dimensions, use the following formulas:
"L" = 1.093 (27.76) + $\frac{\text{(NO. OF CIRCUITS)}}{4}$

"A" = "L" − .218 (5.54)
†Two identical brush blocks are supplied with each CAY-755 assembly.
†REPLACEMENT PARTS
Cartridge Assembly: AHW-16

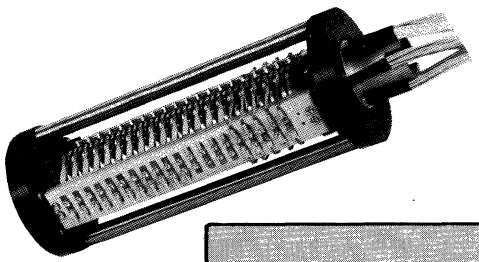
MULTI-PURPOSE SLIP RING ASSEMBLIES



These assemblies, designed for use in commercial equipment, have been used in applications ranging from thermocouples to the transmission of medium power. They feature coin silver rings, silver graphite brushes, convenient terminals on both the slip ring and brush blocks, and a rotor design which allows the leadwires to be exited through the shaft bore, or under the bearing when a shaft clearance hole is required. The wide variety of sizes and configurations available, including "in-between" shaft diameters, allows the designer to select a standard assembly for his application, eliminating time consuming and costly design charges.

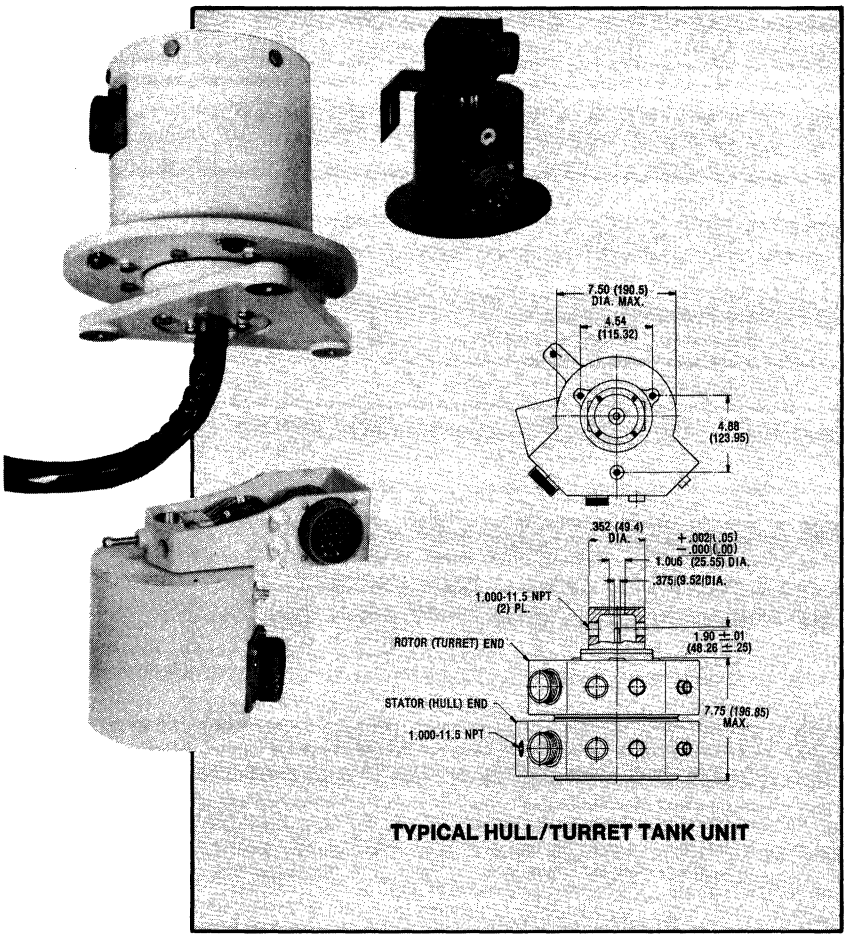
Airflyte ELECTRONICS CO.

VEHICLE SLIP RING ASSEMBLIES



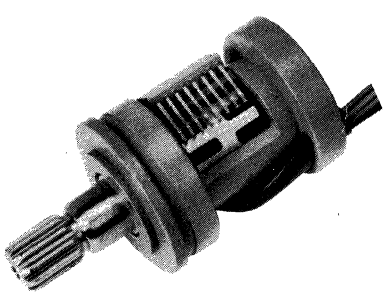
TYPICAL HULL/TURRET TANK UNIT

Airflyte Electronics has experience in the design and manufacture of assemblies for personnel carriers, tanks and other military vehicles. We have built slip rings for periscopes, turrets and commander stations. These assemblies range in size from 6″ or less in outside diameter to slip rings with clearance holes larger than 28″. This type of assembly is characterized by its rugged construction, usually has two high power rings, several low power and up to 50 signal rings. Illustrated are several of the configurations we have built in production quantities.

SPECIFICATIONS

1. Voltage: from 28 VDC to 208 VAC
2. Current: from 1 amp to 600 amps
3. Frequency: DC to 100 MHz
4. Speed: Usually about 20 rpm
5. Noise: Less than 10 mΩ peak to peak
6. Hydraulics: 3000 psi operating
7. Pneumatics: 1500 psi operating
8. Torque: 15 ft.-lb. max. (no hydraulics)
9. Life: 3000 hrs.
10. Environmental: Vibration, shock, etc. per MIL SPEC
11. Terminations: Connectors & fittings customer compatible

ENCODERS & SWITCHES



Airflyte encoders and rotary switches feature drum construction with solid gold alloy conducting segments embedded in epoxy and machined flush. Brushes are multi-strand, spring-temper gold-alloy. As small as ½″ diameter.

ENCODERS

Special encoders with BCD, Gray, True Binary or non-standard codes are available. Units supplied with or without logic circuitry.

SWITCHES

When close accuracy, repeatability and size are important, specify Airflyte rotary switches for timing and positioning applications. Successfully replaces snap action switches and cams. Pre-set to eliminate installation time. Zero hysteresis.

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

AUTOMOTION

Brushless DC Motors & Controls

313 / 662-7771
Fax: 313/662-3707

AFFORDABLE BRUSHLESS DC SOLUTIONS

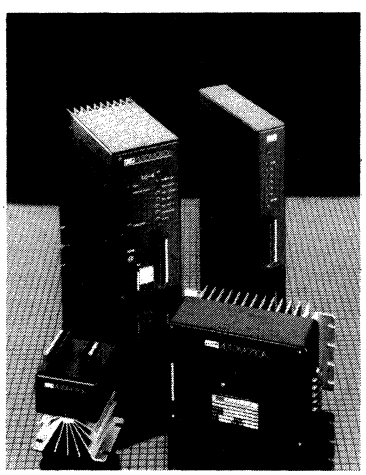
Everything from off-the-shelf packaged motors and controls to ground-up OEM custom solutions. All at affordable prices.

At Automotion, we research, engineer, design, and manufacture DC brushless motor controls. And that's it. Because of our focus, we believe we can provide the best DC brushless motor control available anywhere. And, because of our focus, we can provide these controllers at affordable prices.

Not only is our price tag small, our product is small. The LC family of controllers provides more power and function, in a compact package, because of our advanced design. That means your motor application need not suffer from an oversized or overpriced control.

We are also happy to work with you on a custom basis to design a specific control for your specific needs. And even help you find the right motor for your application.

Because at Automotion, only two things count: our customers and meeting their DC brushless motor control needs.

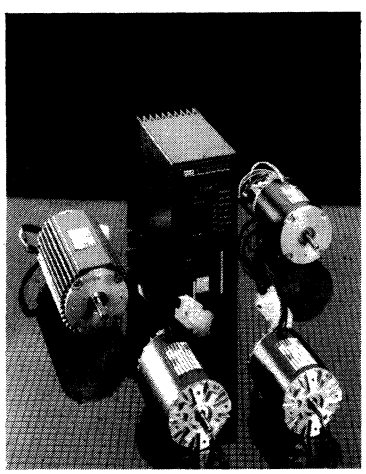


STANDARD PRODUCT

Consider the LC family of controllers from Automotion. They are compatible with any 3-phase WYE or DELTA wound DC brushless motor, and are efficiently designed to fit the tightest space requirements. And they offer some pretty impressive advantages, like instantaneous start/stop and forward/reverse, dynamic braking, and analog or digital PWM speed control in voltage ranges from +7 to 320 DC. At prices starting under $200.

Packaged low voltage versions feature a protective cover, heat sink, and quick disconnect wiring terminations that conform to NEMA type 1 requirements.

Each high voltage model is available as either an open frame unit for OEM use, or packaged in a NEMA 1 rated metal enclosure with integral heat sink, diagnostic LEDs, and quick disconnect terminlals.

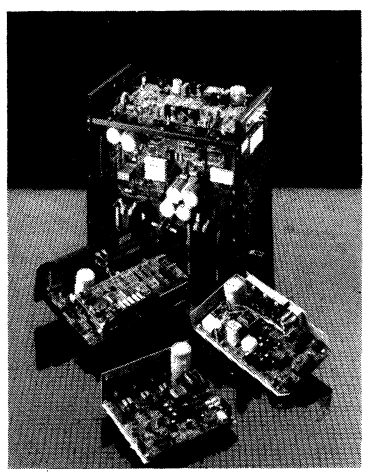


AUTOPAC™ PACKAGE.

The "AUTOPAC", a general purpose industrial grade DC brushless motor and control package, is available in standard, "off-the-shelf" ratings beginning at 1/10 HP @ 1800 RPM. Most units are rated up to 5000 RPM, maximum, with optional higher RPM designs available upon request.

The AUTOPAC family uses our advanced design of PWM drive technology coupled to a precision fractional horsepower PM DC brushless motor to produce a highly efficient, powerful, and very versatile package that is surprisingly affordable.

The DC brushless motors offered, built to Automotion's demanding standards, feature: dynamically balanced rotors, built-in, high-temperature Hall Effect sensors, Class H insulation system, and precision ground shafts.



CUSTOM

Based upon the same proven reliable, advanced PWM drive technology as our standard family, our custom series demonstrates the significant flexibility of Automotion in the design and manufacturing of cost effective custom driver solutions for our OEM customers.

Starting with the basic four quadrant H bridge driver, OEM's can select from a long list of Automotion I/O, operating and protection options to build just as much of a driver solution as the application requires. As a result, OEM customers get the brushless DC control capability they need, at a price and size that their application can justify.

Made with pride in the USA.

Multiple choices in speed control– which one is best in your automation application?

For expert objective advice, dial

1-800-7BODINE

- Stepper motors
- Conventional permanent magnet DC motors
- 3 phase/inverter-fed motors
- Brushless DC motors
- Parallel shaft or right-angle gearheads available

We're prime manufacturers of all four types of fractional hp motors driven by electronic controls—and one of the few motor manufacturers to produce our own gear-heads. So we have no "ax to grind" for any particular approach—only our commitment, demonstrated for over 85 years, to help you make the optimum choice for your application.

At Bodine, the watchword is "products that perform, people who respond." We'll respond with knowledgeable application engineering, to make sure you get the right match of motor to machine. We have the people—the equipment—the know-how—the quality-proven manufacturing systems—to assure you the motor you choose will perform and provide relatively long life in the equipment in which you install it.

Bodine motors, gearmotors and motor controllers are available around the world. Call 1-800-7BODINE for the name of your nearest Authorized Stocking Distributor—or send for a free copy of Catalog S.

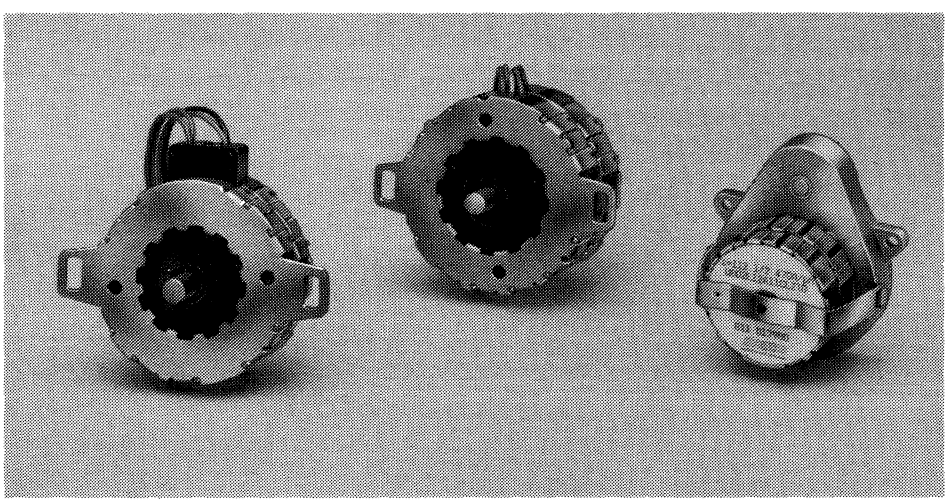
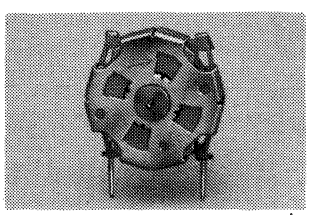
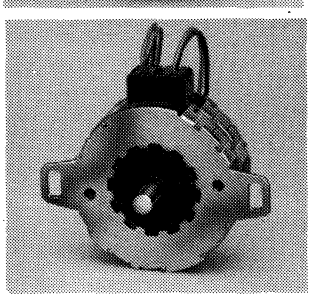
Burgess-SAIA is an international supplier of ultra-high quality OEM products. Motor fabrication and assembly of millions of electrical motors, timers, and switches takes place in our Murten, Switzerland facilities, offering complete customer support worldwide.

UNIDIRECTIONAL SYNCHRONOUS MOTORS – SERIES UBS 1,UDS 1, UDS 7, For single phase AC and with permanent magnet rotor, the direction of rotation is not given by the supply system, so that starting in the correct direction is predetermined by the design. This can be performed either by a reverse running stop or by auxiliary poles surrounded by copper short-circuiting loops, and which together with the field poles, create a rotating field. Unidirectional synchronous motors with auxiliary poles are quieter in operation while those with reverse running stop can be manufactured at a lower cost.
A wide selection of rated voltages and gear boxes including heavyduty are available. Approved by all major national and international testing authorithies UL, CSA, VDE.

REVERSING SYNCHRONOUS MOTORS – SERIES UBR 1 and 2, UDR 1, UFR 1, UFM 1, UFR 4, UHM 1, Single-phase AC with permanent magnet rotor require at least two stators or stator windings. The electrical reversal of the direction of rotation is performed by a single-pole changeover switch. Reversing synchronous motor with four stators are available and it consist of two series or parallel connected synchronous motors with two stator windings.







REDUCTION GEARS – SERIES A, D, L, B and F, V, J, The ruggedly designed reduction gears consists of hardened, polished steel. Gears are maintenance-free permanently lubricated in an enclosed housing.
Torque range 32 cNm (45.3 oz in) to 1500 cNm (2126 oz in), speed range 5/12 s to 100 days, motor and gear combined by means of a snap-on clip, heat-treated gear-wheels in gears where T > 250 cNm (354 oz in), various single-way and two-way slipping clutches, special output shafts available.

STEPPER MOTORS – Series UBB / UBD, UDB, UFB / UFD, UFB 3 and 4, URD, UKD 1 and 2, UAF 1, The principal advantage of the step motor lies in the fact that its rotational position can be constantly monitored without need for a position feedback system. It is also possible for a step motor to be accelerated without loss of its positional accuracy. It is eminently suited as a digital actuator in conventional hydraulic, pneumatic, and mechanical applications. Burgess-SAIA STEP MOTORS are simple in design, have a remarkable power capacity, and they are compatibly priced. Custom windings are available upon request and engineering support for any OEM designs.

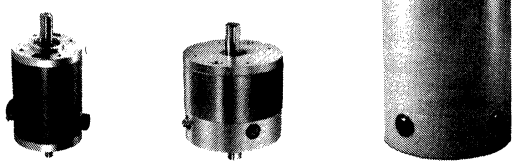
Dependability in Motion...Fractional Horsepower Motors from Clifton Precision

DC PM MOTORS

Wheelchairs, door openers, welding wire feeders, computer peripherals, machine tools



...with peak torques from 90 to 3500 oz-in., continuous torques from 10 to 560 oz-in., 2 inch to 4 inch O.D. Advanced magnetic materials...cartridge brushes

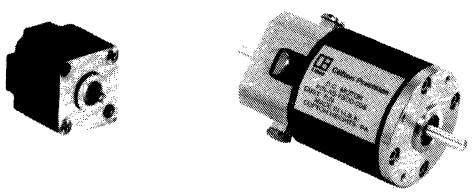
BRUSHLESS DC MOTORS

Floppy and Winchester disk drives, machine tool drives, pumps, fans, robotics

...with 40 to 150 mm O.D.; 1, 2, or 3 phase. Specializing in rotor/stator parts sets, with housed units also available. Will customize upon request.

MINIATURE HIGH-TORQUE DC SERVOMOTORS

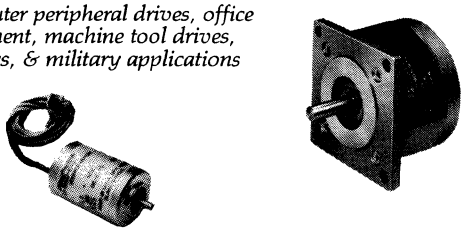
Computer peripheral drives, instrument recorders, laboratory instruments, medical equipment, robotics



...with peak torques from 2 to 50 oz-in., up to 8 oz-in. continuous torque; .75 inch cube to 1.32 inch O.D. Cartridge brushes, Alnico or rare earth magnets

PM, HYBRID, AND VR STEPPER MOTORS

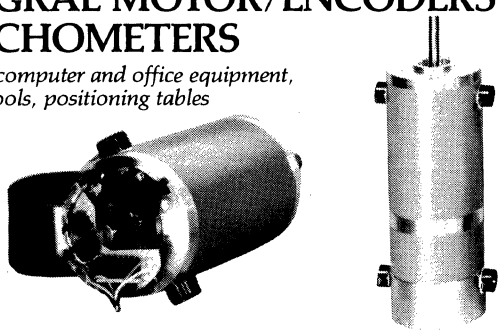
Computer peripheral drives, office equipment, machine tool drives, avionics, & military applications



...with step angles 1.8°, 1.875°, 15°, 30°, 45° 90°, 120°; .75 inch to 2.3 inch O.D. Ceramic Alnico or rare earth magnets. Available with integral encoders.

INTEGRAL MOTOR/ENCODERS & TACHOMETERS

Robotics, computer and office equipment, machine tools, positioning tables



...for closed loop feedback: optical encoder resolution to 1024 cycles. Analog tachometers integral to motor. No assembly or alignment necessary.

BRUSH & BRUSHLESS DC PM HOLLOW SHAFT TORQUE MOTORS

Inertial navigation platforms, aircraft instruments, aircraft controls

...with torques from 6 oz.-in. to 1000 lb. ft., 1.1 inch to 40 inch O.D. Precision tolerances, gold commutators, high reliability

Clifton specializes in custom designed products.

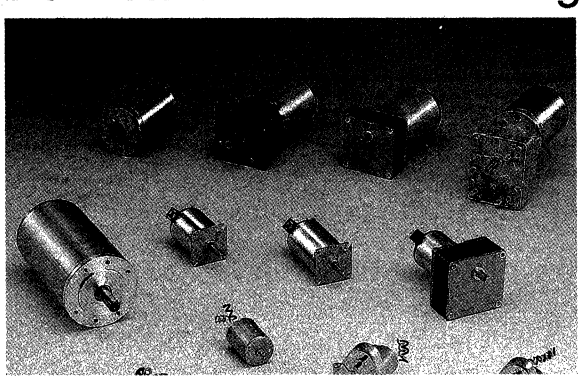
DC Motors - Permanent Magnet



Permanent magnet DC motors feature interchangeable brushes. Series 82 810 and 82 800 are built with sintered bronze sleeve bearings as standard. Front ball bearing is optional on the fore-mentioned series and standard on the 82 830 series.

DIRECT-DRIVE MOTORS

	 82 810 Series 12/24/48V	 82 800 Series 12/24/48V	 82 830 Series 12/24/48V
Diameter	1.65 in.	1.65 in.	2.45 in.
Nominal Output Pwr.	9 w	15 w	27 w
No Load Speed	3100RPM	3100 RPM	2100 RPM

GEAR MOTORS

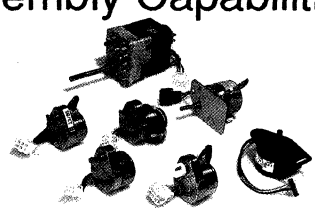
Shaded Pole Gearmotors

Instrument-grade shaded pole gearmotors are designed for exceptionally low noise operation and long life. Features of this high quality line include rugged die-cast gear case, optional fast stopping brake, and choice of metal or delrin gears. Output speeds range from 5 to 120 RPM and dynamic torque ratings range from 5 to 50 in.lbs.

Assembly Capabilities



One of Crouzet's specialties is creating and supplying motor "packages". Our ability to supply motors complete with connectors, capacitors, protective sleeves, various shaft attachments, special mounting plates, and even switches, allows us to meet virtually any application requirement.
Crouzet will help you save time, money, and aggravation, with a complete motor package.

The more demanding your motion application, the more you need to talk to us.

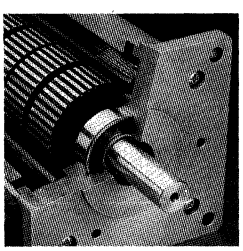
EAD
EASTERN AIR DEVICES, INC.
1E Progress Drive, Dover, NH 03820
TEL: 603-742-3330 · FAX: 603-742-9080

STEPPING MOTORS

These permanent magnet and variable reluctance motors are made in a broad range of configurations and step angles from 1.8° to 90°, with high positioning accuracy of ±3% noncumulative.

These units will produce exceptionally high torque/size ratios, are easily controlled by digital commands and operate at slewing rates of 20,000 steps/second and higher.

Sizes: 8, 11, 15, 18, 20, 23, 34, and 42 bidirectional.



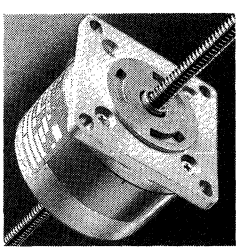
LINEAR ACTUATORS

Based on our 1.8° permanent magnet stepping motors, these linear actuators transform rotary motion of the rotor into linear motion of the lead screw.

Units operate over a wide temperature range and offer extremely fine resolution and high linear force up to 1 ton.

The threaded shaft does not rotate, therefore critical speed problems associated with rotating a long shaft are eliminated. Standard units feature a CRS rolled thread shaft and a bronze rotating nut.

Sizes: 23, 34, and 42.

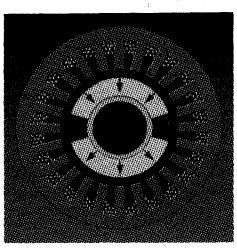


BRUSHLESS DC MOTORS

When life, EMI generation, maintenance costs, efficiency, and output-per-cubic-inch are important factors, brushless DC motors offer an attractive solution. New electronic components and rare earth magnets increase the growing popularity of these motors.

Sizes: 8, 10, 15, 18, 23, 31, 34, and 39.

Drives: Unipolar and bipolar to 20 amps and 350 VDC.



SYNCHRONOUS MOTORS

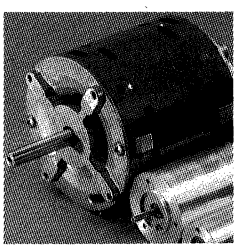
EAD is the North American leader in the design and manufacture of hysteresis/synchronous motors.

Sizes: 10 to 56, to ½ HP.

Synchronous (hysteresis and reluctance) motors produce smooth operation and precise speed which will not vary with load or voltage.

Hysteresis-synchronous motors develop smooth, constant starting and accelerating torque. They synchronize any load within their torque rating regardless of inertia.

Available in 1-, 2- and 3-speed designs.



BLOWERS, FANS

Move air from 3 to 2000 cfm quietly. From 1½″ to 10″ in diameter.

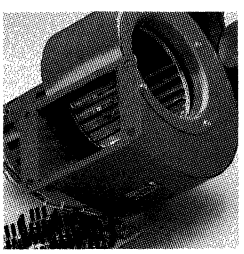
Centrifugal blowers: Deliver air at relatively high static pressure.

Tubeaxial fans: Move air through a wide range of volumes at medium pressure.

Vaneaxial fans: Move air axially over a wide range of volumes at relatively high pressure.

Propeller fans: Move air in large volumes at low pressure.

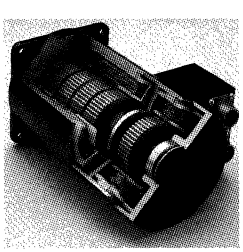
Mixed flow fans: Move air where it needs to be dispersed radially.



CLOSED-LOOP STEPPING MOTORS

When improved performance and load varying requirements are beyond the range of a standard stepping motor, the closed-loop stepping motor will supply the extra control, power, and performance needed to meet the requirements.

Sizes: 23, 34, and 42 bidirectional. Maximum speeds 3000 RPM continuous, 4500 peak.

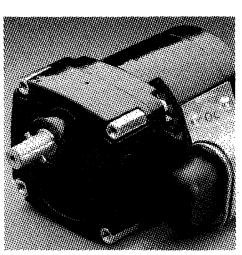


INSTRUMENT MOTORS AND GEARMOTORS

Our compact, permanent split capacitor motors and gearmotors are made in induction, torque, and synchronous versions.

Sizes: 25 and 29.

Available with 2, 4, or 8 poles, single or 2-phase, 50 and 60 Hz, gear ratios to 1800:1, output to 150 oz. in. Motors up to 1/100 HP.



SERVO MOTORS AND GEARMOTORS

Servo motors are 2-phase AC induction motors with permanently lubricated and shielded ball bearings. They can be controlled by solid state amplifiers, offer precise control, fast response, and are inherently impedance protected. Servo gearmotors have a high torque-to-inertia ratio. Reductions from 3:1 to 3600:1.

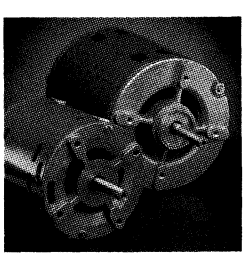
Sizes: 8 thru 23 for 50/60 or 400 Hz operation.

Gearmotors offer smooth, low-speed operation at moderate output torques. Lubricated motor ball bearings for maintenance-free operation. Outputs 1/500 to 1/20 HP AC.

TORQUE MOTORS

Torque motors offer smooth, moderate accelerating torque and low speed, with speed ranges from near zero to near synchronous. Options include shaft styles and extensions, nonstandard voltage and frequency, various mounting styles.

Sizes: 25, 34, and 44 open or totally-enclosed construction.



INDUCTION MOTORS

1-phase and 3-phase models and both high and low slip.

Single-phase motors available in permanent split capacitor and capacitor start versions.

Sizes: 10, 18, 25, 31, 34, 39, and 44.

Outputs to ½ HP. Available in both 50/60 Hz and 400 Hz versions.

OTHER PRODUCTS

Alternators, all frame sizes.

Precision military motor tachometers, sizes 11, 15, 18.

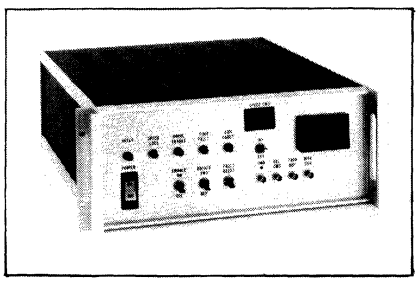
Rotor/stator sets, all frame sizes.

ELTROL
ELTROL CORPORATION

DC SERVO SYSTEMS

For applications requiring closed servo loop performance

MODEL 7-300-030-00
BRUSHLESS D.C. VELOCITY SERVO SYSTEM

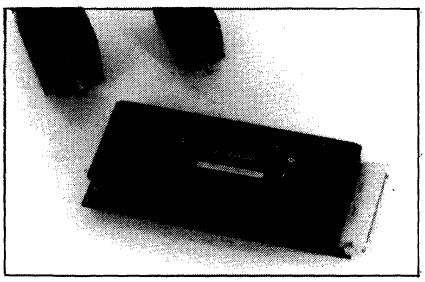


The basic system includes the following:
- Brushless DC servo controller
- Brushless DC motor
- Commutation position encoder
- Incremental optical encoder

The system provides precise velocity control in a complete package: Internal D.C. power supplies, crystal reference, controls for bidirectional rotation and variable speed, digital speed readout, operating controls and status indicators.
Instantaneous speed regulation to ±.001%
Fault protection: Overtemperature, shorts to ground, shorts across motor
Current loop: High bandwidth with current limiting
Input power: 115/220VAC, 1 ϕ, 50–60 Hz

The Eurocard Phase Lock Servo Controller included in Model 7-300-030-00 is available as a separate item.

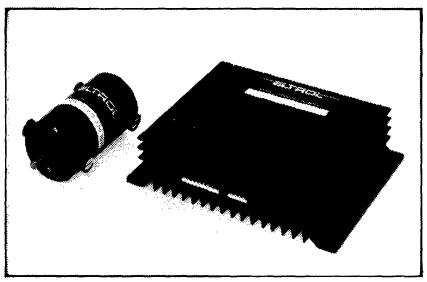
MODEL 5-156-028-00
BRUSH OR BRUSHLESS D.C. SERVO CONTROLLER



This EUROCARD provides closed loop four quadrant PWM control of motor velocity or torque. It offers maximum flexibility. Many operating features are set by pluggable jumpers. Variable compensation and gain by plug-in component carrier and trim pots simplify set up of closed loop operation.

FEATURES
- Single 24–60 volt P.S.
- Adjustable current 5–15 amps
- High efficiency 24KHZ PWM drive scheme minimizes EMI in noise sensitive applications
- Fault protection for excess temperature, speed, voltage, current, and motor stall
- Digital inputs command enable/reset, brake, and ± travel limits
- Differential amplifier for ± 10V input command
- Velocity F/B from commutation sensors, encoder, or DC tachometer

MODEL 6-120-024-00
BRUSH-TYPE LINEAR D.C. SERVO CONTROLLER



Motion control of position, velocity, or torque.
Simple adjustments for application adaptation
Peak output current: 2–10 amps
Linear operating mode: No switching EMI, high servo stiffness, no torque dead zone
Fault protection: Shorts across motor, shorts to ground, peak and time dependent continuous foldback current limits, external fault indication and reset.

The Eltrol motor-tach shown above is ideally suited to take full advantage of the servo controller's capabilities.

Eltrol Corporation is an engineering oriented firm specializing in D.C. servo systems. We provide standard, modified standard or custom designed systems to your electrical and mechanical specifications.

Write or call us today for additional information.

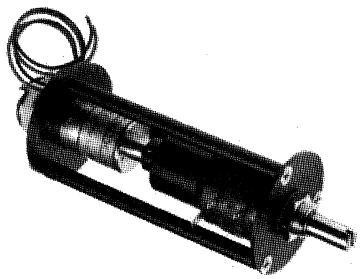
ETI SYSTEMS

D.C. MOTORIZED POTENTIOMETERS

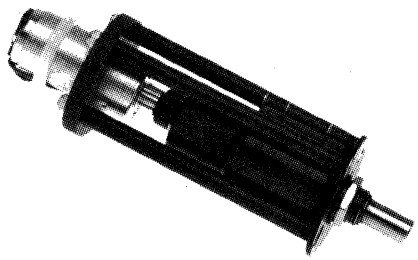
MOTORIZED MULTI - TURNS - 6 or 12 VDC



MC2W WIREWOUND (1-1/4" dia) 10 turn

RPMS AVAILABLE:	0.06 to 210
RESISTANCE RANGE:	100 to 100KΩ
POWER RATING:	2.0 watt

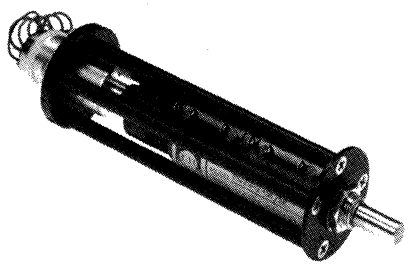
LOW COST Industrial grade general purpose for process control, speed control adjustors and remote control.



MC20A WIREWOUND (1-1/4" dia) 10 turn

RPMS AVAILABLE:	0.06 to 210
RESISTANCE RANGE:	100 to 100k Ω
POWER RATING:	3.0 watt

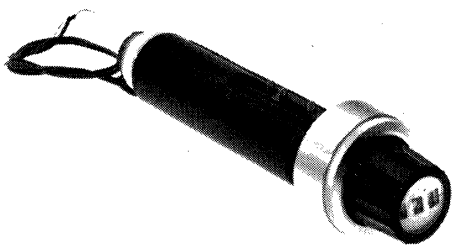
Mil-Spec type general purpose control.



MC20 - 2 WIREWOUND dual gang (1- 1/4 dia) 10 turn

RPMS AVAILABLE:	0.06 to 210
RESISTANCE RANGE:	100 to 100k Ω
POWER RATING:	3.0 watt

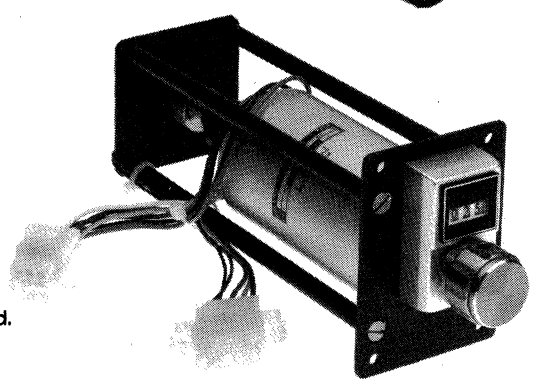
Dual Gang For Fully Fed-Back Systems.



MC20 -3 WIREWOUND (1- 3/8 dia) 10 turn

RPMS AVAILABLE:	0.06 to 50
RESISTANCE RANGE:	100 to 100k Ω
POWER RATING:	3.0 watt

Digital Turns Counting Dial is pre-assembled and calibrated to motorpot at factory.



MC4RS WIREWOUND (2.00" sq.) 10 turn

RPMS AVAILABLE:	0.06 to 50
RESISTANCE RANGE:	0.5 to 100KΩ
POWER RATING:	5.0 watt

High Resolution. Limit Switches at one or both ends of travel. 20 or 30 turns available.

All Resistance Ranges shown are standard.
Other resistance values are available.

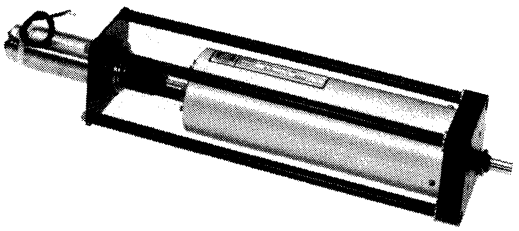
ETI SYSTEMS

D.C. MOTORIZED POTENTIOMETERS

HEAVY DUTY MOTOR & GEAR - 6, 12 or 24 VDC



MC46 - 4 WIREWOUND dual gang (2" sq) 10 turn
MC46 - 5 WIREWOUND single gang

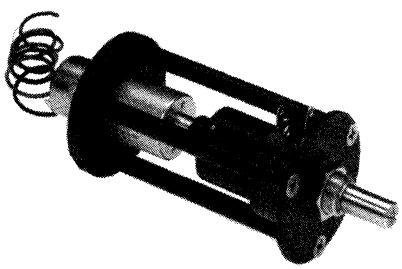
RPMS AVAILABLE: ..... 0.46 to 276
RESISTANCE RANGE: ..... 0.5 to 100k Ω
POWER RATING: ..... 5.0 watt

18 to 25 oz. in. torque. Required when attaching the potentiometer output shaft to another gear or mechanism.

MOTORIZED SINGLE TURNS - 6 or 12 VDC

MC2E - WIREWOUND (1-1/4" dia)

RPMS AVAILABLE: ..... 0.06 to 210
RESISTANCE RANGE: ..... 50 to 10k Ω
POWER RATING: ..... 0.5 watt

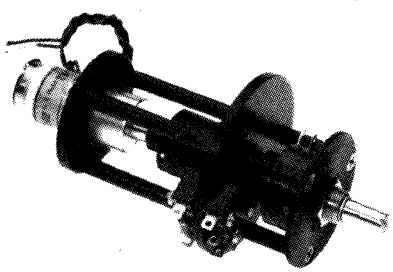


General purpose. Potentiometer terminals allow *Plug on Connectors, Simplifying Harnessing.*

MC2P CONDUCTIVE PLASTIC (2" dia)

RPMS AVAILABLE: ..... 0.06 to 210
RESISTANCE RANGE: ..... 1K to 10k Ω
POWER RATING: ..... 1.0 watt

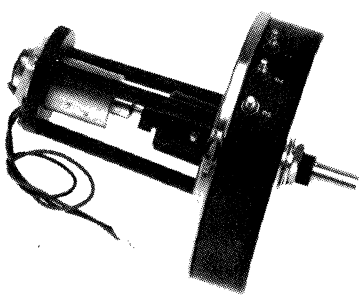
Same as MC2E, but with *Conductive Plastic* element for essentially infinite resolution and longer life.



MC2P - 2 CONDUCTIVE PLASTIC (2" dia)

RPMS AVAILABLE: ..... 0.06 to 210
RESISTANCE RANGE: ..... 1K to 10k Ω
POWER RATING: ..... 1.0 watt

Unit has *5 Amp Snap Action Switches* at both ends of travel.



MC4P - CONDUCTIVE PLASTIC (1-1/2" dia)

RPMS AVAILABLE: ..... 0.06 to 210
RESISTANCE RANGE: ..... 1K to 10KΩ
POWER RATING: ..... 2.0 watts

Conductive Plastic element for essentially infinite resolution and 50,000,000 turns life.

All resistance ranges shown are standard. Other resistance values are available.

FEATURES of ETI SYSTEMS D.C. Motorized Potentiometers: Slip clutch between gearmotor and potentiometer allows manual adjustment when power is off. Operating temperature range -30°C to +65°C. Driver boards for self-contained closed loop servo positioning available. Motor speeds up to 18000 RPMs are extremely responsive and may be pulsed similar to stepper motors.

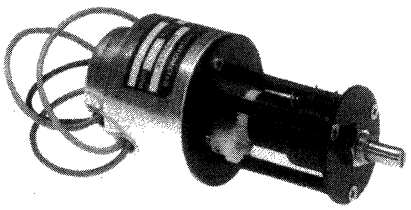
ETI SYSTEMS

A.C. MOTORIZED POTENTIOMETERS

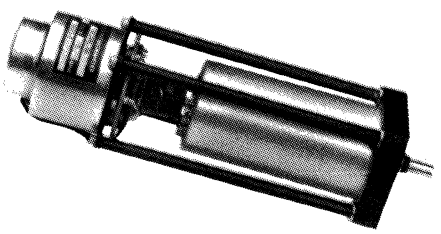
MOTORIZED MULTI - TURNS - 24 or 115 VAC

MAC2W - WIREWOUND (2" dia x 4-1/4" max)
RPMS AVAILABLE: ..... 1, 2, 5, 10 & 15
RESISTANCE RANGE: ..... 100 to 100k Ω
POWER RATING: ..... 2.0 watt



General Purpose 10 turn Wirewound element for excellent output stability.

MAC46 - WIREWOUND (2" sq. x 6" max)
RPMS AVAILABLE: ..... 1, 2, 5, 10 & 15
RESISTANCE RANGE: ..... 0.5 to 100k Ω
POWER RATING: ..... 5.0 watt

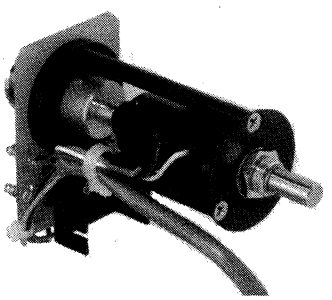


High Wattage, high resolution. Now uses MR46 potentiometer.

MAC4RC - WIREWOUND (2" sq x 6-13/16" max) (pictured)
RPMS AVAILABLE: ..... 1, 2, 5, 10 & 15
RESISTANCE RANGE: ..... 0.5 to 100k Ω
POWER RATING: ..... 5.0 watt

Limit Switches at one or both ends of travel. High Wattage. *With Circuit Board.*

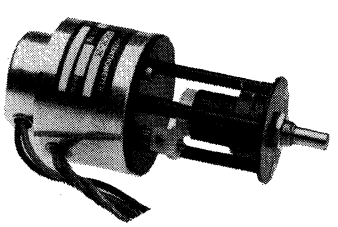
MA2W - WIREWOUND (2-3/8" high x 1-1/2" wide x 4.175" long max.)
RPMS AVAILABLE: ..... 0.06 to 210
RESISTANCE RANGE: ..... 100 to 100k Ω
POWER RATING: ..... 2 watts



High RPM with AC input - uses DC motor. General purpose.

MOTORIZED SINGLE TURNS - 24 or 115 VAC

MAC2E - WIREWOUND (2" dia. x 3-1/2" max)
RPMS AVAILABLE: ..... 1, 2, 5, 10 & 15
RESISTANCE RANGE: ..... 50 to 10k Ω
POWER RATING: ..... 0.5 watt



General Purpose. Wirewound element for excellent output stability.

MAC2P - CONDUCTIVE PLASTIC (2" dia. x 3-1/2" max.)
RPMS AVAILABLE: ..... 1, 2, 5, 10 & 15
RESISTANCE RANGE: ..... 1K to 10k Ω
POWER RATING: ..... 1.0 watt

Conductive Plastic for long life and essentially infinite resolution.

FEATURES of ETI SYSTEMS Motorized Potentiometers. Slip clutch allows manual adjustment when power is off. Operating Temperature range: -30°C to +65°C. A.C. motors are UL approved, reversible. Circuit board (optional), packages the starting capacitor, balancing resistor and braking diode. Braking diode prevents motor coasting.

ETI SYSTEMS

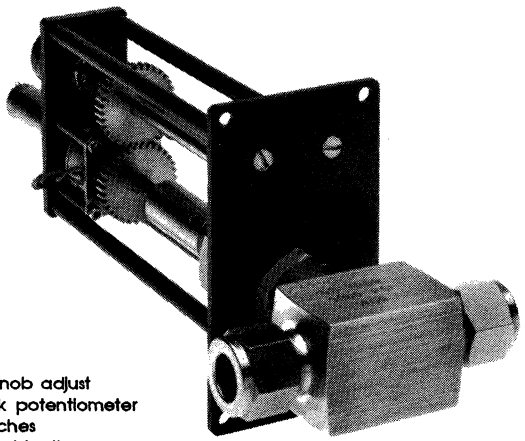
ROTARY ACTUATORS

VALVE POSITIONERS

Patented design addresses safety and downtime, torque concerns, and perhaps most critical, *"styction"*. From 10-turn needle valves to regulators requiring 200 in.lbs. of torque, ETI Systems offers the precision functioning and feedback devices that fit your requirements.

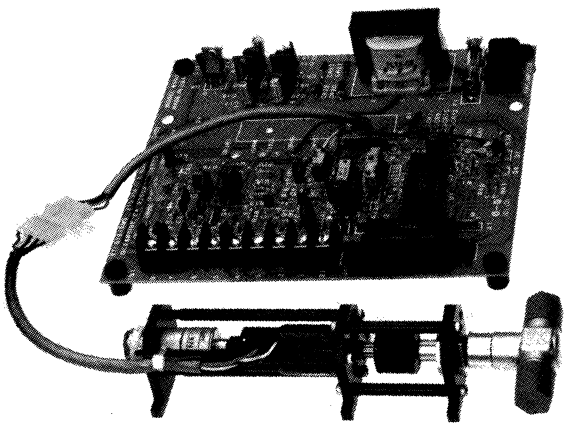
MODEL VA7003 VALVE ACTUATOR CHASSIS MOUNT



OPTIONS: Manual knob adjust
Feedback potentiometer
Limit Switches
Color combinations
Enclosures

VALVE ACTUATOR DRIVER BOARD Model VC6500

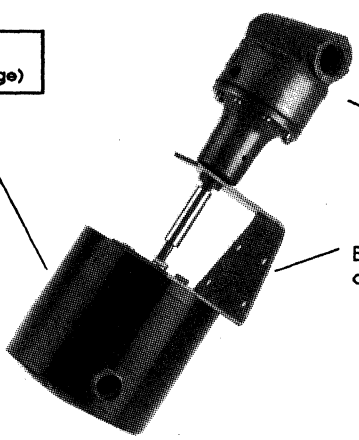
- Servo Control with feedback.
- Inputs to position valves are:
  0 to 10VDC,
  4 to 20 MA or
  16 Bit binary.
- Non-Standards available.



For quotation: Specify valve torque, number of turns, type of liquid or gas. Or, send us your valve to be motorized. Actuators can be panel or chassis mounted, or we will place actuator in an enclosure.

WATER REGULATOR ADJUSTOR Model VM100 (D.C. or A.C. Motor Voltage)

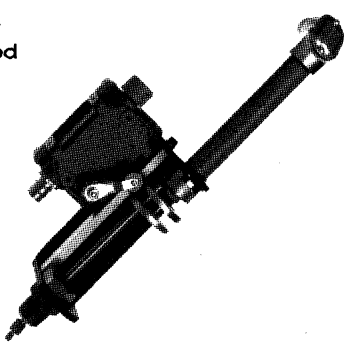
Housing is 5" in Dia. and contains:
- End travel limit switches.
- Feedback position potentiometer.
- Multiple motors (patented), provides higher torque, better load distribution and prevents catastrophic motor failure.
- Energy absorbers (patented) reduces sticking.



Valve or regulator (customer provided or designated).

Bracket is detachable or custom made.

WATER REGULATOR FEEDBACK Model VL2350S



FOR MOTORIZED POTENTIOMETERS SEE OUR AD IN EEM (Motors, Drives & Rotating Components). FOR SERVO POSITIONING CONTROL CIRCUITRY, SEE OUR AD IN EEM (Control Systems & Components). SEE OUR POTENTIOMETERS IN EEM (Potentiometers,Trimmers, Controls & Rheostats)

CHARACTERISTICS

RPM: Rigid one piece housing eliminates bearing alignment problems

RINGS: Coin Silver 5 AMP Rings

BRUSHES: Silver Graphite
Fabricast Grade FAG 180 (80% AG — 20% C)
Two brushes per ring
Brushes individually removable and replaceable

NOISE: 10 Milliohms dynamic resistance MAX
5 Milliohms MAX with 4 brushes per CKT

HI-POT: 1000 VAC 60 CYCLE for 15 seconds.

ROTOR: One piece steel sleeve
Ring complement vacuum cast on sleeve as unit with epoxy dielectric

COVER: Easily removable for brush and ring inspection

BEARINGS: Shielded or sealed ball bearings

* RING COMPLEMENT MAY BE LIMITED BY ABILITY TO PASS ROTOR LEADS UNDER BEARINGS.
* FOR 50 AMP STANDARD POWER ASSEMBLIES SEE POWER ASSEMBLY SECTION.
* INSTRUMENT AND 50 AMP POWER CIRCUITS MAY BE CAST ON COMMON SLEEVE.

CHARACTERISTICS

RPM: Rigid one piece housing eliminates bearing alignment problems

RINGS: Coin Silver 5 AMP Rings

BRUSHES: Silver Graphite
Fabricast Grade FAG 180 (80% AG — 20% C)
Two brushes per ring
Brushes individually removable and replaceable

NOISE: 10 Milliohms dynamic resistance MAX
5 Milliohms MAX with 4 brushes per CKT

CURRENT: Noted in tabulated block
Rating may be doubled with 4 brushes per CKT

HI-POT: 1000 VAC 60 CYCLE for 15 seconds

ROTOR: One piece steel sleeve
Ring complement vacuum cast on sleeve as unit with epoxy dielectric

ROTOR LEADS: 5 AMP Leads — 20 GA per MIL-W-16878 TYPE "E"
Lead exit as shown on most units. Maximum ring complement may require smaller wire or leads to exit both ends.

HOUSING: One piece tube construction

COVER: Easily removable for brush and ring inspection

BEARINGS: Shielded or sealed ball bearings

CHARACTERISTICS

RINGS: Coin Silver AMP Rings.
Copper 50 AMP Rings.

BRUSHES: Silver Graphite.
Fabricast Grade FAG 180 (80% AG – 20% C)
Two brushes per ring
Brushes individually removable and replaceable.

NOISE: 10 Milliohms dynamic resistance MAX.
5 Milliohms max with 4 brushes per CKT.

CURRENT: Noted in tabulated block.
Rating may be doubled with 4 brushes per ckt.

HI-POT: 1000 VAC 60 cycle for 15 seconds.

ROTOR: One piece steel sleeve.
Ring complement vacuum cast on sleeve as unit with epoxy dielectric.

ROTOR LEADS: 5 AMP Leads – 20 GA per MIL-W-16878 TYPE "E"
50 AMP Leads – 8 GA – Teflon
Lead exit as shown on most units. Maximum ring complement may require smaller wire or leads to exit both ends.

BRUSH BLOCK: Glass epoxy laminate.
Optional mounting methods shown.

PART NUMBER CODING – Specify fully when ordering.

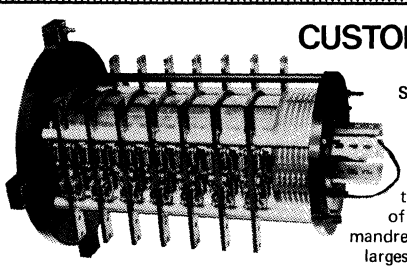
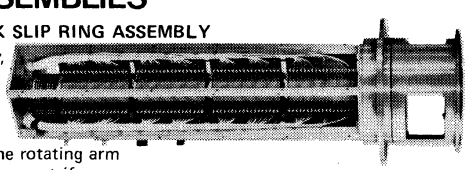
CUSTOM DESIGNED SLIP RING ASSEMBLIES



CUSTOM 7000 AMP SLIP RING ASSEMBLY

This slip ring assembly, as designed and manufactured by Fabricast, Inc., is used to supply 7000 amperes of current to the rotating mandrel of the world's second largest spin forging machine.

CUSTOM 222 TRACK SLIP RING ASSEMBLY



This slip ring assembly, as designed and manufactured by Fabricast, Inc. was used to complete the electrical circuits to the rotating arm of an astronaut carrying centrifuge.

The unit consists of 50 amp. power, 5 amp. instrumentation and 50 megacycle coaxial modules.

FABRICAST WILL ALSO CUSTOM DESIGN SPLIT RING ASSEMBLIES AND SEGMENTED SLIP RING ASSEMBLIES

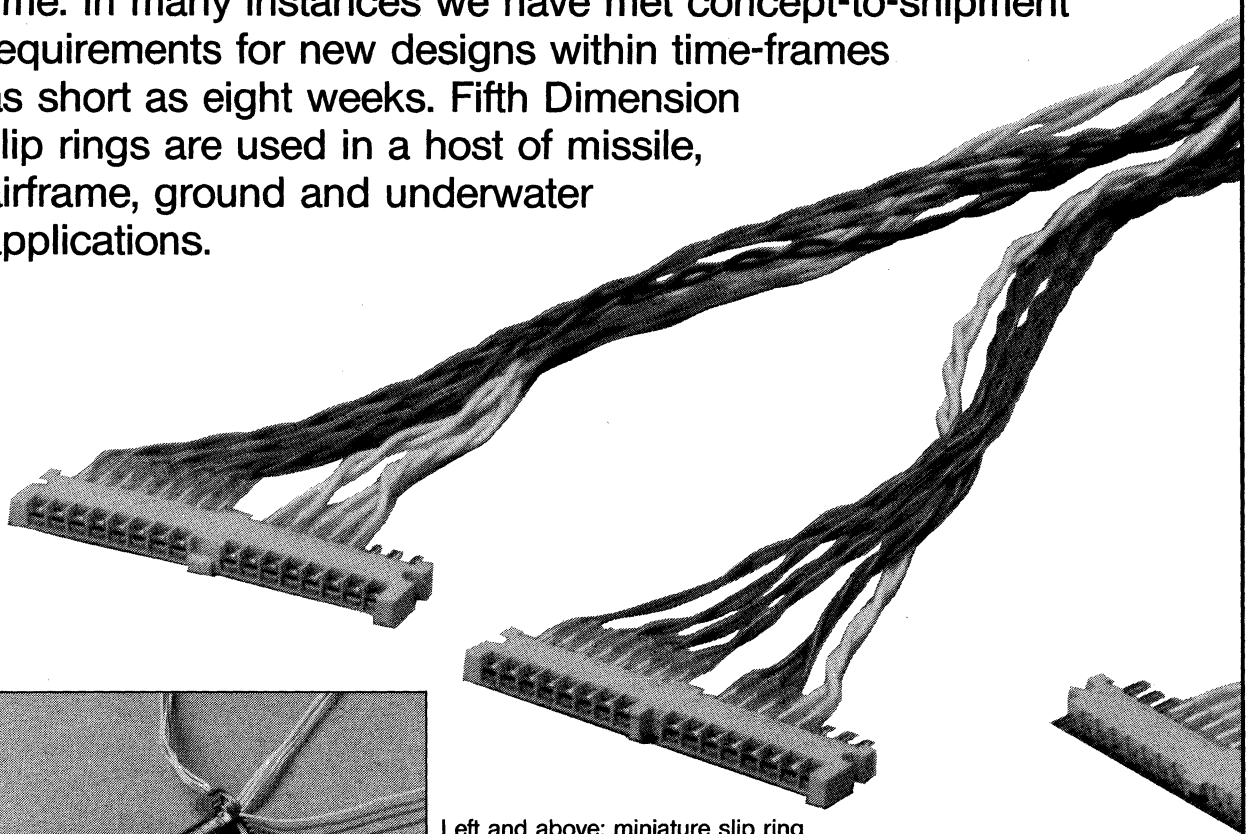
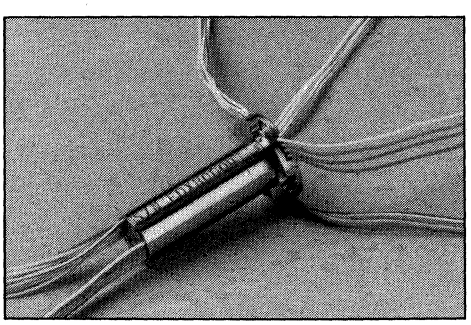
FIFTH DIMENSION INC.

Slip Rings

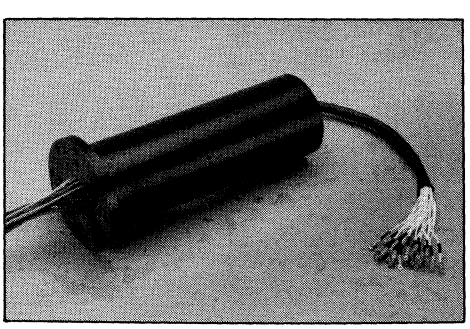
High-Precision, Short Delivery Cycle

Look to Fifth Dimension Inc. for the development and production of high-precision, high reliability slip rings in remarkably short time. In many instances we have met concept-to-shipment requirements for new designs within time-frames as short as eight weeks. Fifth Dimension slip rings are used in a host of missile, airframe, ground and underwater applications.





Left and above: miniature slip ring capsules used in the gimballed pitch, roll and azimuth axes of the Trident II Mark VI Inertial Guidance System. Their small size has been achieved without sacrificing reliability.



Submersible slip ring assembly.

Fifth Dimension slip ring capabilities include:

- Miniature
- Helicopter
- Vehicular
- Pedestal
- Cable Reel
- Robotic
- Twist Capsules

FIFTH DIMENSION INC.

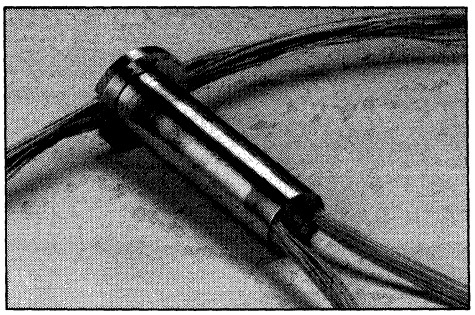
801 New York Avenue, Trenton, NJ 08638-3982 • Tel: (609) 393-8350 • FAX: (609) 599-9508

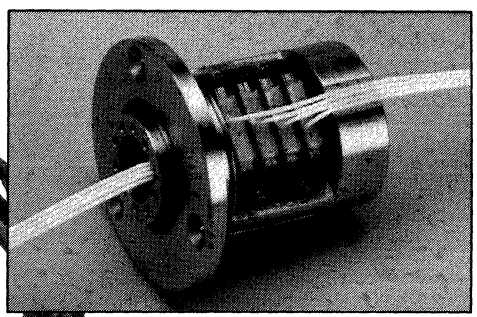
FIFTH DIMENSION INC.

Slip Rings

High-Precision, Short Delivery Cycle

Aircraft slip ring assemblies are supplied for rotary and fixed-wing applications.





Cable reel slip ring for applications such as submarine antennas and underwater towed vehicles.

Facilities

- Clean rooms for slip rings manufacturing certified to meet Class 100,000. Critical final assembly takes place on laminar flow benches certified to Class 1.
- Complete machine shop
- Mold tool and die fabrication
- Extensive precious metal plating capabilities with laboratory-type control
- Epoxy casting and molding
- Automatic noise and torque test stations
- Comprehensive electrical, mechanical and environmental testing laboratory

Documentation

Where required, documentation can be as comprehensive as Class 1 wherein each manufacturing step requires operator sign-off and complete traceability of all component parts is maintained.

Short Delivery Cycle

At Fifth Dimension, project management is geared to short delivery cycles without compromising high quality. We invite you to write or call to discuss your slip ring requirements.

MINIGLOSSARY SERVO COMPONENTS

SPECIFICATIONS

Excitation: The input voltage and frequency.

Transformation Ratio: The ratio of the output voltage, at maximum coupling, to the input voltage.

Phase Shift: The lead or lag of the output voltage with respect to the input voltage. For most synchros and resolvers, the phase shift can be approximated by the angle whose tangent is the ratio of the primary winding's DC resistance to its reactive component.

Impedance: Specified as R + jX, where R is the AC resistive component and X is the reactive component. Important impedances are: (a) Z_{po} (or Z_{ro} for rotor primary units), which is the impedance of the primary winding with the secondary open; (b) Z_{so}, which is the impedance of the secondary winding with the primary open; and (c) Z_{ss}, which is the impedance of the secondary with the primry shorted (essentially when driven by a low impedance).

Null Voltage: The voltage remaining when the unit is at electrical zero or in the minimum coupling position.

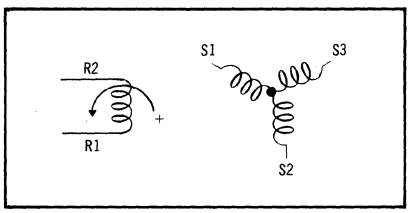
Accuracy: The error of the position of the rotor with respect to the electrical angle. It is defined as the output voltage driven by the "speed" (pole pairs) of the unit, referenced to the starting point of the calibration (usually the electrical zero position). Error is commonly expressed in minutes of arc (1/60 of a degree) or in seconds of arc.

Loads: For a transmitting unit, the impedance that the output voltage signal faces. This can be a receiver, a differential with its load, a control transformer, an A/D converter, etc.

Operation Temperature: The ambient temperature range over which the unit performs its primary function.

FUNCTIONS

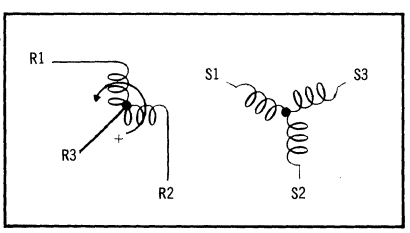
Transmitter: A unit with a Y-connected stator that outputs a signal proportional to the position of its single-phase excited rotor. High power units, called "torque transmitters," are used to drive one or more receivers. Low power transmitters are used to drive control transformers.



Receiver: A unit with a three-phase stator excited by the input, usually from a torque transmitter, and a single-phase rotor that follows the resulting stator field. Usually used to drive a position pointer.

Control Transformer: A unit with a three-phase stator excited by the input from a transmitter and a single-phase rotor mechanically driven to the null position by an external motor or other device.

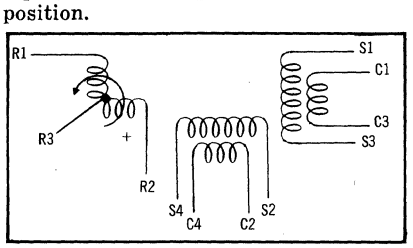
Differential: A unit with a three-phase stator and a three-phase rotor. It is usually connected between a transmitter, which excites its stator, and a receiver or control transformer. It can be used to "dial in" correction factors for the synchro chain.



Transolver: A unit with a three-phase stator and a two-phase rotor that can be used either as a control transmitter (with one rotor phase excited and the other shorted), or as a control transformer with the signal obtained from one phase of the rotor—making sure the other phase is equally loaded to prevent unbalances.

Differential Resolver: A unit with a two-phase stator and a three-phase rotor that is used as a transolver with the advantage that when connected as a control transformer, the signal does not travel through slip rings.

Resolver: A unit with a two-phase rotor and a two-phase stator that is used to create or receive SIN-COS signals such as vector resolutions for solving inertial platform coordinate transformations, unknowns of right triangles, etc. Resolvers can also be used as transmitting, differential, or receiving elements by proper choice of impedances. It is also possible to use resolvers as phase shifters where, in one mode, one rotor phase is excited and the two stator windings are feeding an appropriate RC network and indicating a phase shift, referred to the input, that corresponds to the rotor position.



Compensated Resolver: A unit with a "2×2" phase stator and a two-phase rotor used as a resolver with the added benefit of feedback windings in parallel with the stator windings that increase the useful accuracy over a wide range of environmental operating conditions.

Linear Transformer: A unit with a single-phase stator and single-phase rotor designed to provide a linear output voltage that is directly proportional to the rotor input angle. It operates over a range of less than ±90°, and is analogous to a potentiometer providing infinite resolution, but without contact between the elements. It can be used only with AC voltages.

Brushless Synchro: Available in two types—hairspring and bobbin. Hairspring synchros use spiral wound conductor springs to pick off the rotor signal, and are generally limited to a ±165° rotation. Most have mechanical stops to prevent damage due to overrotation. Bobbin synchros pick off the rotor signal with rotary transformers inside the unit, allowing the rotor unlimited motion.

Pancake Unit: A name derived from the physical dimensions of the unit, which has a diameter that exceeds axial length. Sizes range from under 1" to 20" or more. The unit is frequently used as a gimbal pickoff element and is designed to fit a particular application envelope. It can be supplied as a rotor and stator only.

GRAPHALLOY® SILVER GRAPHALLOY BRUSHES and BRUSH & SLIP-RING ASSEMBLIES...

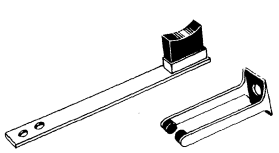
USED IN MICROWAVE EQUIPMENT • SERVO SYSTEMS • SYNCHROS • INVERTERS • THERMOCOUPLE and STRAIN GAGE CIRCUITS • PULSE SYSTEMS • COMPUTER GROUNDING CONTACTS • TORQUE INDICATORS • MEDICAL EQUIPMENT • PACKING MACHINERY

GRAPHALLOY® BRUSHES

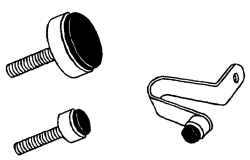
Silver-Graphalloy Brushes have been widely used because of low *and* constant contact drop, extremely low electrical noise, *and* long life. Over 100 grades are now serving in a wide variety of applications. Silver-Graphalloy Brushes on ½-inch-diameter coin silver slip rings have operated successfully in highly critical electrical circuits at speeds up to 100,000 r.p.m.

Standard sizes from ⅛"-square to ¾"-square. Many sizes in stock.

Our Engineering Department will assist you in determining the exact grade of GRAPHALLOY for your needs. *Ask for our Brush Inquiry Form 109.*



LEAF SPRINGS



CUP CONTACTS

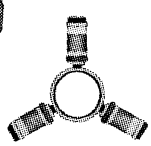
GRAPHALLOY® SLIP RINGS

We supply Coin Silver and Bronze Slip Rings, both *cylindrical* and *flat* types ...and recommend three brushes per ring...spaced at 120°...for best contact. The cylindrical type are designed for press fitting over standard steel shafting. The flat type rings are designed for nesting either on an insulated plate or for molding into insulation. Insulated slip rings of either type, or slip-ring assemblies, can be furnished with leads attached.

No. 168 Series FLAT TYPE to 20" O.D.

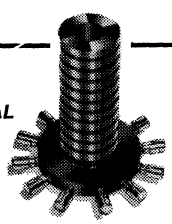
Standard FLAT Rings have ¼" radial contact surface and ⅛" radial spacing between adjacent rings.

No. 116 Series CYLINDRICAL TYPE to 36" O.D.



Typical Layout

Model 319 CYLINDRICAL SLIP-RING Assembly



SOLID COIN SILVER RINGS

Model	Rings	Length

GRAPHALLOY BUSHINGS and PILLOW BLOCKS

Survive unlubricated! Replace oil-lubricated bushings in synchros, instruments, timers and missiles. Advantages:

(1) Lower friction at room temperatures;
(2) No oil to solidify at low temperatures;
(3) No oil to carbonize at prolonged elevated temperatures.
(4) No oil or grease drag.

Ask for Data Sheets 270 and 277 on Miniature Bronze-Graphalloy Bushings.

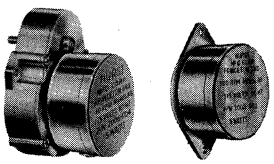
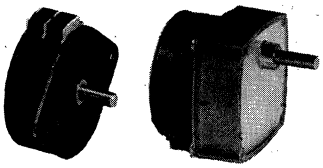
STEPPING AND SYNCHRONOUS MOTORS



A SERIES

Designed for long life at rated loads. Geared models have hardened steel gears and pinions running on steel studs. Hi-Torque rotors available; also voltages other than those shown may be specified. Widely used in applications requiring high quality components.

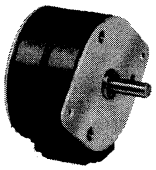
Dim. Geared: 2.81" H x 1.63" D
Direct Drive: 1.94" H x 1.02" D



S SERIES

Compact direct drive or geared motors for applications where space is limited and precise performance is required. Geared motors have typical torque ratings to 200 oz-in @ 200 p/s (max. gear train loading). Dual-stack motors featuring greater torque are now available. Call or write for complete specifications.

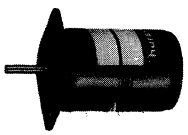
Dim. Geared: 2.45" H x 1.78" D
Direct Drive: 2.28" H x .97" D



SC SERIES

SC Series stepping motors have approximately 66% greater torque yet are only ⅔" longer than the popular SAS Series motors. Dual sleeve bearings are standard but ball bearings as well as double ended shafts may be specified.

Dim. Direct Drive: 3.13" H x 1.41" D



BA SERIES

This exceptionally small stepping motor — a mere 0.895" x 1.438" — has a relatively high torque to inertia ratio. Its design recognizes the demand for small components to fit where space is severely limited. Applications are found in a wide range of medical and scientific instruments and robotics. These stepping motors are also recommended for low duty-cycle, battery operated equipment.

Dim. Direct Drive: .895" H x 1.438" D

DIRECT DRIVE STEPPING MOTORS

	AS and ABS	SAS and SBS	SCS	BAS
STEP ANGLE (degrees)	7.5 and 15	7.5 and 15	7.5	18

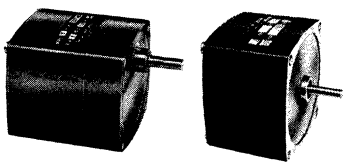
EMERSON ELECTRIC COMPANY, BOX 326, PRINCETON, IN 47670. TELEPHONE (812) 385-2564. FAX (812) 386-7504

STEPPING AND SYNCHRONOUS MOTORS



T SERIES

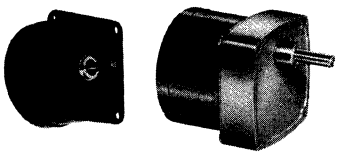
Compact, rugged and efficient, TS Series motors are designed for heavy-duty applications. Geared models offer hardened steel gears and pinions with dynamic torque ratings up to 250 ounce-inches. Both geared and direct drive motors have machined die cast housings. Sleeve bearings are standard but ball bearings may be specified on the output shaft.

Dim. Geared: 2.38" H x 2.53"D
Direct Drive: 2.38" H x 1.75" D

KVS SERIES

KVS Series motors are hybrid permanent magnet types. The motors are constructed with multitoothed rotors and stators of unequal tooth number so that a vernier effect provides the equivalent of a large number of poles and small step angles without the necessity for gearing. Standard KVS motors are furnished with 6-lead bifilar windings for 12 VDC operation. Other voltages and 2-phase, bipolar windings may be specified.

Dim. Direct Drive: 2.38" H x 2.44" D



P SERIES

PAS and PBS Series motors provide users with a choice of direct drive or geared models, standard or Hi-Torque rotors and, for direct drive models, a choice of mounting plates. Voltages other than those shown may be specified.

Gearing is scaled to provide a maximum dynamic gear train loading of 200 ounce-inches.

Dim. PAS Geared: 2.38" H x 2.25" D
PAS Direct Drive: 2.28" H x 1.56" D
PBS Geared: 2.38" H x 2.13" D
PBS Direct Drive: 2.28" H x 1.41" D

R SERIES

Designed specifically to combine greater torque and small size, RAS and RBS stepping motors meet many industrial and instrument requirements. Standard 7.5° step angle motors have a torque rating at 4-5 p/s of 23 ounce-inches. The Hi-Torque model is rated at 29 ounce-inches. Models with 15° step angles are rated, respectively, 13 and 17 ounce-inches.

Dim. Direct Drive: 2.88" H x 1.84" D

DIRECT DRIVE STEPPING MOTORS

	TS	KVS	PAS and PBS	RAS and RBS
STEP ANGLE (degrees)	7.5	1.8 and 3.75	7.5 and 15	7.5 and 15
STEPS PER REVOLUTION	48	200 and 96	48 and 24	48 and 24
2-PHASE HOLDING TORQUE (oz-in)	14 and 15.5*	25 and 21	11, 12.3, 14, 16.5	24, 27, 33, 37
RATED TORQUE @ 4-5 p/s (oz-in)	8.5 and 10.4*	18.5 and 14	5.8, 7.3, 8.5, 11.5	13, 17, 23, 29

FULL LOAD TEMPERATURE RISE (°C)	27 to 38	31 to 45	37 or 46
WEIGHT (oz)	20	13	26

GEARED SYNCHRONOUS MOTORS

	T and TA	PA and PB
SPEED @ OUTPUT SHAFT (rpm)	1 to 150	1 to 360
RATED TORQUE (oz-in)	13-250*	6 to 200
INPUT POWER (Watts)	7 or 9.5	7.5 to 11
CAPACITOR VALUE (mfd)	.68 or .85	.68 to 1
WEIGHT (oz)	27	18

*Maximum gear train loading

NOTES
1. Capacitors furnished with most standard synchronous motors. (No capacitor furnished with TA or BA Series motors).
2. (PA and PB). Square mounting plate is standard for direct drive models.
3. All motors except some TA Series motors operate on 115 VAC, 60 Hz. Some TA models operate on 115 VAC, 50 Hz.

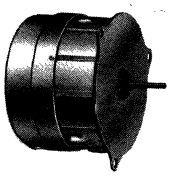
HYSTERESIS SYNCHRONOUS, REVERSIBLE MOTORS



CA SERIES

Efficient, compact CA Series hysteresis synchronous motors have a range of standard speeds from 1200 rpm (direct drive) to ⅓ rpm (geared). Gear train materials include high quality bronze bearings, brass gears, hardened steel pinions and wheel shafts.

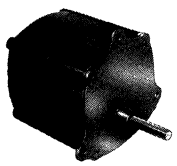
The gear torque rating is 100 ounce-inches at 1 rpm.

Dim. Geared: 2.13″ H x 2.5″ D
Direct Drive: 1.63″ H x 2.5″ D

DA/DB SERIES

Heavy duty DA and DB gear motors maintain timing accuracy and are offered in a broad range of shaft speeds 120 rpm through 24 rpd. They are recommended for applications requiring high gear torque ratings (100 oz-in max.) and small size.

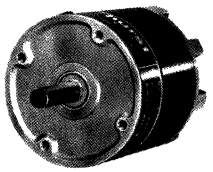
Dim. DA 1.8″ H x 2.5″ D
DB 2.05″ H x 2.5″ D



GA SERIES

GA Series motors provide the highest torque ratings of all the Hurst gear motors — 600 oz-in at 1 rpm. A choice of 14 different speeds, from 1 to 300 rpm, are available as stock models for operation at 115 VAC, 60 Hz. Other speeds may be specified. High quality construction throughout assures dependable field performance.

Dim. Mounting holes: 2.99″ W x 2.37″ H x 3.06″ D



MB SERIES

MB Series motors have inverted rotors and at 60 Hz have a synchronous speed of 1800 rpm. The "fly wheel" effect of the increased rotor inertia provides smooth operation with more uniform angular velocity characteristics than other types. These motors are particularly suited to applications requiring low flutter, direct drive, synchronous operation.

Dim. 2.66″ H x 2.0″ D

DIRECT DRIVE OR GEARED MOTORS

	CA	DA/DB	GA	MB
SPEED @ OUTPUT SHAFT (rpm)	⅓ to 1200	1 to 120	1 to 300	1800
RATED PULL-OUT TORQUE (oz-in)	100 to 0.10	100 to 1.25	600 to 2	5.50(C) 5.25(A) 6.00(B)

WEIGHT (oz)	15	14	40	28

(A) Pull-in torque
(B) Locked rotor torque
(C) Pull-out

NOTES 1. Capacitors are furnished with most motors.
2. MB Series. Thermal protection available.

CUSTOM DESIGNED MOTORS A HURST SPECIALTY

For more than 30 years we have been providing top-drawer companys with special purpose motors. Often they are adaptations of standard Hurst motors, thus costs are kept to a minimum. In other cases, completely new motors are designed to exacting specifications.

BRUSHLESS D.C. MOTOR CAPABILITIES

Over the past several years our design, engineering and production groups have become completely familiar with brushless D.C. motors. Sophisticated machine tools are in place and meeting production needs for these motors. We invite your inquiries.

Virtually all piece parts of Hurst motors — rotors, shafts, gears, pinions, etc. — are produced in-house for stricter quality control. That is why all of our motors bear this symbol of precision:

hurst

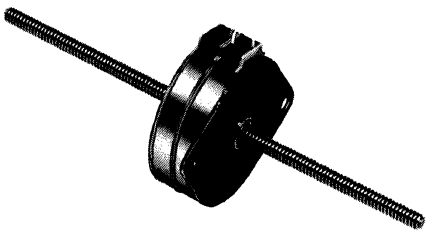
LINEAR ACTUATORS, Stepping or Synchronous



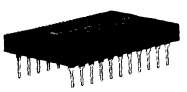
Stepping (SLS Series) or synchronous (SL Series) linear actuators are reversible, permanent magnet rotor types. An integral part of the rotor assembly is a sintered bronze nut for extended life. The nut accepts a ¼" diameter, .048 pitch Acme screw that provides linear motion for pushing, pulling, lifting and positioning applications. Standard 8" lead screws have a maximum travel of 6.75" and a maximum thrust of 25 pounds. Screws of other lengths may be specified. Ball bearings are standard. SL (synchronous) Series motors provide travel of .24 inch per second. SLS (stepping) Series motors have a resolution of .001" per step or 1000 steps per inch.

New 600 rpm versions of these motors are now available. They have all the quality features of the SL and SLS Series. The direct drive model has a linear travel rate of .48"/sec. The stepping version has 500 steps/in. Consult the factory for complete specifications.

CONTROLS FOR STEPPING MOTORS

MODEL 220001

The 220001 is a DIP package containing all the basic circuitry required for operation of a 4-phase, unipolar stepping motor: a pulse generator, bidirectional logic sequencer, and phase drivers. It is fabricated as a thick film hybrid circuit using CMOS and bipolar components for small size and low power consumption.

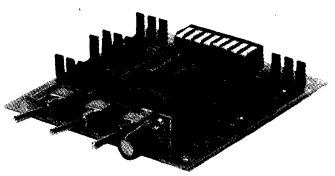


FEATURES:

- 5V logic level control of
  - — rotational direction
  - — run/hold
  - — single step (jog)
  - — phase driver disable
- 2-on, 2-off phase sequencing
- drivers rated at 500 ma per phase
- operation from single 6 to 24 VDC supply

MODEL EPC-016

The EPC-016 is a PC board assembly containing the 220001 hybrid, power drive transistors, and all external components needed for manual control of a stepping motor. A motor, DC power supply, and this board form a complete system.



FEATURES:

- 3 position switch for operation of motor in continuous step, jog, or hold mode
- CW/CCW rotation selection switch
- phase disable switch
- step frequency adjust potentiometer
- 2 amp per phase drive capability
- operation from single 6 to 24 VDC supply
- Dimensions: 4" x 4"

MODEL EPC-013

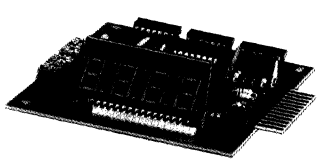
The EPC-013 is a PC board assembly with additional stepping motor control capabilities.

FEATURES:

- sequencing and drivers for 3 or 4 phase unipolar motors
- 3 modes of excitation
  - — full step, 2 phases on
  - — full step, 1 phase on
  - — half step, alternating 1-2 phases
- ramping oscillator for step rate control
- adjustable ramp rates
- linear or exponential ramp profile
- single step (jog) input
- gating for external control of input pulses
- manual or digital interface to control functions
- 2 amps per phase drive capability
- operation from single 6 to 30 volt supply
- 5V regulator output available for external use
- Dimensions: 6.5" x 4.5"

MODEL EPC-014

The EPC-014 is a general purpose presettable counter/display PC board assembly suitable for use with most stepping motor drive systems. In a typical application, it is preset with a number of motor steps, counts and displays the steps as executed, and provides a control signal when the preset count is reached. It is also suitable for count and control applications using input pulses derived from sources other than step commands, e.g., from an external encoder or other sensor.



FEATURES:

- 4 decade counter/display
- manual count preset via BCD switches
- optional remote location of count preset switches and display
- manual or digital control of enable input
- 5V logic level output latch
- operation from 5VDC supply
- Dimensions: 4.0" x 4.5"

MODEL EPC-015

The EPC-015 is a totally encased, hand-held driver containing all the control features of the EPC-016 plus selectable display of step frequency or step count. A motor, DC powder supply, and this controller form a complete control system.

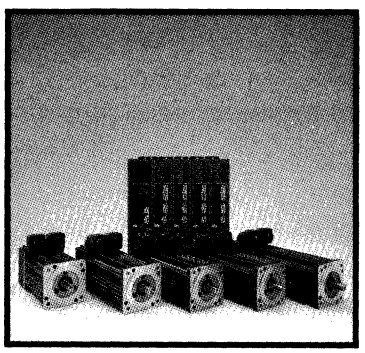
FEATURES:

- 4 decade frequency/count display
- all control features of EPC-016
- 1 amp per phase motor drive capability
- operation from a single 6 to 24 VDC supply
- compact size: 1" x 3.5" x 6"

INDUSTRIAL DRIVES

INNOVATIVE PRODUCTS FOR MOTION CONTROL

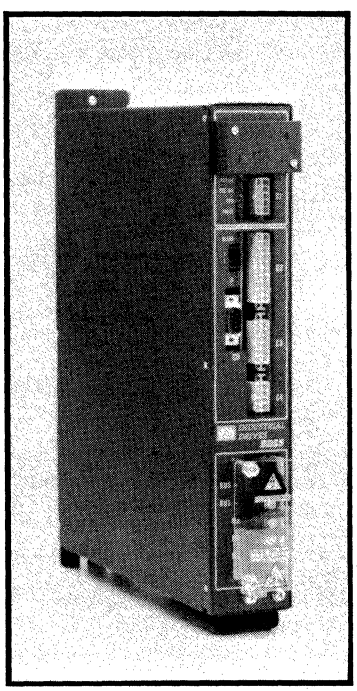
NEW GOLDLINE SERIES
Unsurpassed Brushless Servo Technology



- 0.6 to 82.0 lb-ft of continuous torque—speeds to 7,500 RPM
- Rugged TENV IP65 sealed construction for use in harsh environments is standard
- Highest acceleration and deceleration capabilities
- Class H insulation provides in excess of 9 years of winding life under rated conditions
- Compact single board design minimizing interconnections and vastly increasing reliability and life
- Precise torque and velocity control
- Continuous power ratings to 40 KVA—peak power ratings to 68 KVA
- Personality card in the amplifier matches the motor and drive to your application

NEW BDS5
DIGITAL BRUSHLESS SERVO AMPLIFIER/POSITIONER

The BDS5 is the newest member of the recently developed family of **GOLD**LINE products. It is a full-featured digital positioner and servo amplifier—all in one compact package.



- Low cost—very affordable with a full set of advanced features
- Easy installation—the servo amplifier and the positioner are integrated into one package, therefore, eliminating many interconnections
- Simple programming language—uses BASIC-like commands and allows you to write operator-friendly, menu-driven application software
- MOTION LINK—a powerful, menu-driven communications package for your IBM PC or compatible computer that enables the BDS5's programs and variables to be received from or saved to a disk drive
- True multitasking with several priority levels
- Self-tuning for automatic compensation
- Complete set of error diagnostics
- Smallest, totally integrated package available to motion control users
- Totally designed and manufactured by INDUSTRIAL DRIVES

For product information please call our Literature Hot Line, 1-800-77-SERVO!

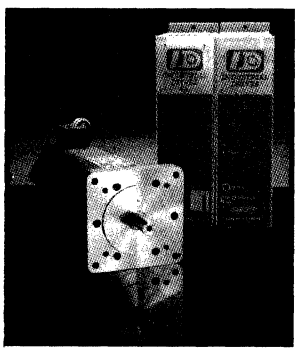
INDUSTRIAL DRIVES

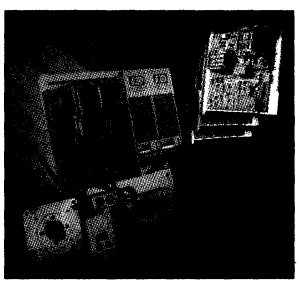
INNOVATIVE PRODUCTS FOR MOTION CONTROL

NEW EXPLOSION-PROOF BRUSHLESS SERVOMOTORS



- 1.8 to 11.2 lb-ft of continuous torque—speeds to 6,000 RPM
- Designed to operate in hazardous locations
- Same superior motor design as other brushless motors—utilizes high energy neodymium-iron-boron magnets
- Integral frameless resolver with amplifier options which allow closing a position loop
- Applications include chemical plants; munitions production; paint spraying; gasoline pumping equipment; and process control, and air and hydraulic pumps in hazardous environments
- U.L. listed

DIGITAL POSITIONING SYSTEMS

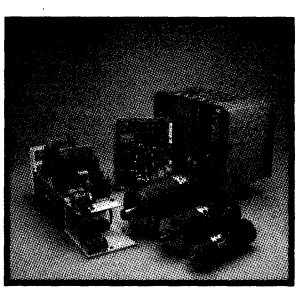


- Complete systems—all components premounted on back panel and thoroughly tested
- Menu-driven software tailored to your specific machine's operation sequence
- Built-in diagnostics for simplified troubleshooting
- Standard and custom systems available

SUBMERSIBLE MOTORS AND DRIVES

- Power ratings from 0.3 to 20 HP
- Pressure compensated—reliable operation of motors and drives to depths of 20,000 feet (10,000 PSI)
- Integral motor/controller packages
- Special control drives minimize audible noise, EMI, RFI, and structure-bourne vibrations—designed to military specifications

BRUSH-TYPE SERVOMOTORS AND DRIVES



- Permanent magnet DC servomotors—advanced designs
- Wide motor selection 35 oz-in to over 100 lb-ft of continuous torque—speeds to 6,000 RPM
- Patented technology PWM and SCR amplifiers complement motors with features including high bandwidth, commutation current limits, and overspeed shutdown
- Amplifiers 6 to 200 amps continuous

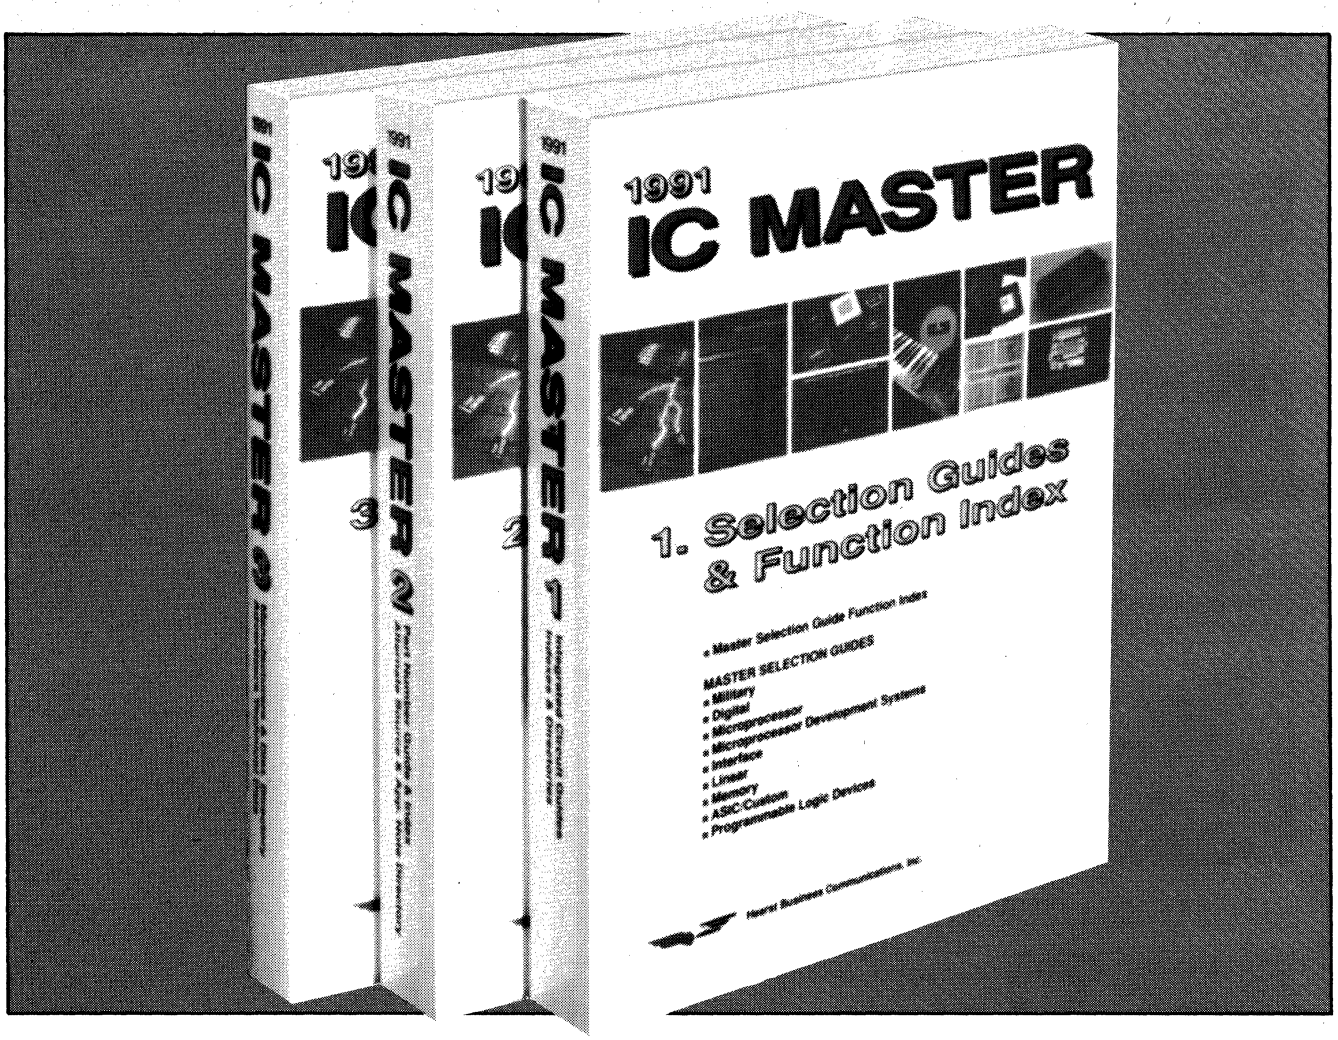
SUPER TIME SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your question has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516) 227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Communications, 645 Stewart Ave., Garden City, NY 11530. She'll mail you the IC Master subscription form right away.

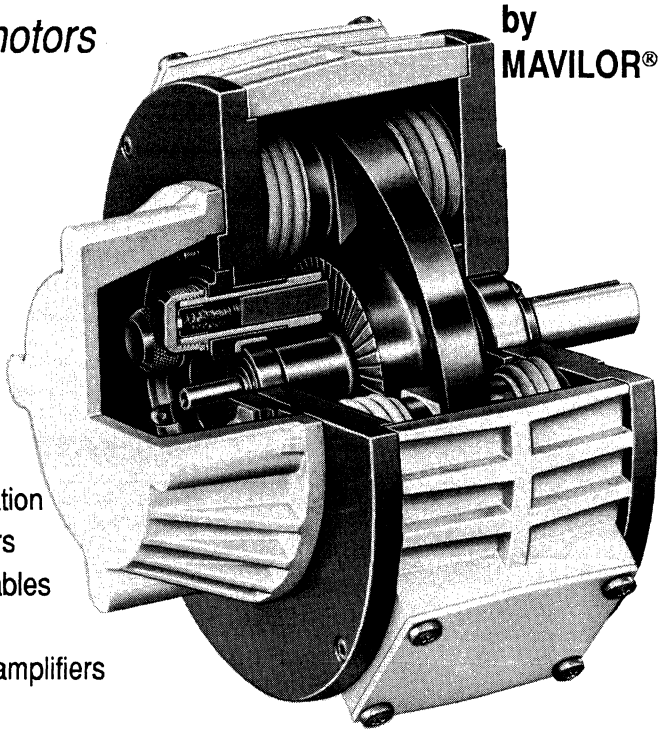
And, if you tell her you saw it in the 1991/92 EEM, she'll take $10 off the subscription price!

IC MASTER

INFRANOR Compact Servo Technology

"Quite possibly, the best servo motors and amplifiers in the world."

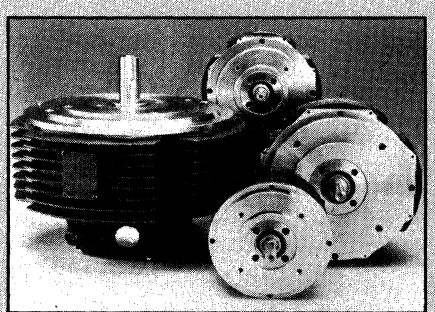
by MAVILOR®



Compact, space saving, pancake design, fits where others don't!
Ultra-smooth, cog-free operation at low speeds to 0.1 RPM
Speed capability to 10,000 RPM
Peak output torques to 3,000 in-lb.
Efficiencies to 91%
Brush and Brushless models available
Ironless, low inertia rotor for fast acceleration
Integral tachs, brakes, encoders, resolvers
Shaftless models eliminate coupling variables
UL Recognized models available
Complete line of compatible DC and AC amplifiers

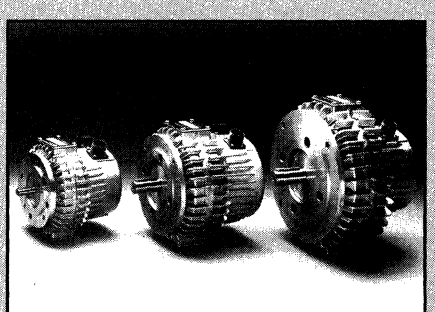
DC SERVOS

Compact, Pancake Design
Speeds to 10,000 RPM
Torques to 3,000 in-lb.
15,000 hour brush life
Cog-free to 0.1 RPM
Efficiencies to 91%
UL Recognized
Ironless, wire-wound industrial strength rotor handles 10X overcurrent



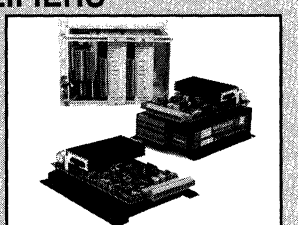
BRUSHLESS SERVOS

Compact, pancake design
Speeds to 6,000 RPM
Torques to 1363 in-lb.
Low inertia disc rotor
Ceramic rare earth magnets
3 Ms mech. time constant
Compact resolvers
Built-in brakes



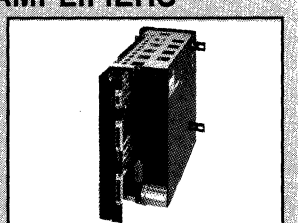
DC AMPLIFIERS

Compact design
Power outputs to 15 kW
Peak currents to 120 A
Non-audible switching
I^2t overcurrent protection
8 axes fit 19" rack
Efficiency to 96%



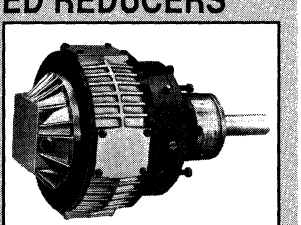
BRUSHLESS AMPLIFIERS

Drive any AC or DC brushless motor
6 axes fit 19" rack
Power outputs to 12 kW
Peak currents to 80 A
220 VAC single power source
I^2t overcurrent protection
Four quadrant operation



PRECISION SPEED REDUCERS

Zero backlash models available
Input speeds to 6,000 RPM
Torques to 51,000 in-lb.
Low input inertia
Efficiencies to 94%
Variety of ratios
200% overload capability



For Literature, Application Assistance, contact

STEPPER MOTORS & CONTROLS

INLAND MOTOR
KOLLMORGEN CORPORATION

Canned Stack Step Motors

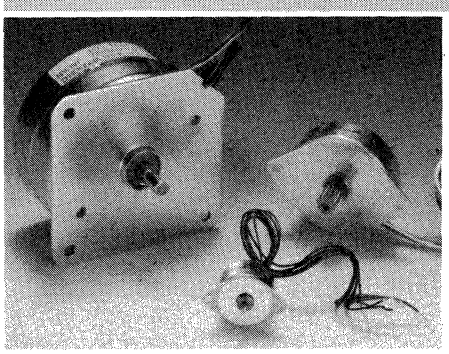
Model No.	Motor Dia. (mm)	Motor Length (mm)	Step angles	Pull-out torque With Double Voltage
PF25	25	15	7.5° or 15°	1.75 oz-in at 400PPS
PF35	35	20.6	7.5° or 15°	2.25 oz-in at 400 PPS
PF35T	35	15	7.5°	3 oz-in at 400 PPS
PF42	42	21.8	7.5° or 15°	6 oz-in at 200 PPS
PF42T	42	15	7.5° or 3.75°	6 oz-in at 200 PPS
PF55	55	25	7.5°	14 oz-in at 200 PPS
PF70	70	38	15°	35 oz-in at 100 PPS

Note: Selected models are available with gear heads and a choice of four magnet materials.
Ask for detailed data sheets.

Hybrid Step Motors

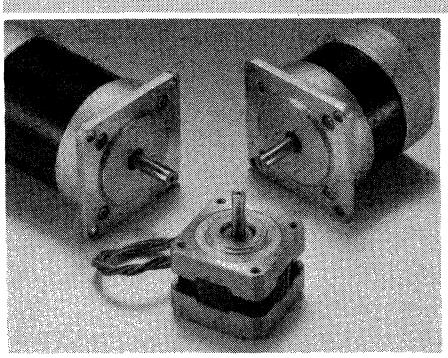
Model No.	Motor Dia. (mm)	Motor Length (mm)	Step angles	Pull-out torque With Unipolar chopper Driver (B1 windings)
PJ39	56	39	1.8°	18 oz-in at 500 PPS
PJ42	56	42	1.8°	27 oz-in at 500 PPS
PJ50	56	50	1.8°	39 oz-in at 500 PPS
PJ55	56	55	1.8°	55 oz-in at 400 PPS
PJ80	56	80	1.8°	85 oz-in at 400 PPS
PQ40	40 square	33	1.8°	8 oz-in at 400 PPS

PF Series



The PF series are permanent magnet stepping motors, with superior cost/performance, ideal for high volume mass production applications. Available in four step angles (3.75°, 7.5°, 15° and 18°), a choice of windings and magnet materials (isotropic ferrite, anisotropic ferrite, anisotropic plastic ferrite, neodymium (NdFeB), the PF series offer the design engineer the ultimate in flexibility to match the applications requirements with the most cost effective motors.
A variety of optional flanges, shafts and gear heads are available to meet the requirements of the most exacting applications.
Applications for the PF series include: printers, typewriters, facsimilie machines, copiers, word processors, automobile electrical equipment and medical equipment.

PJ & PQ Series



The PJ and PQ series are high performance, 1.8° step angle **hybrid** motors, ideal for applications requiring high torque and superior response characteristics. The PJ model (57 mm diameter, **size 23**) is available in a number of stack lengths and together with the PQ model (40mm square, **size 17**) enable the design engineer to choose the most cost effective motor to match the application's exact requirements.
Applications for the PJ and PQ series include: printers, facsimile machines, valves, pumps and a variety of automatic instruments.

Other Related Products From Inland Motor:

VR series variable reluctance step motors, PCL-Series programmable single chip high speed pulse generators, board level controller/drivers, and PTM series synchronous motors. SMC series low cost off-the-shelf controllers/drivers standard and micro-stepping versions with multiple axis addressing and input/output control.

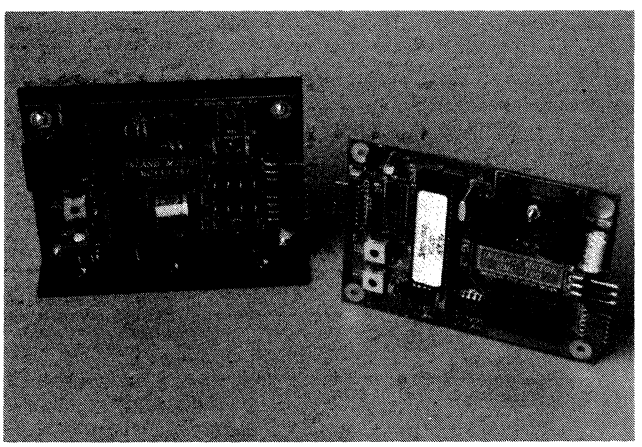
INLAND MOTOR
KOLLMORGEN CORPORATION

SMC Series
BOARD LEVEL STEP MOTOR MOTION CONTROLLERS/DEVELOPMENT TOOLS

SMC-500 Microstepping controller with built-in bipolar driver (2 amp and 3.5 amp) versions, input/output controller (four programmable inputs and four programmable outputs), RS232C serial multidrop interface to any PC (up to 8 controllers can be daisy chained on a single serial link), powerful high level language command set, on-board non-volatile RAM for program storage and auto-execution upon start up, microstepping software selectable up to 64 steps/step, unique mode indexing feature which enables microstepping mode changes on the fly to obtain high speed and high resolution at the same time and many useful and interesting features. The SMC-500 is an excellent quick-start development tool and it is also available in open chassis form as a very inexpensive OEM product. Size: 6″ × 4″ × 1.13″. Single supply operation 12-32 volts DC.



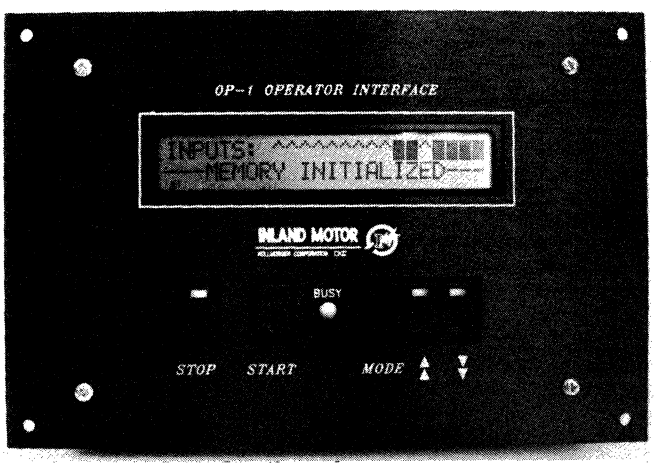
SMC-400 is identical to the SMC-500 in all respects except that it is designed for full and half stepping. It is a less expensive choice when microstepping is not required.

SMC-300 is a bipolar chopper driver with dip switch selectable ramps. It features a command buffer and TTL pulse and direction control. Single supply operation 12-32 volts DC. Size: 6″ × 4″ × 1.13″.

SMC-200 is similar to the SMC-300 except that it has a unipolar driver. Single supply operation 12-32 volts DC.

SMC-150 is a bipolar chopper driver with pulse train input and direction control. On board oscillator and adjustable potentiometer for self-contained variable speed operation. Size: 4.75″ × 3.63″ × 1.13″.

SMC-100 is similar to the SMC-150 except that it has a unipolar diver.



OP-1 & OP-2 are operator panels that hook up to the SMC-400 or the SMC-500. The built-in display and push button switches enable the manual setting of the program variables. The operating system can be customized to talk in application specific real units. An automatic calibration feature makes the OP and SMC400/500 combination truly remarkable and offers a low cost solution to a variety of applications such as fluid metering pumps, cut-to-length and may other applications where operator programmable indexing is required.

PCL Series
HIGH SPEED PROGRAMMABLE PULSE GENERATORS

The PCL series programmable pulse generator chips are motion control IC's that allow the programming of an output frequency with an external CPU. In addition, the PCL series are equipped with ramp up/down control which can vary the output frequency linearly. A variety of inputs and outputs are provided for sophisticated control through software. The PCL series are an ideal choice where the designer wishes to unload his CPU with the time consuming motion control tasks which can be taken over by these high performance, high speed chips.

PCL chips are suitable for use in either stepper or servo controls.

HOW TO SPECIFY A SLIP RING

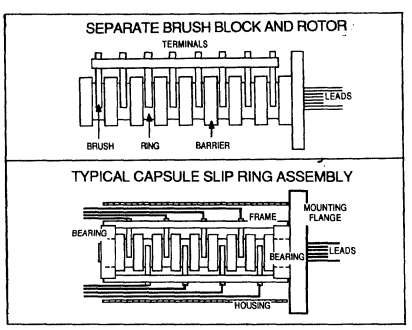
Many of the more than 4,000 Poly-Scientific slip ring designs are available for use in their existing configuration, or they may be modified to meet your specific requirements. New designs can also be created to meet the most demanding specifications.

Our engineers are experienced in a wide range of slip ring applications. We utilize resources such as the Anvil computer-aided design (CAD) system. And, a very active in-house quality circle program solicits the best inputs from all of our many skilled craftspeople, from start to finish.

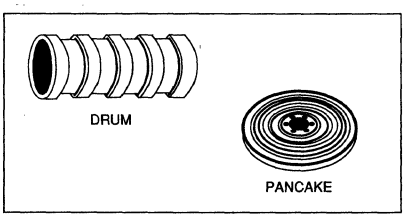
This section is designed to guide you through the process of specifying a slip ring. We've outlined below the major considerations that a slip ring engineer will need to know about your application.

A. Basic Slip Ring Design

Throughout these pages, you will see the terms "slip ring capsule" and "slip ring separates". The term "separate" indicates an individual rotor/brush block combination. The term "capsule" is used to denote a self-contained unit consisting of a rotor, stator and its own integral ball bearings.



There are two basic slip ring configurations to consider based on space allocation in your system: the more common drum approach where each ring is adjacent to the next along the centerline, somewhat like the threads on a bolt, and the pancake approach where the rings are concentric with one another like the grooves on a phonograph record. The pancake approach is used when length is at a premium but diameter is less restrictive.



B. Defining the Mechanical Envelope

The envelope is, of course, largely dictated by the space available in the system. The slip ring engineer should be given the maximum space available in the system so all existing candidate designs can be considered. It is imperative that the space required for the slip ring be specified in the early stages of the system design and that it be consistent with the structural and electrical demands.

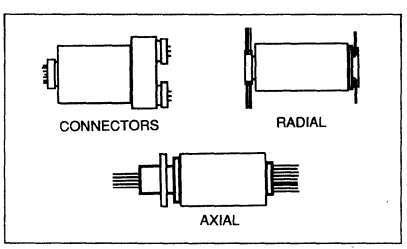
C. Defining System Interface Requirements

The slip ring engineer will need to know these system interface considerations:

1. Is a bore required through the slip ring for routing coolant plumbing, hydraulic lines, pneumatic lines, waveguides, etc? In such applications, the slip ring actually mounts concentric with these lines in the system.

2. How will the slip ring attach to the system? It is never advisable to hard mount both the rotor and the stator to the system since the slip ring bearings may be overloaded if there is any misalignment between them and the system bearings.

3. How should the electrical connections to the slip ring be made? Is it desirable to have connectors integral with the slip ring on both the rotor and stator, or would flying leads on one or the other ends be desireable? And if flying leads are preferred, should they exit the rotor in a radial or axial direction, and what length should the leads be?



D. Defining Electrical Requirements

The current specified enables the slip ring engineer to propose a unit with the appropriate cross-sectional area of the rings, brushes and lead wires. The specified voltage dictates the spacing between adjacent rings and brushes. It is helpful in achieving the most cost effective and smallest practical envelope not to rate all circuits at the maximum level. For example, if you need 20 circuits total, three of which must carry ten amps, designate three for high current. Don't go for 100% functional interchangeability by specifying that all 20 be able to carry ten amps. And, if the ten amps is a surge current with a continuous current of only two amps, tell us that, too. There is no reason for you to pay for ten amps continuous capacity when you only need two.

Be aware that voltage surges and spikes are the major cause of system slip ring failures. Poly-Scientific uses a very conservative approach to circuit design, however, it is not uncommon in some power supply systems to see voltage spikes ten or more times the normal operating voltage. We strongly recommend surge protection on all power supplies.

Most smaller slip rings will satisfactorily conduct signals to 1 MHz or 500 Kilobits. Special slip rings can be used to pass broadband signals from dc to 1 gigahertz and data rates of 500 megabits or even higher. Crosstalk, insertion loss and bit error rate information can be provided if data rates, formats and impedances are defined.

E. Defining Mechanical Requirements

1. Operating speed (rpm's). Almost any slip ring can operate successfully at speeds to 100 RPM although many applications only require operation at a few rpm. But slip rings are also routinely used to instrument jet turbine engines operating at speeds in excess of 20,000 RPM. The operating speed in conjunction with the diameter dictates the surface speed of the brush relative to the ring and hence the internal design approach and material selection.

2. What rotational life is necessary for your application? Will the unit oscillate or rotate at a continuous speed?

F. Defining the Environment

The environment in which the slip ring must survive is a key factor. Operating temperature is important in specifying the proper lubricant. And if the slip ring will operate exposed to the elements or to a hostile environment, integral seals must be included in the design. Any unusual shock or vibration should also be specified.

The next eight pages of the catalog give a brief overview of our slip ring design and production expertise. The last page of our section allows you to list your specific application needs. For specific product information, please contact our sales department at 800-336-2112.

SLIP RING SEPARATES

Sometimes a self contained "capsule" slip ring is not practical due to size constraints or cost limitations. (Don't however, fail to include in this comparison your costs for mating the slip ring and brush block or to consider the risk of damage to the fragile unprotected brushes). If a separate rotor/stator approach is dictated for your application please review the following tabulation of an assortment of candidate designs—or contact us for a custom design.

MINIATURE SLIP RING CAPSULES

These smallest of all slip ring assemblies are widely used in the pitch, roll and yaw axes of inertial navigation systems where there can be no sacrifice in reliability to achieve packaging density.

Very tight pitch controls are maintained on individual ring locations with center-to-center spacings as small as 0.015 inch between adjacent rings.

HIGH SPEED SLIP RINGS

For successful slip ring operations above several thousand RPM, increased structural demands and frictional heating at the sliding contact surface are two concerns that must be addressed. Applications for high speed slip rings include aircraft turbine testing, stressometer feedback in rolling mills, and gasoline or diesel engine testing.

VACUUM AND SPACE CAPSULES

The use of slip rings in a hard vacuum environment focuses special attention on the area of outgassing organics that could interfere with other components in the system and in the area of lubrication for long term operation. Our contact material recommendations are based on a two year continuous life test program that we conducted in a 10^{-7} torr environment and have been proven in numerous space flights.

POLY-TWIST CAPSULES

The Poly-Twist is a reliable slip ring substitute for limited rotation applications. Sometimes called a twist-cap, this device provides a self-contained, no-sliding contact rotary interface using flexible circuit tapes. Typical dimensions and data are tabulated below for a few of our many twist-cap designs. Although the majority of applications for the thousands of units supplied to date have required miniature twist-cap assemblies, some very large designs have also been provided.

HELICOPTER SLIP RINGS

Slip rings that power de-icing and blade folding systems must transfer high current levels to blade systems rotating at high speeds. They must also withstand vibration levels and environmental hazards typical of helicopter operation. The latest de-icing applications include both main and tail rotor slip rings, with main rotor current levels to 60 amperes and tail rotor speeds to 1,500 RPMs.

VEHICULAR SLIP RINGS

Electrical and hydraulic slip rings are used in vehicles such as tanks, retrievers, mobile missile launchers, and armored personnel carriers. A typical armored vehicle might contain slip rings in the turrett, the commander station, and the periscope.

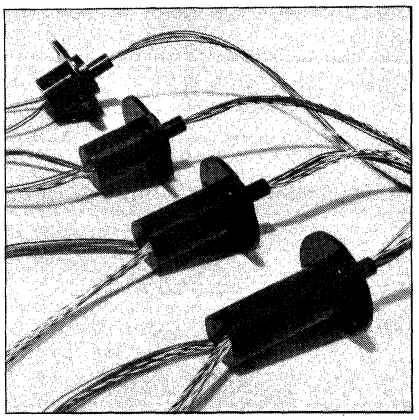
12	4102	.5A	BB 1.05 SR 1.67	.982 .46	Slip ring and brush block set Slip ring bore .196 inch
14	3141	1 ground-150A 1-150A 12-7.5	9.28	11.25	Sealed, rugged construction
16	4019	1A	2.35	1.00	Fiber brush capsule. 3000 RPM

No more than 20% of all rings should be loaded with rated current simultaneously.

Many industrial applications such as continuous-panning CCTV cameras, automated machinery and robotic end-effectors can benefit from the continuous, unrestrained, rotational freedom of a slip ring. Our 4023 Industrial Slip Rings offer the reliability of precious metal contacts at an affordable price. This is made possible by standardizing on four basic models (6, 12, 18, and 24 rings), which are mass produced for volume pricing.



SPECIAL SLIP RINGS

Cable Reel Slip Rings

Cable reel slip rings can be found in a wide range of military and industrial applications including marine/seismic exploration, underwater towed vehicles, remote tele-operated vehicles, construction cranes, and buoyant submarine antennas. These slip rings are designed for a particularly rugged environment while also providing field accessability of the brush block assemblies if repairs are necessary. With access plates in place, sealed bearings, and integral gasketed connectors, the internal portion of the unit is well protected from environmental conditions.

Mooring Slip Rings

Deep water drilling requires a slip ring to allow complete freedom to weathervane for floating power generation stations (SALM type installations). Experience to date in mooring applications include currents to 600 amps, voltages to 35,000 volts (transmission of 36 megawatts of power) in sizes to 8 feet in diameter by 10 feet in length.

Medical Electronics Slip Rings

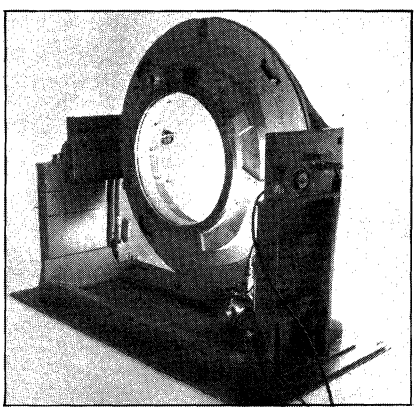
Slip rings are used in various scanner applications, particularly for computed axial tomography (CT Scanners) which require the need to scan at faster speeds, unencumbered by mechanical stops. These units provide a large through bore for mounting as an integral part of the gantry.

Voltages to 200,000 volts are handled safely with careful attention to gradients, internal surface contours, material selection and debris management.

Our slip rings require minimum inertia for spin-up and braking consistent with structural and electrical safety.

Slip rings for medical scanners are built on a history of reliable low maintenance applications, with reliability levels exceeding a million circuit hours being demonstrated.

Our CT slip ring capsules are typically sealed with static seals and redundant dynamic lip seals at all rotary interfaces. A slip ring with separate mating brush blocks is available in a low cost design for low voltage CT scanners where the X-ray voltage is stepped up on the rotating gantry.



Slip Ring Applications Are Only Limited by Your Imagination

These are just a few of the unique applications of slip ring technology. When you need to pass power and/or data through a rotating interface—turn to Litton.

Many of the designs and manufacturing processes are proprietary and are covered under one or more U.S. or European patents.

COST EFFECTIVE Smart Sub-F.H. dc Motors

☐ **World's largest DC motor manufacturer (780 million units/yr.)**

☐ **World-proven quality** ☐ **On-time delivery**

Typical applications:

Automotive Products
Actuators for car mirrors, door locks, A/C damper, fuel and washer pumps, lumbar support, cruise control, window lifters, air pumps, etc.

Cordless Power Tools
Drills, screwdrivers, string trimmers, hedge trimmers, grass shears, hand-held vacuum cleaners, etc.

Wide range of other applications
Home and kitchen appliances, products for personal care, audio-visual, cameras, office automation, bilge pumps, etc.

Call, fax, write us your performance requirements. We will suggest the best-suited motors from our extensive standard line — or with custom-made specifications.

Factory Contact: Karen Lindahl

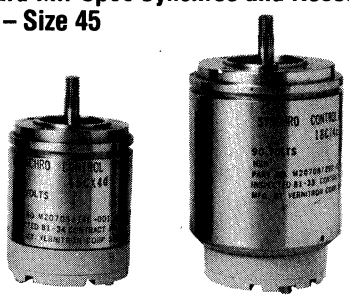
Vernitron Magtech Controls is a leading supplier of DC Torquers and Mil-Spec synchros and resolvers, and is a primary source for the more sophisticated, ultra-high-accuracy single, dual and multi-speed pancake-type componentry consistent with today's state of the art.

Vernitron Magtech Controls operates from a modern 60,000 square foot facility located on 4.6 acres in San Diego, California, specifically designed for the manufacture of electromagnetic devices.

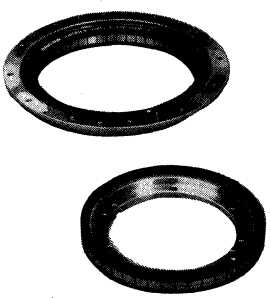
Vernitron Magtech Controls has supplied products for such programs as Harpoon, TOW/Cobra, FVS A-6, Trident, Phalanx, Leopard II, DD963, CG47, and many more. Vernitron Magtech Controls' products are also found in many areas of industrial applications, including robotics, automatic machine tools, and computer disk drives.

Product Lines from Vernitron Magtech Controls

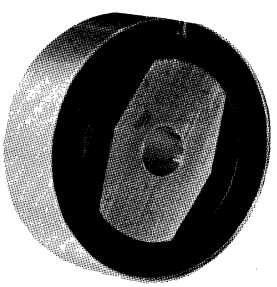
Standard Mil-Spec Synchros and Resolvers Size 8 – Size 45



Hi-Accuracy Multispeed Pancakes

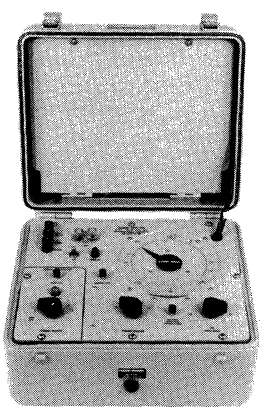


Limited Angle Brushless Torque Motors

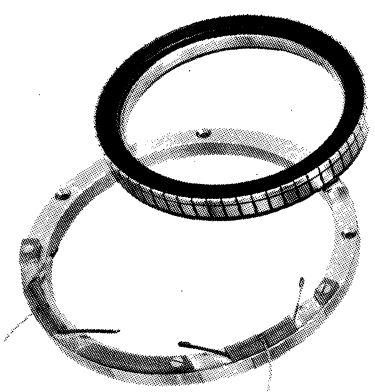


Torqsyn Remote Positioners Analog or Digital Input

Custom Subsystem Designs



DC Torquers



Other Products:

- **Digital Resolver (single turn absolute encoder, 16-bit output)**
- **50 VA Solid State Synchro Amplifier**
- **RVDT**
- **Segment Resolver**
- **DC Motors and Tachometers**

MERCURY ROTATING ELECTRICAL CONNECTORS

FEATURES

- Superior to conventional slip rings, Mercotac's mercury-wetted contacts provide increased reliability. Extremely low electrical noise, less than 1 milliohm resistance.
- Sealed, ball bearing construction.
- Durable, compact, low cost, no maintenance. Ideal for computers, instrumentation, thermocouples, strain gauges, packaging, heating and control equipment.
- Mercotac-mercury-wetted contacts.

COAX

Coaxial Connector Series: Small, up to 10 amps, high rpm, inexpensive series used with Mercotac accessories.

OPERATING AND MOUNTING INFORMATION:

1. Mercotac connectors can be used both horizontally and vertically. However the arrow on the body of the connector should not point below horizontal. The connectors are reversible so they need not be installed upside down. Store upright.

2. It is preferable to mount the connector with the body to rotate, to reduce the mechanical loads on the bearing. The unit may be held by the body or the plastic bushing (as shown).

3. Use wires of ample length and flexibility to avoid mechanical loads. Do not have rigid mounting of both ends. The wires attached to the stationary end should be stiff enough to keep it from turning.

4. Vibration and mechanical shock reduce the connector life. Some installations require shock absorbing bushing to mount connector. Limit mounting eccentricity to .005".

5. Provide thermal insulation where necessary to prevent temperature of the unit exceeding 60°C (140° F)

6. Do not solder or bend connector tabs; such misuse voids warranty.

7. In food applications: ISOLATE MERCOTAC CONNECTOR FROM ANY POSSIBILITY OF CONTAMINATING FOOD.

Hearst Engineering Software

ICMASD...IC Alternate Source Directory

The all new 1991 version of the world famous Alternate Source Directory is now available in floppy disk form for your IBM XT & AT and 100% compatible personal computer with hard drive.

The **1991 ICMASD** contains the more than 180,000 listings that appear in the Alternate Source Directory Section contained in Volume Two of the printed version of the 1991 IC Master ...plus additional discontinued parts. The database includes complete vendor addresses and phone numbers.

You can personalize the **ICMASD** for your application. The program allows you to add comments, up to 20 digits long, to each listing. These comments can be part numbers, prices, or any information specific to your needs. You may also add, delete and/or discontinue devices!

For greater flexibility the base number search feature enables you to access parts by base number, i.e., the device number stripped of prefixes and suffixes. You don't need to know the manufactures codes to call up any of the alternates to these devices.

The **1991 ICMASD** is fast, convenient and very user friendly!

Complete program documentation is included. When ordering, be sure to specify if you want the **1991 ICMASD** on three, double-sided, double-density disks OR on one high-density disk.

For immediate delivery you can order the **1991 ICMASD** at $179.50* simply by charging your Visa or MasterCard credit card. To place your order or for more information, call or write:

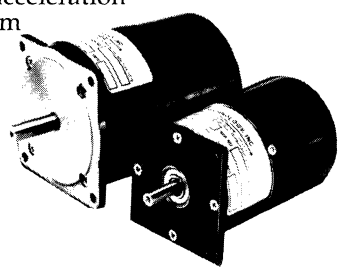
BRUSHLESS SERVO MOTORS & CONTROLLERS

LEADERS IN HIGH PERFORMANCE AND PRECISION MOTION CONTROL

Complete Velocity and Positioning Servo Systems. Interface with User Host Computers and Controllers.

New!...and only from MFM Technology. Brushless NEMA 23 and 34 frame size servo motors replace stepper and DC brush motors. Advantages of these MFM brushless servo motors:

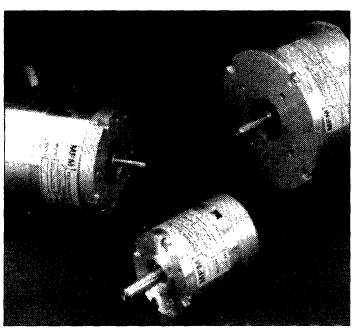
* smooth at all speeds - no cogging!
* instantaneous linear acceleration
* full torque to 6,000 rpm
* no resonance effects
* cool operation



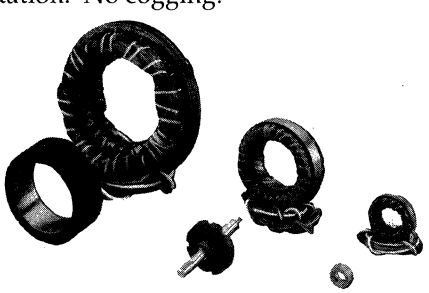
Using samarium-cobalt magnets, MFM brushless DC motors are available in 10 frame sizes from 1.25 inch through 10.0 inch diameter with peak torque ratings from 13.5 oz-in. to 4500 lb-in.

Modular motor components are matched to provide optimum performance using many standard rotor configurations.

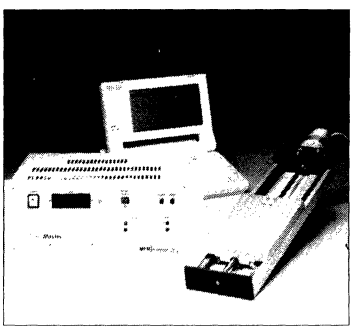
No cogging!



Unhoused motors are supplied as kits for better performance and cost savings for direct mounting onto the driven shaft. Eliminate performance-reducing effects of conventional couplings, belts, or pulleys. Choice of Hall sensor, optical encoder, or resolver commutation. No cogging!

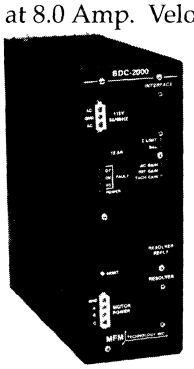


Servo *Master* is a complete brushless servo system consisting of a programmable motion controller, power supply, brushless servo amplifiers, and brushless DC motors with shaft encoder feedback.



This system provides closed loop control of up to three axes, and makes possible micropositioning of mechanical stages, combined with high speeds.

Model BDC 2000 is a four quadrant sine-wave PWM brushless motor drive. Output bus rating is 160 Volt at 8.0 Amp. Velocity or current loop control accepts a ±10 volt analog command signal. Resolver-to-digital conversion provides electronic commutation, absolute shaft position, and velocity control.



Emulated channel A, B and index encoder output is provided for use with a motion controller. Other models offer power ratings to match a broad range of motor speed and torque requirements.

Precision air or ball-bearing spindles with embedded brushless DC motors are available with micro-inch shaft run-out tolerances.
Model BDC 0550 linear sine-wave drive offers programmable acceleration/deceleration, virtually no EMI/RFI, closed loop servo control and IEEE-488 or RS-232C digital interface.
Speed accuracy > .001% with smooth speed from less than 1 rpm to more than 15,000 rpm.

600/300 Watt

SERVO AMPLIFIERS for DC MOTOR DRIVE

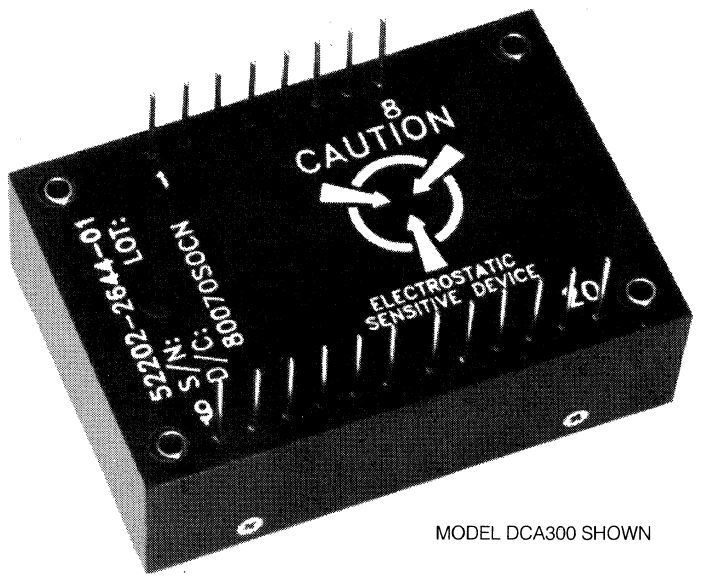
DCA600/300

Description

The DCA600 and DCA300 are versatile and compact 600 watt and 300 watt rated servo amplifiers for DC motor drive and other linear amplifier applications. These linear amplifier have a MOSFET "H" bridge output power stage for bi-directional motor drive with a unipolar power supply. The MOSFET power stage provides excellent safe operating area and ruggedness. The amplifier can handle the back EMF's produced by motor loads.

External terminals for voltage and current feedback are provided for external user configuration. External terminals are also provided for adjustment of output current limiting. A thermal over-temperature shutdown is incorporated. These amplifiers operate from a voltage source of either 44 VDC or 100 VDC and require a bias supply of –15 VDC.

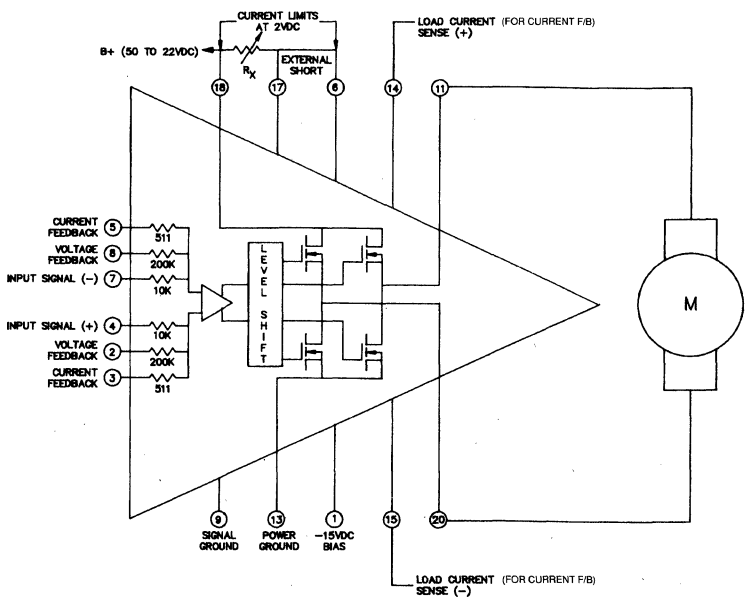
The DCA series amplifiers are available in military and industrial ranges. The military version is also radiation hardened. The design is fully derated, and low thermal resistances between the power semiconductors and the baseplate minimize junction temperatures. The amplifier is designed to be conduction cooled and is mounted to the heat sink surface by four through mounting holes.



MODEL DCA300 SHOWN

Features

- 600 or 300 watt rated
- For DC motor loads and other linear amplifier applications
- Operates from 44 VDC (DCA300)
  100VDC (DCA600)
- Bi-directional motor drive
- Unipolar power supply
- Rugged MOSFET "H" bridge output power stage provides excellent safe operating area
- Thermal over-temperature shutdown
- External user configuration provided via external terminals for voltage and current feedback
- Output current limiting adjusted via external terminals
- Radiation hardened available
- High Reliability



Specifications

INPUT:	44 VDC (DCA300) 100VDC (DCA600)
BIAS SUPPLY:	-15 VDC
OUTPUT	
DCA300:	±20V @ 15A
DCA600:	±90V @ 6.7A
VIBRATION:	15 G rms (random)
SHOCK:	50 G peak
TEMPERATURE:	–55°C to +125°C
HUMIDITY:	to 100%
ALTITUDE:	50,000 ft., operating
DIMENSIONS	
DCA300:	3.25"x1.900"x0.96"
DCA600:	4.13"x3.52"x1.00"

We can modify these units to meet your custom amplifier requirements.

Immediate Solutions by Phone and FAX

At Motor Technology we solve most applications over the phone lines.

Your call to us goes straight to a competent motor application engineer, never to a clerk, correspondent or some other non-technical person. You discuss your project with a highly qualified engineer who is experienced with motors—motor application problem solving, motor design, and motor related hardware.

For a lot of projects, you won't always know the exact torque or speed you need. Or, maybe there's a voltage variation you're not sure how to cope with. The odds are 100:1 we've had experience with a similar application. So, basically, all you need to do is explain the conditions and what you want the motor to do. We help fill in the blanks, then come up with a design that's cost efficient for you.

If you're ready to talk about a prototype, the same application engineer will give you the price and a firm ship date—all in the span of a single phone call. (We don't shuffle you to other departments or make you wait days for the answers you need.)

Get an immediate solution by phone or FAX from Motor Technology the next time you have an application. And have the prototype on your desk within a few days.

Custom Prototypes in Three to Four Days

Motor Technology is a quick response company.

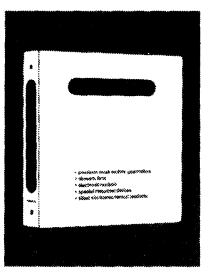
We custom engineer while you're on the phone, then follow-up with your prototype 3-4 days later. A distributor might be able to deliver as fast, but he couldn't match Motor Technology's factory engineering assistance. And our solution comes to you with two important guarantees:

1 We guarantee performance—the torque you need, over the speed range required, at the voltage selected. The motor, motor tachometer or gearmotor will do exactly what we say, or you don't pay for it.

2 We guarantee the prototype to be production feasible. That's assurance you aren't likely to get with a "kludge" assembled by a distributor technician.

Motor Technology is the quick response company that starts you off with a prototype that's engineered to be right for your breadboard and cost efficient in production.

To find out more about us, write or call for our extensive catalog. Or, just phone and/or FAX the problem to us.



The Motor Technology Catalog

Wide range of standards, with complete performance and specification data. Includes short course on how to predict performance when torque, speed or voltage conditions vary. Shipped UPS, same day.

NMB TECHNOLOGIES

PRECISION STEPPING MOTORS

Whether design requirements require an existing motor or a custom design, NMB Technologies will fit your exact specifications. Vertically integrated processes assure quality and dependability. Parts and subassemblies are manufactured in-house on automated production lines. Motors from NMB Technologies offer higher torque, lower inertia, greater accuracy and cooler operation at very competitive prices.

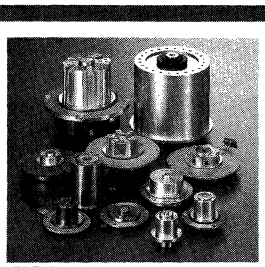
PM.DM SERIES SPINDLE MOTORS



Two premier companies — Minebea Co., Ltd., a world leader in manufacturing precision ball bearings and mechanical components and Papst-Motoren GMBH & Co., a world renowned technology leader in electronically commutated DC motors — have formed a joint venture company, Papst Minebea Disc Motors. PM.DM, Thailand and PM.DM, Germany will supply technically advanced spindle motors for the worldwide hard disc drive motor market. Contact NMBT for additional information.

FEATURES AND BENEFITS

ASTROSYN STEPPING MOTORS
HYBRID AND PERMANENT MAGNETIC MODELS

- Quiet, reliable performance, long life
- Wide range of laminated and press construction models — standard or custom designs

ACCUSTEP PM SERIES MOTORS

- Up to 15% more torque than comparably sized units
- As much as 20% lower operating temperature

COMPETITIVE PRICING

- Vertically integrated processing for total quality control
- Precision automated production
- In-line quality control and testing

INVENTORY

The designer/user should contact his local NMBT Sales Office. Spindle Motors are designed to specification for prototypes and production. No inventory available.

ASTROSYN MODELS

Notes:

1) First two digits of P/N denote frame diameter size in inches x 10. Example: 23 LM C006 has a frame size of 2.3 inches.
2) Most motors listed are available with single or double-ended shafts.
3) Options available include lead screws, gears and pulleys.
4) Standard drivers are available for all standard motors. For special designs contact NMBT applications engineers.

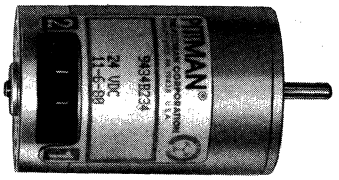
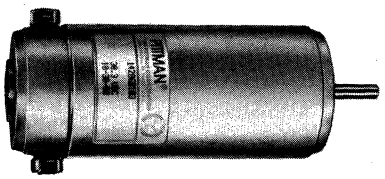
Series 8000 LO-COG® Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.2 in.; 3 lengths to 2.4 in. overall. Stall torques to 17 oz.-in. Mechanical time constants as low as 14.1 ms. (some models).

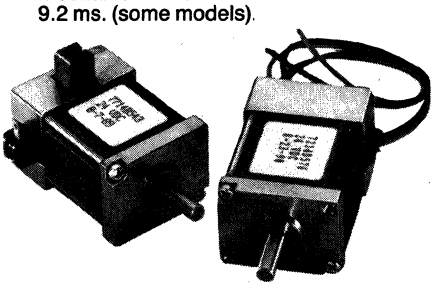
Series 9000 LO-COG® Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.6 in.; 3 lengths to 2.5 in. overall. Stall torques to 24 oz.-in. Mechanical time constants as low as 14.7 ms. (some models).



Series 9030 Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.6 in.; 3 lengths to 2.5 in. overall. Stall torques to 41 oz.-in. Mechanical time constants as low as 9.2 ms. (some models).

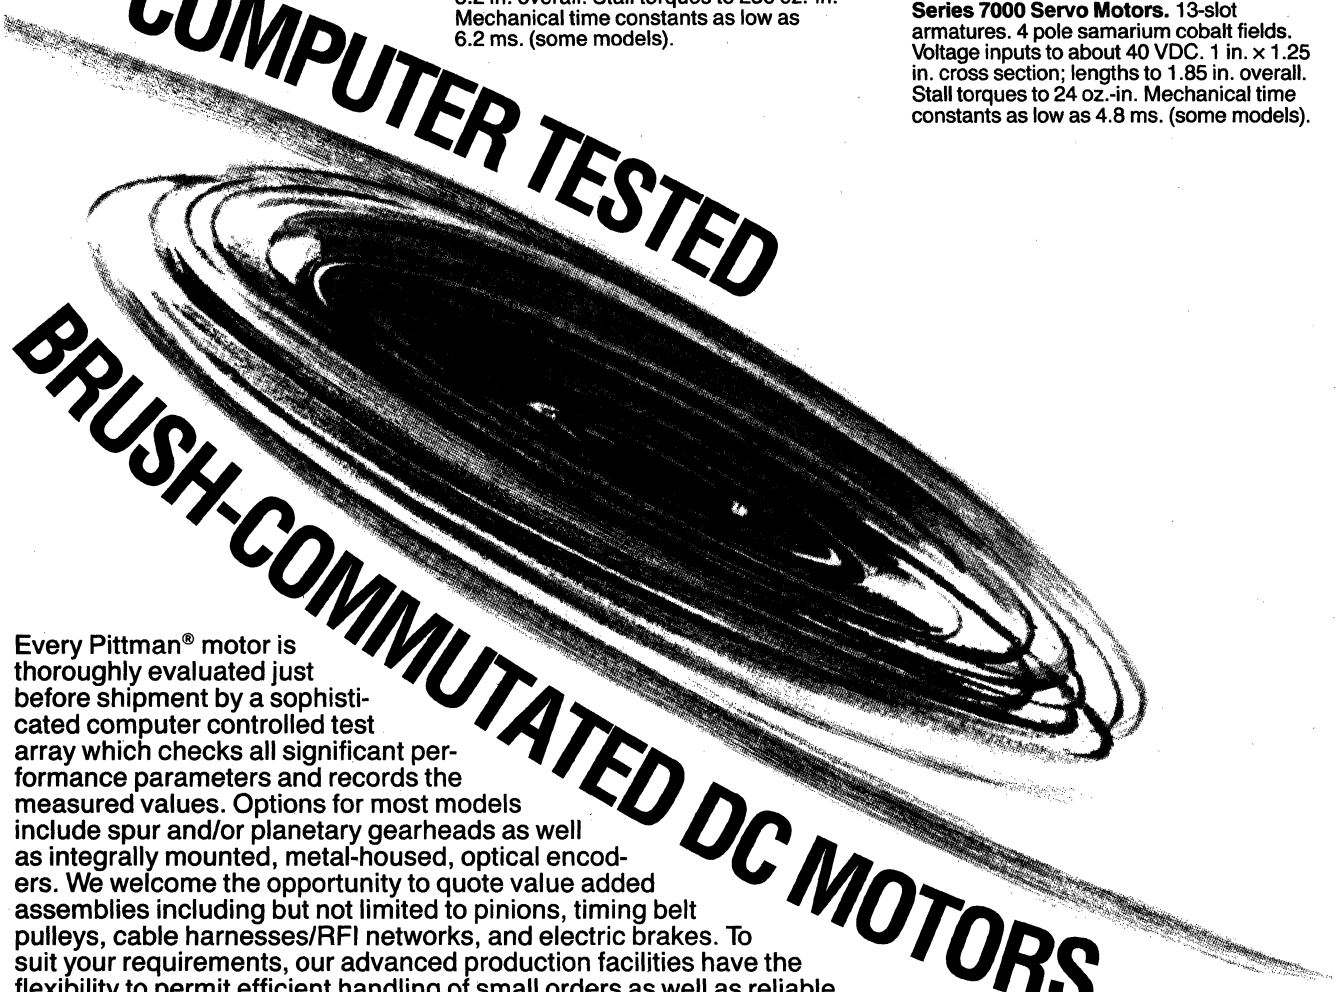


Series 14000 Servo Motors. 11-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 2.13 in.; 4 lengths to 5.2 in. overall. Stall torques to 286 oz.-in. Mechanical time constants as low as 6.2 ms. (some models).



Series 7000 Servo Motors. 13-slot armatures. 4 pole samarium cobalt fields. Voltage inputs to about 40 VDC. 1 in. x 1.25 in. cross section; lengths to 1.85 in. overall. Stall torques to 24 oz.-in. Mechanical time constants as low as 4.8 ms. (some models).

COMPUTER TESTED BRUSH-COMMUTATED DC MOTORS



Every Pittman® motor is thoroughly evaluated just before shipment by a sophisticated computer controlled test array which checks all significant performance parameters and records the measured values. Options for most models include spur and/or planetary gearheads as well as integrally mounted, metal-housed, optical encoders. We welcome the opportunity to quote value added assemblies including but not limited to pinions, timing belt pulleys, cable harnesses/RFI networks, and electric brakes. To suit your requirements, our advanced production facilities have the flexibility to permit efficient handling of small orders as well as reliable deliveries of thousands of motors per week. Contact us for complete data and application assistance. Phone (215) 256-6601. Fax (215) 256-1338.

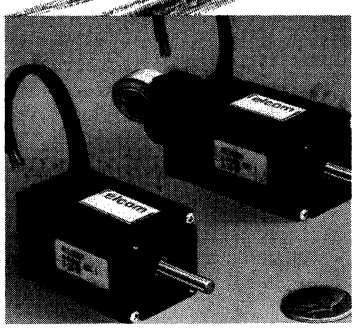
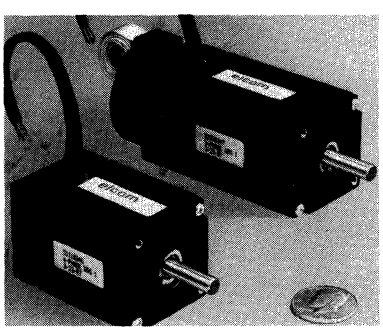
®elcom DEMONSTRABLY SUPERIOR BRUSHLESS SERVO MOTORS

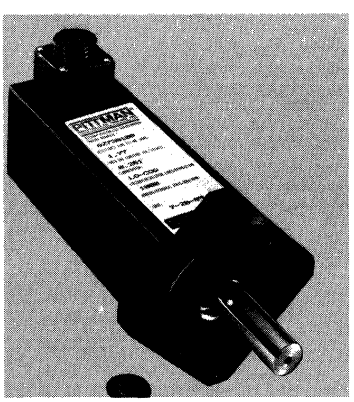
Series 3000 30mm sq. frame size; lengths of 55.2 and 65.4mm. At 7,200 rpm, longest motor develops 1/15 hp, continuous duty, with normal heat sink.



Series 4000 40mm sq. frame size; lengths of 67.8, 75.3, and 83.0mm. At 7,200 rpm, longest motor develops 1/6 hp, continuous duty, with normal heat sink.



Series 5000 50mm sq. frame size; lengths of 77.4, 90.1, and 102.8mm. At 7,200 rpm, longest motor develops 1/3 hp, continuous duty, with normal heat sink.



Series 6000 65mm sq. frame size; 202mm long. Internally mounted 1,000 line, 3-channel optical encoder. At 3,600 rpm, develops 1 hp, continuous duty, with normal heat sink.

- Samarium cobalt rotor construction
- Exceptional thermal efficiency
- Negligible magnetic cogging
- Very low winding inductances
- High torque to inertia ratios
- Low mechanical time constants
- Capable of high speed operation
- Optional patented 12-step drive for minimum commutation torque ripple
- Conventional 6-step drives, digital control systems, and power supplies available from Pittman

Options for Series 3000, 4000, and 5000 include optical encoders and/or planetary gearheads. Get the whole story on unique Pittman® ELCOM® electronically commutated servo motors by calling (215) 256-6601; Fax (215) 256-1338.

Tachometers, Encoders, Brushless Tach/Commutators.

dc tach generators

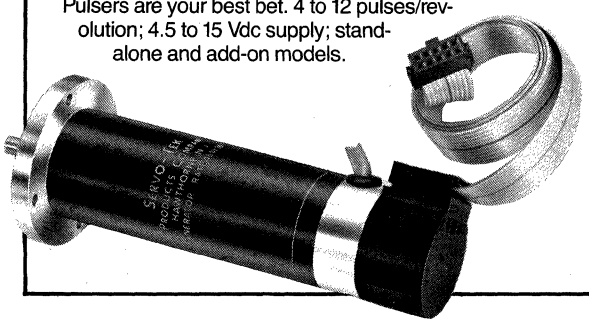
Servo-Tek 1.135″ OD tachometer generators are built to last. With silver-alloy commutators, stainless-steel shafts and bearings, brushes rated for 100,000-hour life, temperature compensation, and full factory run-in, our tachs deliver stable, long-term performance. A complete line with a variety of mechanical and electrical characteristics is available from stock. Output ratings from 1 to 45 V/1000 rpm.

incremental encoders

These high-resolution (100 to 512 pulses/revolution) optical encoders are offered both as options on 1.135″ Servo-Tek rotating components (pictured) and as stand-alone feedback devices. All configurations provide 3-channel (2 in quadrature and 1 index) LSTTL logic output. Combination units give position, speed, and direction feedback.

5 Vdc supply; 3.2 mA output standard; 16 mA with standard amplifier, others available, STTL.

For inexpensive single-pulse-train feedback, Servo-Tek Pulsers are your best bet. 4 to 12 pulses/revolution; 4.5 to 15 Vdc supply; stand-alone and add-on models.



tachsyn® brushless tach/ commutators

Does your brushless dc drive require

- High-accuracy commutation?
- Linear, low-noise tach signal?
- Elevated-temperature operation?
- No electronics in the motor?
- Low-inertia rotor?

The new patented Tachsyn tach/commutator from Servo-Tek may be the ideal transducer for your exacting requirements.

The Tachsyn brushless three-phase transducer is available in 4-, 6-, and 8-pole configurations to match your motor. With remote signal conditioning electronics, it provides accurate 6-step Hall-equivalent or sine-wave signals plus a low-ripple analog dc tachometer output.

The rotor is a low-inertia, passive component suitable for high speeds. Overhung mounting eases addition to your motor–no extra bearings or couplings are required.

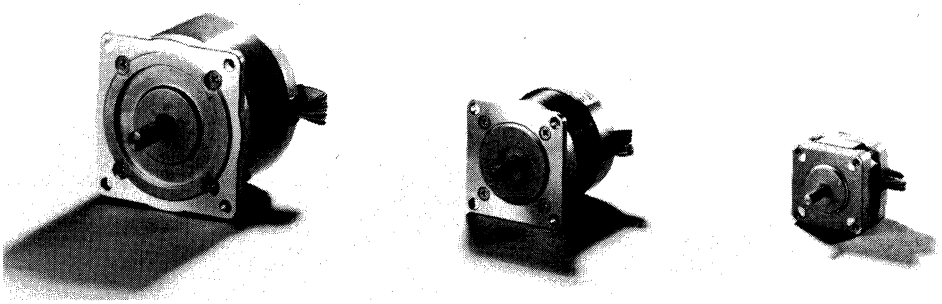
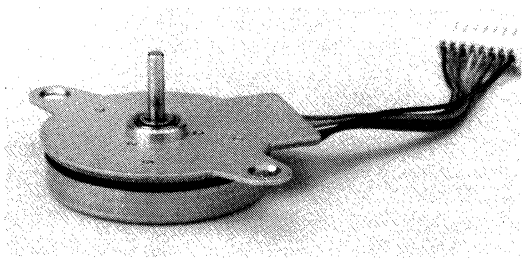
LOOK TO SKC FOR VALUE ENGINEERED MOTORS AND TECHNICAL SUPPORT

STEPPING MOTORS

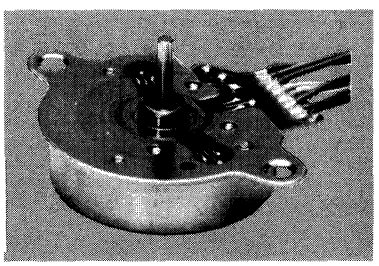
Sizes: 15 (35mm), 17 (39mm), 23 (56mm) & 34 (83mm). **Step Angles:** 0.9°, 1.8°, 3.6° & 3.75°. Hybrid, unipolar or bipolar, precision ball bearings 3% accuracy, state-of-the-art performance. **Applications:** Disk drive, tape streamer, printers, plotters, medical equip., office automation machines.



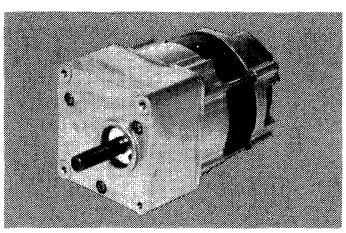
BRUSHLESS DC MOTORS



High energy rare earth magnet, 3 phase bipolar winding, efficient radial gap, precision ball bearing, outer or inner rotor, with or without hall sensors. **Applications:** Capstan motor of tape streamers, spindle motor of laser scanners, medical equip., peripheral equip. and air movers. **Options:** Optical encoder, tachometer, capstan, pulley & integral driver chips.

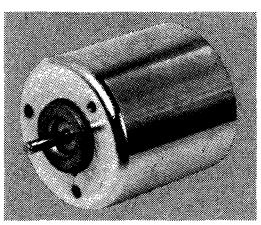


AC & DC GEARED MOTORS



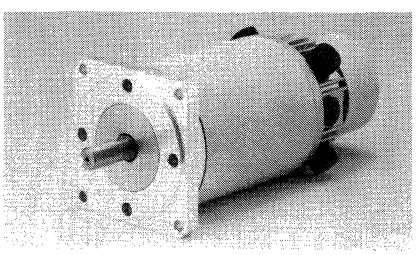
Induction motors, frame sizes of 60 to 100 mm dia. 120 or 220 vac, 50 or 60 HZ, torque ratings up to 70 KG-CM at 70 RPM. DC motors, frame sizes of 50 & 70 mm, various voltage ratings, torque ratings up to 40 KG-CM at 82 RPM.

CORELESS DC MOTORS



Ironless rotor, 23mm to 50mm dia., 8.5 to 1400 GM-CM starting torque. **Options:** Ball bearings, tachometer, terminals. **Applications:** Medical equip., office equip., recorders, small printers, plotters.

DC SERVO MOTOR AND ENCODER



State of the art performance, output range: 12 watts to 330 watts. Torque constant up to 1.8 KGCM/AMP, DIA: 38, 50, 52 and 72 mm. Precision ball bearings, high energy magnet, incremental encoder, all steel construction **Applications:** Robotics, NC machines, office automation, computer peripherals.

Stock Drive Products

a DSG company

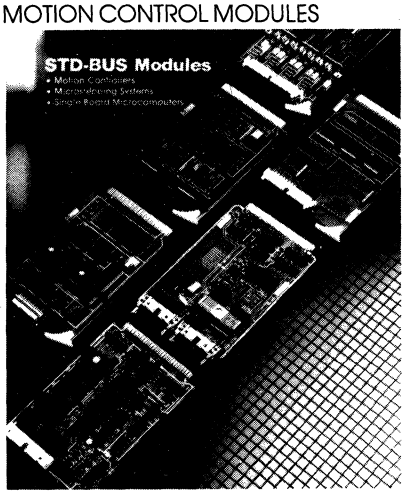
2101 JERICHO TURNPIKE, BOX 5416, NEW HYDE PARK, NY 11042-5416
PHONE: 516-328-3970 • TWX: 510-223-0642 • FAX: 516-326-8827

Stock Drive Products—founded by engineers provides unique application assistance in the form of detailed handbooks and catalogs. In keeping with SDP traditions, this material provides very complete details on SDP products to help design engineers choose the products most acceptable to their needs. It is an accepted industry fact that SDP product quality is of the highest order as is SDP use of standard products detailed in the catalogs.

In addition, expert advice is available for your special or custom requirements by calling 516-328-3970. Ask for Application Engineering.

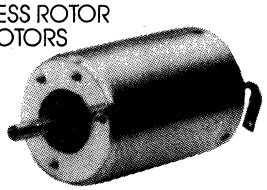
Send for your free copy of the extensive catalog of over 1,000 standard motion control products including DC and AC motors (both direct and reduction drive), steppers, tachometers, gearheads and fans plus off-the-shelf STD-BUS cards and motion control modules. Call 516-328-3970.

STD-BUS MOTION CONTROL MODULES



Control motor position, velocity or torque via RS-232, STD-BUS or local switch. Digital filtering. Idea for robotics/automation. Commands in ASCII. Stepper control, linear or circular interpolation. Microstep DAC controls 4 dc motors. A complete family of control modules, cards and boards available off-the-shelf. Catalog TI-822.

RONLESS ROTOR DC MOTORS

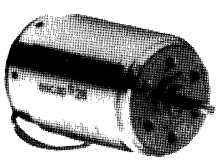


Permanent magnet ironless rotors provide up to 90% efficiency and high power/volume ratios. Many standard models from 7 mm x 12 mm rectangular motors to 36 mm diameter. Nominal voltages from 1.2 volts to 36 volts dc, stall torques exceeding 24 oz.-in.

DC GEARMOTORS

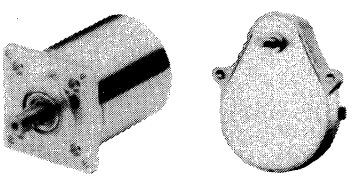
Supplied either with integral ironless rotor dc motors and gearheads or as assembled motors and gearbox components. A very wide range of torque and gear ratios. Static output torques up to 29.5 ft. lbs.

DC TACHOMETERS & MOTORS/TACHOMETERS



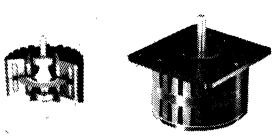
Ironless rotor construction ensures maximum reliability and performance. EMF constant 0.84 to 13.5 V/1000 rpm. Typ. ripple (pk-pk): 6-10%. Linearity & reversion error ±0.1%. Motor/tachs available with speed reducers.

GEARHEADS/SPEED REDUCERS



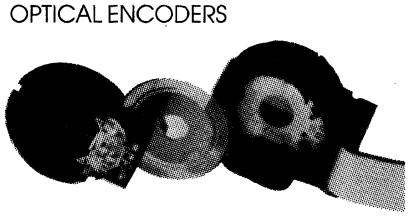
Precision construction in a variety of styles and ratios to fit most standard ac or dc motors. Ratios range from as little as 4.0625:1. to 360,000:1. A wide range of output torques are available. Static torque capability from 9.9 oz. in. to 29.5 ft. lbs. See Catalog SDP-823.

DISC MAGNET STEPPER MOTORS



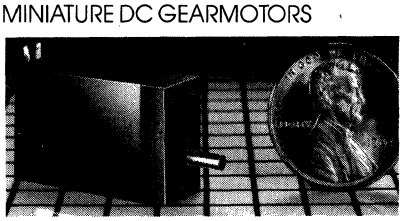
The outstanding performance offered by the escap line of disc magnet stepper motors is unequalled by any other kind of stepper motors. They are ideally suited for applications where rapid and precise incremental motion is to be achieved in a simple open loop drive. Weight is 50% less than comparable motors. From 32 mm to 112 mm diameter. Step angles of 1.8°, 3.6°, and 6° are available. Holding torques up to 354 oz. in.

OPTICAL ENCODERS



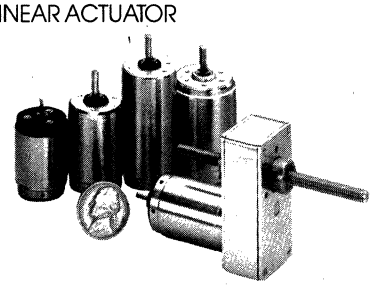
Integral single channel for motors 16 mm to 20 mm diameter. Integral Quadrature encoders for size 23 mm diameter to 34 mm diameter. HP HEDS 5000, 5010 and 5500 series for sizes 23 mm diameter to 36 mm diameter motors.

MINIATURE DC GEARMOTORS



Tiny precision ironless rotor dc motors with an integral gearbox with a choice of reduction of 3.67 to 2430; 1 of the 7200 rpm 2 or 4 Vdc motors. Maximum static output torque 9.9 oz. in. Maximum size is 9 mm wide x 15 mm high x 21.8 to 34.7 long. Wt.: 10 to 13 grams.

LINEAR ACTUATOR



Linear actuator with wide range of complimentary ironless dc and disk magnet stepper motors. Maximum holding force of 45 lbs. and linear speeds up to 3.9 ft./min.

SLO-SYN® DC Stepping Motors

Permanent magnet type stepping motors that provide high torque-per-pound and torque-to-inertia ratios. Can be driven to speeds above 20,000 steps/second with low power input. Motors have Class B insulation and can be operated at an ambient temperature range of −40°C to +65°C. Continuous duty temperature is 65°C. Standard 1.8 degree step angle motors can be half-stepped or microstepped with accuracies of ± 5% or ± 3% noncumulative. Holding torque ratings from 53 to 5000 oz-in. To simplify installation and connections, new quick-connect, plug-in types are available. Motors have no brushes, ratches or gear and use shielded ball bearings to ensure reliability and long life.

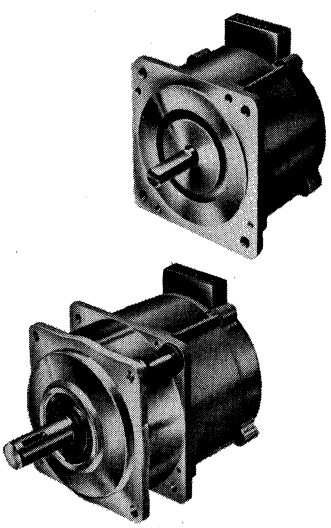
(2) Both windings energized at rated current.
(3) Calculated from holding torque in oz-in and rotor inertia in oz-in-sec² (lb. in²/24).
(5) Values are subject to change without notice. Parameters used as part of a specification should be verified with the factory.
(6) Operation below rated current will reduce torque and may degrade step accuracy.

SLO-SYN® AC Synchronous & Gearmotors



Provide slow basic shaft speed synchronous with line frequency. Allow direct load coupling without gearing. Instantaneous starting, stopping and reversing eliminate clutching and braking. Simple single-pole, 3-position switch provides complete forward, reverse and off control. Will not overheat or be damaged if stalled. Starting and running currents nearly identical. Conventional motors have speeds of 72 and 200 rpm at 60 Hz and torque ratings from 25 to 1800 oz-in.

New **high torque models** provide more power per frame size than any other synchronous motors. Types offered in NEMA frame size 23 and 34 with minimum running torque ranging from 60 to 420 oz-in. Shaft speed is 72 rpm at 60 Hz, 60 rpm at 50 Hz. **AC gearmotor models** offer torque ratings to 5000 oz-in and shaft speeds as low as 0.72 rpm at 60 Hz. All are designed for quick-connect, plug-in connection with optional mating connectors having 36 in. minimum length leads.

Call 1-800-447-7171 today for instant attention.

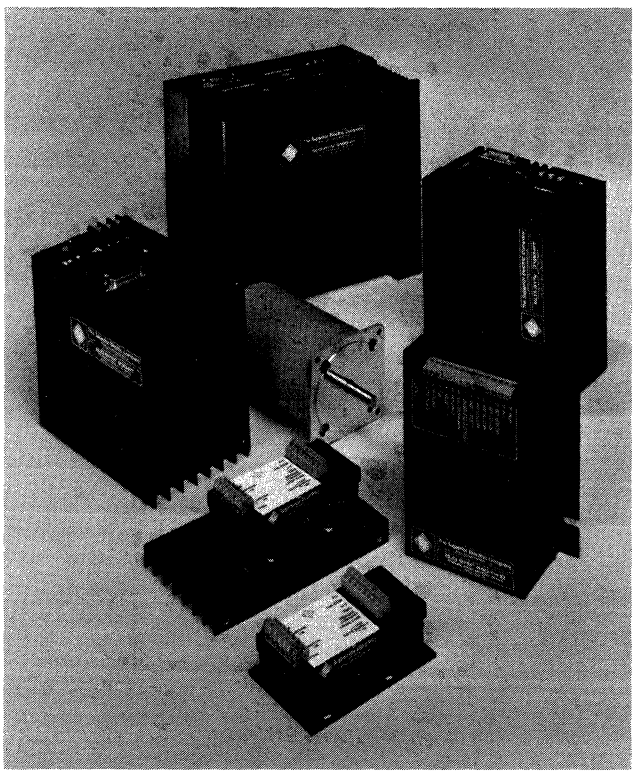
SLO-SYN®

Micro Series Stepper Motor Drives & Motion Controls



230 & 430 Series Translator Drives

All types in these series are available as modules for use with user supplied power supplies or packaged with all necessary power supplies.

- *Bipolar chopper, 2-phase stepper motor drives*
- *230 Series units are 2 A, 30 VDC*
- *430 Series units are 3.5 A, 30 VDC*
- *Capable of operating at reduced currents*
- *Full/half step operation*
- *Optically isolated inputs*
- *Modular units can be used alone or as integral PC board components with user supplied power supply*
- *Can be packaged with an integral power supply*
- *Also available with the following motion control features:*
  - *Oscillator for internal pulse source*
  - *Preset indexer for simple motion control*
  - *Fully programmable indexer for more sophisticated motion control*

440 Series Translator Drives

- *Bipolar chopper, 2-phase stepper motor drives*
- *1, 2, 3 or 4 A switch selectable motor current, 36 VDC*
- *1/5 – 1/10 or 1/125 microstep operation gives smoother performance and resonance-free operation*
- *Optically isolated inputs*
- *Full short circuit, undervoltage and transient overvoltage protection*
- *Available in easily mounted packages, power supply not included*

3180 Series Translator Drives

- *Bipolar chopper, 2-phase stepper motor drives*
- *0.5, 1, 2 and 3 A switch selectable motor current, 170 VDC*
- *Full/half, 1/10 or 1/125 step resolutions are available*
- *Optically isolated inputs*
- *Over-temperature protection*
- *Packaged with necessary power supplies*
- *Also available with the following motion control features:*
  - *Oscillator for internal pulse source*
  - *Preset indexer for simple motion control*
  - *Fully programmable indexer for more sophisticated motion control*

6180 Series Translator Drives

- *Bipolar chopper, 2-phase stepper motor drives*
- *1, 2, 3, 4 or 6 A switch selectable motor current, 170-190 VDC*
- *Full/half, 1/10 or 1/125 step operation*
- *Optically isolated inputs*
- *Over-temperature and short circuit protection*
- *Also available with the following motion control features:*
  - *Oscillator for internal pulse source*
  - *Preset indexer for simple motion control*
  - *Fully programmable indexer for more sophisticated motion control*

Enhanced Motion Controls

New SLO-SYN Enhanced Motion Controls are available for half- or full-step, 1/10 or 1/125 microstep operation of SLO-SYN DC Stepper Motors. Both open and closed loop indexer models are offered in preset (single line) and programmable (400 line) types for added versatility and improved performance. Features include:

- *Selectable ramp profiles*
- *Additional I/O capabilities*
- *Velocity changes during motion*
- *Programmable backlash compensation*
- *Index from run*

Call or write for complete literature on all Superior Electric Motion Control Equipment.

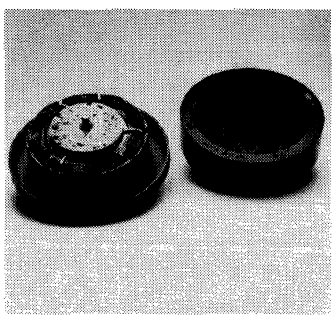
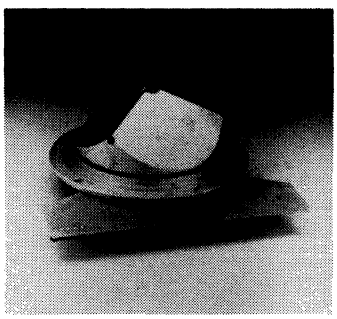
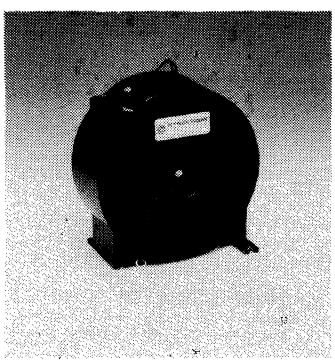
Variable-Speed, Brushless-Motors and Drives



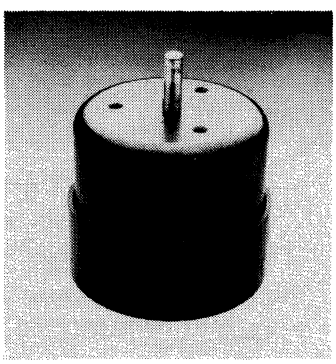
P/N F007



P/N S002



P/N F003



P/N H006

Synektron variable-speed, brushless-motors and drives save valuable space, reduce noise in products while increasing reliability and performance. The control electronics are integrated into the motor package.

A variety of control schemes are available to optimize speed/torque requirements for various applications. Synektron motors feature outer-rotating rotors. This gives a positive means of magnet retention and increases your flexibility in motor design and packaging.

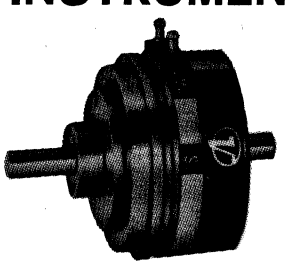
CLUTCHES AND BRAKES

PRECISION INSTRUMENT



These units are manufactured primarily to satisfy the high standards of Military requirements. Their above-standard quality is further emphasized by a high efficiency-to-size ratio. If precision is the need — then these are the instruments for you.

PERMANENT MAGNET HYSTERESIS CLUTCH

PMC Series

Designed for applications requiring repeatable torque and long life. Units can be utilized to comply with OSHA safety regulations and as a fail-safe device to protect other expensive components. In the 1.5 in. diameter frame size—torque is factory adjustable up to 8.5 oz. in. and can be held within 10% max., from unit to unit in speeds up to 10,000 R.P.M. Repeatability of torque level can be maintained within ±1%.

The PMC series will operate over a temperature range of −65°F to 260°F.

FAIL SAFE BRAKES (SBF SERIES)

DESIGN FEATURES

- ☐ Braking action occurs when coil is de-energized, or power fails.
- ☐ Unit is adjustable to compensate for wear.
- ☐ Zero backlash armature with spring release.
- ☐ Clamp-Lock hub for positive retention.
- ☐ Stationary field coil — no slip rings or brushes.
- ☐ Fast response time.

MANY INDUSTRIAL TYPES AVAILABLE

Refer to sections 2440, 4750, 5500 for additional product listings.

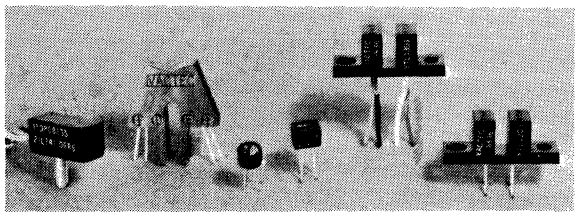
- Photoconductive Cells
- Interrupter Switches
- Phototransistors and Photodarlingtons
- Selenium Photovoltaic Cells
- Vactrols (Opto-Isolators)
- Standard Silicon and Blue-Enhanced Photovoltaic Cells, Blue-Enhanced Photodiodes, and PIN Photodiodes

EG&G VACTEC

INDUSTRY'S BROADEST OPTOELECTRONIC LINE

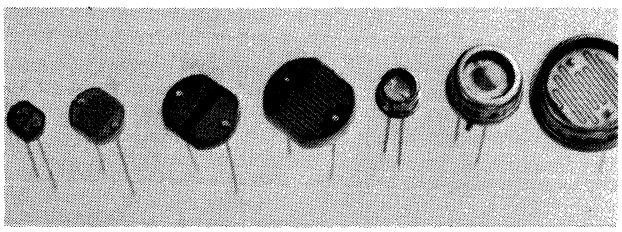
RETROREFLECTIVE & INTERRUPTER SWITCHES (SLOTTED)

Standard and custom optical switches—infrared GaAs LED and silicon phototransistor interrupters available in sealed housing of I-R transmitting plastic or opaque plastic with open apertures. Three retro styles: arrow, TO-18, and cubic.



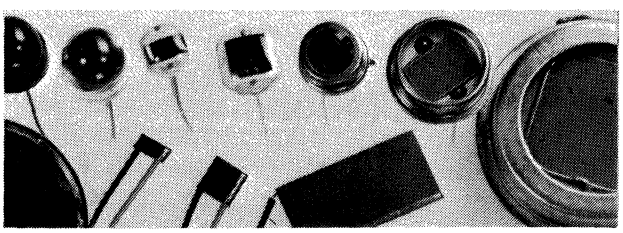
PHOTOCONDUCTIVE CELLS

Vactec light dependent resistors (LDR's) are available in three hermetic enclosures (TO-18, TO-5, TO-8) and 4 ceramic types. Ceramic types have automatically inserted wires which insure perfect contact integrity. Six materials of CdS, CdSe and CdSeS-CdS mixtures with spectral response peaks from 565-735 nm. Each material has a variety of sensitivities to satisfy all requirements.



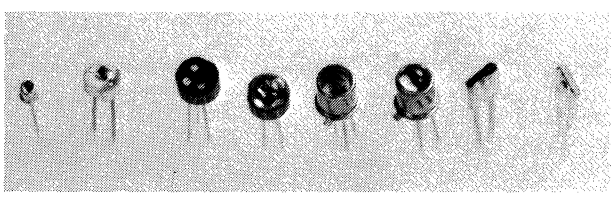
SILICON PHOTOVOLTAIC CELLS

Three processes: BLUE ENHANCED, LOW CAPACITANCE, STANDARD SOLAR. All available in a variety of hermetic, ceramic, as chips, or with flying leads. The BLUE ENHANCED cells are unique large area detectors with high U-V sensitivity to as low as 200 nm. Almost non-existent U-V enhancement effect with stability equivalent to high quality photodiodes. LOW CAPACITANCE cells have fast response less than 15μS with 10KΩ load. The high shunt impedance is desirable for driving amplifiers. SOLAR cells have high V_{oc} at low illumination (typ 200mV at .05mW/cm²). Linear over wide illumination range.



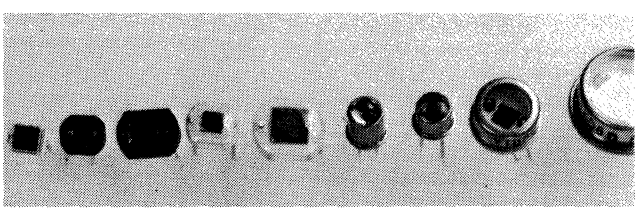
PHOTOTRANSISTORS — LED'S — PHOTODARLINGTONS — LIGHT ACTIVATED SWITCHES (LAS)

Phototransistors and photodarlingtons are NPN passivated—4 chip sizes of 25, 40, 50, and 60, mil square in TO-18, ceramic, coaxial, and lateral (side looking) packages. High light current at very low drive current ideal for instrumentation applications. GaAs I-R LED's with excellent stability in TO-18, T-1, T-1¾, lateral packages. LAS (light activated switches) have high sensitivity with Schmitt Trigger output. New—high power GaAlAs I-R LED's in TO-18, T-1, T-1¾ packages.



PHOTODIODES

BLUE ENHANCED photodiodes are extremely low dark current devices with excellent response in the U-V. Less than 10pA (I_D) for small chips. Large area diodes (VTB5051) 14.8mm² active area with 1.2A/(W/cm²) at 365nm and I_D of 250pA max. FAST photodiodes have low capacitance. Use with reverse bias for fast response time and excellent linearity. Ideal for remote I-R sensor digital controls.



VACTROLS

Optical couplers using LED's, neons, or incandescent lamps as the emitter and Vactec photoconductive cells (LDR's) as the detector. For noiseless switching and signal monitors for audio. Neon types to sense telephone ring. LED types for triac gate control. Incandescent types for low cost true RMS sensor as voltage regulator or control of constant wattage heater. Five package types include 2 hermetic.

MICRO SWITCH
a Honeywell Division

Solid State Sensor Capabilities

Honeywell, MICRO SWITCH division, means one-stop shopping for all commercially available sensors - from electromechanical through solid state.

Solid state sensing capabilities include: optoelectronic, Hall effect, pressure, temperature, air flow, optoelectronic airborne-ordnance-marine sensors, and fiber optic interconnect local area network (LAN) components. We are the complete single source for solid state components to meet your requirements. Our worldwide field specialists can recommend the best sensing solution for all your application needs.

Hall effect, pressure, temperature and airflow sensors are in the Switches section 5100.

Our Richardson, Texas facilities consolidate a full sensor/integrated circuit design capability with a "Class 10" wafer fabrication operation. Our sensor design specialists utilize the most up-to-date technologies and processes to provide you with the best quality solutions, at the best prices worldwide. Real time, Honeywell operated data links allow us to meet your JIT and SPC requirements.

You can get the world's largest lines of standardized catalog listings and customized sensing solutions in:

- Optoelectronic sensors
- Fiber optic sensors
- AOM (airborne-ordnance-marine) optoelectronic sensors.

We offer optoelectronic fiber optic components, modules, and integrated interfaces such as ethernet. Also available are custom-designed or off-the-shelf components and value-added assemblies for government, military and other applications requiring high reliability, radiation hardened, or special packaging. Applications range from satellites to missiles to drilling equipment.

Optoelectronic Sensors

Optoelectronics, the integration of optical principles and semiconductor electronics, has become the technology of choice for many sensing applications. Products include:

- **IREDs** (Infrared Emitting Diodes)
  Hermetic IREDs
  Plastic Encapsulated IREDs
- **Sensors**
  Hermetic Sensors
  Plastic Encapsulated Sensors
  Hermetic Optoschmitts
  Plastic Encapsulated Optoschmitts
- **Transmissive Assemblies**
- **Reflective Assemblies**

General application areas include:
- Object presence sensing
- Motion sensing
- Position encoding
- Non-invasive medical applications
- Limit sensing

Some specific application for Honeywell sensors are:
- Printers
- Tape drives
- Copiers
- Flow meters
- Drop sensors
- Liquid-level sensing
- Thread-break sensing

One of Honeywell's many advantages is the unique transfer molded T-1 package which has no parting line in the optical lens area to interfere with beam emission.

The sensors in Catalog 25 are the standard listings. They offer a broad selection of low cost, off-the-shelf solutions for many applications.

Telephone: 1-800-367-6786
In Texas: 214-470-4271

In addition to the standard products offered in Catalog 25, Honeywell can also provide custom solutions, ranging from special parameter selections, special marking or packaging, to completely customized sensors. Honeywell has a staff of experienced design engineers who are available to provide assistance at any stage of the product development, from R & D through production. Contact one of Honeywell's field sales engineers for further information or design assistance.

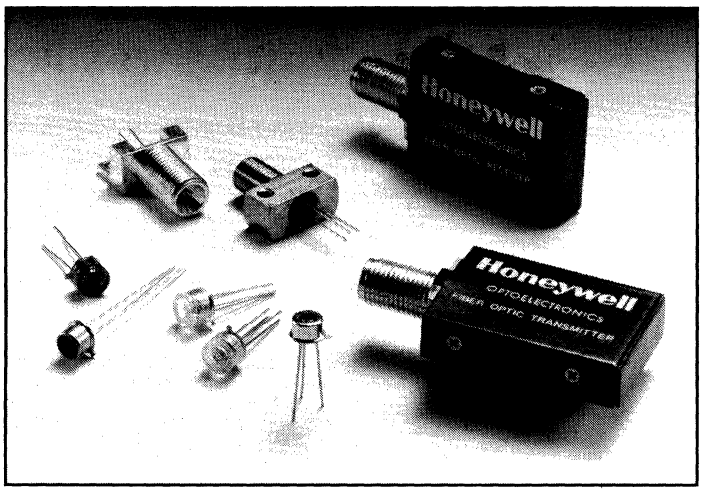
Other Optoelectronic Products

FIBER OPTICS

Honeywell is a leader in the field of fiber optics. The Fiber Optics group specializes in the design, development and manufacture of active optoelectronic components and subassemblies for the short-haul fiber optic datacom market. Honeywell active fiber optic products are compatible with the majority of standard multimode fiber optic connectors and cables now available in the industry.

Honeywell also offers custom fiber optic products (Dash 900). These products are Honeywell standard products with special testing, selection, documentation and/or minor physical changes to meet special requirements. In addition, Honeywell has the capability for major development programs for new innovative fiber optic products. Technical assistance and additional product data as well as custom capability are available from the Honeywell Sales Offices.



The **Fiber Optic Components Selection Guide** lists the Honeywell standard products now available and includes:

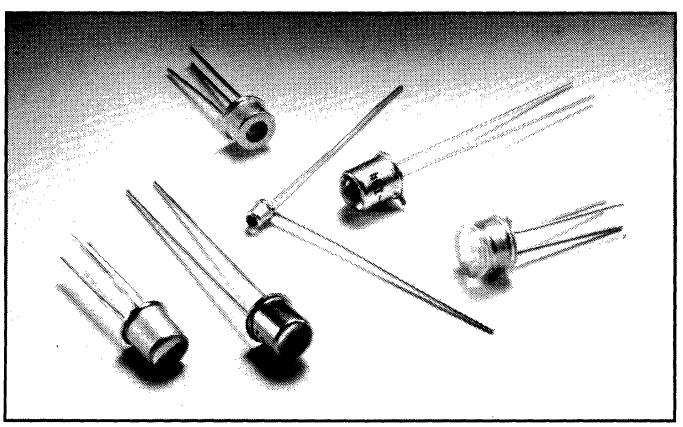
- Connectorized Components
- Fiber Optic Modules
- Fiber Optic LEDs and Integrated Transmitters
- Photo Diodes and Integrated Receivers
- Conversion Information

HIGH RELIABILITY PRODUCTS

Honeywell Optoelectronics has been a leader in advancing both fiber optic and optoelectronics technology. Its products have been used in many different commercial and military applications all over the world.

Both individual optoelectronic components and custom designed and manufactured sub-assemblies have been used in aerospace, missile, land vehicles, aircraft and shipboard systems. Honeywell Optoelectronics' products and sub-assemblies, for example, have been used in the TOW and Hellfire anti-armor missile systems, the Trident submarine navigation system, the heat-seeking Sidewinder air-to-air missile, PAVEWAY glided bombs, and in the M1 Main Battle Tank's fire control system.

Because Honeywell is a leading supplier of both commercial and high-reliability military specification optoelectronic components, it has the largest selection of emitters and detectors of any manufacturer in the industry.



Many of these proven commercial components undergo additional testing in accordance with MIL-S-19500 for vibration, thermal shock, burn-in, constant acceleration and hermeticity. They can be designed for radiation hardened applications, qualifying them for use by defence contractors in their products.

High reliability optoelectronic components from Honeywell are the choice of many major defense contractors because of their proven reliability, their electrical performance and because Honeywell delivers on-time.

SALES AND SERVICE

MICRO SWITCH serves its customers through a worldwide network of sales offices and distributors. For ordering, application assistance, pricing or name of nearest Authorized Distributor, contact a nearby MICRO SWITCH sales office. See the EEM Yellow Pages or contact:

MURATA ERIE NORTH AMERICA

Pyroelectric Infrared Sensor IRA Series

FEATURES

- Low cost
- Broad band response
- High sensitivity
- No cryogenics
- HIC® H8D1779 type preamplifier is available for dual elements.

APPLICATIONS

- Passive IR Intruder Alarm System
- Automatic Door
- Light Switch
- Physical Detectors
- Toy, etc.

Slotted optical switches, also known as interrupter assemblies, are designed to provide non-contact sensing of linear or rotary motion as in optical encoders. Devices from Optek Technology consist of an infrared emitting diode and a silicon photosensor mounted on opposite sides of a slot in a molded plastic housing. Switching takes place whenever an opaque object passes through the slot. **All assemblies are available with wire leads. Contact Factory**

High Contrast Reflective Assemblies

Part No.	$I_{C(ON)}$	d"	$I_{C(OFF)}$	Contract Ratio
OPB750	500mA	.080	250nA	2000:1
	375mA	.150	250nA	1500:1
	250mA	.220	250nA	1000:1

Designed to decrease low-level gain while not affecting the high-level light gain. Photocurrent is measured using an Eastman Kodak neutral white test card as a reflective surface having a 90% diffuse reflectance. $I_{C(OFF)}$ is photocurrent measured with current to the input diode and a 5% reflecting surface.

(1) Phototransistor output
(2) Photodarlington output

Reflective assemblies are designed to provide non-contact sensing of the presence of a reflective surface, or a change in surface reflectivity. Unfocused types, where the emitter and sensor are mounted on parallel optical axes, are best suited for sensing diffuse or rough surfaces. Focused types, where the emitter and sesor are mounted on converging optical axes are best suited for sensing specular or polished surfaces.

Custom Assemblies

Designed to meet your exact requirements.

In order to develop new state-of-the-art products, customers often require special optoelectronic devices. In these cases, Optek engineers can design a part to meet the toughest mounting or electrical requirements.

Helping customers meet special design objectives is a specialty at Optek.

Bring your ideas, design proposals and application problems to Optex experienced design engineers. They will work with you to analyze your design objectives and develop a part that meets your needs. And, since Optek has manufacturing capability which extends from silicon chip to custom housings and circuit boards, you can be sure that Optek quality goes into every component and subassembly.

Optek Technology, Inc. 1215 West Crosby Road, Carrollton, TX 75006 (214) 323-2200 FAX (214) 323-2396

MINIGLOSSARY OPTO SEMICONDUCTORS

Avalanche Photodiode: A photodiode that takes advantage of avalanche multiplication of photocurrent. It is particularly suited to low noise and/or high speed applications.

Contrast: A noticeable difference in color, brightness, or other characteristics in a side-by-side comparison.

Chrominance Contrast: The color contrast between two adjacent surfaces of identical area, shape, texture, and luminance. The human eye is more sensitive to differences in color than it is to differences in brightness.

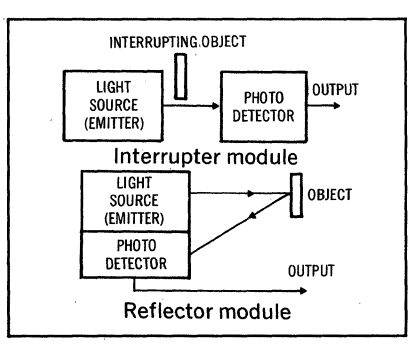
Current Transfer Ratio: The ratio of an optocoupler's output current to input current at a specified bias.

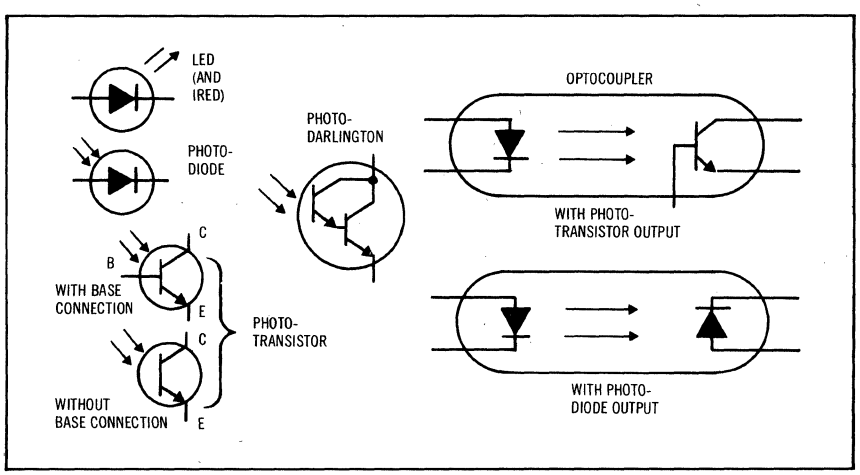
Dark Current: The leakage current of a photodetector with no incident light.

Dominant Wavelength: The wavelength that is a quantitative measure of apparent color of light as perceived by the human eye.

Infrared Radiation: The electromagnetic wavelength region between approximately 0.75 and 100 micrometers longer than the wavelength of visible light.

Interrupter (module): A device that produces an electrical output signal when an object breaks the light (visible or invisible) between a light source and a photodetector.





IRED: An infrared-emitting diode. See light-emitting diode.

Light Current: The current that flows through a photodetector when it is exposed to radiant energy.

Light-Emitting Diode (LED): A semiconductor diode that emits incoherent light at its PN junction when forward biased. The light can be in the visible or invisible (infrared) wavelength region.

Luminance Contrast: The observed brightness of a light-emitting element compared to the brightness of the "surround," an integral part of the device and inseparable from it.

Optocoupler: A device that transmits electrical signals, without electrical connection, between a light source (input) and the receiver (output). The input is generally an LED; the output might be a photodiode, phototransistor, a photo–Darlington, etc. Sometimes referred to as optoisolator.

Peak Wavelength: The wavelength at the peak of the radiated spectrum of an emitter.

Photo–Darlington: A light-sensitive Darlington-connected transistor pair. The photo–Darlington has a very high sensitivity to illumination or radiation.

Photodetector: A device that provides an electrical output signal when subjected to radiation in the visible, infrared, or ultraviolet regions of the electromagnetic spectrum. Photodiodes, phototransistors, and photo–Darlingtons are the most common type of photodetectors.

Photodiode: A junction diode that is responsive to radiant energy. Photodiodes have a high degree of linearity between the input radiation and the output current, and faster switching speeds than phototransistors.

Photothyristor: A thyristor whose switching action is controlled by light applied to the thyristor gate.

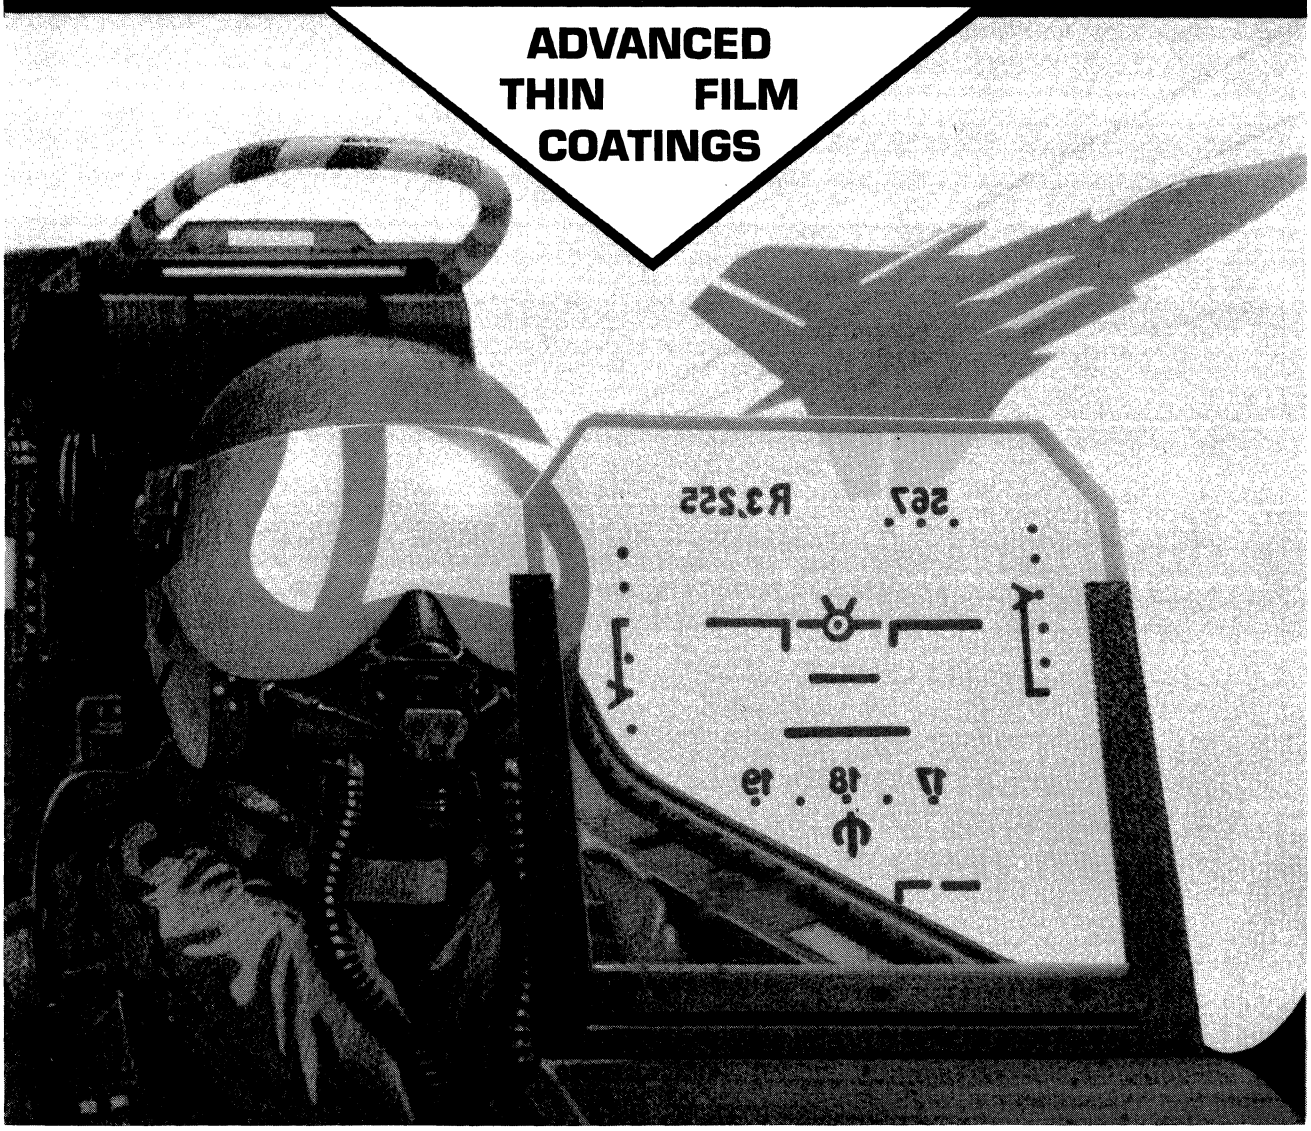
Phototransistor: A light-sensitive transister that delivers an electrical output proportional to the light intensity at its input. The low-level photocurrent that is generated is amplified by the current gain of the transistor. The base region (or gate in a FET) may or may not be brought out as an external terminal.

Point Source: A source with a maximum dimension less than one-tenth the distance between sources and detector.

Reflector (module): A device containing a light source and a photodetector that detects any object that reflects light produced by the source back to the detector.

OMITEC THIN FILMS

An enabling technology company which provides solutions allowing customers to gain technological and commercial advantage



APPLICATIONS:

- **Night vision goggles**
- **Head up displays**
- **Fiber optics and sensors**
- **Helmet mounted displays**
- **Laser systems and laser gyros**
- **Aircraft instrumentation and displays**

OMITEC
Thin Films

PRODUCTS:

- **NVG compatible filters**
- **Transparent conducting windows**
- **Ring laser gyro mirrors**
- **Color selective HUD combiners**
- **Laser protection filters**
- **Thin film onto plastic optics**
- **Anti-reflection coatings**

Photocouplers

Classification chart

Photocouplers
- PC100 series — VDE approved (long creepage distance type)
- PC300 series — Opaque mini-flat package type
- PC400 series — Opaque mini-flat package, OPIC* type
- PC700 series — DIP 6-pin, Viso:5kVrms
- PC800 series — Opaque 4-pin x N (N = 1,2,3,4), Viso: 5kVrms
- PC900 series — OPIC*
- 6N series — Standard 6N series (OPIC*)

Phototriac couplers

Photothyristor couplers

Features

Various output methods:
- Single phototransistor
- Darlington phototransistor
- OPIC*
- Bidirectional output transistor
- Phototriac
- Photothyristor

Various package formats:
- Standard dual-in-line package
- Flat package
- Mini-flat package
- Dual-in-line package for long creepage distance

Wide line-up of products meeting international safety standards:
UL, VDE, TÜV, BS, SEMKO, DEMKO, EL-FEMKO
High isolation voltage: PC100/PC700/PC800 series, etc.

Photointerrupters

Classification chart

Photointerrupters
- Transmissive type
  - GP1S series — Single phototransistor output
  - GP1L series — Darlington phototransistor output
  - GP1A series — OPIC*
- Reflective type
  - GP2S series — Single phototransistor output
  - GP2L series — Darlington phototransistor output
  - GP2A series — OPIC* or amplier built-in type

Features

Various output methods
- Single phototransistor
- Darlington phototransistor
- OPIC*
  - Single-phase digital output
  - Two-phase digital output (transmissive type)

Various mounting methods
- Snap-in mounting type
- PWB mounting type
- Both-side mounting type
- Either-side mounting type (transmissive type)
- Side-mounting type (transmissive type)

Transmissive type — Line-up of products with a detecting accuracy of slit width ranging from 0.15 to no slit.

Reflective type — Line-up of products with detecting distance ranging from 0.4 to 15mm (optimum).

Transmissive type — Line-up of products having an object passing width ranging from the light emitter and detector gap of 0.9 to 10mm.

Versions with cover case, 3-pin connector terminal, and super-compact products are available to meet a variety of customer needs.

SHARP® Optoelectronics

Laser Diodes

Laser Diodes

Sharp's laser diodes use a double hetero junction of gallium, aluminum and arsenide compound (GaAlAs). Long life and high reliability are realized by use of our original VSIS structure (V-channeled Substrate Inner Stripe).

Features

- High power type, low noise type, wide temperature ranges and short wavelength type are included in the scope of products.
- High precision package. PIN photodiodes are built in, and optical power output control is easy.
- The line-up is full, from the ultra compact (ϕ5.6 mm packages) type to the single positive power supply p/w type.
- Long life, high reliability.
- Stable single transverse mode, low threshold current.

Model No.	Wavelength (nm)	Optical power output (mW) TYP.	Optical power output (mW) MAX.	Features	Main applications
LT030 Series	750	3	5	Short wavelength	High-speed laser printers, Bar code readers
LT031 Series		7	10	Short wavelength	High-speed laser printers
LT020MC	780	3	5	General use	Measuring instruments, Bar code readers
LT021 Series		10	15	High power	High-speed laser printers, Medical apparatus
LT022 Series		3	5	Low noise	CD-ROMs, Fiber Optic Communication
LT023 Series		3	5	Low noise (Multi-mode)	VD players, Analog devices, Fiber Optic Communication
LT022/023 WIDE TEMP. Series		3	5	Low noise Wide Temperature (−30 to 85°C)	Fiber Optic Communication Factory Automation Equipment
LT024 Series		20	30	High power	Optical disk memories, Magneto-optical disk systems
LT025 Series		30	40	High power	Optical disk memories, Magneto-optical disk systems
LT026 Series		3	5	Small astigmatism	General use laser printers
LT027 Series		7	10	General use	Medium-speed laser printers
LT080MD		3	5	Stabilized wavelength	Measuring instruments, Laser printers, Bar code readers
LT091MD		14	20	2 channels*	High speed laser printers
LT010 Series	810	3	5	General use	Measuring instruments, Fiber Optic Communications

HIGH PERFORMANCE

CUSTOM SILICON PHOTODETECTORS

Designed by Engineers for Engineers

High Speed
Spectrally Enhanced
UV - Visible - IR
Low Noise
Linear
Photoconductive
Photovoltaic
Low Capacitance
High Voltage Breakdown
Reliable and Low Cost

SD – XXX – XX – XX – XXX

ACTIVE AREA SIZE
(Expressed in inches — effective diameter)
ie: 020 = .020 inch diameter
200 = .200 inch diameter
444 = .444 inch diameter

PRODUCT SERIES
11 Single element, Red IR Enhanced
12 Single element, Blue Enhanced
13 Single element, U.V. Enhanced
21 Single Axis Position Sensing (PSC)
22 Dual Axis Position Sensing (PSC)
23 Quadrant Detector
24 Bi-Cell Detector
31 Photopic Detector
32 Red Photopic Detector
41 Opto Hybrid Red/IR Enhanced
42 Opto Hybrid Blue Enhanced
43 Opto Hybrid U.V. Enhanced

PACKAGE CODE
011-TO-18
211-TO-18 Isolated
021-TO-5
221-TO-5 Isolated
041-TO-8
042-TO-8 UV Window
241-TO-8
242-TO-8 Isolated UV
251-Jumbo TO-8
252-Jumbo TO-8 UV
171-BNC Std. Window
172-BNC UV Window
022-Std. TO-5 Header/UV Window
222-Iso. TO-5 Header/UV Window
042-Std. TO-8 Header/UV Window
242-Iso. TO-8 Header/UV Window
181-1.6" Diameter BNC Pkg.
231-Iso. TO-5 Tall Cap
232-Iso. TO-5 Tall Cap UV Wind
261-Jumbo TO-8 Std. Window
262-Jumbo TO-8 UV Window
391-Plastic Pkg. Exp. Window
040-No Window Cap Ins. Wire Bd
051-Std. Jumbo TO-8 Head Std. Window

DETECTOR APPLICATION
11- Photovoltaic—Ultra Low Noise/Medium Frequency Red I.R. Enhanced
12- Photovoltaic—Ultra Low Noise/Medium Frequency Blue Enhanced
13- Photovoltaic—Ultra Low Noise/Medium Frequency U.V. Enhanced
21- Photoconductive—High Frequency Red I.R. Enhanced
22- Photoconductive—High Frequency Blue I.R. Enhanced
23- Photoconductive—High Frequency U.V. Enhanced

Amplifier Specifications (23°)
- Input Offset Voltage-------- 3.0 mV (max)
- Input Offset Current-------- 3.0 mV (typ)
- Input Bias Current---------- 15.0 pz (typ)
- Slew Rate 60 V/US
- Gain Bandwidth Prodnt 26 mHz
- Power Supply ± 5 to 15 Volts.

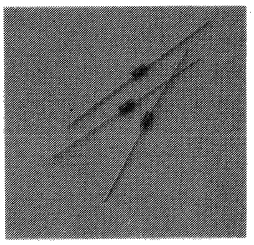
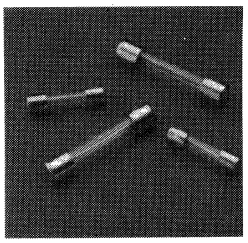
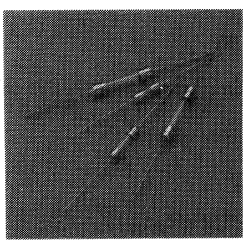
FUSE PRODUCTS





bel...Defining a degree of excellence



bel...defining a degree of excellence in quality and service for over 40 years in the electronics industry. bel is your full line fuse source, worldwide. bel specializes in:

- **Lightning Surge Fuses**
- **Slow Blow Micro Fuses**
- **Pre-assembled Fuses & Clips**
- **Locking Fuse Clips**
- **"Euroform" Micro Fuse**
- **/Semko Approved Fuses**

When you need miniature or micro fuses, magnetic products, custom thick film hybrids, or delay lines...come to bel, the company who has been supplying the world with electronic components since 1949.

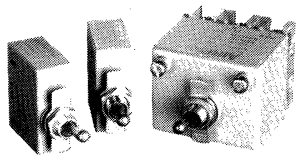
CIRCUIT BREAKERS

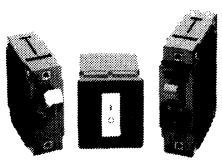
Airpax circuit breakers are rated at 50 milliamps to 160 amperes in more than 50 configurations and styles. And we can design one to your exact specifications. Contact Airpax , Woods Road, Box 520, Cambridge, MD 21613. (301)228-4600. Fax (301)228-8910. A North American Philips Company.



Models AP and UP**

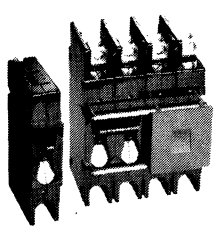
Hermetically sealed. DC, 50/60 Hz or 400 Hz versions. Various delays to meet your needs. UP version has wide glass terminals.
Specifications: 1 to 3 poles. Ratings: 0.05-20A, 240 VAC, 50 VDC, Interrupting capacity: AP MIL, 500A @120 VAC, 50 VDC; 300A @ 240 VAC. UP 1000A @ 32 VDC, 240 VAC.
Approval: QPL: MIL-C-39019 Lloyds

**(UP, single pole, series only)



Models SNAPAK®, IEG and IEL

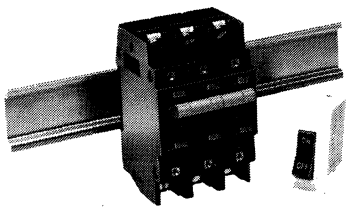
All conform to VDE and IEC spacing requirements.
Specifications: SNAPAK: 1 or 2 pole ratings. 7.6 to 15A at 32 VDC/125 VAC, 0.10 to 7.6A at 50 VDC/250 VAC.
2-pole only (2-pole breaking) and ratings: 7.6 to 15A at 125/250 VAC, 32/50 VDC. Interrupting capacity: 1000A at 125 VAC, 250 VAC, 32 VDC AND 65 VDC
Approval: IEC VDE* Lloyds
IEG and IEL Ratings: 0.05-30A, 277 VAC, 65 VDC (Model IEG). 0.05-50A, 277 VAC, 65 VDC (Model IEL). Interrupting capacity: 3500A, 277 VAC max., 2000A, 65 VDC (Model IEG). 5000A, 277 VAC max., 2000A, 65 VDC (Model IEL).
Approval: VDE*



Model 209

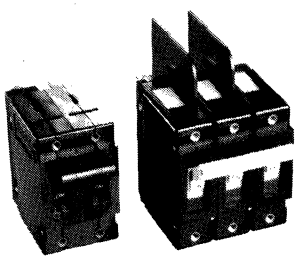
Ideal for branch circuits. Mounts in switch boards, panel enclosures, panel boards, junction boxes. Series includes 219 manual motor controller, 229 appliance controller, 249, 259 and 269 marine power selectors.
Specifications: 1 to 6 poles. Ratings: 0.10-100A, 125 VDC; 0.10-77A, 600 VAC; 0.10-100A, 120, 240 277 and 480 VAC. Interrupting capacity: 5000A.
Approval: Lloyds

*Limited approvals, consult factory



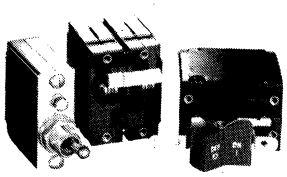
Models 203 and IELHR

203 is a front panel mounting device which combines over-current protection, ON-OFF switching and pilot light. Series, shunt or relay trip.
Specifications: 1 to 3 poles. Ratings: 0.05-10A, 250 VAC, 50 VDC, 10.1-20A, 120 VAC, 32 VDC. Interrupting capacity: 1000A.
Approval: Lloyds
IELHR designed for 35 mm symmetrical DIN rail; quick mounting, easy removal. Handle assembly available in 7 colors.
Specifications: Ratings: 0.05-50A, 65VDC and 250 VAC. Operating temperature: -40°C to + 85°C.



Models APL/UPL and 205

These breakers offer precision operation for critical service. Series, shunt and relay configuration options. Choice of delays, ratings. 205 is dust-sealed for harsh environments.
Specifications: 1 to 9 poles. Model APL/UPL Ratings: 0.05-20A, 277 VAC; 0.05-50A, 250 VAC; 0.05-100A, 65 VDC. Interrupting capacity: 5000A, 120 VAC; 2000A, 65 VDC. Model 205 Ratings: 0.05-20A, 277/480 VAC; 0.05-50A, 250 VAC; 0.05-100A, 32 VDC. Interrupting capacity: 5000A, 277/480 VAC; 5000A, 250 VAC; 2000A, 32 VDC.
Approval: QPL: MIL-C-55629 Lloyds



Models APG/UPG/IPG

Low-cost, precision operation. Multi-pole assemblies, single or multi-handle. For data processing, broadcast equipment, vending machines, controllers, etc.
Specifications: 1 to 4 poles. Ratings: 0.02-30A, 277 VAC, (Model IPG, 250 VAC), 65 VDC, 31-50A, 50 VDC. Interrupting capacity: 1000A, 277 VAC; (Models IPG, 250 VAC), 2000A, 65 VDC; and at 5000A, max. ratings of 30 A 120 VAC, 20A at 250 VAC, 10A at 277 VAC, (Model IPG, 250 VAC).
Approval: QPL: Mil-C-55629 Lloyds Model IPG-VDE*

ENERGY LIMITING CIRCUIT BREAKERS DIN RAIL MOUNT

Eliminate fuse replacement and provide reliable and cost effective circuit and equipment protection against overload (thermal trip) and short circuit (magnetic trip). Enhance the value of your product or system with our compact single, two- or three-pole modular design breakers. The high speed contact separation, quick arc transition and high arc voltage achieve effective short circuit interruptions and limit the short circuit current. All circuit breakers and accessories snap easily onto the same standard 35mm DIN rail, so no individual mounting is required, saving space and assembly time. Factory or field attach auxiliary switches, shunt trips or under voltage releases. Mix and match them with your other control components such as terminal blocks, relays or contactors.

- Instantaneous magnetic short circuit protection
- Thermal overload protection
- Compact, economical
- Touch Protected
- Easy to mount
- Current limiting
- Modular design, conforms to standard DIN size
- Screw-clamp terminals for conductors up to AWG 2 (in), AWG 4 (out)
- Toggle lever indicates ON/OFF position
- International approvals
- Selection of trip delays

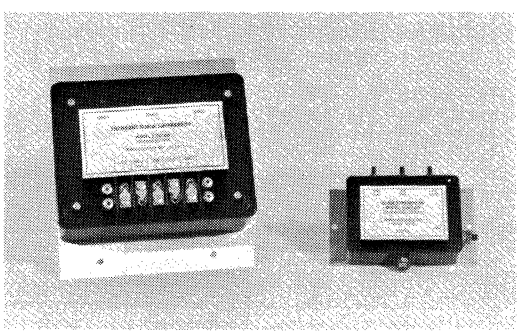
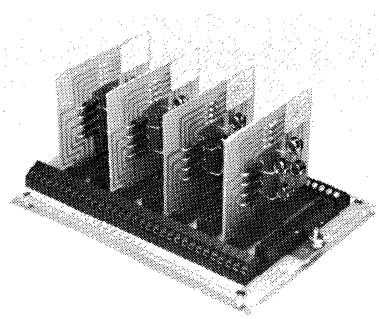
AC POWER LINE AND DATA LINE TRANSIENT SUPPRESSORS





SINGLE PHASE PROTECTION

Both the OEM series and CM series AC transient suppressors attenuate spikes and fill notches throughout the full 360 degrees of the AC sinewave. Unlike other suppressors which merely clamp a transient hundreds of volts above or below reference, Amber operates within +/– 1 volt variation of the sinewave instantaneous voltage. The CM series adds common mode protection (hot to ground and neutral to ground). Both OEM and CM series are UL 1449 approved (file #E103476). Models are available with either screw terminals or wire leads. Models are also available for DC power and "line cord" protection. Not only does Amber outperform other approaches in both categories of IEEE-587; it also outperforms the competition in the new (1992) IEC and ANSI standards.

THREE PHASE PROTECTION

Amber's three phase protection is available for either the OEM or full facilities protection. The small size and mounting profile allow them to be used in many locations where mounting larger units would be impractical or impossible. These protectors are designed so as to be installed in either the user's electrical panel or the equipment manufacturer's enclosure. The 1135 models have built-in self diagnostics and alert of any fault. Both OEM and facilities models are available for all service types and voltages. Amber's three phase protectors are among the most cost effective on the market today. The OEM version of the three phase protector is UL approved to 1449 (file #E103476).

DATA LINE PROTECTION

The Amber ACS system protects digital data lines, sensor and transducer lines, plus 4-20mA current loops. Each ACS enclosure will protect up to 32 single-ended data lines or 16 differential pairs or 4-20mA loops or 8 RS-232 sets. A Nema type 1 enclosure is standard, with type 4 or type 12 available as options. Each line is separately protected up to 3000 surge amps with only 10 ohms maximum impedance. The modular construction of the ACS system allows different data types to be protected in the same enclosure.

THE AMBER DIFFERENCE

Amber Industries Inc. is a technological leader in single phase, three phase and data line surge suppression. We invite you to let us know what your specific requirements are. Our applications and engineering departments will work directly with your engineers to assure a quality design based on the most up-to-date suppression technology available.

3SB1	1	250	3SB8	8	250
3SB1.2	1-2/10	250			

Listed by Underwriters' Laboratories through 8 amperes. Certified by Canadian Standards Association through 8 amperes.

Type 3SB fuses, described as slow blow, are designed to prevent unnecessary blowing in circuits where transient surges are anticipated. Protection against short circuit or continued overload is still maintained. Pigtail leads (Type 3SBP) are available when direct soldering into circuits is desired.

TYPE 3SF/3SFP QUICK ACTING GLASS TUBE FUSE SERIES

3SF500	.500	250	3SF8	8	60
3SF630	.630	250	3SF10	10	60

Approved by SEMKO from 315 mA through 10 A.

Type 3SF fuses are designed to meet the electrical and mechanical requirements of IEC 127, CEE 4, Standard Sheet IV. They carry the SEMKO mark in the values specified as SEMKO approved. They are mechanically interchangeable with Type 3AG, the 1/4×1-1/4 normal blow fuse. However, since the fusing characteristics specified in IEC 127 and UL 198G are different, it is important that the designer carefully compare the blowing curves of the two types before substituting one for the other. They permit manufacturers of equipment built to United States/Canadian standards to substitute a fuse acceptable and available in the European market without changing board layouts or fuse mountings. Pigtail leads (3SFP) are available when direct soldering into circuits is desired.

TYPE 8AG/8AP NORMAL BLOW GLASS TUBE FUSE SERIES

*Pigtail (AP)

Listed by Underwriters' Laboratories through 7 amperes. Certified by Canadian Standards Association through 5 amperes.

Type 8AG is designated as a normal blow fuse for use in general circuit protection. Their smaller size permits use where space limitations prevent use of Type 3AG. Pigtail leads (Type 8AP) are available when direct soldering into circuits is desired.

5MF800	8/10	250	5MF7	7	125
			5MF8	8	125

Listed by Underwriters' Laboratory from 50 mA to 8 amperes. Certified by Canadian Standards Association through 8 amperes.

Type 5MF fuses, described as fast acting are manufactured to meet the requirements of UL 198G and CSA 22.2. They permit European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration. Pigtail leads (5MFP) are available when direct soldering into circuits is desired.

TYPE 5MT TIME LAG GLASS TUBE FUSE SERIES

ELECTRICAL CHARACTERISTICS

Listed by Underwriters' Laboratories from 50 mA to 5 amperes. Certified by Canadian Standards Association through 5 amperes.

Type 5MT fuses, described as time lag offer additional surge protection for circuits where momentary transients are anticipated. They are built to meet the specifications of UL 198G and CSA 22.2. They permit the European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration. Pigtail leads (5MTP) are available when direct soldering into circuits is desired.

Approved by SEMKO for 80 mA, 125 mA, and from 250 mA through 6.3A.

Type 5SF fuses, described as quick acting, low breaking capacity, are manufactured to the specifications of IEC 127, CEE 4, Standard Sheet II (Type F). Used throughout Europe, they carry the SEMKO mark in the ratings indicated. They are used for general circuit protection in electrical and electronic equipment where momentary transients are not anticipated. Pigtail leads (5SFP) are available when direct soldering into circuits is desired.

5TT700	7/10	250	5TT6	6	125
5TT800	8/10	250	5TT7	7	125

Listed by Underwriters' Laboratories from 50mA to 5 amperes and certified by CSA through 5 amperes.

Type 5TT fuses, described as slow blow, are designed to withstand higher surge currents occurring at switching during the normal life of equipment than the 5MT series. They are built to meet the specifications of UL 198G and CSA 22.2. They permit the European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration.

Pigtail leads (5TTP) are available when direct soldering into circuits is required.

MFA is UL listed through 7A while MB/MBP are UL listed and CSA certified through 7A.

MFA type fuses are subminiature and are color coded for current rating identification.

MB/MBP are designed for applications where space is a critical factor.

All Bel Fuse clips are manufactured from .020 phosphor bronze stock and specially hardened to assure long life and minimum contact resistance. They are bright tin plated to facilitate soldering and prevent oxidation. In addition to the stock designs illustrated, clips can be quickly tooled to meet customer specifications.

RAIL PACKAGING

CARLINGSWITCH CIRCUIT BREAKERS

VISI-ROCKER® CIRCUIT PROTECTION

Unique molded-in two-color rocker actuator that indicates mode whether breaker is on or off/tripped. (Indicator and legend color are red with remainder of rocker black.) Available in series trip with 6-32 threaded mtg. inserts and push on .250" tab terminals. Rated @ 250 VAC/65 VDC. Series trip curve-34 (AC-DC type) trip point is 135% of rated current. Recognized by UL Inc., CSA and VDE certified.

All "B" and "C" series magnetic circuit breakers are Recognized by UL Inc. and are CSA and VDE certified.

All products are of a "series trip" construction, with 6-32 threaded mounting inserts, dual "I-O/ON-OFF" markings on a black toggle actuator, and come with .250" tab (Q.C.) terminals on the "B" series, and 10-32 threaded stud terminals on the "C" series. All units are supplied with a general purpose medium, AC-DC delay curve #34, rated at 250VAC/65 VDC with trip times as shown below.

CARLINGSWITCH CIRCUIT BREAKERS

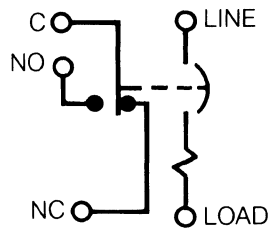
Circuit Options (Consult Factory)

Series Trip

A basic two (2) terminal device usually used as a combination power switch and overload protector. The contacts and current sensing coil are connected in series with the line and load terminals.

Series Trip with Auxiliary Switch

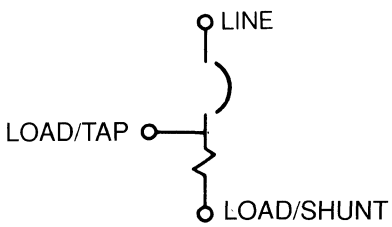
Same as "Series Trip" except with the addition of a SPDT snap-action switch which is *electrically isolated,* but *mechanically* linked to the movement of the main breaker contacts. Commonly used to remotely signal the status of the breaker (on or off/tripped).



B AND C SERIES

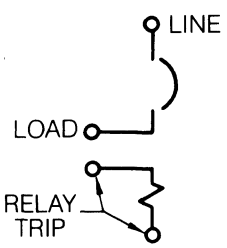
Shunt Trip

A three (3) terminal device similar to a "Series Trip" with the addition of a third terminal between the contacts and coil. This circuit is usually used to control two separate loads from the same power source, while sensing overload current in only one load.



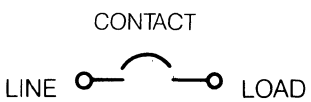
Relay Trip

A four (4) terminal device in which the contact and coil circuits are *electrically isolated* but are still *mechanically* linked to each other. An overload in the coil circuit will cause the contact circuit to open. Both circuits may be of opposite polarity to each other. Commonly used in "dump" circuit or "remote shut down" applications. (Note: World Approval Agencies may require an extra "Series Trip" pole for this function.)



Switch Only

Same as a "Series Trip" device without a sensing coil. Provides low cost, heavy duty switch capability when overload protection is not needed.



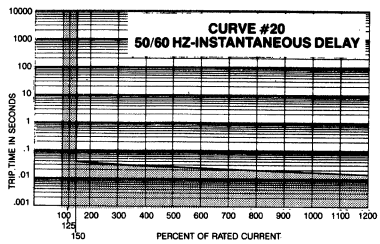
Note: The preceding circuits may be mixed on multi-pole units for special application requirements—(consult factory).

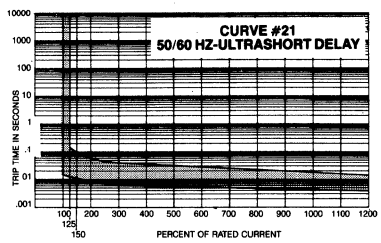
CARLINGSWITCH, Inc., 60 Johnson Avenue, Plainville, CT 06062-1156
(203) 793-9281 • FAX: (203) 793-9231 • 1-800-243-8556

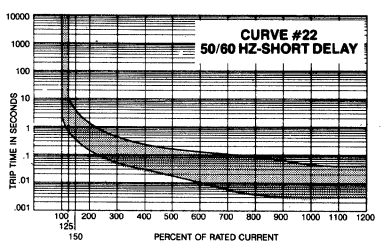
CARLINGSWITCH CIRCUIT BREAKERS

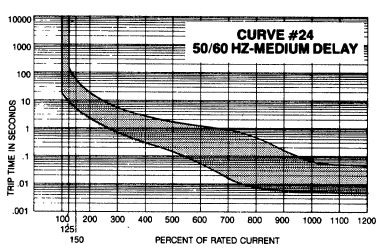
Time Delay Options (Consult Factory)

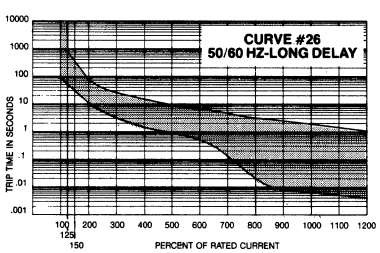
AC



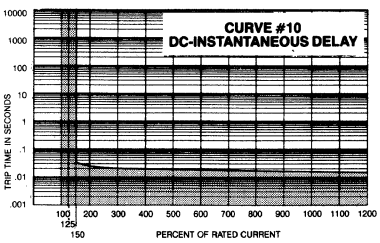


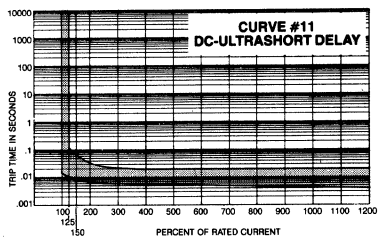


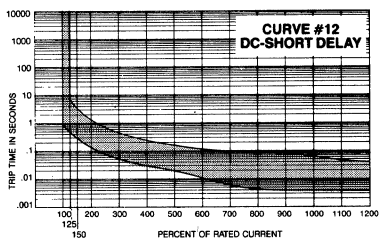


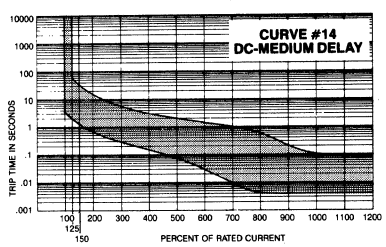


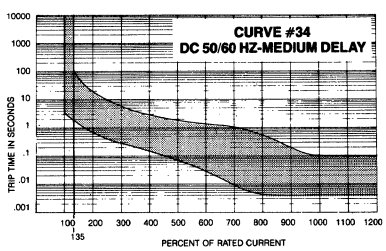
DC











Curve #34 is a combination AC/DC Time Delay Curve.

Notes:

High Inrush Time Delay Curves #42, 44, 46 are also available

Time Delay Curves (#11, 12, 14, 21, 22, 24 & 26):

Breakers must hold 100%, may trip between 101% to 125%, must trip at 125% of rated current and above within time limits shown in curves.

Time Delay Curve (#34):

Breaker must hold 100%, may trip between 101% to 135%, must trip at 135% of rated current and above within time limits shown in curve.

Instantaneous Curves (#10 & 20):

Breakers must hold 100%, may trip between 101% to 150%, must trip at 150% of rated current and above within maximum times shown in curves.

All Curves:

Curve data shown represents breaker response at ambient temperature of 77°F (25°C) with no preloading. Breakers are mounted in standard wall-mount position.

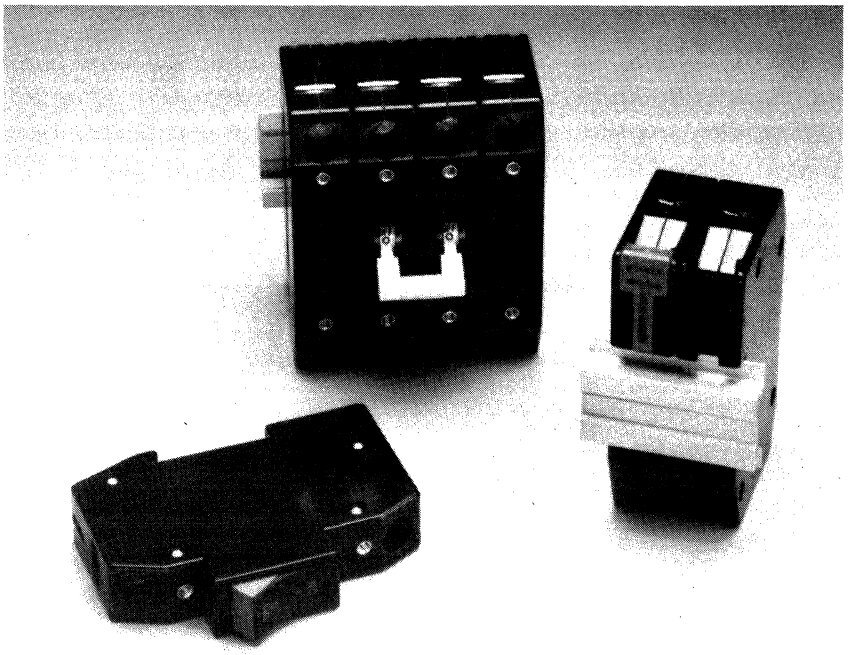
CARLINGSWITCH CIRCUIT BREAKERS

D Series - DIN Rail Rocker/Handle Actuator

(WORLD MARKET DESIGN)



Similar to the C Series magnetic circuit breaker but designed for snap-on-back panel rail mounting on either a 35mm x 7.5mm, or a 35mm x 15mm Symmetrical Din Rail. This design allows rapid and simple mounting and removal of the breaker. It features recessed, wire-ready, touch-proof, shock resistant terminals suitable for automatic screwdriver assembly, as well as "Dead Front" construction characteristics.

This breaker is available with the exclusive Visi-Rocker™ two-color actuator, an industry first, which can be specified to indicate either the ON mode or the TRIPPED/OFF mode. Rockers are available in three Visi-color combinations and seven solid colors. The D Series is also available with a standard handle type actuator. Both rocker and handle types fit in the same industry standard panel cutouts.

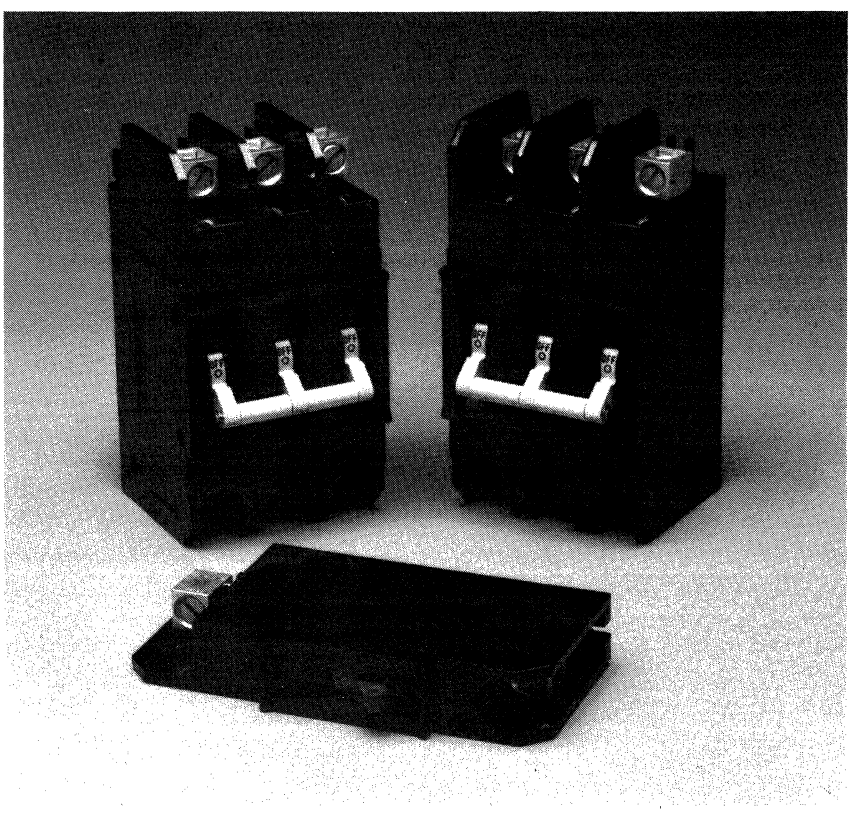
.1 - 50amps, up to 480VAC or 65 VDC, 1 - 4 poles (handle); 1 - 3 poles (rocker), with a choice of time delays.

AGENCY APPROVALS

UL Recognized under Component Recognition Program as Protectors, Supplementary (Guide QVNU2, File E75596), UL Standard 1077. CSA Certified under Class 3215 01, File LR47848.

E Series - Handle Actuator

(WORLD MARKET DESIGN)



The E Series is ideally suited for large current applications. Available with front or back mounting, screw terminals, stud terminals and heavy duty box wire connectors for solid wire or a pressure plate connector for stranded wire.

The E Series is UL Listed and CSA Certified for Branch Circuit Protection which does not require a fuse backup. It is also UL Recognized and CSA Certified as a Supplementary Protector and as a Manual Motor Controller.

This World Market product is designed in accordance with the 8mm spacing requirements of IEC Publications 380, 435, 950 and VDE specifications 0805/0806.

1 - 6 poles, .1 to 100 amps, up to 600 VAC or 125 VDC. Available with a choice of circuits, time delays and actuator colors.

AGENCY APPROVALS

UL LISTED Circuit Breaker Guide DIVQ, File E129899, under UL Standard 489.

UL Recognized under the Component Recognition Program as Protectors, Supplementary (Guide QVNU2, File E75596) UL Standard 1077 and as Industrial Control Equipment - Motor Controllers, Manual (GuideNLRV2, File E135367) UL Standard 508.

CSA Certified Circuit Breaker, Class 1432 01, File LR93910, under CSA Standard C22.2 No. 5.

CSA Certified Supplementary Protectors, Class 3215 01, File LR47848 under Standard C22.2 No. 235.

If your only concern is initial cost, then you'll save a few bucks by choosing fuses over E-T-A Circuit Breakers.

But fuses blow . . . and can drive up your total operational costs including warranties, replacement, service, even product liability.

E-T-A Circuit Breakers, on the other hand, add value to your product. They provide better circuit protection and performance characteristics than fuses. They're trip free and foolproof . . . and can actually lower your total costs.

So forget the fast buck. Go for the long-term value of E-T-A Circuit Breakers . . . 100% quality tested and approved for use worldwide.

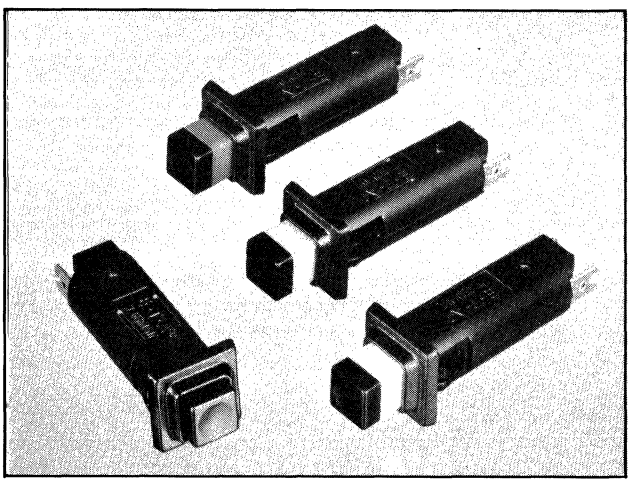
MINIATURE SWITCH/BREAKER COMBINATION

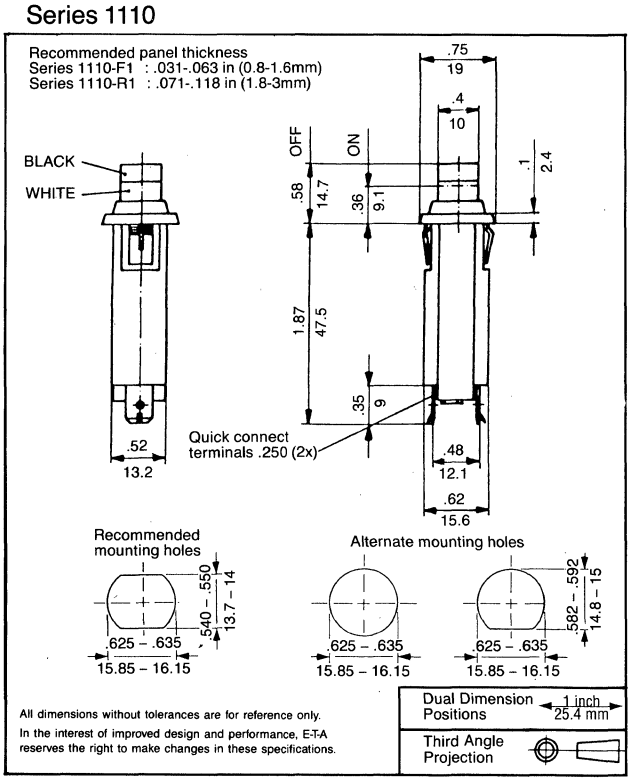
Series 1110-F-112-P1M1

SWITCH CIRCUIT BREAKER COMBINATION SINGLE POLE

- Snap in mounting
- Fits standard fuse holder cutout
- White band, trip indicator ring standard
- Fully trip free, Cannot be held closed on overload. If button is held, breaker will trip anyway on overload.
- UL 1077 recognition – File E67320
- CSA approved – File 16186
- VDE approved



Series 1110



Maximum voltage rating: 250 V ac or 28 V dc
Maximum interrupting capacity: 8 times rated current for amp ratings up to 6 A; 10 times rated current for ratings 8 A and up. UL tested up to 1000 A/125 V ac according to UL Standard 1077
Life: 6,000 cycles at rated current
Dielectric strength: 2000 V ac
Insulation resistance: 100 megohm
Operating temperature range: 0°C to +55°C (32°F to +131°F)
Shock resistance: 25 g (IEC 68-2-27, Ea)
Vibration resistance: 10 g (IEC 68-2-6, Fc)
Humidity: 95% at 40°C (EIC 68-2-30, Db)
Weight: 12 grams (.5 oz.) approx.

Standard current rating / internal resistance
Trip current is 140% of rated current:

amp	ohm	amp	ohm	amp	ohm
0.10	110	1.00	1.1	4.00	0.07
0.20	28	1.20	0.75	5.00	0.05

Commercial & Military Approved Panel Mount Fuseholders

- Superior Clip Design for Solid Fuse Contact
- UL Recognized & C.S.A. Certified
- Most Commercial Models are recognized under the Marine Electrical and Fuel System (PEQZ2) as "Ignition Protected Devices"
- Blown Fuse Indicating & Non-Indicating
- High Impact Plastic for Superior Strength
- Dead-Front, Watertight
- Military Versions Meet MIL-F-19207

Commercial Fuseholders

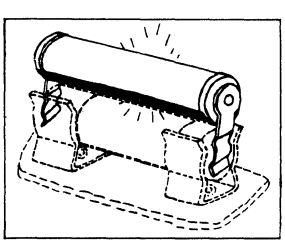
Blown Fuse Indicators

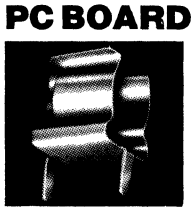
When A Fuse Blows, A Light Glows!®

Several Models To Choose From

- Bolt Down for Rectifier Fuses
- Snap On for Ferrule Fuses
- Top Mounting for Knife Blade Fuses



PC BOARD FUSE CLIPS



Low profile clips (.360" high) are soldered to printed circuit boards eliminating eyeletting or riveting. Available in Spring brass, beryllium copper or spring bronze with various platings.

HEINEMANN® Circuit Breakers First in Features, First in Quality

Heinemann offers the widest choice of styles and current ratings in high-quality, reliable circuit protectors. Ratings range from 0.01A to as high as 700A. Their applications are as diverse as medical equipment, computers, industrial air conditioners, electric locomotives and telecommunications equipment.

Heinemann can also supply circuit breakers that provide auxiliary functions. For example, a heavy-duty relay, an on/off switch and a hydraulic-magnetic circuit breaker, all in one economical and compact unit.

Use this condensed guide to locate the type of circuit breaker that best meets your requirements. Then write or call us for a copy of the appropriate product bulletin containing detailed specifications and ordering information. Or call one of our technical assistance engineers to dicuss your particular application.

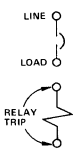
Technical assistance, important features and quality products...three reasons why it pays to look to Heinemann "When your reputation's on the line."

SPECIAL-FUNCTION CIRCUITS

Heinemann circuit breakers (except for PS1, KD, TX and Hector) can be furnished with a number of special-function internal circuits. They permit a single protector to perform the protection and control functions of several components.

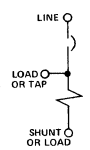
RELAY-TRIP

Permits remote actuation using a separate control circuit. Electrical isolation allows use of a different current or voltage from contact circuit. Both time delay and non-time delay constructions are available.



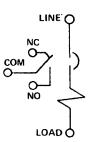
SHUNT/TAP

Use of third terminal permits remote tripping by utilizing line voltage with or without a time delay response. On breakers rated up to 1A, the trip point may be raised by shunting with an external resistor on the shunt/tap terminal.



AUXILIARY SWITCH

Used for logic functions, alarms, lights and other circuits. Miniature snap-action SPDT or DPDT switch is mounted on the back of the breaker, mechanically connected to the switching mechanism. Contact capacity: 10A at 125/250 V, 50/60 Hz; 4A resistive at 30 Vdc; 2.5A inductive at 30 Vdc. Minimum operating voltage 6 Vdc or ac, at 3 VA dc or ac.

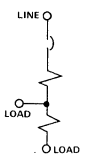


SERIES TRIP (Standard internal circuit)

Ideal for use as both power switch and overload protector. Usually installed in series with line and load terminals to provide circuit interruption in the protected circuit.

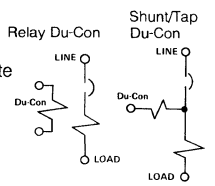
DUAL RATING

Two concentrically-wound sensing coils provide two discrete current ratings in the same breaker. Protects equipment designed to operate at two different current levels or supply voltages within certain limitations.



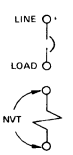
DU-CON™ (DUAL-CONTROL)

Provides sensing of both overcurrent and separate voltage signals in the same pole through a small, non-continuous-duty voltage sensing coil. DU-CON overload and voltage coils must be specified separately.



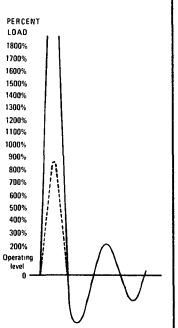
NO-VOLTAGE TRIP

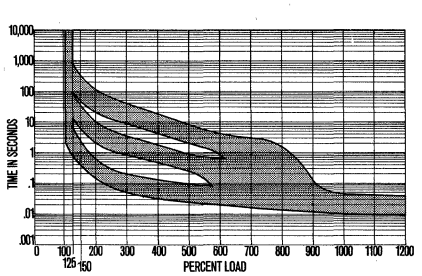
Prevents uncontrolled re-start of equipment after power outage. Used in ground-fault interrupters and other safety applications. Not intended for overload protection without one pole connected in series-trip configuration.



HIGH-INRUSH

Economical protection of high-reactance loads, which draw starting surges often as high as 30 times normal load current in a 50/60 Hz 1/2-cycle pulse, such as ferro-resonant power supplies and distribution transformers. Eliminates nuisance tripping without derating or special circuitry.





Typical Time Delay Curves

Circuit breakers are available in a variety of time-delay curves for applications such as high-inrush, 50/60 Hz and dc as well as with no intentional delay.

HEINEMANN® Circuit Breakers First in Features, First in Quality

	PS1 FUSE-SWITCH	RE-CIRK-IT® SERIES KD1	TYPE TX	SERIES RX
					Fuse-Switch provides ON/OFF control and fuse protection in a single low-cost component. Its use eliminates a hole and interconnecting wiring and makes it easy to re-fuse from the front panel. It accepts standard 1/4-inch diameter by 1¼-inch fuses. An adapter is available for 5 mm x 20 mm fuses. Can be supplied for normally open or normally closed operation.	A low-cost, pushbutton supplementary protector for electrical equipment, designed to fit in a standard 5/8-inch round or "D" fuseholder panel cutout. Resettable at up to 1000% of its rated current from 2.5A through 15A, 500% from 0.25A through 2A. Slide-on retaining ring included.	The attractively designed Type TX circuit protector doubles as an economical ON/OFF switch and with an optional lamp as a power indicator. Rocker arms available in a variety of colors; in one and two pole models. Its trip free design cannot be held closed against a fault. Features quick-connect terminals and snap-in mounting.	A compact hydraulic-magnetic circuit breaker featuring snap-in mounting and rocker handle operation. Over-the-center, non-teasable mechanism prolongs contact life by reducing arcing. Available with long, short and no deliberately imposed time delay.
APPLICATIONS	Consumer and industrial products that would otherwise use a separate ON/OFF switch and fuse holder.	Consumer and industrial products, office machines, appliances, power supplies, convenience outlets, electronic games.	Commercial and consumer products, power supplies, medical electronic equipment, office and reproduction equipment, data processing equipment.	OEM (power supplies, medical-electronic equipment, control systems, office and EDP equipment).

HEINEMANN® Circuit Breakers First in Features, First in Quality

SERIES HM	SERIES L	SERIES J/S	SERIES AM	SERIES AM-MIL
				Lightweight, subminiature, multi-frequency circuit breaker designed to withstand severe environmental extremes such as shock, vibration and high humidity. Housed in a corrosion-resistant brass case, nickel plated. Meets MIL-C-39019, is explosion- and fungus-resistant, operates in any position. Silver contacts provide good conductivity with low power loss.	This compact hydraulic-magnetic circuit protector provides the same quality, precision and choice of time delays found in larger Heinemann magnetic circuit breaker. Over-the-center, non-teasable mechanism provides snap-action operation that prolongs contact life by reducing arcing. Handles available in seven different colors for decorative or circuit-identification purposes.	Compact, lightweight, moderately-priced circuit breaker for single or multi-pole OEM applications. Also available with snap-in mounting or rocker handles. Sealed mount models are also available, single pole only. Series J/S breakers are suitable for domestic or world-market applications. Models also available for marine applications.	A low-cost, lightweight breaker available in single or multi-pole configurations, the Series AM features rear-connection studs, a high level of moisture resistance, and a current range up to 100A dc or 60A ac. Qualified under MIL-C-55629 to 50A dc and ac.	Heinemann Series AM-MIL breakers are specifically built and tested in accordance with the requirements of MIL-C-55629. Fungus- and moisture-resistance is provided by treating all ferrous parts with a special finish, and by using special springs and inherently fungus-resistant phenolic cases, covers and handles.
Military programs and commercial products, power supplies, mining and medical applications where hermetically-sealed circuit protection is required.	OEM (power supplies, medical-electronic equipment, control systems, office and EDP equipment).	OEM (power supplies, medical-electronic equipment, control systems, office and EDP equipment), control panels, marine equipment, field instrumentation.	OEM (data-processing equipment, mobile applications, humid environments).	OEM (data processing equipment, mobile applications, military equipment subject to humid, tropical environments).

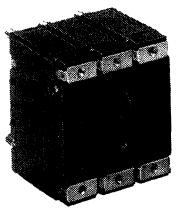
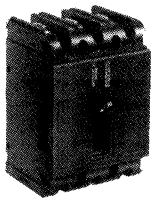
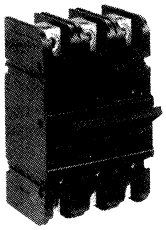
HEINEMANN® ELECTRIC COMPANY

P.O. Box 6800, Lawrenceville, NJ 08648-0800 USA • (609) 882-4800 • EasyLink 62886238 • FAX (609) 882-2183

HEINEMANN® Circuit Breakers First in Features, First in Quality

SERIES AM/S	SERIES CF E-FRAME	SERIES GH EH-FRAME	SERIES GJ	SERIES GJ1P
				






Series AM/S "world class" circuit breakers meet International Standard IEC 380 and German Standard VDE 0730. The 8-mm spacing requirement and dielectric-withstand specification are incorporated into the standard AM breaker housing without changes in size, thereby eliminating mounting procedure modifications or the need for adapter plates.	Priced considerably lower than competitive E-frame breakers, the Series CF is the most compact and versatile circuit breaker available for equipment and branch-circuit protection. Single- and multi-pole models are stocked in a wide range of standard ratings for fast, off-the-shelf delivery.	This rugged new EH-frame breaker offers all the advantages of a completely magnetic, three-pole breaker with 14,000A interrupting capacity for less than most thermal units. Compact, environmentally stable and to 100A at 480 Vac and 250 Vdc.	Where space is at a premium and current capacity up to 250A is called for, the Series GJ is the answer. Available in one-, two-, or three-pole models, it is especially suitable for panelboards, service entrances, and electric vehicles.	GJ1P parrallel-pole breakers incorporate Precision Current Equalization (PCE) to automatically distribute current equally through the current-sensing elements. PCE thereby minimizes nuisance tripping which can occur with conventional parallel-pole breakers. An optional shunt permits metering of current. Since shunt output is only 25 mv, light-gauge wiring can be used between shunt and meter.
OEM (data processing equipment, mobile applications, humid environments).	Panelboards, switchboards, branch circuits, EDP equipment, machine tools, environmental systems, single- and three-phase applications.	Motor controls, air conditioning, electric heating, computer main frames, transportation, indoor or outdoor installations.	Commercial, industrial, and residential service — entrance or panelboard applications; lighting, appliance, transformer, electric vehicles, EDP power supplies, heating, air conditioning, and electronic circuit protection.	Telecommunications, transportation, air conditioning, other outdoor "heat-loaded" equipment.

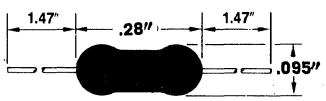
PICO II™ SUBMINIATURE FUSES

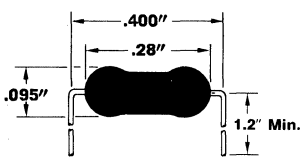
- World's smallest axial lead fuse for use in micro electronic circuits including computer and aerospace applications.
- Available on tape and reel.
- Low resistance values.
- Hi-speed action.
- Epoxy coated body for protection against environmental conditions.
- Withstand axial pull of 7 lbs.
- Available with or without color-coding per I.E.C. standards.
- Interrupting rating of 300A D.C. and 50A A.C. at rated voltage.

Opening Time: 100%, 4 hrs. min.; 200%, 1 sec. max. (1/16-7A) 3 sec. max. (10A) 10 sec. max. (12-15A).
U.L. Recognized and Certified by C.S.A. through 15 amperes.

251 Series - Axial Leads



252 Series - Radial Leads



Note: Leads are solder-coated copper, .025" diameter for 1/16-10A, .032" diameter for 12-15A.

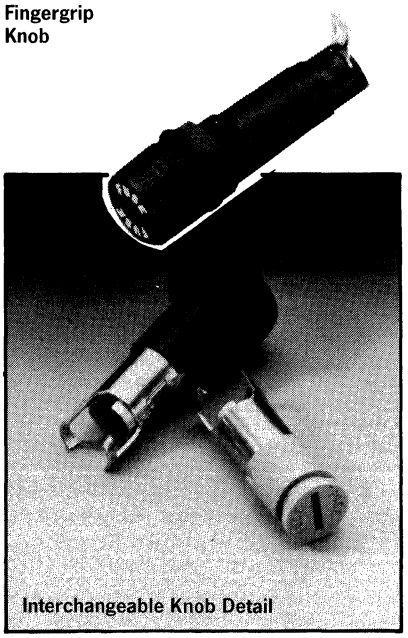
Littelfuse® CIRCUIT PROTECTION DEVICES

INTERNATIONAL SHOCK-SAFE FUSEHOLDER

Low Profile
Fingergrip
Knob



FEATURES:

- Designed to eliminate the possibility of electrical shock, as defined in IEC standards 65 and 257.
- Universal fuseholder body will accept 3AG, 5 × 20mm, and 2AG fuse sizes depending on knob selected. Permits inventory reduction of bodies and provides knob interchange versatility.
- Available with two knob styles—screwdriver slot or fingergrip. Drip-proof option is available on screwdriver slot knob style.
- Available in three terminal styles—dual-purpose for soldering or 3/16" quick connect; 3/16" NEMA quick connect; and 1/4" NEMA/DIN quick connect.

APPROVALS:

	3AG	5 × 20mm	2AG

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C
CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

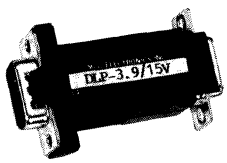
Z
ZIF zero insertion force

Comprehensive Surge Protection for Data Lines

Features 50 joule hybrid circuits offering clamp voltages at +/-6V, 10V, 15V, 25V and 200V
Special low Z, high band pass protectors on request.

Computer/Terminal Protection

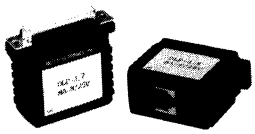
The DLP-3 series of in-line RS232 protectors prevent costly I/O port damage and failures. The DLP-3.1 uses standard 25 pin connectors; the DLP-3.9 uses a 9 pin connector.



DLP-3.1 (UL) *listed*

Telephone Line Protectors

The DLP-3.7 and DLP-3.8 telephone line protectors offer RJ11 and RJ45, respectively, at the input and 25 pin "D" connectors at the output.

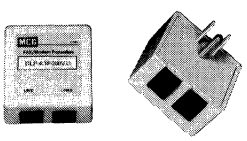


Dial-Up/Leased Line Protectors

The DLP-4.2 and DLP-4.4 protect 2 or 4 wires and install between your sensitive equipment and telephone or leased lines using RJ11 jacks.

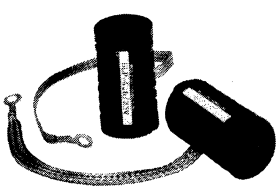
Optimum Fax/Modem Protection

The DLP-4.3 plugs into the same local AC outlet as the equipment being protected. Vulnerable equipment is then plugged directly into the protectors' RJ11 jacks.



Compact Telco Protectors

The DLP-4.6 and DLP-4.8 will protect any equipment using dial-up telephone lines. The DLP-4.6 uses RJ11 jacks on the line and load side; the DLP-4.8 employs RJ45 jacks.

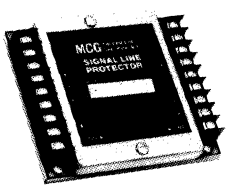


Video/High Speed Data Protection

The DLP-5 series offers in-line protection for video and wide band applications. DLP-5.1 is for use with BNC/coaxial systems; the DLP-5.2 is used with twinaxial systems.

Multiple Signal/ Data Line Protection

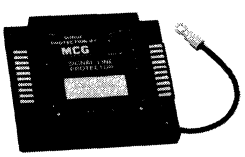
DLP-10, 20, 30 and 33 provide multiple line protection for 2 to 24 wires. These "universal" protectors are hard-wired to install anywhere.



DLP-10, 20, 30 (UL) *listed*

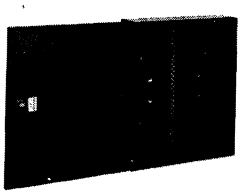
Ten Wire Protector

The DLP-35 is designed to protect 10 wire (5 pair) configurations. The unit features a "no tools required" terminal strip installation.



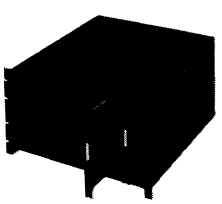
PABX/Key System Protection

DLP-36 series protect security systems, PABX systems, port selectors, etc. Provides telephone line protection (25 pair) using 50 pin RJ21X connectors.



Rackmount Protection Systems

The DLP-40 and DLP-55 series provide for termination of wires using plug-in cards housed in a standard 19" rack enclosure.



MCG ELECTRONICS INC.

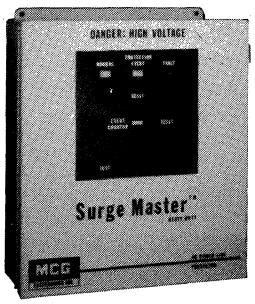
Maximum Surge Protection for AC Power Lines

Lightning and power switching transients surge along AC power lines producing costly damage to computers, electronic equipment and other sensitive electrical devices. Prevent these problems with high speed, brute force MCG protectors.

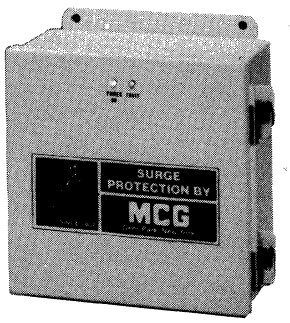
Major Facility Protectors
Surge Master

Superior, triple redundant protection for facilities or major equipment. Exceptional transient absorption capability. On-board diagnostics and modular construction simplify field maintenance. Models available for protecting 100 to 5000A service panels for 120/208, 240 or 480 VAC systems, wye and delta power configurations.



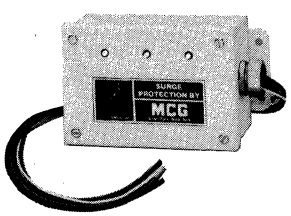
Service Entrance/ Panelboard Protectors
SPC/SPB

The SP series are rugged, yet cost-effective, shunt-installed panel protectors. They are ideal for applications where heavy-duty surge suppression is required, but extensive diagnostics are unnecessary. Choose the SPC for service entrance protection; the SPB for panelboard protection. All popular voltage ratings available.



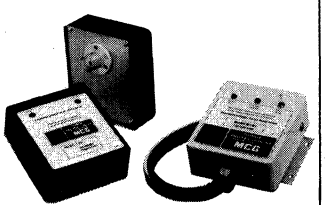
Branch Panel Protectors
SPA

The shunt-installed SPA is ideal when a plug-in protector is not enough and a larger protector would be overkill for the application. The unit provides up to 1680 joules total surge energy absorption.



Commercial/Residential Protectors - P100/160

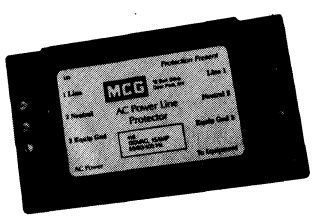
The P100 and 160 series AC voltage surge suppressors are internally-fused, high speed, solid state devices designed for residential and commercial applications. The P100 series employs a twist-lock plug for easy installation; the 160 series offers the flexibility of hardwired installation and the assurance of an audible alarm. LED status indicators verify the presence of power and protection.



P100 Series UL *listed*

Compact OEM Protectors - 407, 415 - 417

The 407, 415, 416 and 417 are equipment-level protectors installed "within" a piece of equipment. The units employ a sophisticated combination of brute force surge protection and impulse filtering to prevent equipment damage or malfunction. Reaction time is less than 1 nanosecond with automatic reset after the transient has passed. Absorption capability to 800 joules.



415, 416 and 417 UL *listed*

Plug-in Protectors 200 Series

Plug-in protectors guard computer hardware and peripherals from AC power line transients. The 200 Series offers two, four and six protected outlets (5-15R). They are designed for a very low voltage transient "let thru" and a very high energy handling capability (720 joules total, depending on model). Model 293 adds fax and modem protection via RJ11 connections.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

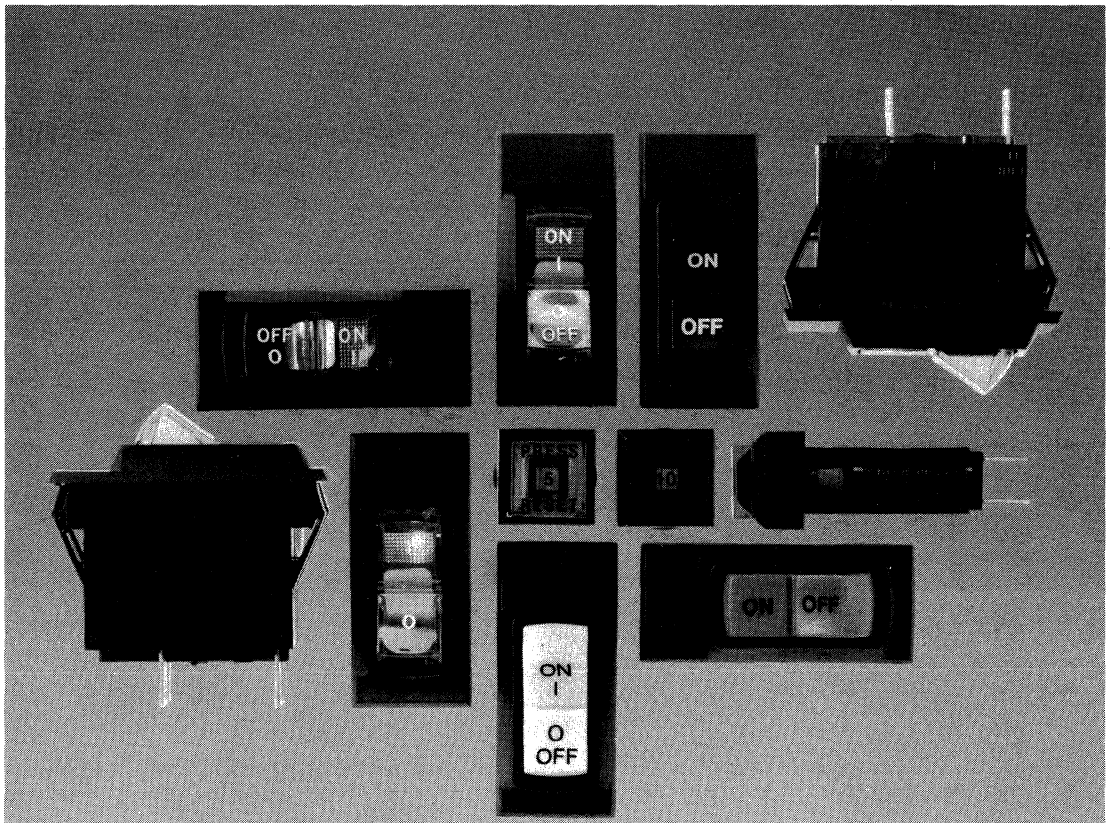
There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

645 stewart ave., garden city, ny 11530



PUT YOUR PROTECTION UP FRONT

The MP 2200 and the new 2400 series: Front panel mounted, switchable circuit protectors. Aesthetically designed to provide greater equipment engineering flexibility. Now that's a switch.

MP 2400 Single and two pole switch/circuit protector. Illuminated in amber, red, or green. **MP 2200** Dual function rocker switch/circuit protector. Comes in various color combinations. **MP 2000** Push to reset fuse holder replacement. Unique indicator in either amber or red.

Write, call, or FAX your specifications or application engineering needs.

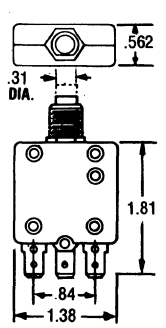
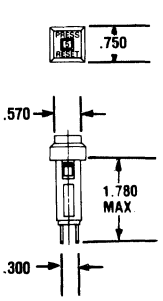
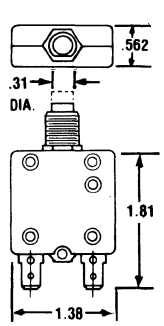
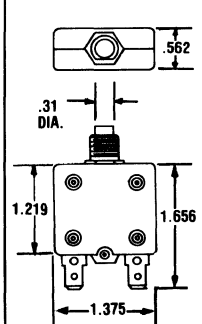
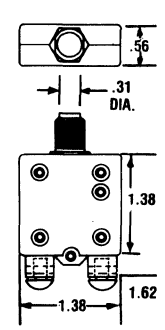
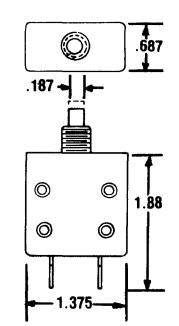
Not all combinations of load and control parameters are compatible. Please consult factory for assistance.	Snap-in mount fits panel thicknesses 0.020 to 0.075. Mounting size incl. 5/8" dia. double D and square holes. Inductive Load Rated at 120VAC (240VAC through 10A)	Various mounting sizes and termination styles available including "Snap-in"	Various mounting sizes and termination styles available including "Snap In".	Several customers have obtained agency approval for their product utilizing the 1648. Terminal type is screw.	The 252 is a UL recognized (UL 489). Molded Case Circuit Breaker. A minimum of ½" is needed between terminals and grounded metal parts.
					












International "Touchproof" Fuseholders

Interpower™fuseholders accept both sizes of fuses that are used in the world today: the North American 3AG (1/4 x 1-1/4"/6.3 x 32mm) and the international 5x20mm fuses. International "touchproof" fuseholders have four important characteristics:

1. Fuseholder is accessible with a tool only
2. Contacts are recessed and protected
3. Fuse carrier is insulated
4. Fuse carrier is retained in a spring-loaded carrier.

Three body styles are available, each with four contact styles. Order fuses separately.

Maximum panel thickness: .762mm (.30")
Materials: Body molded from polyphenylene sulfide thermoplastic resin; contacts, tin-plated brass. UL 94-V0 flam. rating.
Markings: All parts are marked "80910"

MINIGLOSSARY TIMERS

Accuracy
The variation of unit performance, i.e., time delay, voltage trip point, etc., over the specified conditions of ambient temperature, input voltage range, and time between operations.

Adjustability
The changing of a unit set point, within the specified range of unit operation, by means of internal or external adjustment mechanism (i.e., changing time delay with potentiometer).

Contact Rating
The electrical power-handling capability of relay contacts under specified environmental conditions and for a prescribed number of operations.

Delayed Interval Timing Function
Input voltage is applied continuously. The timing cycle is started by momentarily actuating the control circuit. The functions of separate Delay-On-Operate and interval type timers are combined in one package providing a single OFF-ON-OFF output cycles

Also called: single shot.

Delay-On-Operate Timing Function
Application of the input voltage starts the time delay. At completion of the time delay, the relay contacts transfer.

Also called: Delay-On-Make, On-Delay, Delay Relay, Delay-On-Pickup.

Delay-On-Release Timing Function
Input voltage must be supplied continuously to timer. Actuation of control circuit causes relay contacts to transfer immediately. Time delay starts when control circuit is released. The relay remains energized for the duration of the time delay—then de-energizes.

Also called: Delay-On-Break, Off-Delay, Delay-On-Dropout, Delay-On-Energization.

Frequency Sensor
A device that monitors a predetermined overfrequency and/or underfrequecy condition, and changes output state when these conditions exist.

Hysteresis
The difference between the response of a unit or system to an increasing and a decreasing signal (example: a voltage sensor).

Interval Timer Timing Function
Application of input voltage causes relay contacts to transfer and time delay to begin. At completion of the time delay, the relay contacts return to de-energized state.

Also called: Delay Interval, One Shot.

Output Control
The switching device, either solid-state or electromechanical, used in the unit to control the load connected to the output terminal(s).

Phase Sensor
A device that monitors for proper phase rotation in 3-phase systems.

Programmability
Ability to modify function, time delay or input voltage of a timer.

Recovery Timer

(Delay-On-Operate/Interval Timer)
The minimum time that input voltage must be interrupted *prior* to time-out to insure a successive timing cycle within the specified limits.

(Delay-On-Release)
The minimum duration of time that control circuit must be re-actuated to insure a new timing cycle when the control circuit is released.

Recycle Time

(Delay-On-Operate or Interval Timer)
The minimum time that input voltage must be interrupted after the timing cycle is completed to assure a successive timing cycle within the repeatability specified.

(Delay-On-Release)
The minimum duration of time that control circuit must be actuated to insure a successive timing cycle within the repeatability specified when the control circuit is released.

Repeat Cycle Timer Timing Function
Application of power automatically initiates continuous off-on cycling of the output relay.
Also called: flasher, intervalometer

Reset Time
The time required for the contacts to return to normal position when power is removed.

Reverse Polarity Protection
Blocking circuitry arrangement within the timer to prevent damage or output actuation if reverse polarity input voltage is applied.

Tolerance
The difference between specified and actual timing or sense point (factory setup tolerance).

Transient Protection
Prevents damage to unit if positive or negative transients are applied to the unit. Insures proper operation of the unit during and after transient occurrence. Max. transients are usually specified as to amplitude and duration, i.e., 1000V for 1 second.

Trip Point
The predetermined point at which a sensing device is set to change the output state.

Voltage Sensor
A device that monitors for a predetermined overvoltage and/or undervoltage condition, and changes output state when these conditions exist.

J Watt Seconds (Joules)	Max.	10J	10J	10J

CONSTRUCTION:

A 0.47 MFD Metallized Film Capacitor, in series with a Carbon composition 0.5W Resistor, in the 22-680 Ohm range. This assembly, with or without a VARISTOR, is sealed with Flame Retardant Epoxy resin in a molded plastic box.

Single Phase R-C Networks; R-C networks are used to absorb energy, when disconnecting inductors including contactor operating coils, solenoids, and motors. This prevents damage to mechanical switch contacts, or solid state devices such as Rectifiers, SCRs and TRIACs. PPD R-C NETWORKS USE a 0.47 MFD Metallized Polyester film Capacitor. In series is a 0.5W carbon comp resistor with a value in the range 22-680 Ohm. A Varistor may be included in the assembly, connected across the R-C network terminals.

Voltage designation is:

V1 = Normal operating voltage without the Varistor. Both AC and DC ratings are given.

V2 = Max AC voltage with Varistor, above which heating will occur due to increased Varistor current draw.

V3 = Clamping voltage for Varistor at specified clamping current.

In addition the Varistor energy absorbtion rating is given in: Joules = Watt Seconds. For example, a clamping voltage of 400V at 10A would dissipate 4000W, and Varistor rating of 2.5 Joules would become overloaded beyond

$$\frac{2.5}{4000} = 625 \text{ micro secs.}$$

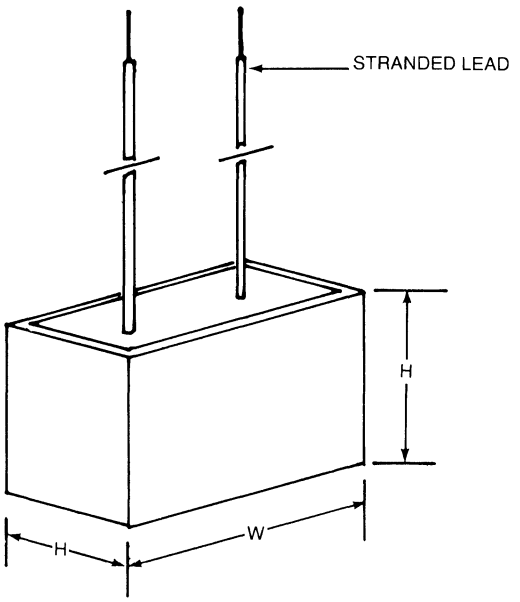
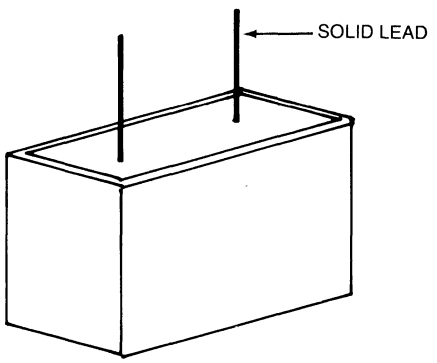
Specifications subject to change without notice.

PPD ARC ⚡ SURGE suppressor





Applications:

Use PPD ARC/SURGE SUPPRESSORS TO PREVENT:

(1) ARCING and VOLTAGE SURGES when disconnecting RELAYS, CONTACTOR COILS, & SOLENOID VALVES.

(2) Breakdown of DIODES, SCRs, and TRIACs.

(3) Transient overvoltages in COMPUTERS, and ELECTRONIC CONTROLLERS.

Dimensions:

Box: H = 0.935" W = 0.6" L = 1.25"

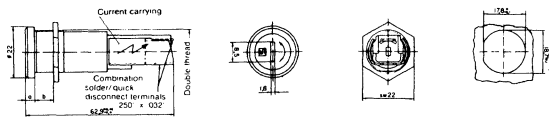
PROTECTIVE COMPONENTS •

Standard products for unique requirements

INTERNATIONAL FUSEHOLDERS–IEC 257/VDE 0820, IEC 65/VDE 0860, IEC 529

FUL-High Current

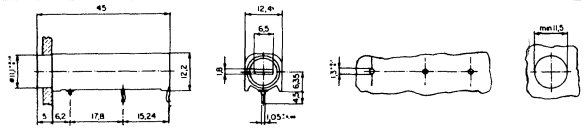
UL, CSA rated 30A/250V, VDE rated 16A/250V
For ¼ x 1¼" or 5 x 20mm fuses, ¼" fast-on terminals
031.2308 Body only
031.2321 Fuse carrier for ¼ x 1¼" fuses
031.2323 Fuse carrier for 5 x 20mm fuses
859.0046 Insulator boot (optional)



FAU

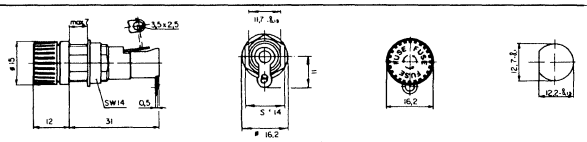
vert. or horiz.

UL, CSA rated 16A/250V, VDE rated 6.3A/250V
031.3577 Body only, horizontal
031.3804 Body only, vertical
031.1666 Fuse carrier for ¼" x 1¼" fuses
031.1663 Fuse carrier, fingergrip, for ¼" x 1¼" fuses
031.1667 Fuse carrier, fingergrip, for ¼" x 1¼" fuses



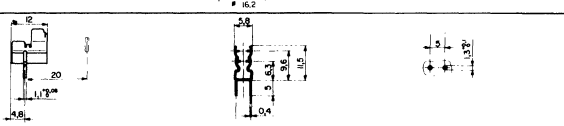
FEU

UL, rec. 20A/250V, CSA cert. 16A/250V,
VDE Approved 10A/250V
031.1803 Fuseholder complete with carrier for 5 x 20mm fuse
031.1804 Fuseholder complete with carrier for ¼" x 1¼" fuse



OG

751.0099 Fuse clips for ¼" x 1¼" or 5 x 20mm fuses. Bronze, Tin-plated. UL rec. 16A/500V (Fuses according to 250V standards only.)
751.0100 Fuse clips, Brass, Tin-plated

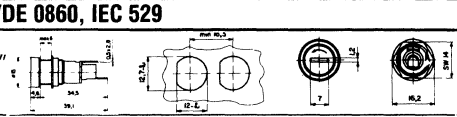


5 x 20mm FUSEHOLDERS–IEC 257/VDE 0820, IEC 65/VDE 0860, IEC 529

FIN

watertight IP 67

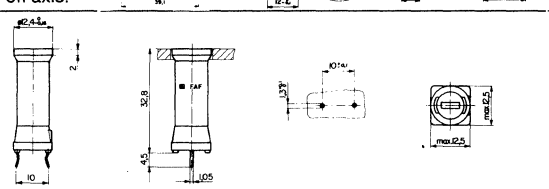
UL, CSA, rated 10A/250V, VDE rated 6.3A/250V
Watertight, for 5 x 20mm fuses with solder/fast on terminals .110" x .020"
031.1351 Complete fuseholder with carrier, axial terminals
031.1353 Complete fuseholder with carrier. End terminal 90° off axis.



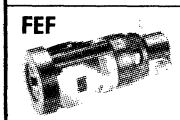
FAF

vert. or horiz.

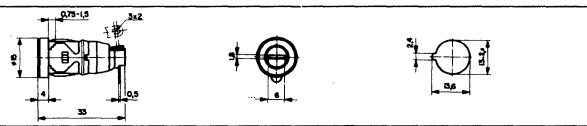
UL rated 12A/250V, CSA 10A/250V, VDE 6.3A/250V
For 5 x 20mm fuses, pcb mount, flux proof. Unsealed or sealed (IP54)
031.3558 Complete fuseholder with fuse carrier, IP40, horizontal
031.3751 Complete fuseholder with fuse carrier, IP40, vertical
031.3753 Complete fuseholder with fuse carrier, IP 54, vertical



FEF

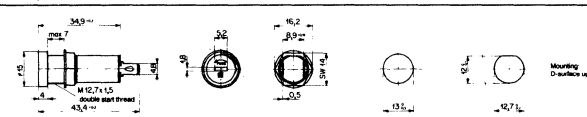


UL, CSA, VDE rated 10A/250V for 5 x 20mm fuses
031.1085 Fuseholder/slotted carrier, screw-on mount, solder terminals.
031.1165 Fuseholder/slotted carrier, push-on mount, solder/fast-on terminals.



FBS

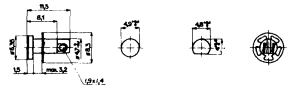
UL, CSA, VDE rated 10A/250V. Fuseholder and carrier complete in one unit. Solder/fast-on terminals
4.8 x 0.5mm. For 5 x 20mm fuses
031.3901 Front panel mount
031.3961 PCB Mount



MICROFUSE HOLDERS

FMS UL, CSA rated 5A/125V
Base material is temperature resistant. Polyphenylensulfide thermoplastic. Contacts are brass, silver plated.
031.7501

FME UL, CSA rated 5A/125V
031.7503



FUSES–IEC/UL

5 x 20mm 250V

FSF Quick-Acting 2mA–10A

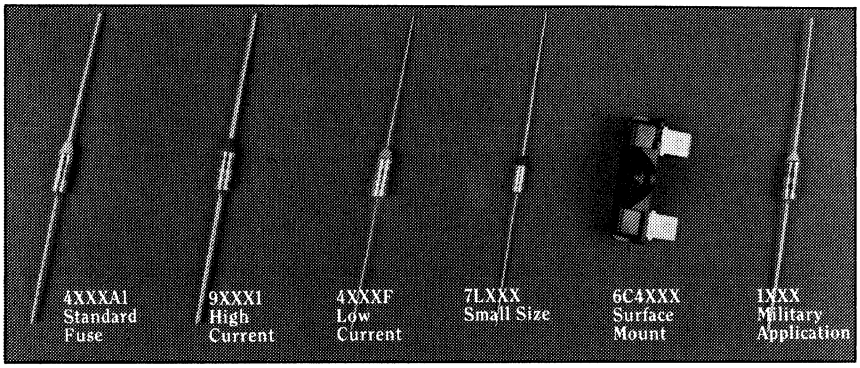
MICROTEMP® Thermal Cutoffs

Microtemp® Thermal Cutoffs provide permanent over-temperature protection for motors, transformers, appliances, HVAC equipment and electronic equipment. Once a Microtemp® Thermal Cutoff opens a circuit, it remains open until the fault is corrected and the thermal cutoff replaced. Custom packages, insulations or special assemblies may be specified to meet your unique application needs.



Thermal Cutoff Series Selection

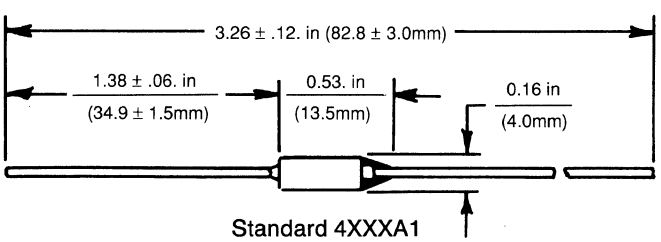
To determine which series is best for your application, remember:

- To consider the normal and abnormal electrical currents and voltages of your product.
- That the current passing through a Microtemp® Thermal Cutoff can generate I^2R, self heating.
- That the outer case of the Microtemp® Thermal Cutoff is electrically live and may require insulation. This insulation can reduce heat transfer, requiring consideration in selecting opening temperature.
- To determine the correct temperature setting a thermocoupled dummy should be installed in the product circuit.
- The ideal placement of the thermal cutoff should allow the greatest difference between operating temperatures and fault conditions.

Thermal Cutoff Types

Type No.	Temp. (°C) Calibration Range	Wire Size AWG	Maximum Recommended Operating Current and Voltge (Resistive)
4XXX	60-240	18	15 Amp/240 VAC
9XXX	60-240	15	25 Amp/240 VAC
4XXXF	60-240	23	5 Amp/240 VAC
7LXXX	72-184	23	6 Amp/240 VAC
6C4XXX	60-184	—	15 Amp/240 VAC
1XXX	60-240	18	15 Amp/240 VAC

Thermal Cutoff Standard Dimensions



Standard 4XXXA1

MICROTEMP® Thermal Cutoff Temperature Ratings

Reading the temperature chart.

All Microtemp® Thermal Cutoffs are identified by their type no. (4XXX, 9XXX, etc.). The "XXX" digits are determined by the opening temperature you specify. For example: A 4136A1 is a Microtemp® Thermal Cutoff with an opening temperature of 60°C.

Model # (XXX)	Max. Opening Temp. °C*
136	60
146	66
158	72
168	77
178	84
191	91
194	93
204	98
208	100
218	104
227	109
239	117
244	121
257	128
283	141
300	152
333	167
358	184
377	192
415	216
438	228
468	240

*Tolerance ±0 −4°C

For further information on your specific design application, contact a Therm-O-Disc sales engineer at 419-525-8500.

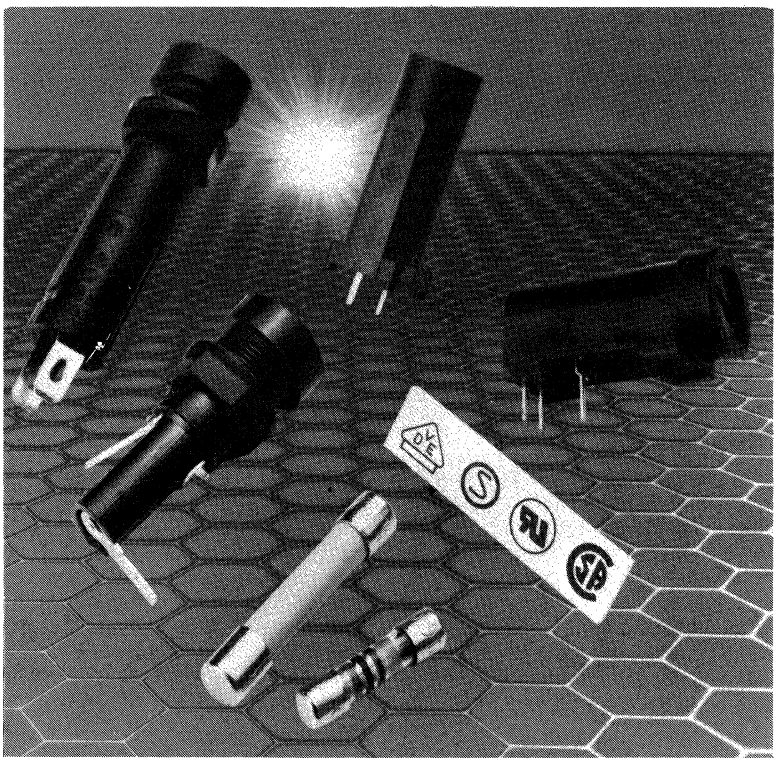
Wickmann

MINIATURE FUSES & FUSE HOLDERS



THE COMPANY

For over 70 years the name Wickmann has stood for the protection of electrical equipment and systems from excess voltage and excess current.

Founded in 1918, the enterprise quickly developed to become a leading manufacturer in the field of fusing technology. In 1930, Wickmann introduced the 5 x 20mm fuse-link marking the beginning of a new era in the manufacture of replaceable fuses.

Further technological advances were made with the addition of Microfuses and Picofuses in 1964, followed by development of the popular TR5 in 1978. Introduction of the surface mount SM3 series in 1988 marks another recent milestone in the company history.

Wickmann USA, Inc. is the North American subsidiary of Wickmann-Werke GmbH devoted to providing local technical and application assistance in the specification of Wickmann components. A comprehensive inventory of circuit protection components is also maintained to meet immediate industry requirements.

STANDARD MINIATURE FUSES

- International 5 x 20mm fuses
- Fast Acting (–F) and Time Lag (–T) characteristics
- High break (ceramic) and Low break (glass) capacity
- VDE, SEMKO, BSI approved
- 5 x 20mm (–F & –T) fuses with UL and CSA
- 5 x 25mm ceramic cartridge fuses with blown fuse indicators

SPECIAL MINIATURE FUSES

- 5 x 30mm glass cartridge fuses rated 500 Volts (50mA - 6.3A)
- 1/4" x 1 1/4" cartridge fuses rated 500 Volts (1.6A-16 Amps)

FUSE HOLDERS

- International Shock-safe fuseholders to accept either 1/4" x 1 1/4" or 5 x20mm fuses
- Panel mount with either high or low profile
- PC board types mounting vertically or horizontally
- Molded construction with sealed contacts
- Full agency approvals

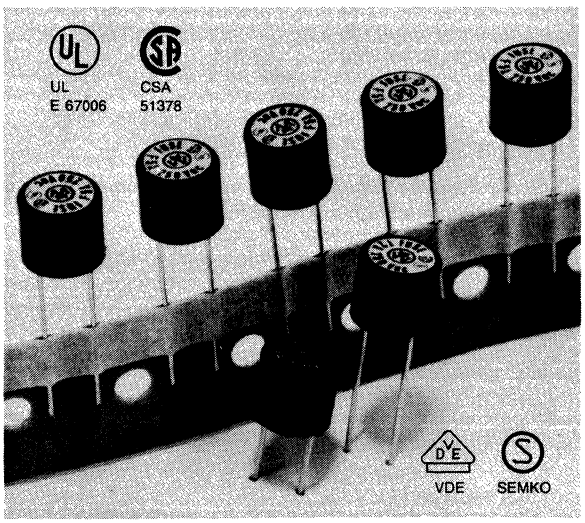
SUBMINIATURE FUSES

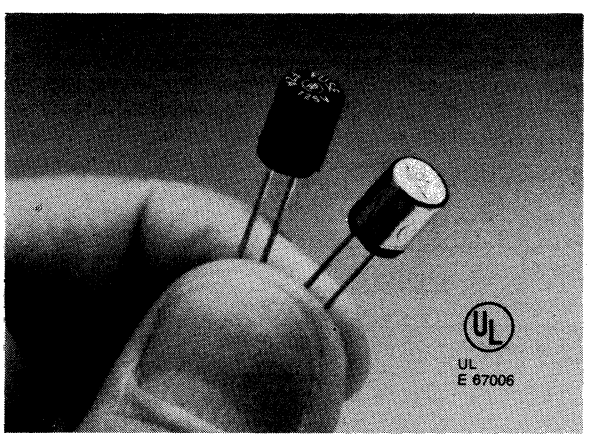
TR5 FUSE - 250 VOLT



- **Rated Voltage:** 250 Volts
- **Rated Current Range:** 50mA - 6.3 Amps
- **Characteristic:** Available either Fast Acting or Time Lag
- **Breaking Capacity:** 50 Amps at 250 VAC
- **Diameter:** 0.335″ (8.5mm); **Height:** 0.315″ (8.0mm) max.
- **Board solderable or Plug-in leads:** 0.2″ (5.08mm) pin spacing
- **Board washable, shock and vibration resistant**
- **Packaging:** Bulk (long or short pins) and Tape & Reel
- **Approvals:** UL Listed/CSA Certified or VDE/SEMKO approved

Catalog #	Description	Range	Approvals
19373	TR5-F (Fast Acting)	50mA-6.3A	UL/CSA
19374	TR5-T (Time Lag)	50mA-6.3A	UL/CSA
19370	TR5-F (Fast Acting)	50mA-4.0A	VDE/SEMKO
19371	TR5-M (Medium Time Lag)	200mA-4A	–
19372	TR5-T (Time Lag)	40mA-4.0A	VDE/SEMKO

TR3 FUSE - 125 VOLT

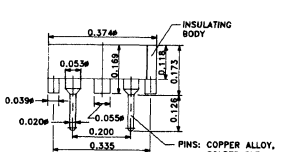


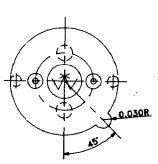
- **Rated Voltage:** 125 Volts
- **Rated Current Range:** 50mA - 5.0 Amps, Fast Acting
- **Breaking Capacity:** 50 Amps at 125 VAC
- **Diameter:** 0.236″ (6.0mm); **Height:** 0.315″ (8.0mm) max.
- **Board solderable or Plug-in leads:** 0.1″ (2.54mm) pin spacing
- **Board washable, shock and vibration resistant**
- **Metal or Thermoplastic cap**
- **Packaging:** Bulk (long or short pins) and Tape & Reel
- **Approvals:** UL Listed/CSA Certified (Metal cap only)

Catalog #	Description	Range	Approvals
19303	TR3-F (Fast Acting)	50mA-5.0A	UL/CSA (metal cap)
19300	TR3-F (Fast Acting)	50mA-5.0A	– (plastic cap)

PC BOARD SUBMINIATURE FUSEHOLDERS

HOLDERS FOR TR5 FUSE

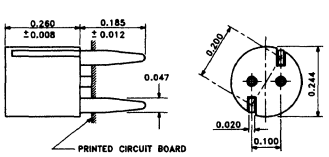




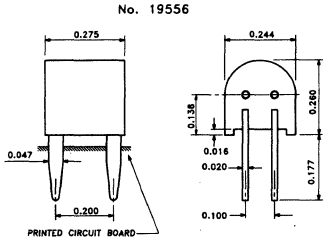
No. 19560

- Rated up to: 250V, 6.3A, 1.6W
- UL94-V0
- Also available in Panel Mount Shock-Safe design

HOLDERS FOR TR3 FUSE



No. 19556



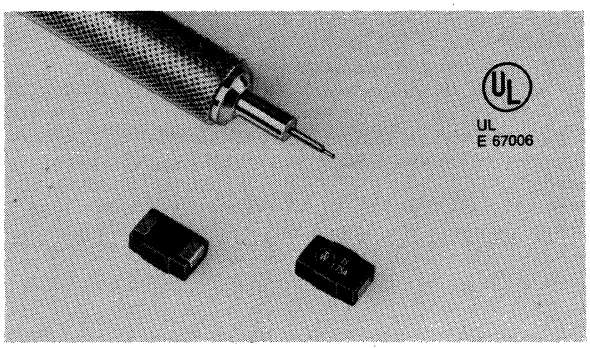
No. 19557

- Rated up to: 125V, 5A
- UL94-V0
- Vertical (No. 19556) or Horizontal (No. 19557) mounting

Wickmann

SUBMINIATURE FUSES

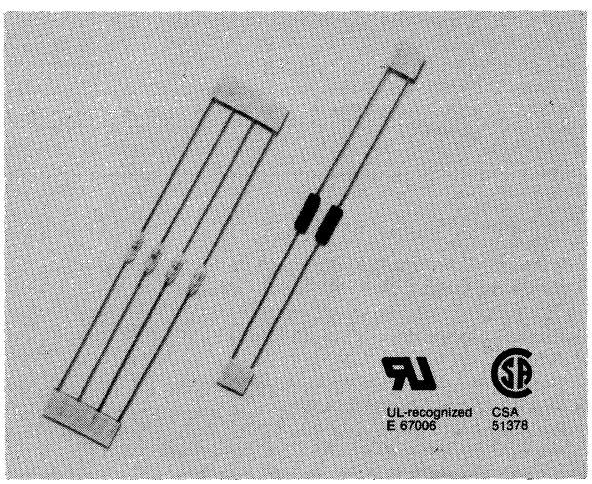
SM-3 SURFACE MOUNT FUSE



- **Rated Voltage:** 125 Volts
- **Rated Current Range:** 500mA - 4.0 Amps, Fast Acting
- **Suitable for all Surface Mount soldering processes**
- **Breaking Capacity:** 50 Amps at 125 VAC
- **Packaging:** Bulk and Blister Tape
- **Approvals:** UL Listed - File No. E67006

Catalog #	Description	Range
19413	SM3-F (Fast Acting)	500mA-4A

PICOFUSE / NANOFUSE

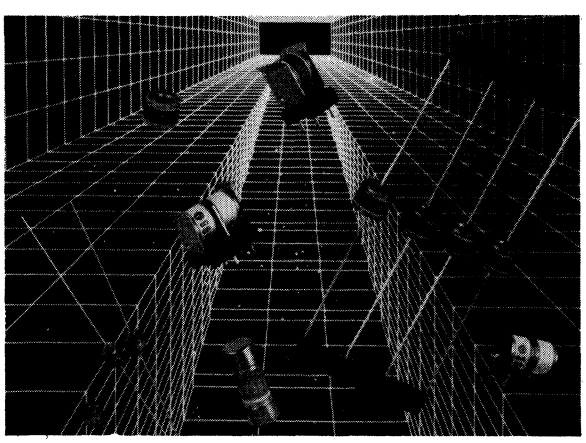


- **Rated Voltage:** 125 Volts
- **Rated Current Range:** 63mA - 10 Amps, Fast Acting (Also 15 Amps at 32 Volts)
- **Material:** Picofuse – Ceramic tube with clear shrink tube cover
  Nanofuse – Ceramic tube with black Thermoplastic molding
- **Board washable, shock and vibration resistant**
- **Packaging:** Taped
- **Approvals:**

	Picofuse	Nanofuse
UL Recognized:	63mA..10A	63mA..7A
CSA Certified:	63mA..5A	63mA..7A

Catalog #	Description	Range
19275	Picofuse	63mA-15A
19274	Nanofuse	63mA-7A

MINIATURE GAS TUBE SURGE ARRESTERS



- Metal Ceramic technology for effective protection against transient overvoltages
- Available in 2 or 3 electrode configurations with nominal DC Sparkover voltages of 90, 230 and 350 Volts
- Nominal AC Discharge Current capacity up to 20 Amps
- Light, Medium or Heavy Duty construction
- Correspond to CCITT K. 12, and VDE 0845 standards
- Button Arresters exhibit self-capacitance below 1pF
- Also available with Tritium doping of fill gas if required
- Please call for a complete catalog of Surge Arrester Specifications and Part Numbers

MINIGLOSSARY ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

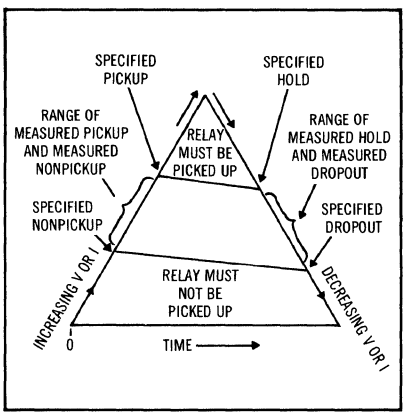
Encapsulated: Imbedded in a suitable potting compound.

Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.



Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.

OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

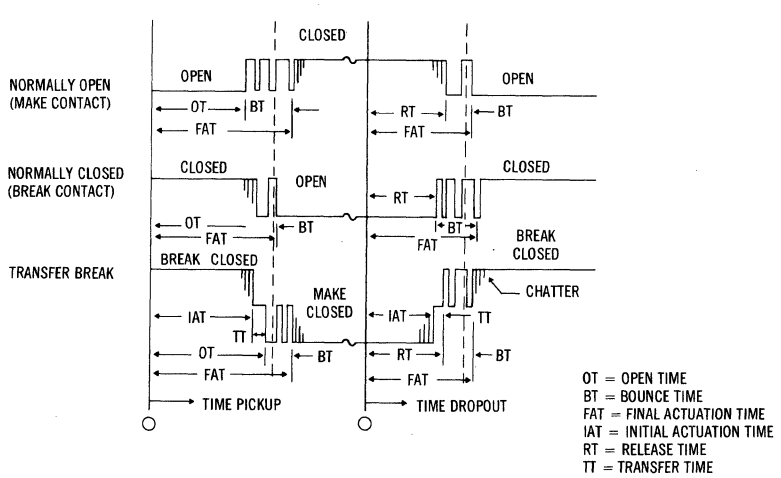


Fig. 2. Typical time vs. current (non-inductive load)

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

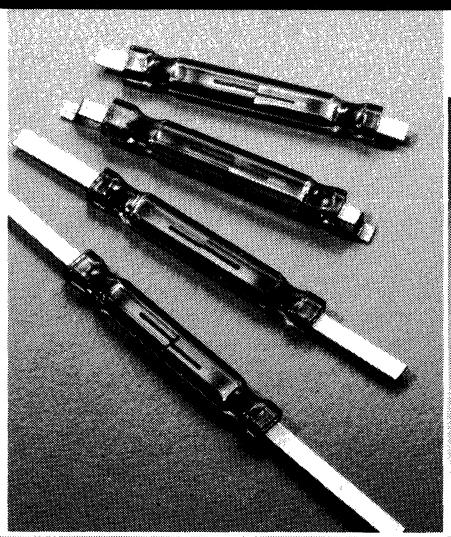
Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

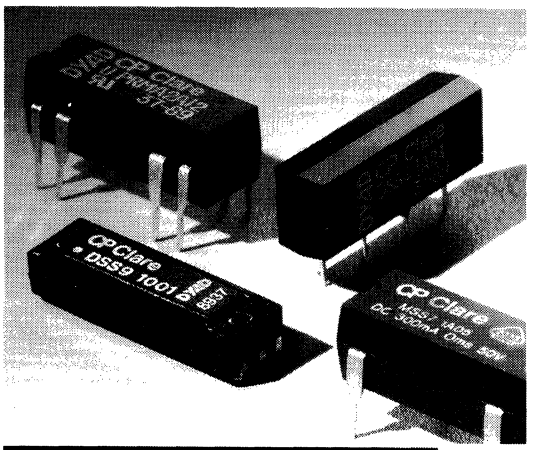
Chatter: See bounce.

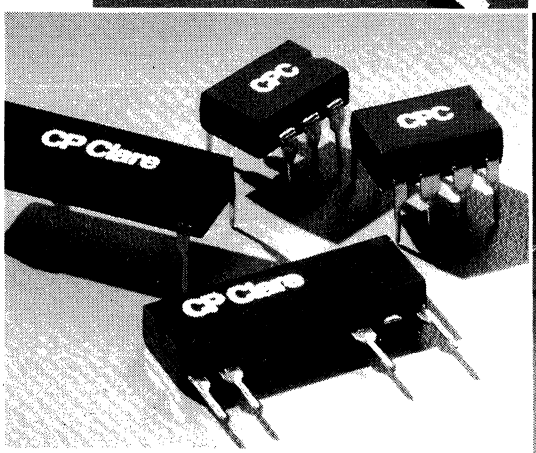
Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

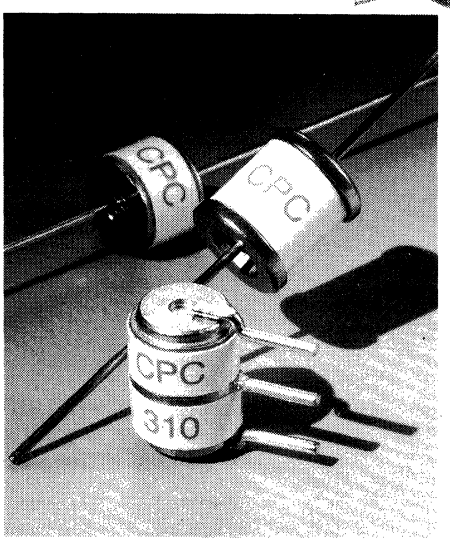
Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.









CP Clare
A Commitment to Quality

At Clare, quality is integral to our approach of maximizing total value for our customers. We have earned the position of being the world's largest supplier of relays, reed switches and surge arrestor products. The Clare Relay Family covers the spectrum of relay technologies for low-power switching: solid-state relays; dry reed relays; mercury-wetted reed relays; and electro-mechanical relays.

Couple this with high-volume manufacturing capabilities, and you get superior quality products at competitive prices with fast off-the-shelf delivery and full product support.

Call your local Clare representative or authorized Clare distributor for more information about our full family of: ■ Relays ■ Reed Switches ■ Surge Arrestors

§ Surface Mount * Mil. Spec.

- Open styles
- High voltage
- Epoxy or metal housings
- Reed relays to MIL. specs
- Fully or partially encapsulated
- Choice of 5 different Form A & 4 different Form C switches

MERCURY WETTED RELAYS

The largest selection available including all those discontinued by their former manufacturers.

DRY REED RELAYS

Available in all traditional styles and ratings.

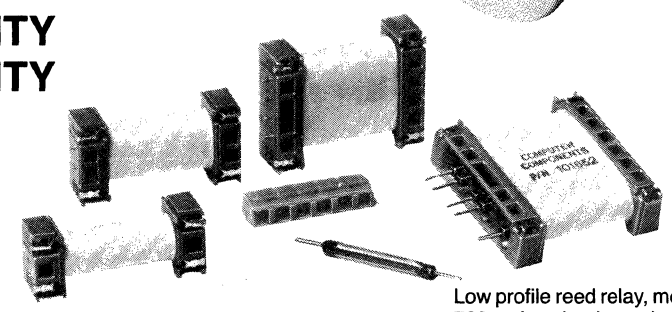
HIGH FREQUENCY SWITCHING

Available in form A, B, or C contact sets for frequencies up to 50 MHZ.

ENCAPSULATED DIP'S

Your source for the largest selection available up to 6 form A or 4 form C contact sets.

QUALITY
INTEGRITY
RELIABILITY

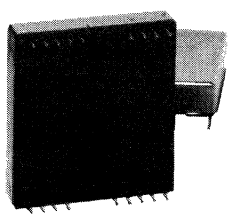


HP (Also 101, 201, 301, & 401 Series)

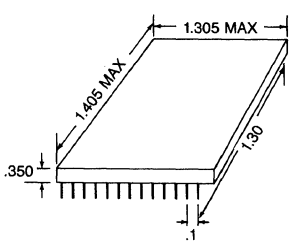
Low profile reed relay, mechanical & electrical replacement for IBM 766 series plug-in, replace reeds, no tools – no soldering

THE MULTI-POLE FLATPACK

The highest density reed relay available – Up to 10 form A or 8 form C or combinations of forms A, B & C



Better Built in the U.S.A.



Why compromise your design using several relays when one compact multi-pole relay can save valuable P.C. board space as well as cost.

SPECIAL DESIGNS

In view of the difficulty in offering a product line that is complete enough to cover every application and physical layout, Computer Components, Inc. maintains special engineering and design facilities to provide the project or design engineer with REED RELAYS specifically tailored to his particular requirements.

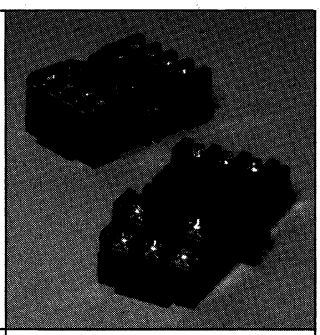
INDUSTRIAL RELAY SOCKETS

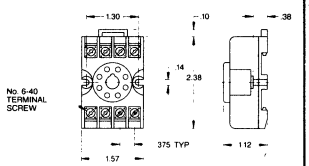
SNAP TRACK MOUNTED

RUNDEL

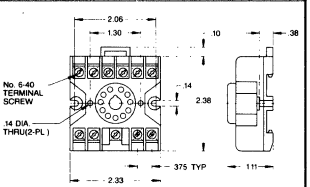


Construction	Self-extinguishing, black polycarbonate body with integral molded barrier.
Terminals	Combination slot/phillips head screws and captive self lifting terminal clamps.

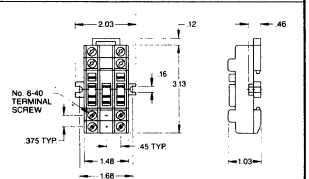
H50SL608S
8-pin octal socket. Rating: U/L and CSA, 10 amperes, 300VAC. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw.



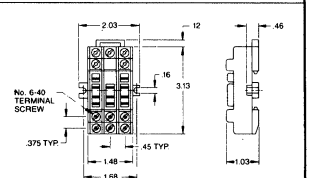
H50SL611S
11-pin magnol socket. Rating: U/L and CSA, 10 amperes, 300VAC. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw.



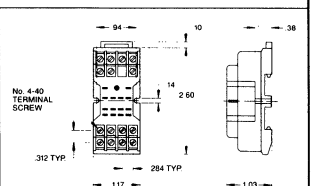
H50SL708S
8-pin blade type socket. Rating: U/L, 15 amperes, 300VAC; CSA, 10 amperes, 300VAC. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw. Cascading mounting center 1.74 ± .010.



H50SL711S
11-pin blade type socket. Rating: U/L, 15 amperes, 300VAC; CSA, 10 amperes. Wire sizes: up to #12 AWG. Terminals: pan head 6-40 screw. Cascading mounting center 1.74 ± .010.



H50SL715S
14-pin blade type socket. Rating: U/L and CSA, 5 amperes, 300VAC. Wire sizes: up to #14 AWG. Terminals: pan head 4-40 slot.



Mounting Track	Standard Track SL601 and SL602 will accept either regular and snap track sockets.

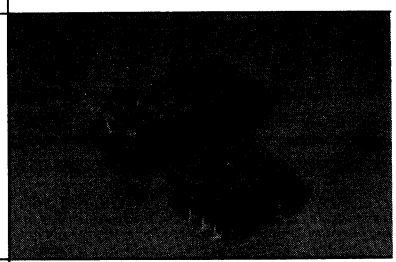
Cradle Socket and Accessories



Construction

Body molded of glass filled flame retardant polyester (PBT). Meets UL94VO and is fungus resistant.
One piece contact/terminal construction of berylium copper.
Selectively plated gold over nickel on contact area. 60/40 Brite-Tin on terminal area.

Arrangement

Number of Poles
2 = 2-pole socket
4 = 4-pole socket
6 = 6-pole socket
8 = 8-pole socket

Terminal/Mounting

REED RELAYS

From American Relays, Inc.

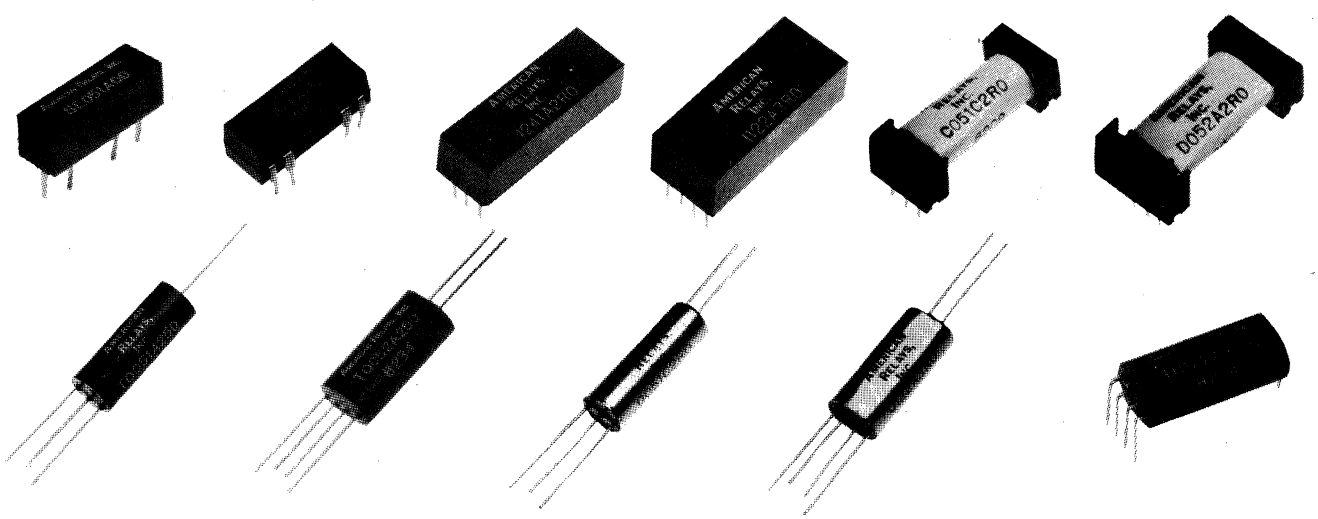
Whether you're looking for a **REED RELAY** that will meet FCC surge requirements, or a sensitive Low-Level **REED RELAY** to switch ATE signal...

AMERICAN RELAYS HAS IT ALL

High Quality — Low Price — On time Delivery

Dry and Mercury Wet contacts
With High Voltage, High Power or Low Level switching

Standard or Specified to YOUR Application,
AMERICAN RELAYS can Build the **REED RELAY** you need.



American Relays, Inc., offers a comprehensive line of super-reliable reed relays. American Relays, Inc., 100% tests all reed switches **AND** 100% final tests all reed relays. We are specialists in **"THE REED RELAY INDUSTRY".**

PACKAGE STYLES

- **Encapsulated**
- **Open Frame**
- **Axial Leeds**
- **DIP**
- **SIP**

SWITCHING TYPE

- **General Purpose Dry Reed**
- **Low Level Switching**
- **High Power**
- **High Voltage**
- **Mercury Wetted Contacts**

- **UL Recognized Relays Available**

REED RELAY INDEX

RELAY TYPE	DESCRIPTION	TERMINAL GRID	CONTACT FORMS AVAILABLE POLES	PACKAGE
ENCAPSULATED	Epoxy encapsulated. Total Environmental protection. Wide range of contact forms and coil voltages are available.	1.000 × .100 1.000 × .150	Form A (1 to 6) Form B (1 & 2) Form A/B (1 & 2) Form C (1 to 4) Form A Latching (1 & 2)	OPEN FRAME	Durable glass filled polyester bobbin construction. Switch and coil leads are securely held with epoxy potting. Cost efficient plug-in type reed relay.	1.000 × .100 1.000 × .150	Form A (1 to 4) Form B (1 & 2) Form C (1, 2, 3) Form A Latching (1)	
AXIAL	Rugged axial lead tubular relay. Nickel plated metal jacket provides magnetic shield. 1.000″ center formed leads are available.	Axial 1.000 × .100	Form A (1 & 2) Form B (1) Form C (1 & 2) Form A Latching (1)	T SERIES	Most economical, high performance tubular relay. Completely sealed in a flame retardant plastic tube. 1.000″ center formed leads are available.	Axial 1.000 × .100	Form A (1 & 2) Form B (1) Form C (1)	HIGH POWER	50W contact rating. Available with encapsulated, open frame and axial lead packages.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2)	HIGH VOLTAGE	25W, 1000 VDC switching. 2500 VDC breakdown voltage. Miniature size. Available with encapsulated, open frame and axial lead package.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2)	MERCURY WETTED	Mercury wetted contact relay. 50W contact rating. Extremely long life expectancy. No contact bounce. Stable low contact resistance.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2) Form C (1 & 2)	DIP RELAYS	Epoxy molded DIP reed relay. Logic compatible. Stable contact resistance. Fits all standard DIP sockets and is automatic insertion compatible.	DIP .300 × .100	Form A (1 & 2) Form B (1) Form C (1)	SIP RELAYS	High quality economical Single-In-Line package reed relays. Epoxy encapsulated package. Various contact ratings are available. UL recognized series available.	SIP .2 × .4 × .2 .2 × .2 × .2	Form A (1) Form B (1) Form C (1)	SPECIAL RELAYS	Let us design reed relays for your specific application. Special relays are cost competitive with standard relays in most cases. Consult the factory or your local representative with your specific requirements.

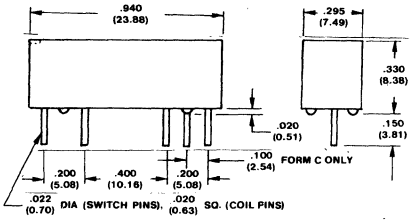
REED RELAYS

SINGLE-IN-LINE SERIES (S SERIES)



- High Quality Low Cost Single-In-Line
- Sturdy Bobbin and Encapsulated in a Polyester Case
- UL Recognized (File #E104383)

GENERAL SPECIFICATIONS

Contact resistance: .150 ohms max.
Operate time: 0.5 ms typ.
Release time: 0.2 ms typ.
Bounce time: (Form A & B) 0.25 ms typ. (form C, NO/NC) 0.5/1.5 ms typ.
Insulation resistance: 10^{10} ohms min. (form A), 10^{9} ohms min. (form C)
Operating temperature: −40° to +85°C
Vibration: 20G (10 — 2000 Hz)
Shock: 50G @ 11 ms duration

REED RELAYS

HIGH POWER SERIES

- Miniature High Power Reed Relays. 50W Contact Rating.
- Capable of Handling High Inrush, Inductive and Capacitive Loads
- Open Frame, Encapsulated and Axial Lead Packages are Available

HIGH VOLTAGE SERIES

- Miniature High Voltage Reed Relays
- Meets FCC Part 68 Voltage Breakdown Requirement
- Open Frame, Encapsulated and Axial Lead Packages are Available

MERCURY WETTED SERIES

- Miniature Reed Relay with Mercury Wetted Contacts
- No Contact Bounce
- 50 Watts Contact Rating
- Open Frame, Encapsulated and Axial Lead Packages are Available

* Mercury wetted relays should be mounted within ±30° from vertical position.

AXIAL LEAD SERIES

- Encapsulated Axial Lead Reed Relays
- Axial Leads Allows Various Mounting Configurations.
- Total Environmental Protection
- Nickel Plated Metal Tube Provides Magnetic Shielding
- Formed Leads are Also Available
- 1 Form A, 2 Form A, 1 Form B, 1 Form C and 2 Form C Types are Available
- Various Contact Ratings Available
- Contact American Relays, Inc. for Specific Part Numbers and Additional Options

SPECIAL RELAY DESIGN

American Relays, Inc. is a custom relay specialist. Our major objective is to design and build parts that fulfill special requirements for the reed relay user.

Our facility is designed and equipped for prompt, systematic processing of samples, prototype and production orders.

MINIGLOSSARY TIMERS

Accuracy
The variation of unit performance, i.e., time delay, voltage trip point, etc., over the specified conditions of ambient temperature, input voltage range, and time between operations.

Adjustability
The changing of a unit set point, within the specified range of unit operation, by means of internal or external adjustment mechanism (i.e., changing time delay with potentiometer).

Contact Rating
The electrical power-handling capability of relay contacts under specified environmental conditions and for a prescribed number of operations.

Delayed Interval Timing Function
Input voltage is applied continuously. The timing cycle is started by momentarily actuating the control circuit. The functions of separate Delay-On-Operate and interval type timers are combined in one package providing a single OFF-ON-OFF output cycles

Also called: single shot.

Delay-On-Operate Timing Function
Application of the input voltage starts the time delay. At completion of the time delay, the relay contacts transfer.

Also called: Delay-On-Make, On-Delay, Delay Relay, Delay-On-Pickup.

Delay-On-Release Timing Function
Input voltage must be supplied continuously to timer. Actuation of control circuit causes relay contacts to transfer immediately. Time delay starts when control circuit is released. The relay remains energized for the duration of the time delay—then de-energizes.

Also called: Delay-On-Break, Off-Delay, Delay-On-Dropout, Delay-On-Energization.

Frequency Sensor
A device that monitors a predetermined overfrequency and/or underfrequecy condition, and changes output state when these conditions exist.

Hysteresis
The difference between the response of a unit or system to an increasing and a decreasing signal (example: a voltage sensor).

Interval Timer Timing Function
Application of input voltage causes relay contacts to transfer and time delay to begin. At completion of the time delay, the relay contacts return to de-energized state.

Also called: Delay Interval, One Shot.

Output Control
The switching device, either solid-state or electromechanical, used in the unit to control the load connected to the output terminal(s).

Phase Sensor
A device that monitors for proper phase rotation in 3-phase systems.

Programmability
Ability to modify function, time delay or input voltage of a timer.

Recovery Timer

(Delay-On-Operate/Interval Timer)
The minimum time that input voltage must be interrupted *prior* to time-out to insure a successive timing cycle within the specified limits.

(Delay-On-Release)
The minimum duration of time that control circuit must be re-actuated to insure a new timing cycle when the control circuit is released.

Recycle Time

(Delay-On-Operate or Interval Timer)
The minimum time that input voltage must be interrupted after the timing cycle is completed to assure a successive timing cycle within the repeatability specified.

(Delay-On-Release)
The minimum duration of time that control circuit must be actuated to insure a successive timing cycle within the repeatability specified when the control circuit is released.

Repeat Cycle Timer Timing Function
Application of power automatically initiates continuous off-on cycling of the output relay.
Also called: flasher, intervalometer

Reset Time
The time required for the contacts to return to normal position when power is removed.

Reverse Polarity Protection
Blocking circuitry arrangement within the timer to prevent damage or output actuation if reverse polarity input voltage is applied.

Tolerance
The difference between specified and actual timing or sense point (factory setup tolerance).

Transient Protection
Prevents damage to unit if positive or negative transients are applied to the unit. Insures proper operation of the unit during and after transient occurrence. Max. transients are usually specified as to amplitude and duration, i.e., 1000V for 1 second.

Trip Point
The predetermined point at which a sensing device is set to change the output state.

Voltage Sensor
A device that monitors for a predetermined overvoltage and/or undervoltage condition, and changes output state when these conditions exist.

RELAY PRODUCT SHOWCASE

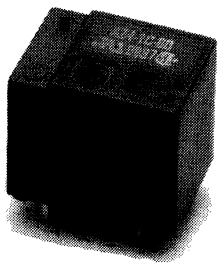
BORN IN THE USA

To maintain its high quality standards and increase customer responsiveness, American Zettler manufactures many of its relay lines right at its headquarter facilities in Orange County, California. Utilizing state-of-the-art production equipment and advanced quality assurance techniques, American Zettler can support your program with competitively priced standard relays, or can design application-specific relays ideally suited to your requirements.

AZ 4

UL-Approved PC Board Relay Sets the Standard in Price Performance

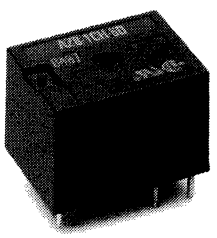
- Subminiature Size
- DC Coils to 48 VDC
- 3, 5,10 Amp Contacts
- Epoxy Sealed
- Suitable for Class B Applications
- UL & CSA Approvals



AZ 8

High Sensitivity Relay Delivers High Reliability in Subminiature Package

- High Sensitivity, 110 mW Pick-up
- Epoxy Sealed
- DC Coils to 48 VDC
- 3, 6,10 Amp Contacts
- Epoxy Sealed
- Suitable for Class B & F Applications
- UL, VDE, and CSA Approvals



AZ 2100

The Industry Leading 30 Amp Relay Gives You the Power of Choice

- Up to 30 Amp Switching in Compact Size
- Three Different Versions
- Complete UL Approvals
- Both PC and "Trace-Saver" Quick Connect Terminals
- Class B & F Applications
- 1 Form A, B, and C Contacts Available

Aromat PhotoMOS Relay

			PhotoMOS Relay							
			AQV10 Type				AQV20 Type			
			DC Type				AC/DC Type			
• Type of relay										
• Packing style			• Low on-resistance • Control with an input current of 10 mA							
• Output	Load voltage*	Peak AC	—	—	—	—	40 V	60 V	250 V	400 V
		DC	40 V	60 V	250 V	400 V	40 V	60 V	250 V	400 V
	Continuous load current	1 A								
		0.5 A	0.6 A	0.5 A	0.2 A	0.15 A	0.4 A	0.35 A	0.15 A	0.1 A
	Peak load current		1.8 A	1.5 A	0.6 A	0.5 A	1.8 A	1.5 A	0.6 A	0.5 A
	Power dissipation*		180 mW				180 mW			
	ON resistance	Typical	0.3 Ω	0.37 Ω	2.7 Ω	6.3 Ω	0.6 Ω	0.74 Ω	5.5 Ω	12.4 Ω
		Maximum	0.5 Ω	0.7 Ω	4 Ω	8 Ω	1 Ω	1.4 Ω	8 Ω	16 Ω
	Off state leakage current		Max. 1 μA				Max. 1 μA			
• Input	LED forward current*		50 mA				50 mA			
	LED reverse voltage*		6 V				6 V			
	Peak forward current		1 A				1 A			
	Power dissipation*		150 mW				150 mW			
	LED operate current	Typical	2.3 mA				2.4 mA			
		Maximum	5 mA				5 mA			
	LED turn off current	Minimum	0.8 mA				0.8 mA			
		Typical	2.2 mA				2.2 mA			
	LED dropout voltage	Typical	2.3 V				2.3 V			
		Maximum	3 V				3 V			
• Switching speed	Turn on time	Typical	0.23 msec.	0.22 msec.	0.13 msec.	0.09 msec.	0.38 msec.	0.41 msec.	0.21 msec.	0.18 msec.
		Maximum	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.
	Turn off time	Typical	0.07 msec.	0.07 msec.	0.07 msec.	0.08 msec.	0.08 msec.	0.08 msec.	0.07 msec.	0.07 msec.
		Maximum	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.	1 msec.
• Total power dissipation*			210 mW				210 mW			
• I/O isolation voltage*			1,500 V AC				1,500 V AC			
• Temperature limits	Operating*		−20°C to +80°C −4°F to +176°F				−20°C to +80°C −4°F to +176°F			
	Storage*		−40°C to +100°C −40°F to +212°F				−40°C to +100°C −40°F to +212°F			
• I/O capacitance	Typical		1.3 pF				1.3 pF			
	Maximum		3 pF				3 pF			
• Initial I/O isolation resistance			1,000 MΩ (min.)				1,000 MΩ (min.)			
• Terminal layout (.100, inch grid)			Through hole terminal (Bottom view)  Tolerance: ±0.1 ±.004				Surface mount terminal Mounting pad (Top view)  			
• Standards			UL (E57521), CSA (LR26550)							
• Mounting method										

*The values are absolute maximum ratings (25°C 77°F).

FEATURES

- **Ultra-small size**
- **High sensitivity:**
  2 Form C; 140mW power consumption (single side stable type)
  4 Form C; 280mW power consumption (single side stable type)
- **Surge voltage withstand: 1500V FCC Part 68**
- **Sealed construction allows automatic washing.**
- **Self-clinching terminal also available.**
- **UL/CSA recognized.**

SPECIFICATIONS

Contact

Arrangement			2 Form C, 4 Form C
Initial contact resistance, max. (By voltage drop 6V DC 1A)			50mΩ
Contact material			Gold-clad silver
Rating	Max. switching power		30W, 62.5VA (resistive load)
	Max. switching voltage		110V DC, 125V AC
	Max. switching current		1A
	Min. switching capability		10μA, 10mV DC
UL/CSA rating			1A 30V DC 0.3A 110V DC 0.5A 125V AC
Expected life (min. operations)	Mechanical (at 180cpm)		10^8
	Electrical (at 20cpm)	1A 30V DC resistive	2×10^5
		0.5A 125V AC resistive	10^5

Characteristics (at 20°C 68°F)

Max. operating speed (at rated load)		20cpm
Operate time (at nominal voltage)		Approx. 2msec.
Release time (at nominal voltage)		Approx. 1msec.
Set time (latching) (at nominal voltage)		Approx. 2msec.
Reset time (latching) (at nominal voltage)		Approx. 2msec.
Initial breakdown voltage	Between open contacts	750Vrms for 1 min.
	Between contact sets	1,000Vrms for 1 min.
	Between contact and coil	1,000Vrms for 1 min.
FCC surge voltage between open contacts		1,500V
Initial insulation resistance		Min. 1,000MΩ (at 500V DC)
Temperature rise (at nominal voltage)		Max. 50 deg.
Ambient temperature		−40°C to +70°C −40°F to +158°F
Shock resistance	Functional	50G
	Destructive	100G
Vibration resistance	Functional	18G, 10 to 55Hz at double amplitude of 3mm
	Destructive	30G, 10 to 55Hz at double amplitude of 5mm
Unit weight		2 Form C: Approx. 1.5g .053oz. 4 Form C: Approx. 3g .106oz.

FEATURES

- **Ultra-slim size for minimal PC board mounting requirements.**
- **Small header area makes higher density packaging possible.**
- **High sensitivity: 140mW nominal operating power**
- **Surge voltage withstand: 1500V FCC Part 68**
- **Sealed construction allows automatic cleaning.**
- **Self-clinching terminal also available**
- **UL/CSA recognized.**

SPECIFICATIONS

Contact

Arrangement			2 Form C
Initial contact resistance, max. (By voltage drop 6V 1A)			60mΩ
Contact material			Gold-clad silver
Rating (resistive load)	Max. switching power		30W, 62.5VA
	Max. switching voltage		110V DC, 125V AC
	Max. switching current		1A
	Min. switching capability		10μA, 10mV DC
UL/CSA rating			1A 30V DC 0.5A 125V AC 0.3A 110V DC
Expected life (min. operations)	Mechanical (at 180cpm)		10^8
	Electrical (at 20cpm)	1A 30V DC resistive	2×10^5
		0.5A 125V AC resistive	10^5

Characteristics

Max. operating speed (at rated load)		20cpm
Operate time (at nominal voltage)		Approx. 2msec.
Release time (at nominal voltage)		Approx. 1msec.
Set time (latching) (at nominal voltage)		Approx. 2msec.
Reset time (latching) (at nominal voltage)		Approx. 2msec.
Initial breakdown voltage	Between open contacts	750Vrms for 1 min.
	Between contact sets	1,000Vrms for 1 min.
	Between contact and coil	1,000Vrms for 1 min.
FCC surge voltage between open contacts		1,500V
Initial insulation resistance		Min. 1,000MΩ (at 500V DC)
Temperature rise (at nominal voltage)		Max. 50 deg.
Ambient temperature		−40°C to +70°C −40°F to +158°F
Shock resistance	Functional	50G
	Destructive	100G
Vibration resistance	Functional	18G, 10 to 55Hz at double amplitude of 3mm
	Destructive	30G, 10 to 55Hz at double amplitude of 5mm
Unit weight		Approx. 1.5g .053oz.

TYPES AND COIL DATA (at 20°C 68°F)

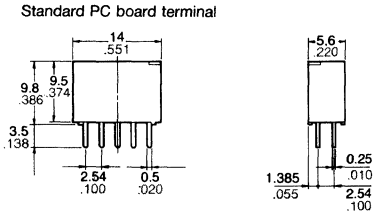
Operating function	Part number	Nominal voltage, V DC	Pick-up/set voltage, V DC (max.)	Coil resistance, Ω (±10%)	Nominal operating power, mW
Single side stable	TN2E-3V	3	2.25	64.3	140
	TN2E-4.5V	4.5	3.38	145	140
	TN2E-5V	5	3.75	178	140
	TN2E-6V	6	4.5	257	140
	TN2E-9V	9	6.75	579	140
	TN2E-12V	12	9	1,028	140
	TN2E-24V	24	18	2,880	200
1 coil latching	TN2E-L-3V	3	2.25	90	100
	TN2E-L-4.5V	4.5	3.38	203	100
	TN2E-L-5V	5	3.75	250	100
	TN2E-L-6V	6	4.5	360	100
	TN2E-L-9V	9	6.75	810	100
	TN2E-L-12V	12	9	1,440	100
	TN2E-L-24V	24	18	3,840	150
2 coil latching	TN2E-L2-3V	3	2.25	45	200
	TN2E-L2-4.5V	4.5	3.38	101	200
	TN2E-L2-5V	5	3.75	125	200
	TN2E-L2-6V	6	4.5	180	200
	TN2E-L2-9V	9	6.75	405	200
	TN2E-L2-12V	12	9	720	200
	TN2E-L2-24V	24	18	1,920	300

Notes: 1. Please add "H" for self-clinching terminal types as TN2E-L-H-12V.
2. Specified value of pick-up, drop-out, set and reset voltage is with the condition of square wave coil pulse.
3. Please note the following: the drop-out voltage; min. 10% of nominal voltage, the reset voltage; max. 75% of nominal voltage.
4. Standard packing: Tube:50pcs Case:1,000pcs

DIMENSIONS

mm inch

Standard PC board terminal



General tolerance: ±0.3 ±.012

Schematic (Bottom view)

- Single side stable (Deenergized condition)
- 1-coil latching (Reset condition)
- 2-coil latching (Reset condition)

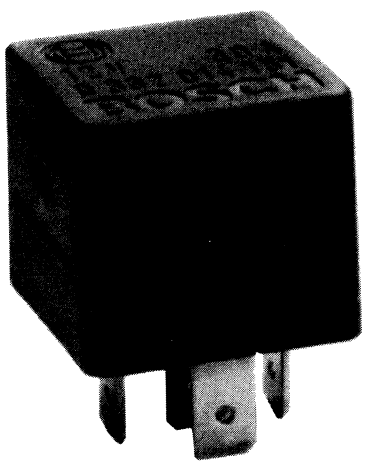
Bosch, The Right Relay 99.999% Of The Time



With the lowest failure rate in the industry, less than 1/100th of one percent, a Bosch relay can make any product a more reliable product. Bosch relays are assembled, tested and inspected by a totally automated system assuring you of exceptional reliability. To receive more information about the Bosch relays call us at (312) 865-5301 and ask why a Bosch Relay's the right relay all of the time.

Military Grade/Half Size Relays

RELAY	CONTACT RATING/ CONFIGURATION	COIL VOLTAGES	FEATURES
 **HFW** (Standard Sensitivity)	• Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	5 to 48.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Sensitive version available • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-39016/6 level L, M & P (Request Brochure Half Size 1-91)
 **HFW4A** (4 Amp Rating)	• Low Level to 4.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	5 to 48.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-39016 (Request Brochure Half Size 1-91)
 **HMS** (Sensitive Series)	• Low Level to 2.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	5 to 36.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Energy-saving 100/125 milliwatt sensitivity • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-39016/44 level L, M & P (Request Brochure Half Size 1-91)
 **HMB** (Bifilar Coil)	• Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6 to 26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Bifilar transient suppression • Excellent RF switching • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-39016/22 level L, M & P (Request Brochure Half Size 1-91)
 **LS** (2 Pole Latching)	• Low Level to 2.0 Amps • 2 Form C, (DPDT)	5 to 48.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Single or dual latch version • Excellent RF switching • Qualified to MIL-R-39016/45 level L, M (Request Brochure Half Size 1-91)
 **LR** (4 Pole Latching)	• Low Level to 2.0 Amps • 4 Form C (4PDT)	5 to 48.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Four pole design • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-39016 (Request Brochure Half Size 1-91)
 **SR** (4 Pole Version)	• Low Level to 2.0 Amps • 4 Form C (4PDT)	6 to 26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Four pole design • Ambient temp rating −65°C to + 125°C • Qualified to MIL-R-39016/40 level L, M (Request Brochure Half Size 1-91)
 **SS** (6 Pole Version)	• Low Level to 2.0 Amps • 6 Form C, (6PDT)	6 to 26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Six pole hi-density design • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-39016 (Request Brochure Half Size 1-91)
 **C-10 AMP** (10 Amp Series)	• Low Level to 10 Amps • 1 Form C, (SPDT)	6 to 26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Unique hi-current design package • Ambient temp rating −65°C to + 125°C • Designed to MIL-R-39016 (Request Brochure Half Size 1-91)

SIZE (Case Size): H-.410 (10.41) D-.410 (10.41) & W-.810 (20.57)

Military Grade/Full Size Relays

RELAY	SIZE (Case Size)	CONTACT RATING/ CONFIGURATION	COIL VOLTAGES	FEATURES
 **FW** (3 Amp Series) **FW5A** (5 Amp Version) **LFW** (Latching Series)	H- .875 (22.23) * D- .400 (10.16) W- .800 (20.32)	FW & LFW • Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A FW5A • Low Level to 5.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6.3 to 110.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Sensitive version available (FW only) • Excellent RF switching • Ambient temp rating -65° to +125°C • One and two coil operation (LFW only) • Qualified to 5757/10 (FW only) (Request Data Sheet FW6-89)

Military Grade/Other Relays

PF 10 Amp Power Relay	H- 1.300 (33.02) D- .515 (13.08) W- 1.075 (27.31)	• Low Level to 10.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6.0 to 115.0 VDC	• Welded, hermetically sealed enclosures • Very low contact resistance • Package volume .72 cubic inch • Excellent RF switching • Ambient temp rating -65°C to + 125°C • Designed to MIL-R-5757/23 & 28 (Request Data Sheet PF-85)
 **07**	H- 1.000 (25.40) D- .515 (13.08) W- 1.015 (25.78)	• Low Level to 10.0 Amps • 2 Form C	6.0 to 120.0 VDC or 115.0 VAC 60/400 Hz	• Qualified to MIL-R-5757/23 & MIL-R-6106 (MS27245 & MS27247) • 10 Amp contact rating • DC & AC coils
RD 4&6 Pole Relays	H- 1.34 (34.04) D- 1.14 (28.96) W- 1.06 (26.92)	• Low Level to 2.0 Amps • 4 Form C, 6 Form C	26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Welded construction • 100 G Shock. • Ambient temp rating -65°C to + 125°C • Qualified to MIL-R-5757/1 & 7 (Request Data Sheet RD-83)
 **02**	H- 1.575 (40.01) D- .718 (18.24) W- 1.062 (26.97)	• Low Level to 2.0 Amps • 2 Form C	6.0 to 50.0 VDC	• Compact 2 pole design • Military construction • Hermetically sealed
03 	H- 1.407 (35.74) D- 1.320 (33.53) W- 1.843 (46.81)	• Low Level to 2.0 Amps • 6 Form C	6.0 to 48.0 VDC	• Efficient 6 pole design • Military construction • Hermetically sealed
82 	H- 3.093 (78.56) D- 4.375 (111.13) W- 4.250 (107.95)	• 150.0 Amps • 1 Form X to 4 Form X	6.0 to 120.0 VDC	• 150 Amp contact rating • High power switching • Up to 4 pole contacts • Optional hermetic sealing
SF 40 MW Sensitive Relay	H- 1.281 (32.54) D- .400 (10.16) W- .800 (20.32)	• Low Level to 2.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	1.8 to 40.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • 40 milliwatt sensitivity • Excellent RF switching • Ambient temp rating -65°C to + 125°C • Designed to MIL-R-5757/13 (Request Data Sheet SF-85)
MFW 1/6th Size Relay 	H- .410 (10.41) D- .230 (5.84) W- .500 (12.70) *mm	• Low Level to 1.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	3.5 to 53.0 VDC	• Hermetically sealed enclosures • Low contact resistance • Total volume only .046 cubic inch • Excellent RF switching • Ambient temp rating -65°C to + 125°C • Qualified to MIL-R-39016/34, L & M level (Request Data Sheet MFW6-88)

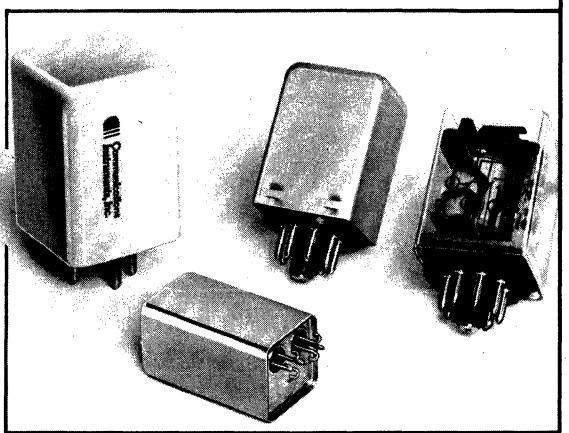
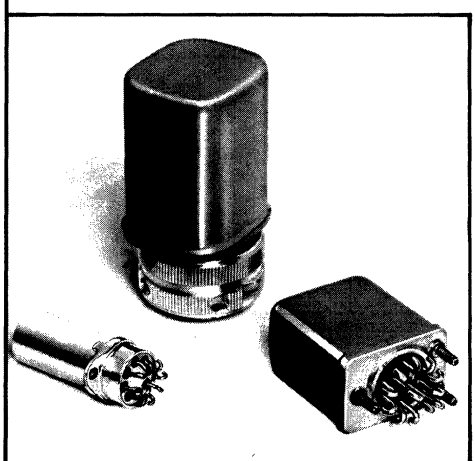
New Relays from CII

CII's new line of highly sensitive relays includes a broad range of types for low level to 10 Amp switching capability. These relays are proven performers with a solid history of reliable performance in aerospace, defense, telecommunications, commercial and industrial applications.

- Series 4 — SPDT, DC sensitive relay
- Series 5 — SPDT, AC/DC sensitive relay
- Series 6 — Multipole, polarized 3-position relay
- Series 22 — SPDT & DPDT sensitive, high performance relay
- Series 26 — SPDT DC miniature relay
- Series 32 — DPDT, Polarized, magnetic latching relay
- Series 33 — DPDT, Polarized, magnetically biased relay
- Series 34 — DPDT, Magnetic latching polar relay
- Series 35 — DPDT, DC Sensitive polar relay
- Series 36 — DPDT, DC Half-size sensitive relay
- Series 41 — SPDT, AC/DC High sensitivity relay
- Series 42 — DPDT, AC/DC High sensitivity relay
- Series 48 — SPDT, DC Rugged, sensitive relay
- Series 72 — SPDT, Pulse & telegraph polar relay



*These relays were formerly manufactured by Sigma Instruments, Division of Pacific Scientific.



CII's new line of commercial and military grade relays offer a range from low level to 150 Amp switching capacity. These relays are highly reliable components that have been used for years in a wide variety of applications.

- 02 Series — DPDT, Military grade relay
- 03 Series — 6PDT, Multiple switching military relay
- 07 Series — DPDT, 10 Amp Aerospace relay
- 21 Series — SP, 3P, 4P, 6PDT, AC/DC Relay
- 54 Series — DPDT, 4PDT Open or sealed general purpose relay
- 57 Series — DPDT, 4PDT Bifurcated miniature, general purpose relay
- 62 Series — High voltage, 25KV relay
- 82 Series — 150 Amp Power relay

*These relays were formerly manufactured by AIRPAX, Division of North American Philips.

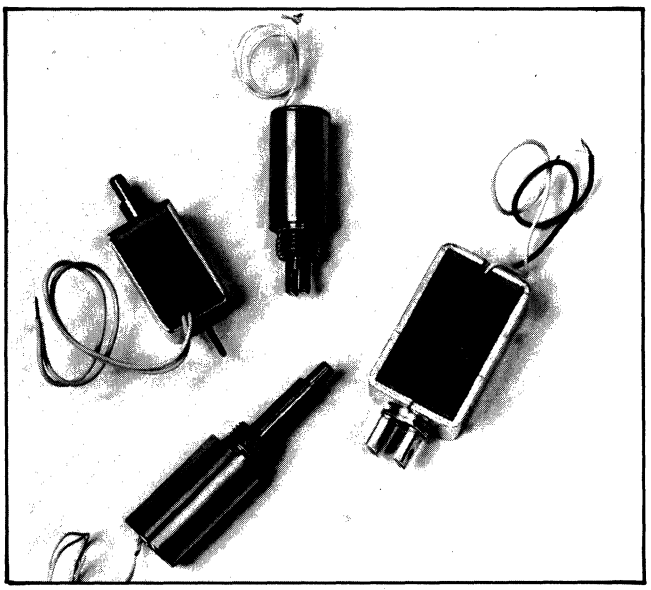
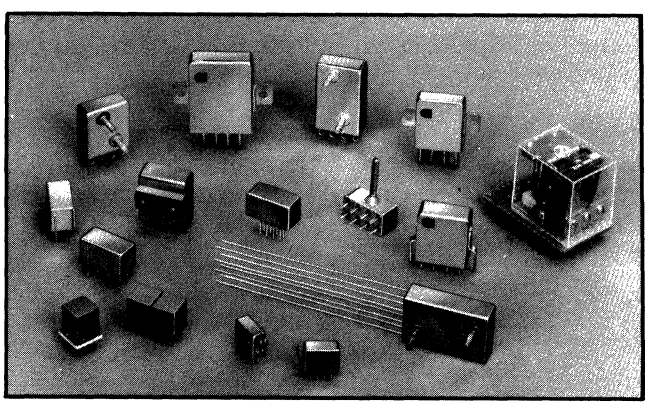
New Solenoids from CII

Custom Solenoids
CII offers a complete capability for manufacturing solenoids to satisfy low, medium or maximum pull force applications. Whether you require a TUBULAR, "C" FRAME or a BOX FRAME unit (in AC or DC) CII can custom-design and build the solenoid you need at especially competitive prices. For more information, contact Communications Instruments Inc.



Custom Relays



- Build to Print
- Custom Made
- Unique Applications
- Replacement/Alternative Design
- Specialized Testing
- RF Switching
- Industrial/Commercial/Military
- High Shock & Vibration
- Extreme Temperatures
- Application Engineering Assistance

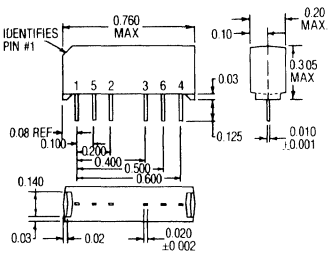
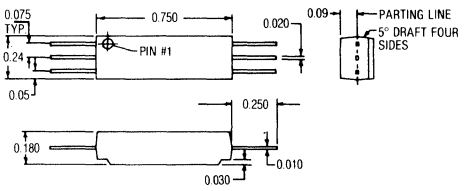
MOLDED REED RELAYS SIP (SERIES 9000) AND SURFACE MOUNT (SERIES 9200)

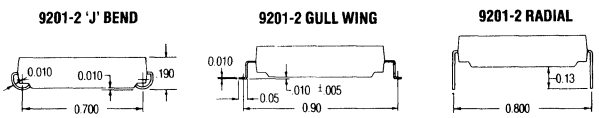
MECHANICAL SPECIFICATIONS





TERMINAL STYLE

LOCATION AND COPLANARITY TOLERANCE ±.003



ORDERING INFORMATION

To order a Coto relay, assemble a part number from the data to describe the desired parameters.

SIP

Model Number — **90XX – XX – XX**

- 01 = SPST, 4 Pin SIP
- 02 = 50Ω Coxial Shield.SPST, 6 Pin SIP
- 03 = SPST, 4 Pin SIP, Recommended For Load Switching

Coil Voltage

- 05 = 5 Volts Nominal
- 12 = 12 Volts Nominal
- 00 = No Option – Omit 0's
- 01 = Internal Diode*

SURFACE MOUNTED

Model Number — **92XX – XX – X0** — Terminal Style

- 01 = SPST, Recommended For Low Level Switching 4 Pin
- 02 = SPST, 50Ω Coaxial Shield 6 Pin

Coil Voltage

- 05 = 5 Volts Nominal
- 12 = 12 Volts Nominal

Terminal Style

- 0 = Gull Wing
- 1 = Axial
- 2 = 'J'
- 3 = Radial

ULTRA-LOW THERMAL EMF REED RELAYS FOR LOW-LEVEL DATA ACQUISITION SYSTEMS

THERMAL EMF

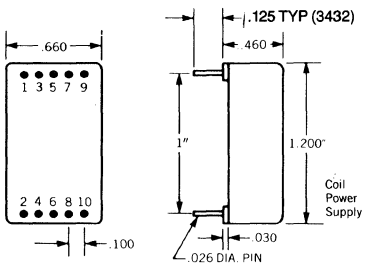
Ratings. Thermal EMF is specified differentially between the two thermal EMF switches (pins 5-6 and 7-8). It is directly proportional to coil power or the square of the applied voltage. When the relays are operated in a scanning mode, the thermal EMF is also proportional to the coil duty cycle.

Coto Series 3600 relays are available with maximum differential thermal EMF ratings of <5μV, <3μV, <1μV, or <0.5μV.

The Mercury wetted 3432 Relay is available with maximum differential thermal EMF ratings of <5μV, <10μV.

Note: The must operate and must release voltages and the coil resistance are specified at 25°C. These values vary by approximately 0.4%/°C as the ambient temperature varies.
Vibration: 20 G's to 2000Hz Shock: 50 G's

MECHANICAL SPECS



All dimensions are nominal
Pin 9 is the electrostatic shield pin.

Thermal EMF Test Circuit

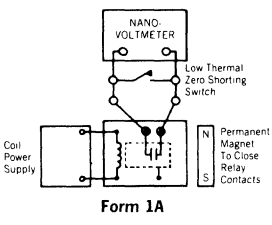
LOW THERMAL EMF REED RELAYS SERIES 3500

THERMAL EMF

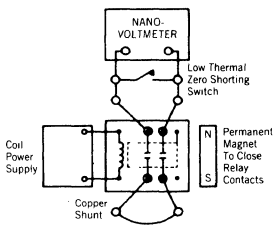
Ratings. The thermal EMF is specified individually for Form 1A relays and differentially between the switches for Form 2A relays. This measurement is made as shown in block diagram. Form 2A relays are measured by shorting pins 2 and 4 with a copper shunt and connecting a nanovolt meter across pins 8 and 10.

The 3500 relays are available with maximum differential thermal EMF ratings of either <10μV, <5μV, <3μV, <1μV or <500nV. The ratings are determined by 100% testing and sorting according to the thermal EMF's measured after the coil has been energized for 5 minutes at its nominal voltage.

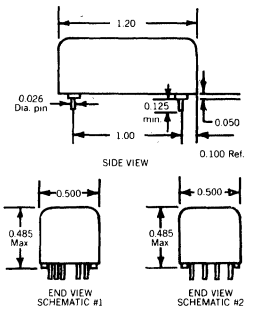
Thermal EF Test Circuits:

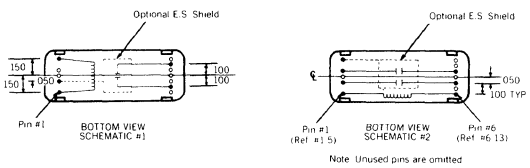


Form 1A



Form 2A





Note: Unused pins are omitted

ORDERING INFORMATION

1 Must be mounted vertically. Pin #1 is up.
2 The coil resistance & operate & release voltages are specified at 25°C. These values vary by approx. 0.39%/°C as the ambient temperature changes.
3 The life expectancy when switching intermediate voltages and currents may vary widely. Consult the factory for your exact load requirements.
4 Measured after 5 minutes at nominal coil voltage.

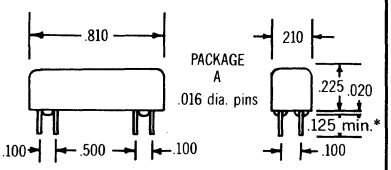
MICROMINIATURE REED RELAYS
SERIES 2200

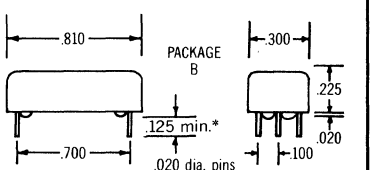
For a complete product line catalog, technical assistance, life test data or other ordering information, please contact us directly. Our philosophy incorporates working hand-in-hand with our customers (Partners in Design) to develop custom designed reed relays that meet their special design requirements.

OPERATING PARAMETERS @ 25°C		
Nominal Volts	05	12
Coil #2 Resistance Ohms*	150	900
Coil #3 Resistance Ohms*	230	1500
Coil #4 Resistance Ohms*	370	—

*Resistance figures are ± 10%



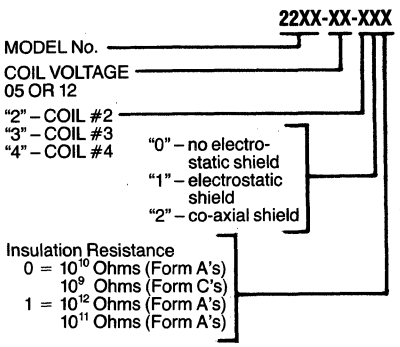
All dimensions are nominal



*.105 ±.015 for models #2200-2310 and #2200-2311

ORDERING INFORMATION

To order, assemble a part number from the data below to describe the desired parameters.



MODEL NUMBER			2200-2301			2200-2302			2200-2311			2204			2211

ALL RATINGS AT 25°C UNLESS NOTED.																	
Schematics (Bottom View) Not to scale																	

Unused pins are omitted.
Pin numbers for reference only.
Black dot on top of relay denotes pin #1.

1. On model 2204 pin #7 is the optional electrostatic shield pin, pins #6 and #7 are the optional co-axial shield pins.
2. Consists of 20V Zener-diode and 1N4002 diode in series connected in parallel to coil.

• Black dot on top of relay denotes Pin #1.
* These relays contain bias magnets. Correct polarity must be observed. Diode coil suppression is required for proper operation of latching relays. If internal diode option is selected on 7150 Pins #1 and #8 are positive. On all other relays Pin #1 is Positive.

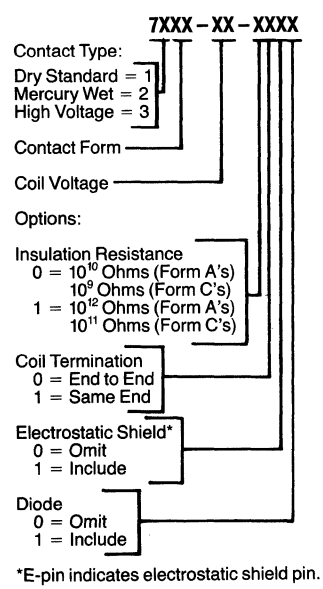
ALL RATINGS AT 25°C UNLESS NOTED.														



*E-pin indicates electrostatic shield pin.

* Life expectancy at full rated load is dependent upon the combination current/voltage switched. While typical life expectancy is >5 × 10^6. Consult factory for life data at your load levels.
‡ Consists of 20V Zener-Diode and IN4002 Diode in series, connected in parallel to coil.

CONTROL RELAYS

Syrelec

Crouzet Corporation
2445 Midway Road
Carrollton, TX 75006-2503
Tel: 214-250-1647
1-800-527-5311 • Fax: 214-250-3865

Syrelec offers several variations of controls. Five models for liquid level controls, 3 phase 220V, 380V and 440V for phase loss or reversal protection, current and voltage detection and control, motion detection, solid state relays, and alternating relays are also available. If a standard control requires modification or a special product is needed to meet your exact needs, please call us or the Syrelec Sales Representative nearest you. *Most Controls are UL recognized and CSA approved.*

	SERIES	FUNCTION	FEATURES	OUTPUT
	WRU Phase Control Relay	Motor phase control 3 phase 220V 60 Hz. 3 Phase 380V 60 Hz. 3 Phase 440V 60 Hz. 3 Phase 575V 60 Hz. Consult factory for 50 Hz.	Motor phase control relay monitors: phase sequence, loss of any phase (even if induced voltage reaches 95% of normal voltage), under and over voltage.	10 Amp SPDT
	IART + TIXP3 Current Control Relay	Output when current overshoots selected level 5 to 100 Amps AC using a current transformer (TIXP3).	Control of AC current level. Selection of threshold and hysteresis separate. LED Status indicator. Hysteresis adjustment 5 to 50% of current point.	10 Amp SPDT
	**DUR** Voltage Control Relay	Output when voltage exceeds selected threshold. 0.1 to 10V, 0.4 to 40V, 4.0 to 400V.	AC or DC control. From 0.1V to 400V. Threshold and hysteresis selection separately. LED state of relay indicator. Latching in "ON" state possible.	10 Amp SPDT
	**FMR** Analog Control Relay	Output relay is energized when voltage or current exceeds threshold. Din-rail mounting.	Settable threshold selection from 0 to 30VDC or from 0 to 30 mA DC. Pushbutton Presetting. Low alarm output at 4 mA. Din-rail mounting.	10 Amp SPDT
	ARS Solid State Relay	Operates as an open or closed switch. Control input: 90 to 280VAC (AC Version) or 3 to 32VDC (DC Version).	10, 25 or 40 Amp output. Zero voltage switching. Opto-isolated to 4000V.	10, 25 or 40 Amp Triac Solid State
	RKT, RIT RPT General Purpose Relay	Blade Plug-in, Ice Cube or 8 and 11 Plug-in Versions.	Surface mount, Indicating light also available.	DPDT or 3PDT 10 Amp
	FJR 3 Triplexor	Control of multi-pump systems. Replaces mechanical duplexor and triplexor controls.	Triplex or duplex mode selectable by jumper. LED status indicators.	3 x SPDT 5 Amp
	JR Alternating Relay	Duplex or alternating action output relay.	LED status indicators. Transient protected, low cost 12, 24, 110, 220VAC 50/60HZ.	10 Amp SPDT 10 Amp SPDT DPDT Crosswired
	**NNR** Liquid Level Control	Pump-up or Pump-down, slide switch selectable. May be used in fresh water, sea water, sewage or chemical solutions.	Adjustable sensitivity from 4.7K to 47K ohms. Senses changes in resistance across probes. Open PC board design or enclosed with three mounting styles. Several accessories available.	1 Amp AC 1 Amp DC SPDT Relay
	NR NRU Liquid Level Control	Control of two liquid levels. Relay will energize when liquid reaches the high or low probe.	Automatic regulation and control of liquid levels, completely solid state detection, sensitivity adjustment on front panel, conventional relay mounting.	10 Amp AC 1 Amp DC SPDT
	DVLR LVLR Under Speed Monitor	Output when speed drops below preset threshold. Inhibit time adjustable at factory of .1 to 20 sec.	Detection and control of underspeed, stopping or jamming condition. Operates from 3 wire proximity switch, contact closure or voltage input. Timimg range .06 sec. to 10 hrs. with four subranges.	10 Amp AC 1 Amp DC SPDT

TIME DELAY RELAYS

Syrelec

Crouzet Corporation
2445 Midway Road
Carrollton, TX 75006-2503

Syrelec Corporation offers a broad line of Timers to meet the requirements of most industrial and instrument applications. Numerous accessories and options are available for convenient and compatible installation. If a standard Syrelec Timer does not meet your exact requirements, a custom designed or modified standard device could be the solution to fit your need. Contact your nearest Syrelec Sales Office or our Customer Service Department at 1-800-527-5311, for information regarding custom Timers and Controls. *Most Timers are UL recognized and CSA approved.*

	SERIES	FUNCTION	FEATURES
	LR2 Multi-Function Relay	1. Delay on Make 2. Single Shot 3. Delay on Break 4. Interval Timer *Single Function Relay	Four functions in one unit. 0.06 sec.-640 min. in 2 time ranges, each with four subranges. 12VDC to 220VAC, 50/60 Hz. Din-rail; plug-in; panel mount. **OUTPUT:** 10 Amp DPDT relay
	LRU Multi-function Relay CRU Series	1. Delay on Make 2. Single Shot 3. Delay on Break 4. Interval Delay on Break	4 delay functions in one unit. Timing Range from .1 sec to 10 hrs in one unit **OUTPUT:** 10 Amp SPDT
	813 Multi-function LCD or LED Timer	1. Delay on Make 2. Single Shot 3. Delay on Break 4. Interval 5. Repeat Cycle	3 Digit LCD or LED. Timing Range from .1 sec. to 999 hours. Push-button presetting. Multi-voltage **OUTPUT:** 5 Amp SPDT
	LR2 U Multi-function Relay	1. Delay on Make 2. Single Shot 3. Delay on Break 4. Interval	Timing Range from .1 sec. to 10 hours in one unit. Direct reading. Big setting Dial. **OUTPUT:** 10 Amp DPDT
	88220 Multi-function Motor timer	Multi-function motor driven timer. Din-rail, 8 pin plug-in and panel mounting.	Five functions in one unit. Timing range from .3 sec to 12 hours. Direct reading. Memory. **OUTPUT:** 8 Amp 2X SPDT
	AXR 2 Timing Relay	Delay on Make DPDT or Delay on Make + one Instantaneous Output Relay.	Timing range from .1 sec. to 10 hours in one unit. Direct Reading. Big Setting Dial. **OUTPUT:** 10 Amp 2X SPDT
	AR2 Timing Relay	Delay on Make electronic timing relay. Din-rail, 8 and 11 pin plug-in, 11 pin spade, and panel mounting.	2 time range models available: 0.06 sec. to 160 sec. or 15 sec. to 640 min. LED relay status indicator. Five input power voltages. **OUTPUT:** 10 Amp DPDT
	AR U Timing Relay	Delay on Make Din-rail and 8 pin plug-in mounting.	Timing range from .1 sec to 10 hours in one unit. Direct reading. Dual voltage. **OUTPUT:** 10 Amp SPDT
	813 AX2 Timing Relay	Delay on Make DPDT or Delay on Make + one Instantaneous Output Relay	3 Digit LCD Timing Range from .1 sec. to 999 hours. Push-button Presetting. **OUTPUT:** 5 Amp 2X SPDT
	AXR Delay on Make And Instanta-neous Output Relay	Dual function: 1 relay Delay on Make and 1 relay Instantaneous. Din-rail, 8 and 11 pin plug-in and panel mounting.	2 time ranges available: 0.06 sec. to 160 sec. or 15 sec. to 640 min. Time within range adjustable in four subranges. Five input power voltages. LED relay status indicator. **OUTPUT:** 10 Amp AC 1 Amp DC Two SPDT relays
	KR True Delay On Break Timer	Delay on Break timing begins on removal of power. Relay energizes when the input power is applied to the timer.	LED input power status indicator. Two time range models available each with four subranges. Four AC input power voltages, 50/60 Hz. **OUTPUT:** 5 Amp AC 1 Amp DC SPDT

	SERIES	FUNCTION	FEATURES
	FR2 Combina-tion Timing Relay	2 independently timed outputs. Delay on Make and Delay on Break. Five mounting styles and five input power voltages.	LED relay status indicator. Each output in two ranges: 0.06 sec. - 160 sec. or 15 sec. - 640 min. T1 is Delay on Make; T2 is Delay on Break. **OUTPUT:** 10 Amp AC 1 Amp DC SPDT or DPDT
	NAR 2 **NBR 2** **NCR 2**	Delay on Make Single Shot Delay on Break	Timing range potentio-meter fine tuned. Models in two ranges: 0.06 sec. - 160 sec. or 15 sec. - 640 min. Open PC board. Time range slide switch selected. **OUTPUT:** 10 Amp DPDT
	AR2C Preset Timer Preset Counter	Delay on Make timer or Preset Counter. Count to 999 at 10 Hz. speed in count mode. Din-rail, 11 or 8 pin plug-in.	Count or time preset selectable with thumbwheel switches on top of enclosure. 24 VAC to 220 VAC, 50/60 Hz. **OUTPUT:** 10 Amp DPDT
	DR2 U Repeat Cycle Timer	Repeat cycle. Both OFF and ON time indepen-dently set. Din-rail, 8 and 11 pin plug-in mounting.	Timing Range from .1 sec. to 10 hours for ON and OFF time selectable in one unit. Direct reading. **OUTPUT:** 10 Amp DPDT
	**DR2** Repeat Cycle Timer	Repeat cycle. Both OFF and ON time selectable. Din-rail, 8 and11 pin plug-in or panel mounting: T1 is OFF and T2 is ON time	2 time ranges available for OFF and ON time functions. Separate controls for ON and OFF setting. Each time range with four subranges. Five input power voltages. **OUTPUT:**10 AMP SPDT
	DR U Repeat Cycle Timer	Repeat cycle. Both OFF and ON time indepen-dently set. Din-rail and 8 pin plug-in mounting.	Timing range from .1 sec to 10 hours in one unit. Direct reading. Dual Voltage. **OUTPUT:** 10 Amp SPDT
	**SAS** **SHS** Solid State Timer	Delay on Make Interval Fast-on Terminals Small Size 1.77" x 1.96"	Available in fixed timing, external potentiometer and internal potentiometer models. Economical, epoxy encapsulated, 10 to 260VAC. 50/60 Hz. **OUTPUT:** Solid State .7 Amp SCR
	SASCB Solid State Compres-sor Timer	A time of 3 or 5 minutes is needed to equalize the interior pressure in the system. The SASCB is available to prevent reset of the thermostat	2 wire Device. Compact, encapsulated design for Din-rail mounting or through hole with screws. **OUTPUT:** Solid State .7 Amp SCR
	QAS **QHS** Solid State Timer	Delay on Make Interval 2" x 2" Package Fast on Terminals	Available in fixed timing, external potentiometer and internal potentiometer models. Economical, epoxy encapsulated, 10 to 260VAC. 50/60 Hz. **OUTPUT:** Sclid State 1 Amp SCR
	QBS **QCS** Solid State Timer	Single Shot Delay on Break 2" x 2" Package Fast on Terminals	Available in fixed timing, external potentiometer and internal potentiometer models. Economical, epoxy encapsulated, 10 to 260VAC. 50/60 Hz. **OUTPUT:** Solid State 1 Amp SCR
	QDS 1 & 2 Solid State Timer	Repeat Cycle Off/On or On/Off 2" x 2" Package Fast on Terminals	Independent Off and On timing. Available in fixed timing, external potentiometer and internal potentiometer models 10 to 260VAC. 50/60 Hz. **OUTPUT:** Solid State 1 Amp SCR

Crouzet® Time Delay Relays

MULTI-FUNCTION
on-delay, interval and single shot in one timer

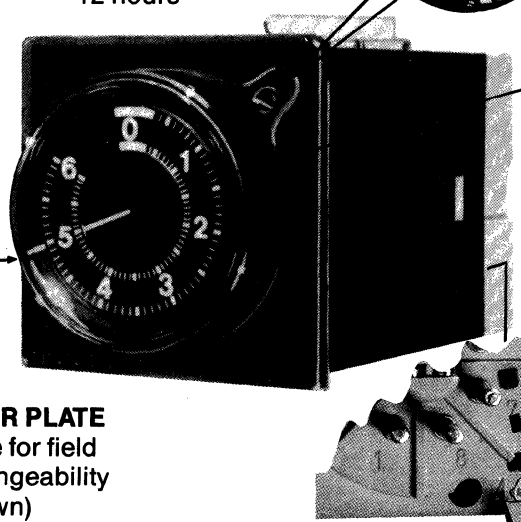
MULTI-RANGE
2 models/3 time ranges each cover from 0.3 sec. to 12 hours

TRANSIENT IMMUNITY
Built-in

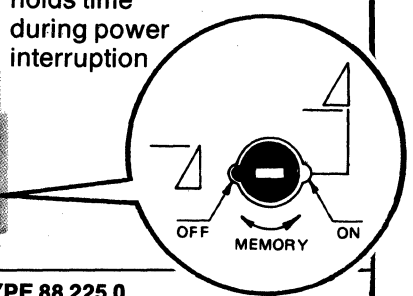
CYCLE PROGRESS
dial shows time remaining in cycle

±2% SETTING ACCURACY

±1.5% REPEAT ACCURACY

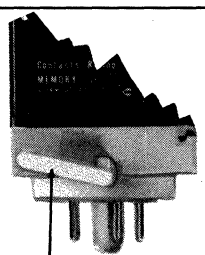


MEMORY
when "on," holds time during power interruption



ADAPTER PLATE
available for field interchangeability (not shown)

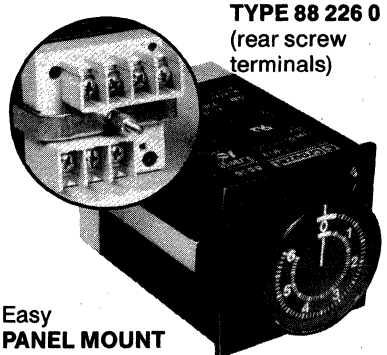
TYPE 88 226 5
(octal plug-in)



spring clip included for easy panel mounting

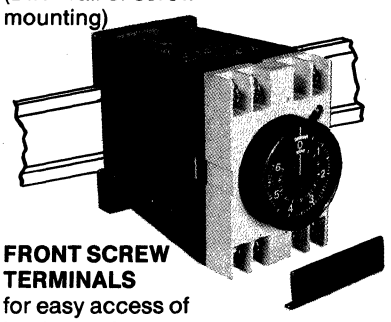
OCTAL LOCK
prevents timer from vibrating out of its socket

TYPE 88 226 0
(rear screw terminals)



Easy **PANEL MOUNT** with no additional hardware (clamp included)

TYPE 88 225 0
(DIN - rail or screw mounting)



FRONT SCREW TERMINALS
for easy access of back panel mounted timer

removable dust covers on terminals

SPECIFICATIONS

Time ranges
Minimum setting: 5% of time range.

Model	Multi-Range*
Model 1	6 sec./60 sec./12 min.
Model 2	6 min./60 min./12 hrs.

*Select any time range with screwdriver on either model

Repeat accuracy
±1.5% (except 4% on 6 sec. range).

Overall accuracy
±1.5% (except 4% on 6 sec. range) throughout entire operating temperature (– 4° F to 131° F) and voltage range (±10%).

Setting accuracy
±2% (except 5% on 6 sec. range).

Reset time
.2 sec.

Timing modes
"Interval," "on delay," "single shot;" possibility of keeping time when memory is "on" even in case of power interruption.

Output ratings
1 instantaneous N O contact, 8A-1/3 HP - 120/220 V AC,
1 delayed SPDT contact, 8A-1/3 HP - 120/220 V AC.

Life expectancy
Over 2.5 million operations or 10,000 hrs of continuous "on" time.

Power requirements
115 V 60 Hz + 10%, – 10%, 24 V 60 Hz + 10%, – 10%,
Optional: 240 V 60 Hz, 220 V 50 Hz, Input power: 3 VA.

Temperature rating
Operating: –20° C, + 55° C (–4° F to 131° F).
Storage: –20° C + 70° C (–4° F to 158° F)

Weight
6.4 oz. (185 grams).

CERTIFICATIONS

UL and CSA. VDE and other European standards.

eem MINIGLOSSARY ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

Encapsulated: Imbedded in a suitable potting compound.

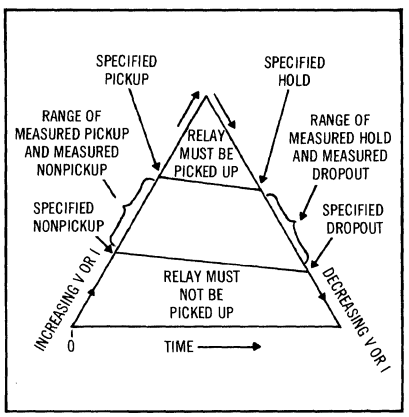
Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.

Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.



OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

Chatter: See bounce.

Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.

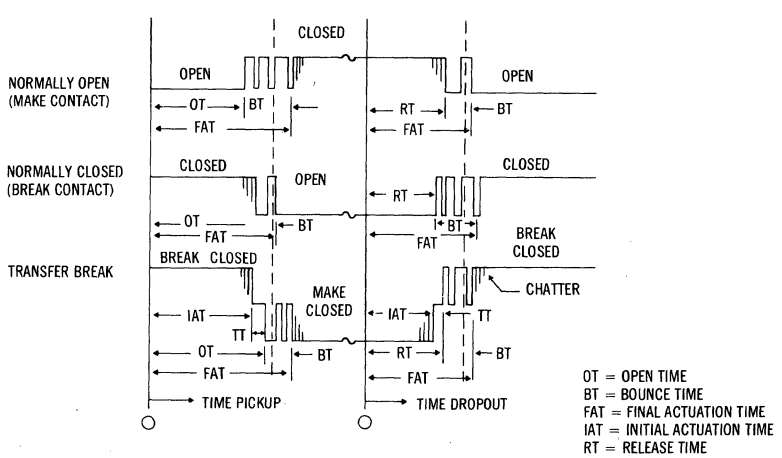


Fig. 2. Typical time vs. current (non-inductive load)

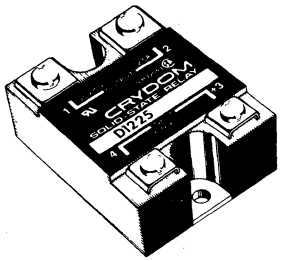
CRYDOM COMPANY

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES 1



2.5 TO 90 AMP, 120, 240 AND 480 VAC SCR AC OUTPUT, PANEL MOUNT SOLID-STATE RELAYS

These Crydom SSRs make it possible to switch AC power loads up to 47 kw. Output circuit consists of inverse-parallel (back-to-back) dual SCRs to meet the most demanding requirements. Features include zero voltage switching, phase control and normally closed models available. UL recognized, CSA certified & VDE approved.

25, 40 AMP Dual-SCR Output 20 AMP Quad-Triac Output

General Specifications

Isolation Voltage: . . . . . .2500 VAC
Temperature Range:
Storage . . . . . – 40°C to 120°C
Operating: . . . . . – 30°C to 80°C
Weight: . . . . . .3.5 oz. (98G) Max.
Control Signal Range . . . . . .4-15 VDC
Must Operate Voltage . . . . . .4 VDC Max.
Must Release Voltage . . . . . .1 VDC Min.
Input Current . . . . . 45 mADC Max.
Off-State dv/dt . . . . . .200V/usec Min.

These space saving and cost saving "dual" and "quad" series provide two (2) or four (4) totally independent AC output solid state relays in a single Series 1 package. The "dual" types employ inverse parallel SCR outputs and are available in 25 AMP and 40 AMP models. The "quad" types have triac outputs. Protection is provided by an internal dv/dt snubber network across the output switch which restricts the rate of rise of most voltage transients to within acceptable limits. Features include 2500 VRMS optical isolation, zero voltage turn-on and zero current turn-off of the the load. Random voltage turn-on units (– 10 suffix) are also available for phase control applications.

These series are ideal when multiple SSR's are required for interfacing between the logic output of TTL, HTL, MOS or microprocessor circuits and AC loads such as motors, heaters, lamps, solenoids and transformers.

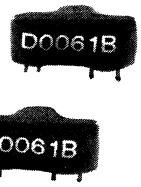
SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES DO 061

DC MINI-SIP



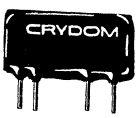
Crydom Model No.	Line Voltage VDC	Max. I @ 60°C A (RMS)	Control Voltage Range	Must Operate Voltage, Max.	Must Release Voltage, Min.	Surge Current 1 Sec.
DO 061A	3-60	1.0	3.0-9.0 VDC	3.0 VDC	1.0 VDC	5A
DO 061B	3-60	1.0	1.7-9.0 VDC	1.7 VDC	0.8 VDC	5A

The DO 061 are miniature DC output modules in a conformally coated SIP package, measuring only 0.46 x 0.9 x 0.4 in. with pinouts on the popular 100-mil grid. The input-to-output isolation is 4000VRMS with an isolation resistance of 1×10^9 ohms. The units are derated 10mA per degree C above 60°C ambient temperature. Operating temperature range is – 30°C to + 80°C. When used for inductive loads, diode suppression across the load is recommended.

SERIES AO 241

1.0 AMP, 24-280 VAC TRIAC OUTPUT DC CONTROL

AC MINI-SIP



The CRYDOM A0241/R AC relays are 1.0 amp rated SPST-NO miniature SIP solid state relays. Utilizing the popular 100-mil. grid they occupy only 0.36 square inches of board space. These miniature relays have the same high technology and reliable design found in all CRYDOM products. UL, CSA pending.

Features
- Compact Package For High Density PC Board Mounting
- TTL Logic Compatible Input
- 4000 Vrms Optical Isolation
- Both "Zero Voltage" & Phase Controllable "Random" Switching Versions

For electrically clean, photo-isolated, noise free interfacing between logic level programmable controllers, microprocessors and machine controls and power level loads.
Input modules accept power level signals and convert them to logic level signals. Output modules accept logic level signals to switch AC or DC loads to 3.5 Amps. UL recognized & CSA certified.

General Specifications—All Models

Dielectric (Input/Output) . . . . . 4000 VRMS
Isolation Resistance
(Input/Output@500V) . . . . . 10^{10} Ohms

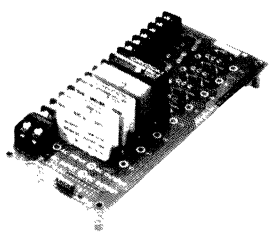
MOUNTING BOARDS FOR I/O MODULES



These mounting boards will accept input/output modules in any combination of input or output types of the same style (single or quad channel). Modules can be easily and quickly inserted, without disturbing field wiring. The single channel models provide an LED status indicator, plug-in 5 amp fuse and 3.3. Kohm pull-up resistor for each module.

Features

- LED Status Indicators
- Plug-in Fuses
- Pull-up Resistors
- Barrier Strip Screw Terminals for Field Wiring
- Card Edge Logic Connections Available
- Screw Terminal Logic Connections Available
- UL Recognized Types
- CSA Certified Types

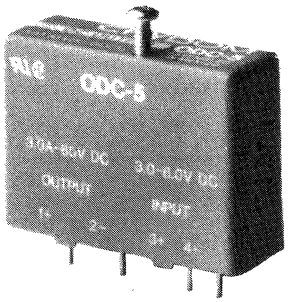
CRYDOM COMPANY

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES IAC/IDC OAC/ODC

SOLID-STATE OPTO-ISOLATED I/O MODULES 5, 15, 24 VDC



Industrial environments can subject sensitive microelectronic circuits to undesirable stress in the form of voltage transients, electrical noise, shock, vibration, etc. These can result in permanent damage, spurious operations or false indications. Crydom's I/O modules are designed to provide an electrically clean, photo-isolated, noise-free "output" interface from logic level control systems to external loads such as motors, valves, solenoids, etc., or, an "input" interface from the load or sensors to microprocessor or computer-based logic level systems. Used with Crydom's I/O mounting boards, these solid-state modules exhibit long, reliable life in industrial environments.

FEATURES

- Color-coded by Function
- 4000 Vrms Optical Isolation
- Industry Standard Package and Pin-out
- High Transient Noise Immunity
- Series Operation Compatibility
- UL Recognized, CSA Certified, SEV Approved Types Available

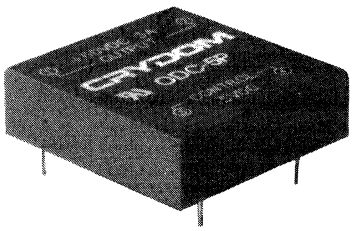
The output of the AC output module is compatible with the input of the AC input module and the output of the DC output module is compatible with the input of the DC input module. 5. Input modules provide an output that is active low. 6. Output modules can be controlled from active or active high logic. 7. Input will operate on AC or DC voltage.

CRYDOM COMPANY

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES IACP/IDCP OACP/ODCP

FLAT PACK I/O MODULES



These flat pack modules offer reliable input-output interfacing in a low profile package outline that permits PC board spacing on half-inch centers.

FEATURES

- Low Profile Permits 0.50 inch (12.70mm) PC Board Spacing
- Industry Standard Footprint
- Color-Coded by Function
- 4,000 Vrms Optical Isolation
- High Transient Noise Immunity
- Series Operation Compatibility
- UL Recognized, CSA Certified

NOTE: 1. UL recognized. 2. CSA certified. 3. The outputs of the output modules are compatible with the input of input modules, making them suitable for series operation. 4. Input modules provide an output which is active low. 5. Output modules can be controlled from active low or active high logic. 6. Transient noise immunity >3000 $V_{p\text{-}p}$ (NEMA ICS—230). 7. Capacitance: 10 PF maximum (input to output). 8. Input will operate on AC or DC.

SERIES 53TP

3 PHASE SOLID STATE RELAYS
25A AND 50A RMS
530V RMS

The Crydom 53TP range of three phase solid state relays is designed to switch line voltages of up to 530V rms directly to loads such as motors, transformers and heating elements. The use of power semiconductor technology ensures precise, clean make and break operation. Standard units incorporate circuitry which ensures switch-on at close to the zero cross-over point of load voltage thus virtually eliminating the generation of r.f.i. and electrical noise. For switching of highly inductive loads, an instantaneous turn-on option is available. Power semiconductors generate heat energy during operation and a suitable heatsink must be used to keep the unit within its temperature ratings. The high current surge characteristics allow trouble-free switching of capacitive loads. UL, CSA & VDR pending.

Characteristics

Type	Irms	Vrms	Vpk	Input	Itsm	I^2t
A53TP25-D	25A	48-520	1200	90-280vac	300A	450

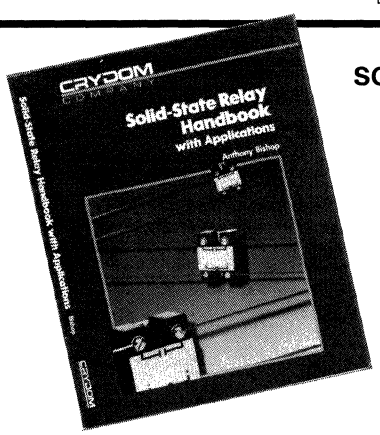
General			
V_{IS}	Isolation voltage (in-out) test 1 min.	kV rms	4.0

FEATURES

- Opto-isolated input-output 4000V rms
- Electrically isolated mounting base
- dc or ac control signal option
- Zero cross-over load voltage turn-on standard; instantaneous turn-on option available[7]



SOLID-STATE RELAY HANDBOOK

WITH APPLICATIONS
BY ANTHONY BISHOP

This comprehensive 223 page reference to the use and applications of Solid-State Relays (SSRs) incorporates a detailed tutorial on what SSRs are and why they are used in various industrial applications. In its pages you will find:

- A thorough introduction to solid-state relays
- Descriptions of various coupling methods
- SSR operation and parameters
- Coverage of different drive methods
- Thermal considerations
- Applications of SSRs in microprocessor-based equipment for industrial machine control
- A cross reference of types and manufacturers
- A handy glossary of terms

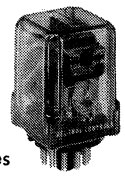
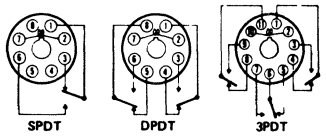
SEE SECTION 4550 FOR SOLENOIDS



105 Series

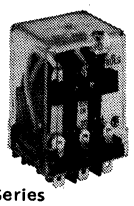
L = 1-3/8
W = 1-3/8
H = 2

General purpose plug-in relay for continuous duty operation. Plastic cover. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066).



BASE DIAGRAMS FOR 105 SERIES

B-3 HOLD DOWN SPRING
S/N 20171-00



165/166 Series

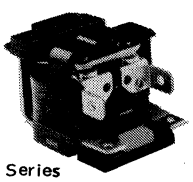
L = 1-13/32
W = 1-1/2
H = 2-3/16

Plastic covered general purpose plug-in relay. Molded nylon coil. Continuous duty operation. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066). Also CSA Recognized.

170 Series

L = 1-7/8
W = 1-5/8
H = 1-1/4

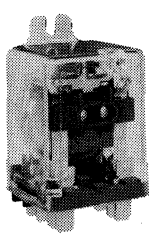
High current relays for industrial control applications. Molded nylon encapsulated coil is resistant to fungus and moisture. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066).



177 Series

L = 1-7/8
W = 1-5/8
H = 1-1/4

High current relays for industrial control applications. Molded nylon encapsulated coil is resistant to fungus and moisture. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066).



267F Series

L = 1-13/32
W = 1-1/2
H = 2-29/32
Mounting Center = 2-1/2

General purpose relay with plastic cover. Molded nylon coil insures reliable continuous-duty performance. .250 quick connect terminals. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066).

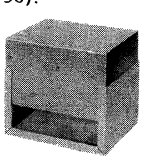
Heavy duty power relay for industrial control applications. Particularly suited for motor controls, heater loads, welder loads, and other power switching applications. Molded nylon coil resists fungus and moisture. Long life, rugged construction. Rating: 30 amps, 1-1/2 hp, 120/240 VAC. Heavy duty screw-type terminals. Mounting: two 3/16" holes on 1-7/8" centers. Listed under the Components Program of Underwriters Laboratories, Inc. (File No. E37066). CSA listed (File No. 20690).



B-5 DUST COVER

L = 5
W = 4
H = 3

S/N 20257-80

Sealed knock-out holes for standard conduit fittings. Relay mounts on pre-drilled base. Constructed of Aluminum. Snap action cover release. Accommodates relay series 900.

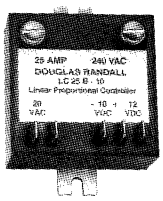
SOLID STATE RELAYS

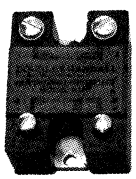
NEW DISTRIBUTORS WANTED!
1-800-447-6799

Full line of optically isolated, U.L. recognized solid state relays, A.C. or D.C. input, output to 100 Amps, 480 VAC. New "Dual" solid state relays available to 40 Amps, 120/240 VAC.



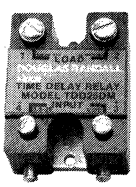
LINEAR PROPORTIONAL CONTROLLER

Optically coupled power control modules utilizing D.C. analog control signal to proportionally control loads up to 100 Amps in a linear fashion. Accepts 0-10V, 0-20V, or 4-20 milli Amp input signals.



PROPORTIONAL CONTROL

Variable AC control products with resistor input and 0-10 VDC input. Controls loads to 40 Amps.

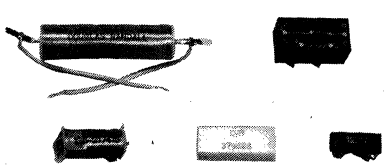


TIME DELAY RELAY

Optically isolated solid state control. Timing set by external resistors. Available to 40 Amps.

FORM C RELAY

Optically isolated, true form C voltage switching. Available to 100 Amps. 240 VAC



REED RELAYS

Full line of standard and custom reed relays.

CV-CONVERTER RELAY

Printed circuit board mountable solid state relay. Model CV-1 and CV-2.

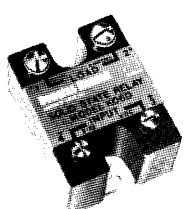
DUAL SOLID STATE RELAY

- Two Independent 15, 25, or 40 Amp Solid State Relays in one standard case
- Both Zero Crossing and Non-Zero Crossing versions available. ZC Units switch on in 1/2 cycle
- Advanced MOS Technology offers a significant increase in both static and commutating dv/dt, improving interference immunity to false triggering. This system exceeds performance of conventional snubber networks.
- Ambient Temperature for all models: −30°C to +80°C operating; −40°C to +120° C storage
- 2500 VRMS Isolation: Input to Output, Input to Base, Output to Base
- All Units have aluminum base plate. Case material is plastic; color is black
- Input is reverse polarity protected

SOLID STATE RELAYS SERIES K & F

DC OUTPUT/
DC CONTROL SIGNAL
NEW OUTPUT TO 300 VDC



SERIES K

Douglas Randall Series K are SPST (NO) or (NC) relays which will switch loads of 4, 8 or 12 Amps to 250 VDC. They provide rapid switching and opto-isolation between input and output. The sensitive inputs are compatible with DTL or TTL logic. Arc-free switching makes these relays suitable for hazardous atmospheres.

SERIES F
500 VDC SWITCHING

Series F Relays are available SPST (NO) or SPST (NC). They provide rapid switching of loads up to 8 amperes DC. Inputs are opto-isolated and compatible with DTL or TTL logic signals. Arc-free switching makes them suitable for hazardous atmospheres as well as machine tool process control equipment.

INPUT SIGNAL DATA

Range	3-32VDC
Must Operate	3VDC
Must Release	1VDC
Input Impedance	1000Ω Min.

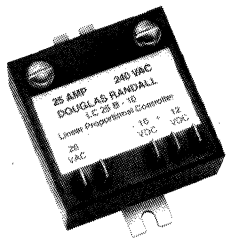
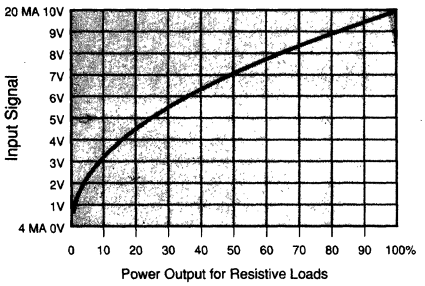
SOLID STATE COMPONENTS STOCKED FOR IMMEDIATE DELIVERY

L.C. SERIES POWER CONTROL MODULES—PROPORTIONAL CONTROLS



OPTICALLY COUPOLED PROPORTIONAL CONTROL



The optically coupled Douglas Randall L.C. series power control modules utilize D.C. analog control signals to proportionally control loads up to 100 amps, 300 Vrms. Changes in input signal linearly vary the firing angle of the thyristor load control device, so only the portion of the sine wave between the firing of the thyristor and zero crossing is available to the load. (see graph 1 on reverse). Average power output versus input voltage/current for resistive loads is shown in Figure 2 on reverse side of this sheet.

INPUT DATA

Range	0-5 DC	0-10 V DC	4-20 mA DC
Turn-on Threshold	.25 V	.5 V	4.5 mA
Input impedence	12.7K ohms	25K ohms	460 ohms
Isolation signal to load	4000 V peak	4000 V peak	4000 V peak
Isolation signal to base	4000 V peak	4000 V peak	4000 V peak

OUTPUT DATA

Model Number	LC25	LC40	LC70	LC100
maximum current	25 A	40 A	70 A	100 A
maximum voltage drop at 100% on	1.6 V	1.6 V	1.6 V	1.6 V
max. non-repetitive single cycle surge current	300 A	400 A	1000 A	1500 A
voltage range (RMS)	20-300	20-300	20-300	20-300
minimum holding current	.10 A	.10 A	.15 A	.20 A
off state DV/DT (V/μsec)	200	200	500	500

AC Line: 90/130 VAC, 200/240 VAC, 250/300 VAC or 400/480 VAC					
Typical Leakage: 90/130 VAC—10 mA; 200-240 VAC—7 mA; 250-300 VAC—6mA; 400-480 VAC—3 mA*.					

*Models R05D. R10D. R15D. R25D and R40D have no snubbers.

INPUT MODULES RDA, RDB & RDD

These modules accept 0-10 VDC signals. Their output is connected to the input terminals of Series R—Resistor Modules, which in turn controls loads up to 40 Amp @ 480 VAC. See Fig. 3.

SERIES RD/LOGIC INPUT CONTROL

Series RD provide full control from 0% to 99% when energized by 0-10 VDC or 0-15m ADC signals.

MODEL RD04A AND MODEL RD04B UL Listed File Number E103645

INPUT SIGNAL	0-10 VDC or 0-15 ma DC(2)	
OUTPUT SIGNAL	RD04A	RD04B
Maximum Current	4A	4A
One Cycle Surge Current	100A	100A
One Second Overload Current	40A	40A
Minimum Holding Current	.05A	.05A
AC Line Voltage	90-130 VAC @ 47-63 Hz	200-240 VAC
Off State Leakage	.01A (typical)	.01A (typical)
Response Time	150 m sec @ 10 VDC (typical)	300 m sec @ 10 VDC
Isolation (Input to Output)	500 VRMS	500 VRMS

Notes: 1. All data is measured at 25°C.
2. The input is not polarity sensitive, but must be protected against voltages above 10 VDC.

GENERAL SPECIFICATIONS —ALL UNITS

- Zero crossover switching
- 7500V opto-isolation
- Back-to-back SCR operation
- Timing: 15K ohm/second nominal; 22 megohms maximum.
- Minimum operation with resistor terminal shorted: 300 milliseconds nominal.
- All units have snubbers

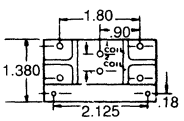
2A Top View



OPTION:
*Relays available in Form B up to 7,500V.

Note: To order, specify as follows: 6HV1A 35 is a 6HV1A relay with 3,500VDC switch.

CONTACT DATA

Series	Maximum Resistive Rating			Breakdown Voltage (min.)	Initial Resistance
35	3,500VDC	3.0A	50W	5,000VDC	.100 Ohms
75	7,500VDC	3.0A	50W	10,000VDC	.100 Ohms
100	10,000VDC	3.0A	50W	12,500VDC	.100 Ohms

SPECIAL DESIGNS

Douglas Randall makes custom designed relays to solve difficult problems. A few models are shown below to illustrate the variety available.

Douglas Randall will gladly review your applications and offer rapid engineering and prototype service.

EI&S
ELECTRONIC INSTRUMENTS & SPECIALTY DIVISION

Reed Relays, Solid State Relays and RF Inductors

A PRIME TECHNOLOGY COMPANY

EI&S Reed Relays

EI&S produces a range of catalog and custom reed relays for switching applications that are not market dependent.

Today's reed relays offer many technical advantages over mechanical relay types, including speed, long life, dry switching and low power input.

Vibration: Reed switch contacts, with only two or three moving parts, offer better response to vibration than mechanical types (e.g. MIL STD 202, Method 204: 20g's @ 10 to 2000 Hz).

Shock: Dry reed relays withstand relatively high levels of shock (e.g. MIL STD 202, Method 213B, Condition A: 50g's for 11mSec @ ½ sine wave).

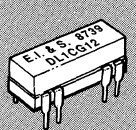
DL/DH

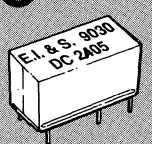
14 Pin Molded DIP (.275 in. high)



- Popular industry standard low cost designs.
- Epoxy-molded for minimum package size.
- DH Series mercury-wet designs for 50W/2Amp switching.

DC

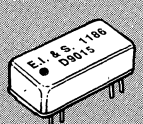
16 Pin Encapsulated DIP (.420 in. high)



- New! Low power coil designs (33mW/5V).
- Form-fit sub for DS type EMR relays.
- 10W/0.5A DPST switching.
- Operate time typically 0.500 mSec.

D/DM

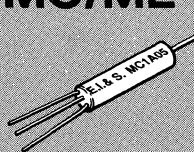
14 Pin Encapsulated DIP (.250 in. high)



- Similar to DL Series with added capability.
- Epoxy-coated metal case for magnetic shielding.
- DM Series mercury-wet designs for 50W/2Amp switching.

MC/ME

Micro-miniature Axial



- Optimized low power designs from 2000 Series.
- Magnetic shielding standard, electrostatic optional.
- Designed for high density applications.

(replacement for 2000 Series)

DA

14 Pin Encapsulated DIP (.420 in. high)

- Redesigned low power replacements for D Series.
- Optimum coil designs (33mW/5V coil).

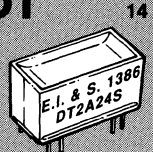
MS/MH

Encapsulated In-line Pinouts

- New! Low power coil designs (<25mW/5V).
- MS Series — to 10W/0.5A dry switching. MH Series — 50W/2A mercury switching.
- Custom designs available.

DT

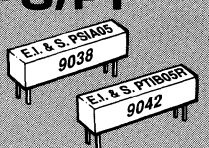
14 Pin Encapsulated DIP (.250 or .430 in. high)



- Meets MIL-R-83516A environmental requirements.
- Ruthenium-plated contacts for low stable contact resistance.
- Optional contact integrity testing.

PS/PT

Pico-Molded/Pico-Encapsulated Pinouts



- Ultra small package high density uses.
- PS: Low profile in a standard molded package.
- PT: Epoxy-coated metal case for magnetic shielding. Electrostatic shielding optional.

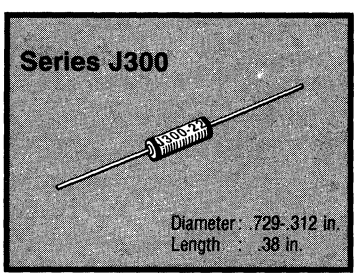
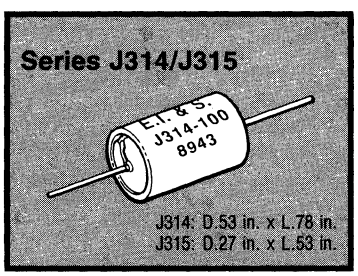
E&S RF INDUCTORS



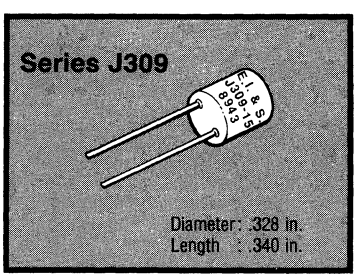
MINIATURE AXIAL-LEADED INDUCTORS

Iron core results in a highly stable design ideal for filters, delay lines and computer applications.



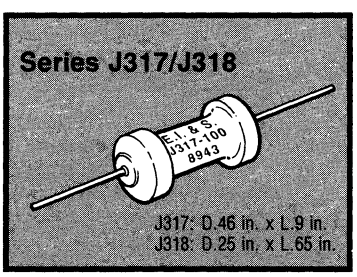
SHIELDED AXIAL-LEADED INDUCTORS

Designed for low DCR . . . for compact audio filters, tone controls, amplifiers, etc. where low inductance is required.



ENCAPSULATED RADIAL-LEADED INDUCTORS

Rugged construction exceeds MIL-C-15305 requirements. Designed for military and commercial packages.



MINIATURE POWER CHOKES

High saturation ferrite core for current ratings to 15 amps with low DCR. Compact size. Ideal for switching regulated power supplies.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C
CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

STANDARD HERMETIC SEALED RELAYS

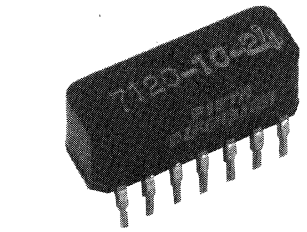
SERIES	General Information	Contact Form	Contact Rating	D×W×H Size	Sensitivity	Coil Voltages
30	Digital time relay. Operate or release delay. Note: 4DPT available in delay on operate only.	1PDT 2PDT 3PDT 4PDT	2 Amp 28 VDC or 10 Amp 28 VDC	Various	N/A	12 to 48 VDC
35	Voltage Sensor	1.4PDT	10 Amp	Various	N/A	6 VDC to 115AC
50	Qualified to M39016/6. Non Latch	2PDT	D/C to 2A 28 VDC Resistive	.4×.800 ×.41	250 mw Pick Up	6 VDC to 115AC
55	Latching 1/2 size sensitive latching relay qualified to MIL-R-39016/45M.	2PDT	D/C to 2A 28 VDC Resistive	.4×.800 ×.41	90 mw Latch/Reset	6 VDC to 115AC
61	Qualified to MS27401	2PDT	DC to 12A	.525× 1.025×1.010		6 VDC to 115AC
68	Crystal can "Lazy S" header.	2PDT	D/C to 2A 28 VDC Resistive	.359×.797 ×.875	300 mw Pick Up	6 VDC to 115AC
71	Sensitive crystal can relay.	2PDT	D/C to 2A 28 VDC Resistive	4×.8 ×1.280	40 mw Pick Up	6 VDC to 115AC
77	Crystal can. Sensitive latching relay.	2PDT	Dry Circuit to 3 Amps 28 VDC Resistive	4×.8 ×.875	90 mw Latch/Reset	6 VDC to 115AC
79	Non Latch Crystal can. Non-latching relay.	2PDT	Dry Circuit to 3 Amps 28 VDC Resistive	.4×.8 ×.875	250 mw Pick Up	6 VDC to 115AC
90 **92**	Sensitive—non-latching. Sensitive—Latching.	4PDT	Dry Circuit to 3 Amps 28 VDC Resistive	.601×1.032 ×1.278	80 mw Pick Up 80 mw Latch/Reset	6 VDC to 115AC
93 **94**	Non-latching Welded or solder sealed. Latching. Welded or solder sealed.	2PDT	10 Amps 28 VDC Resistive	.515×1.032 ×1.300	500 mw Pick Up 150 mw Latch/Reset	6 VDC to 115AC
100 **102**	Sensitive—non-latching. Sensitive—Latching.	6DPT	Dry Circuit to 3 Amps 28 VDC Resistive	.852×1.032 ×1.278	150 mw Pick Up 150 mw Latch/Reset	6 VDC to 115AC
103 **104**	Non-latching. Latching.	4PDT	10 Amps 28 VDC Resistive	.852×1.032 ×1.3	1000 mw Pick Up 300 mw Latch/Reset	6 VDC to 115AC
FHT 	Full or Half size crystal can coaxial relays with 8″ min. RG 178 B/U cables attached. T Series sensitive. Welded sealing.	1PDT with Auxiliary Contacts or 2 PDT Coax	RF to 1.5 Amps 50 Watt Max.	Frequency Range to 500 MHz VSWR–1:1.1 Typical. Characteristic Impedance– 50 Ohm Typical. Cross Talk–50 dB Typical.		6 to 32 VDC
300	The ultimate in high current DC load switching. The load is switched with power semiconductors short term, and carried by the relay hard contacts long term, preventing the semiconductors from overheating. The Arcless™ uses a SPST heavy duty mechanical relay. In addition to switching 70 AMP loads, the Arcless will withstand a 180 AMP inrush current from motor or lamp load. Applications for arcless relays should include all high current DC switching where reliability and long life are important design criteria. **No** arc between contact points–**No** electro-magnetic interference. This non-arcing feature is useful for switching where EMI or RFI might cause damage to equipment, software, or quality of radio signals.					

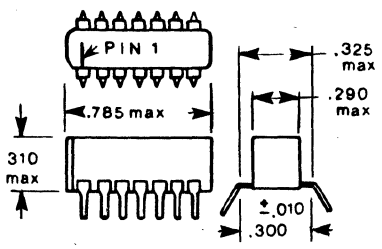
FIFTH DIMENSION INC.

Mercury Relays That Operate in any Position

DIP Relays

- Position-insensitive, bounce-free LCI sealed capsule
- 100% run-in @ 10 VDC-100 mA for 2.5 x 10^6 operations
- 5, 12 and 24 VDC-700 Mw coil drives
- Life expectancy over 50 x 10^6 operations
- Latching or non-latching operation
- Molded diallyl phthalate case





- Operate Time (max.) — 2.5 ms
- Release Time (max.) — 3.0 ms
- Contact Resistance — 75 milliohms

7000 Series (DC to 10 MHz)

- Rated Contact Load — 1.0 amp 4 VDC to 0.3 amp @ 200 VDC

2000 Series (DC to 100 MHz)

(Specifications at 100 MHz)

- Rated Contact Load — 10 watts CW
- Insertion Loss (Typical) — 0.2 dB
- Isolation (Typical) — 40 dB
- VSWR (Typical) — 1.5

Mercury Relays That Operate in any Position

Flame-resistant models available
Meet UL Specification UL94V-0

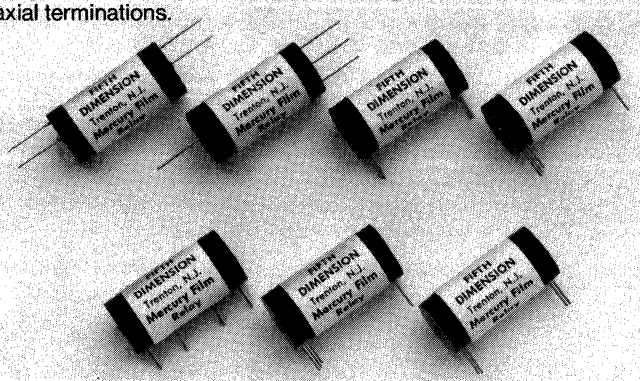
- **No Contact Bounce** — Produce clean square-wave pulses
- **Position Insensitive** — No pool of mercury
- **Self-Healing Contacts** — Always wetted with fresh mercury
- **Rugged Construction** — Welded steel switching capsule
- **Sealed Package** — High density polyethylene (WKS Series)

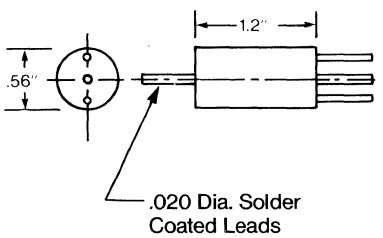
Specifications

Meet Lightning Surge Standards — 2500 volts coil-to-contact breakdown meets FCC standards (WKS Series)
Contact Type: Form A (SPST) mercury film
Contact Bounce: None at 80% of rated voltage or higher
Load Current to 52 VDC: 0.24 amps
Load Current to 200 VDC: 0.10 amps
Contact Resistance: 150 milliohms (max.)
Contact Resistance Stability: ±15 milliohms
Contact Breakdown Voltage: 800 volts DC or AC (rms)
Coil-to-Contact Breakdown: 2500 VAC
Operate Time: 4.0 milliseconds (max.)
Release Time: 4.0 milliseconds (max.)

Molded-Case Magnetically Shielded Series WKS. Relays can be submerged in appropriate cleaning solvents during board assembly.

Series WKS Mercury Relays are available in a wide variety of footprints including 0.1, 0.15 and 0.2-inch PCB spacing as well as with in-line and axial terminations.

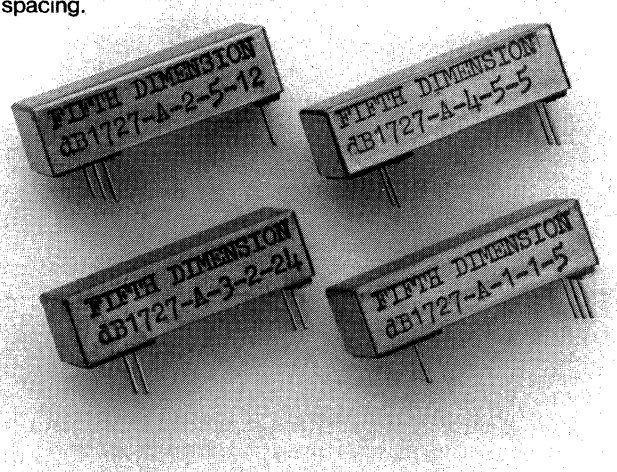


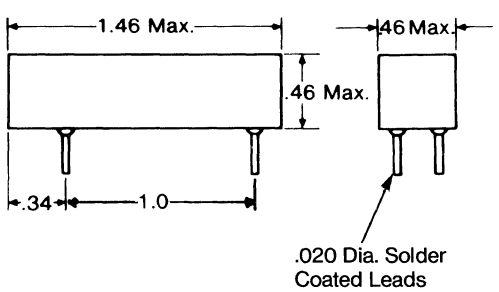


Nominal Coil Volts	Coil Resistance (± 10%) Ohms			Must Operate Volts	Must Release Volts
	250 MW	375 MW	500 MW		
5	100	67	50	4.0	0.5
12	575	384	288	9.6	1.2
24	2300	1536	1150	19.2	2.4

Open-Frame Magnetically Shielded Series dB. Open-frame magnetically shielded.

Series dB Mercury Relays are available with 0.1, 0.15 or 0.2-inch PCB spacing.





Nominal Coil Voltage	Coil Resistance (± 10%) Ohms			Must Operate Volts	Must Release Volts
	125 MW	250 MW	500 MW		
5	200	100	50	4.0	0.5
12	1150	575	288	9.6	1.2
24	4608	2300	1150	19.2	2.4

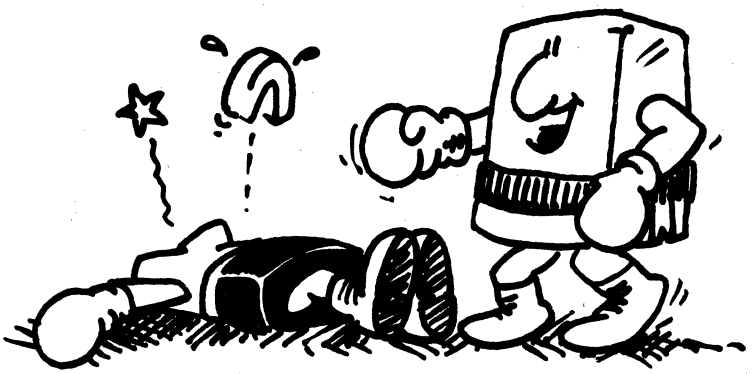
The Current Champions



Fujitsu Relays

Trust your relay needs to the relay heavyweight — Fujitsu.

Our broad relay line is perfect for a wide range of applications — everything from automotive and industrial to test/measurement and telecom. Fully immersion-cleanable, our printed circuit mount relays are leak-proof and impervious to electronic solvents.

You'll appreciate the knockout quality and reliability of our relays — utterly unchallenged by the competition.

What's more, when it comes to customer service, you'll find we're in *your* corner — every step of the way.SM

The complete line is in stock right now with your local Fujitsu Component distributor.

Call 1-(800)-642-7616 for more information.

Try our relays once — you're sure to make a comeback.

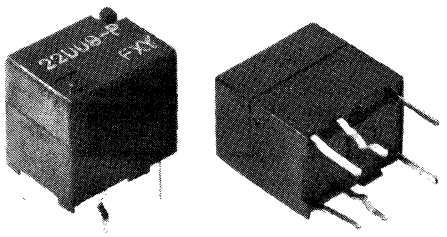
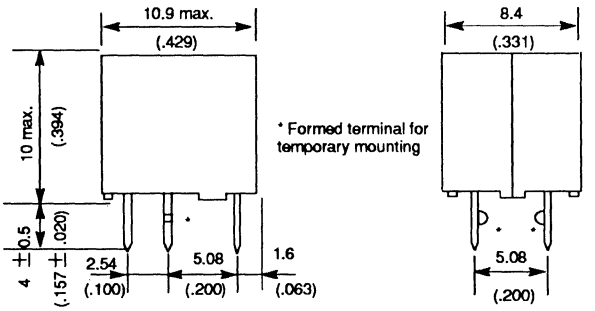
MICROMINIATURE RELAYS FOR P.C. BOARDS
FBR20 Series

FUJITSU

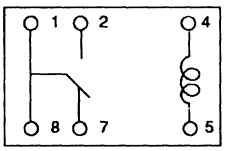


Fujitsu FBR20 series relays are designed for PC board mounting with 1A contact ratings – perfect for microminiature applications.

DIMENSIONS

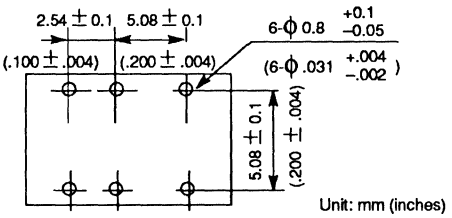


SCHEMATIC



(Bottom View)

MOUNTING HOLE LAYOUT



Unit: mm (inches)

FEATURES

- **Microminiature size.** Two FBR20 series relays can be mounted in the space now required for a single FBR210 series relay.
- **1A contact rating.** Despite their microminiature size, FBR20 series relays have a contact rating of 1A at 24 VDC for convenient installation.
- **Gold overlay on silver-palladium contact.** Contact reliability is assured in low-level applications by contact shapes and materials especially designed for signal switching applications.
- **Low power consumption.** With a rated power consumption of only 0.3 W, today's expensive energy costs can be reduced significantly.
- **Wide range of drive voltages.** Drive voltages from 1.5 VDC to 24 VDC are available for a wide range of applications.
- **Strong shock resistance.** Even with a 50 G shock, FBR20 series relays never miss a switch.
- **Easy-to-pattern design.** Separate terminal connections with drive and output sections allow easy pattern design.
- **Formed terminal available for temporary lock.** The unique design of the forming terminal allows FBR20 series relays to be temporarily mounted for greater design flexibility.
- **Automatic soldering provision.** The terminal is sealed to prevent flux from entering during automatic soldering.
- **Immersion cleaning.** Sealed for immersion cleaning.

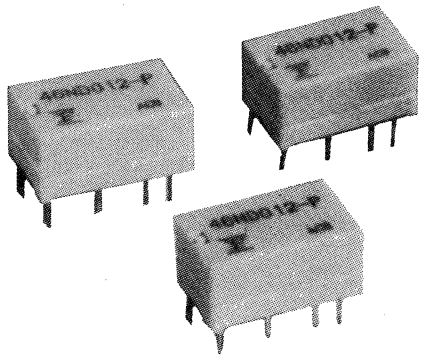
ULTRA-MINIATURE RELAYS FOR P.C. BOARDS
FBR40 Series

FUJITSU



The Fujitsu FBR40 series relay with a pick-up power consumption reduced to 85 mW is an extremely small DPDT CONTACT relay designed for PC board mounting.

FEATURES

- **Ultra-miniature low-profile design.** At half the size of the conventional FBR240 relay and requiring only three quarters of the board area, a drastic reduction in size has been achieved in the design of the FBR40. 15.8 (L) x 9.7 (W) x 7.8 (H) mm.
- **High dielectric strength.** Dielectric withstanding voltage between contacts and coil is over 1,000 VAC and with the ability to withstand a surge voltage of over 1,500 V, it conforms to FCC 68.302 standard.
- **High-shock resistance.** Even a shock force of 30 G will not result in a malfunction.
- **Low power consumption.** With a high efficiency built-in permanent magnet, operating power consumption is only 85 mW. (Rated power consumption is 150 mW.)
- **Formed terminal for temporary lock.** The terminals of the FBR40 are specially formed so that they can be temporarily attached to the PC board.
- **Pattern design is easy.** The terminal connections are designed so that the drive portion (coil) and the output portion (contacts) are isolated, which simplifies pattern design.
- **Immersion cleaning.** Sealed for immersion cleaning.
- **UL and CSA approved.** UL File No. (E63615), CSA File No. (LR64026-17).
- Contact sales representative for availability of models meeting BELCOR 2500 V surge test.

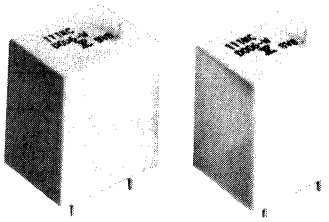
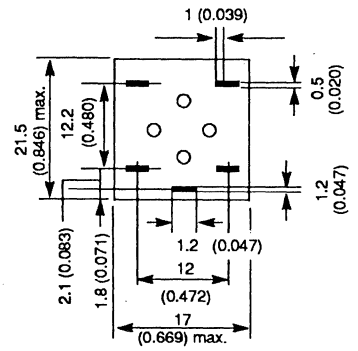
FBR110 Series

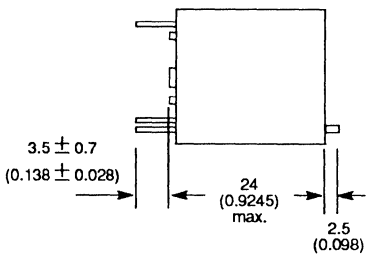
FUJITSU



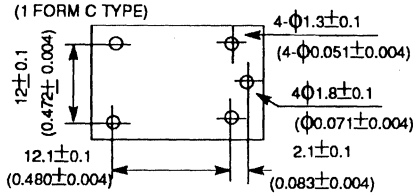
IMMERSION-CLEANABLE N TYPE

Unit: mm (inches)

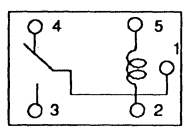




PC BOARD MOUNTING HOLE LAYOUT
(1 FORM C TYPE)



SCHEMATICS
(1 FORM C TYPE)



(Bottom View)

Fujitsu FBR111N series relays are low cost SPDT relays with a versatile switching capability. The contact is rated 3 A, 28 VDC; 3 A, 120 VAC for standard contact, or up to 8.5 A, 28 VDC; 10 A, 120 VAC for special heavy duty contact.

FEATURES

- **Design**
  These small size, sensitive relays, designed to be mounted on printed circuit boards, feature simplified construction and a low power dissipation.
- **Applications**
  Ideal for use in audio equipment, business machines, vending machines, security systems, game machines, and automotive applications.
- **Immersion Cleaning**
  The FBR111N series can be immersion cleaned where printed circuit board cleaning is required.
- **Conforms to Safety Standards**
  Relay FBR111N is UL recognized for office equipment and business machines (File No. E63615). CSA certified (LR45982).

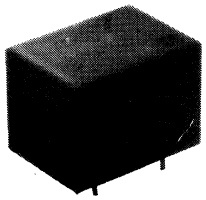
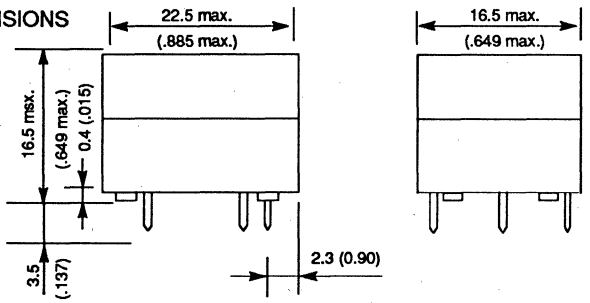
SMALL CONTROL RELAYS FOR P.C. BOARDS
FBR160 Series

FUJITSU

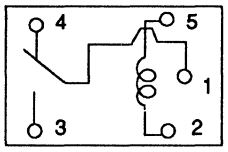


DIMENSIONS



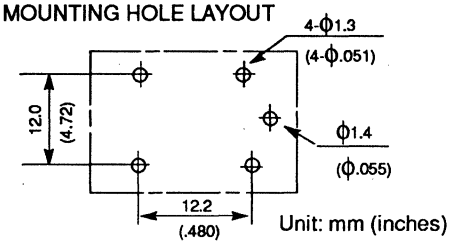
Fujitsu FBR160 series small control relays are PC board mounted and have contact ratings up to 10 A.

SCHEMATIC



(view from terminal side)

MOUNTING HOLE LAYOUT



Unit: mm (inches)

FEATURES

- **Same terminal array as FBR100.** These relays have the same foot print as Fujitsu's conventional FBR100 series.
- **Lower profile.** Since their profile is 7 mm lower than that of the FBR100 series relays, they can be used in smaller equipment.
- **Flux-prevention structure.** The contacts are located on the top of the relay to protect them from solder flux from the terminals.
- **Choices of contact materials.** Two different kinds of contact materials can be specified according to the load.
- **Immersion cleaning.** Sealed for immersion cleaning.
- **Meets major safety standards.** The relays are CSA certified (LR41893-56, LR50924-5, and LR64026-7). The relay structure is designed to meet the Japan Electric Appliance control law (150 V max.) and UL standards (File No. E63614 and E63615).

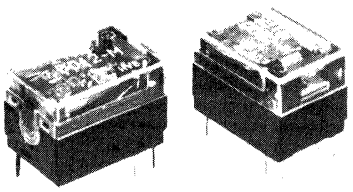
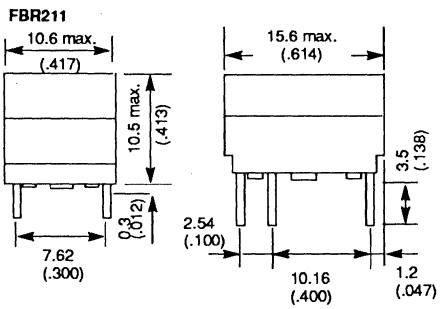
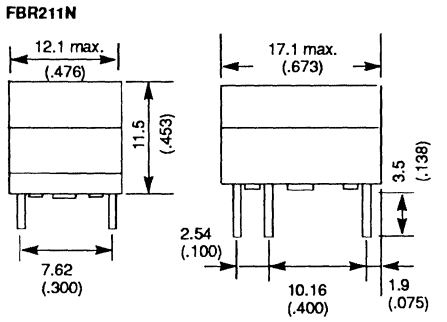
ULTRA-MINIATURE RELAYS FOR P.C. BOARDS
FBR210 Series

FUJITSU

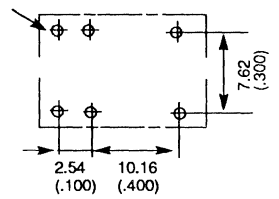


DIMENSIONS Unit: mm (inches)

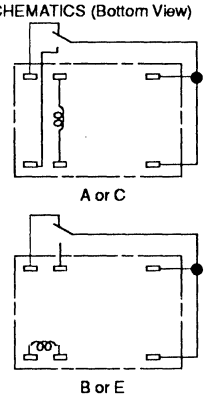




FBR211, FBR211N
MOUNTING HOLE LAYOUT



SCHEMATICS (Bottom View)



Fujitsu FBR210 series of ultra-miniature relays allow high component densities for savings in both equipment size and cost for the printed circuit board. The FBR211N series are suitable for immersion cleaning in freon and aqueous systems.

These highly sensitive relays with gold-clad SPDT contact arrangements are designed to offer load handling capabilities of 1 A at 28 VDC or 0.5 A at 120 VAC under a resistive load. The 0.1 inch grid spacing of terminals makes these relays ideally suited for printed circuit board applications requiring high-density mounting and for use in audio and wireless communications, office vending machines, automobiles and various control applications. Contact sales representative for availability of new 2 A models.

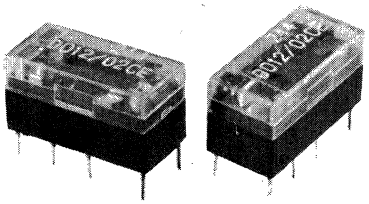
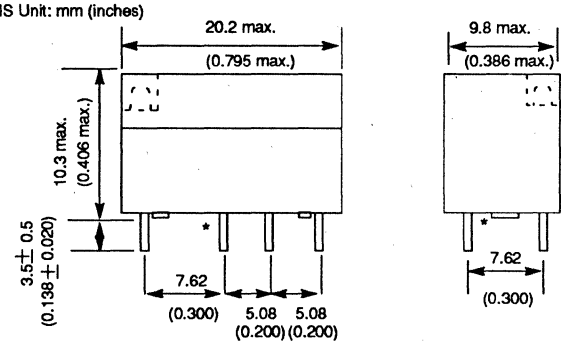
LOW PROFILE RELAYS FOR P.C. BOARDS
FBR240 Series

FUJITSU



FBR244 and FBR244N series relays are low profile, P.C. board relays with 2 Form C (DPDT) contact arrangements in D.I.P.-compatible plastic housing and have a 2.54 mm pinout grid spacing to provide 16-pin-DIP socket compatibility. Sealed construction allows automatic wave soldering and board washing without relay damage. Single or bifurcated contacts switch 1 A at 28 VDC or 0.5 A at 120 VAC and have a rated-load life-time of 5 x 10^5 operations. These relays are suitable for telecommunication equipment, audio equipment and business machines. The relays are CSA certified (LR41893-35) and UL recognized (file #E63615).

DIMENSIONS Unit: mm (inches)



* The terminals marked with an asterisk are formed for temporary mounting on PC board.

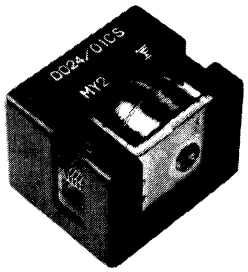
P.C. BOARD RELAYS FOR AUTOMOTIVE APPLICATIONS
FRL270 Series

FUJITSU



Fujitsu FRL270 series power relays are for PC board mounting and are designed especially for automotive applications.

FEATURES

- **Maximum current: 30 A.** The relays are designed for high ambient and storage temperatures to ensure the contacts will endure continuous current of up to 30 A.
- **Rigid, shock-resistant construction.** (1-meter drop test.)
- **Welding resistant contact materials.** Three types of welding resistant contact materials are available as standard.
- Choice of wide terminal model (-01 suffix) for maximum heat/power transfer or standard terminal model (no suffix) for conventional hole/conductor sizes at no extra charge.

Typical Uses

- **Engine Control.** Electronic fuel injection units.
- **Lamp control.** Flasher control units, headlight control units.
- **Motor, solenoid, and heater controls.** Windshield wiper control units for trucks, automatic door-lock control units, defogger control units, other various control units.
- **Immersion cleaning.** A sealed type is available for immersion cleaning.
- Alternate coil voltages 6 VDC and 9 VDC coils are available at no extra charge.

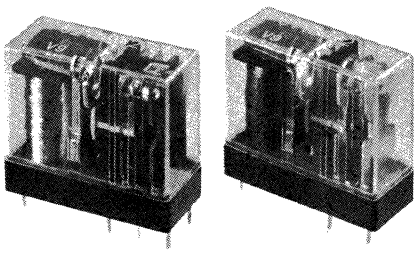
MINIATURE HIGH-POWER RELAYS
FBR600 Series

FUJITSU



The FBR600 series are miniature high-power relays with a switching capability of 16 A, 30 VDC or 240 VAC for 1 Form C contact and 5 A, 30 VDC or 240 VAC for 2 Form C contacts. These relays are designed for mounting on printed circuit boards.

FEATURES

- **Applications.**
  Ideal for use in audio equipment, TV, vending machines, control machines, etc.
- **Conforms to various standards.**
  UL recognized (E63615) for industrial control equipment per UL508. CSA certified (LR41893-50, LR61319-4, and LR64026-10).
- **Immersion cleaning.**
  Sealed for immersion cleaning.

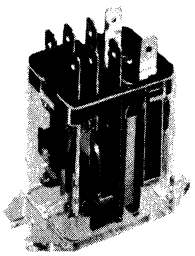
GENERAL PURPOSE RELAYS
FRL260 Series

FUJITSU



FLANGE MOUNT

The FRL260 series relays have been designed with emphasis on reliability, safety, cost performance, and applicability to a wide range of uses. These relays are top quality with proven performance.

These relays provide SPDT to 4PDT contacts, which are offered for contact ratings from 1 A to 15 A at 30 VDC or 240 VAC, resistive. Moreover, they are also available with four transfer bifurcated contacts that enable them to meet signal level or other light loads.

The FRL260 series relays are available in both DC- and AC-rated coils, and with a selection of mountings, such as solder, plug-in, P.C. boards and quick connect terminals.

The FRL260 series are UL recognized (File No. E163614/E63615) and CSA certified (File No. LR41893).

ENGINEERING DATA

Item	Specification
Contact Ratings (resistive load) Initial Contact Resistance	As per Selection Table General (S, K V Contact): 100 megohm max. (at 6 VDC, 1 A) Low Level (T, L Contact): 50 megohm max. (at 6 VDC, 0.1 A)
Coil Power Dissipation Coil Temperature Rise	DC: 0.9 W (at rated coil voltage) AC: 1.2 VA (120 V max.) at rated coil voltage of 60 Hz 1.4 VA (200 V min.) at rated coil voltage of 60 Hz DC: 50 degree max. AC: 60 degree max.
Insulation Resistance Dielectric Withstanding Voltage	100 megohm min. (at 500 VDC) 1500 VAC (1000 VAC between open contacts) for 1 minute
Vibration	50 Hz (dual amplitude: 0.5 mm VDC)
Shock	10 G (11 ms)
Operate Time Release Time	25 ms max. (at rated coil voltage) 25 ms max.
Life Expectancy Mechanical Electrical	 50 x 10^6 ops. min. (at rated load) Medium Load SPDT: 500 x 10^3 ops. min. DPDT: 500 x 10^3 ops. min. 3PDT: 500 x 10^3 ops. min. 4PDT: 200 x 10^3 ops. min. 4PST: 100 x 10^3 ops. min. Heavy Load SPDT: 200 x 10^3 ops. min. SPST: 200 x 10^3 ops. min. DPDT: 500 x 10^3 ops. min.
Temperature Range	–30 to +55 degree C
Weight	35 g approx.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

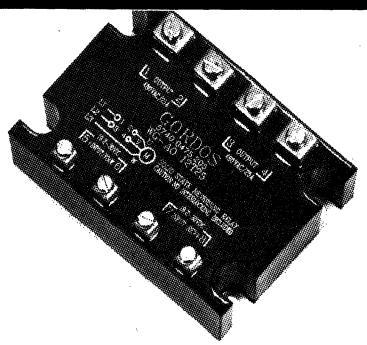
Relays You Can Rely On.

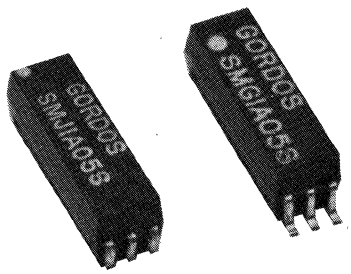
GORDOS SERIAL COMMUNICATION DEVICES



THREE-PHASE MOTOR REVERSING RELAYS

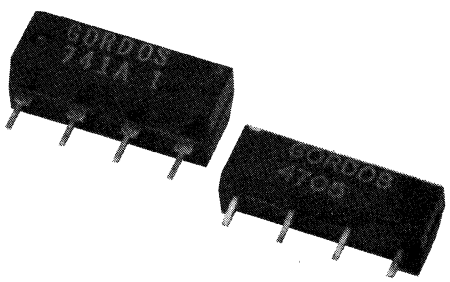
- Convenient Self-Contained Design Eases Installation and Wiring
- 48 to 480VAC Output Voltage Range Suitable for Many Applications
- 1200V Peak Blocking Voltage Helps Protect Against Transients in Harsh Electrical Environments
- 10 Million Operations Provide Long-Life Switching of 25A Three-Phase Loads
- 4000VAC Isolation
- 5, 15, 24V Logic Versions for a Wide Variety of Logic Circuit Applications
- Compact Sealed Package with Screw Terminals

GORDOS REED RELAYS



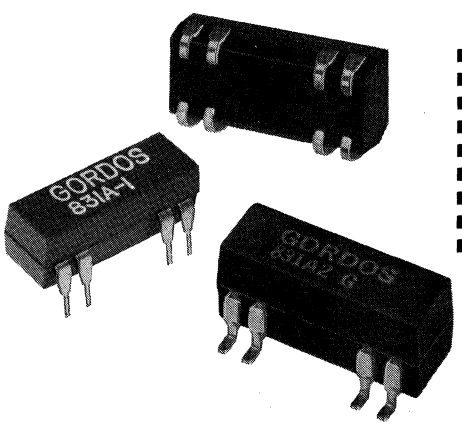
SM SERIES SURFACE MOUNT REED RELAYS

- Available in "J" and Gullwing Versions
- Form "A" and Form "C" Contact Configurations
- Coaxially Shielded Form A Available in 50, 75-ohm Versions
- 5 or 12V Operation
- Semiconductor Grade, 94V-0 Molding Compounds Impervious to Aqueous and Chemical Cleaning Procedures



47 SERIES MINI-SIP
74 SERIES SIP DRY REED RELAYS

- Compatible With Automatic Insertion Equipment
- Form "A" and Form "C" Contact Configurations
- Semiconductor Grade, 94V-0 Molding Compounds
- Coaxially Shielded Form A Available in 50, 75-ohm Versions
- Compatible With RTL, DTL, TTL & HTL Logic
- Available with or without Diodes



83 SERIES DIP THRU-HOLE AND SURFACE MOUNT DRY REED RELAYS

- Choice of Gull or J-Lead Surface Mount or Thru-hole Configurations
- Surface Mount Versions Pass High Reliability Steam Aging Solderability Test
- Surface Mount Versions Compatible with IR Reflow Systems
- Form A, 2A, B or C Contacts
- Logic Compatible 5, 12, or 24V Operation
- Available with or without Diodes
- Compatible with Automatic Insertion Equipment
- Semiconductor Grade, 94V-0 Molding Compounds
- –20°C to 85°C Operating, –20°C to 100°C Storage Temperature Ranges

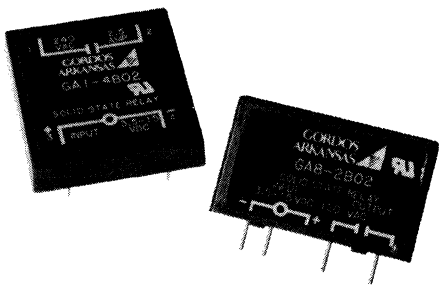
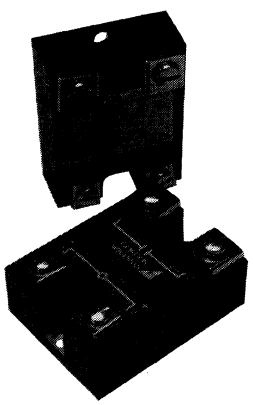
GORDOS SOLID STATE RELAYS



PRINTED CIRCUIT BOARD MOUNTABLE SOLID STATE RELAYS

GA1, GA8 SERIES

- Current Rating: 3.5A @ 140, 250 and 280VAC
- 3VDC to 24VDC Control
- High Current Thyristor for 100A Surge Capability
- Zero Voltage Turn-on
- 4KV Optical Isolation
- Industry Standard Packaging
- Thick Film Hybrid Construction for Superior Reliability
- Ceramic Substrate for Proper Thermal Management
- Computerized Laser Trimming for Optimum Performance
- UL Recognized, CSA Certified



PANEL MOUNT SOLID STATE RELAYS

G, GA5 SERIES POWER RELAYS

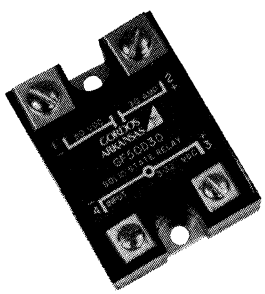
- Output Voltage Ratings from 24VAC to 660VAC
- Output Current Ratings from 10A to 90A
- 18-36 VAC, 90-280VAC and 3-32VDC Inputs
- 4KV Optical Isolation
- Zero AC or Random Turn-on Models
- RC Snubber Network for Inductive Loads
- UL Recognized, CSA Certified
- VDE Approval on Many Models

G SERIES POWER RELAYS

- Back-to-back Dual SCR Output for Severe Inductive Loads
- Superior False Turn-on Immunity and Positive Turn-Off at High dv/dt

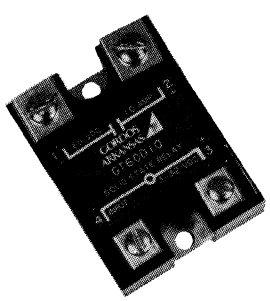
GA5 SERIES POWER RELAYS

- Economical Triac Output for General Purpose Applications



GF SERIES DC POWER FET SOLID STATE RELAYS

- Long Life Switching of DC Loads to 30A
- 10μA Leakage Current Permits Reliable Switching of Sensitive Devices
- Milliohm On-Resistance Minimizes Voltage Drop, Heat Dissipation
- Versatile High or Low-Side Switching
- Output FET Protected Against Transients
- 1500VAC Optical Isolation
- Output Voltage Range Suitable for Many Applications
- 3 to 32VDC Input Compatible with Most Logic Circuits



GT SERIES DC POWER TRANSISTOR SOLID STATE RELAYS

- Long-Life Switching of DC Loads to 10A
- Output Voltage Range Suitable for Many Applications
- Versatile High or Low-Side Switching
- 3 to 32VDC Input Compatible with Most Logic Circuits
- 4KV Optical Isolation
- Fast 25μSec Maximum Turn-On Time
- Cost-Effective General Purpose DC SSR

See Data Acquisition Section for additional GORDOS products.

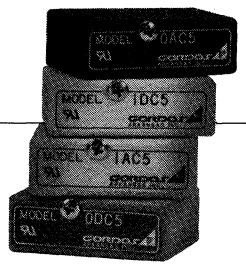
GORDOS I/O PRODUCTS

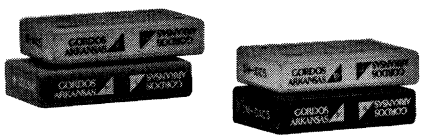
SINGLE POINT, QUAD-PACK & 8-CHANNEL DIGITAL I/O MODULES & MOUNTING BOARDS



- High Current Thyristor for 100A Surge Capability
- 4KV Optical Isolation
- UL Recognized, CSA Certified
- Zero Voltage AC or Random Turn-on Single-Point Output Modules
- Industry Standard Packaging
- Plug into Digital I/O Module Mounting Boards

0.6 INCH SINGLE POINT I/O MODULES

- 5V, 15V, 24V Logic Versions
- Retaining Screw
- Fast-switching DC Versions
- Form A Operation, Form B AC Output Available
- Companion 4 to 32-position Module Mounting Boards



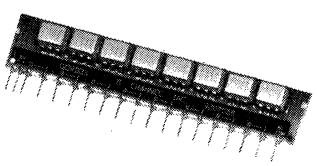
M AND SM SERIES MINIATURE SINGLE POINT I/O MODULES

- 33% Thinner than 0.6 inch Modules
- SM Series are Direct Replacements for Larger 0.6 Inch Modules
- M Series may be Plugged-In or Soldered
- 5V, 15V, or 24V Logic Versions
- Companion 8 to 32-position Module Mounting Boards

QUAD-PACK MODULES

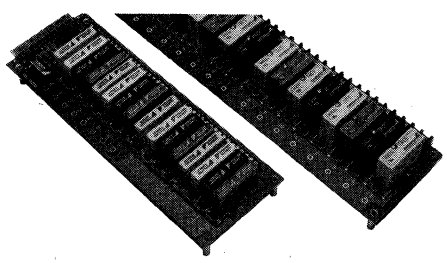
- Four Circuits per Module
- 5, 15, 24 Volt Logic Versions
- Individual LED Status Indication
- AC Input, AC Output, DC Input and DC Output Configurations
- Companion 16, 24 and 32-channel Mounting Boards

8-CHANNEL I/O MODULES



- Thick Film Hybrid Construction, Vapor Phase Soldering Provide Superior Reliability
- Computerized Laser Trimming of Resistors Optimizes Performance
- Ceramic Substrate for Proper Thermal Management
- Solder or Plug into PC Boards
- AC & DC Output Modules Rated at 2.0A per Channel, 10A per Module
- AC Inputs for 120V, 240V
- DC Inputs for 3.3 to 32V, 10 to 60V
- 4KV Optical Isolation
- UL/CSA Approvals Pending

PB SERIES DIGITAL I/O MODULE MOUNTING BOARDS



- Models Available for 0.6 Inch, M and SM Series Single-Point Modules and Quad-Packs
- 4, 8, 16, 24 and 32-point Versions
- UL Recognized, CSA Certified Models Available
- LED Indicators, Replaceable Fuses and Logic Pull-up Resistors
- Barrier Strips for Field Termination
- Logic Termination via Card Edge or Optional Cable Connectors
- Barrier Strip Jumpers and Interconnection Cables Available

ANALOG I/O MODULES

- Wide Variety of mV, V, mA, RTD, TC, Strain Gauge, Wideband mV, Wideband V and Linearized TC Input Models
- 4-20mA and 0-20mA Output Models
- Fully Isolated
- High Accuracy (±0.05%), Low Drift
- IEEE STD-472 Transient Protection
- 240VRMS Field Wiring Protection
- –25°C to 85°C Operating Range
- Mounting Boards Available in 1,2,8, or 16-Module Versions

See Data Acquisition Section for additional GORDOS products.

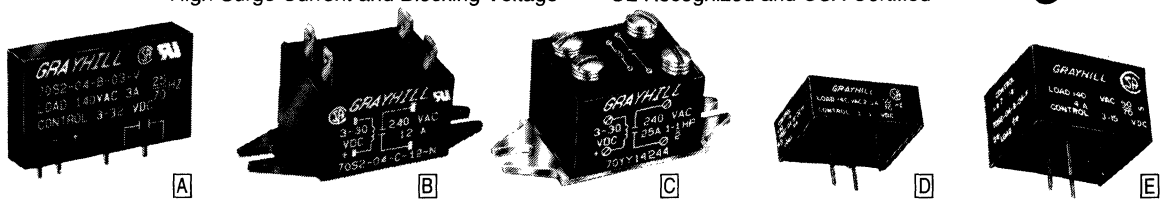
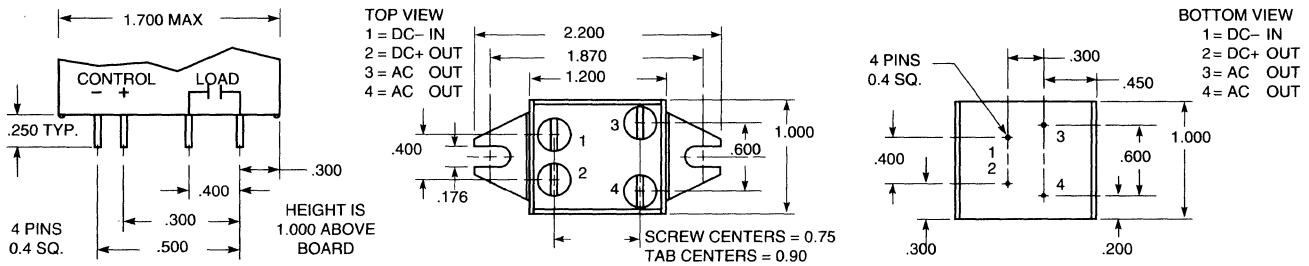
Grayhill INC. Solid State Relays

561 HILLGROVE • P.O. BOX 10373 • LA GRANGE, ILLINOIS 60525 • PHONE; (708) 354-1040

- CMOS and TTL Compatible
- High Surge Current and Blocking Voltage
- Internal Transient Protection
- UL Recognized and CSA Certified



STYLE V **STYLE N** **STYLE S** **STYLE H** **STYLE F**



STYLE V SINGLE IN-LINE PACKAGE RELAY (FIGURE A)

PC mounted relay requires only .680 inches of board area; it is form, fit, and function replacement for industry standard. It is constructed of high performance, surface mount components for high reliability. Package is 0.4 inches deep; in-line pins are 0.3 inches from label side.

STYLES N & S MINI PUCK® RELAYS (FIGURES B & C)

Heavy duty relays are fit, and function replacements for old "hockey puck" style relays, but require only 1/2 the space. High thermal conductive epoxy and high quality heat sinks provide superior heat transfer. Minimum panel space for heat sink effectiveness is 12 x 12 inch area, .125 inches thick, mounted with silicon grease. Relay body is 1.2 x 1.0 x 0.85 inches high. Push tabs (Style N) add 0.30 inches to height. Screws (Style S) add approximately 0.08 inches.

STYLES H & F MICRO & MINI CUBE RELAYS (FIGS. D & E)

Low profile, printed circuit mounted relays allow user to stack PC boards closely together, while switching 24, 120, or even 240 Vac loads of up to 4 amperes. They do not require additional heat sinks. Style H is 0.5 inches high; Style F is 0.83 inches high. For a relay with 0.83 inches height and standard plug-in style termination (Style K, not shown), contact a local authorized distributor. For relays with this footprint for larger loads contact GRAYHILL.

SPECIFICATIONS

NOMINAL LOAD VOLTAGES AND CURRENTS: See chart. Current is rated at 25°C and derated with increases. Mini Puck relays are rated as mounted on panel 12 x 12 x 1/8 inches. CONTROL CURRENT: 1-17 mA (3-30 Vdc relays), 1-19 mA (3-32 Vdc relays), and 1-6 mA (all others). SURGE CURRENT RATING (At 1 full cycle, non-repetitive): 60A (2,5A, 3A, 4A, and 6A relays); 110A (12A relay); 250A (25A relay). BLOCKING VOLTAGES: 200V, 400V, and 600V for the 24 Vac, 120 Vac, and 240 Vac relays, respectively. ZERO VOLTAGE OFFSET: 6V, 8V, and 18v for the 24 Vac, 120 Vac and 240 Vac relays. TRANSIENT PROTECTION: 4000 V/μS for 6A and 15A relays, 3000 V/μS for all others. AVERAGE INPUT IMPEDANCE: 2000 ohms (3-30 & 3-32 Vdc ranges), and 6000 ohms (6-30 and 6-32 Vdc ranges). ISOLATION: 10^9 ohms; dielectric strength is 2500 Vac. CERTIFICATION: All part numbers shown on this page are UL Recognized (file number E58632) and CSA Certified (file number LR 38763). MATERIALS: Cases are solvent resistant thermoplastic (UL94V-0) potted with high thermal conductive epoxy. Heat sincs are aluminum (copper for the 25A relay), tin plated. Terminal pins are brass, tin plated; tabs are brass, lead-tin plated; screws are steel, tin plated.

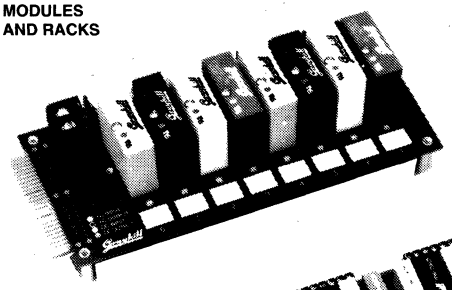
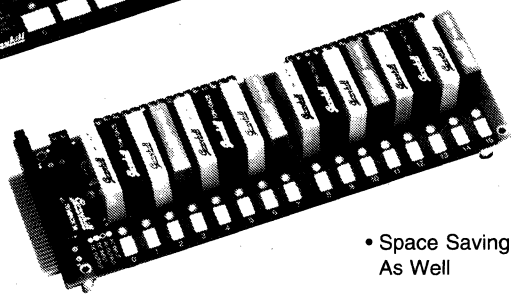
Input/Output Modules

Grayhill INC. 561 HILLGROVE • P.O. BOX 10373 • LA GRANGE, ILLINOIS 60525 • PHONE; (708) 354-1040

STANDARD MODULES AND RACKS



- Power Saving
- Noise Immune
- Transient Protected



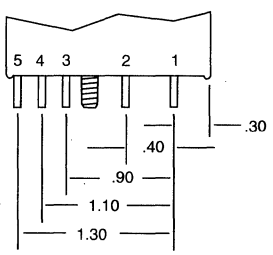
MINIATURE MODULES AND RACKS

- Space Saving As Well

DESCRIPTION - MODULES

I/O Modules provide an optically isolated interface between logic systems and external AC and DC power devices. There are 4 types: AC Output (Black Case); DC Output (Red Case); AC Input (Yellow Case); and DC Input (White Case). UL and CSA certified, all modules are logic compatible, SPST N.O. type with standard industry pinouts, and zero voltage turn-on (AC types).

Grayhill modules require 55% to 66% of the power used by other modules, saving you money on your power supply. They have superior noise immunity, and transient protection (3000 Volts per microsecond); they meet/pass the following specifications or tests: IEEE 472–1974 and ANSI C37.90 transient withstanding tests, and Electrical Noise Immunity Test per NEMA ICS 2–230. They have high blocking voltages of 400 Volts (120VAC) and 600 Volts (240 VAC). *All* modules have 4000 Volts of isolation, immunity to mechanical shock and vibration, and operate over a wide temperature range (–40° to +125°C).



Standard I/O Modules are form, fit function replacements for competitive product; output modules carry up to 3.5 Amps. Standard modules measure 1.0"L, .6"W, and 1.25" H.

Miniature I/O Modules require only .68 sq inches board area, and switch up to 3.0 Amps. Mini modules measure 1.0"L, .4"W, and 1.0"H.

TERMINAL NUMBER AND CONNECTION

	#5	#4	#3	#2	#1
OAC	N/A	DC– In	DC+ In	AC Out	AC Out
ODC	N/A	DC– In	DC+ In	DC- Out	DC+ Out
IAC	Ground	Output	+Vcc	AC In	AC In
IDC	Ground	Output	+Vcc	DC- In	DC+ In

Only input modules have terminal #5.

MOUNTING RACKS

Rack are ordered separately. All standard racks are UL Recognized and CSA certified. Mini racks 70 MRCK8-, 70MRCK16, and 70MRCK24- are CSA certified; other certification/recognition, pending. Mini modules save up to 40% board area when mounted in mini racks. Miniature rack numbers include the letter M; the Q designated types replace quad pack racks. Chose 1 of 6 connector styles: screw terminal strip (70RCK4 only); board edge connector (70RCK8, 70RCK8, 70RCK16 without suffixes, and -EC suffix types); perpendicular header with short (-HS) or long (-HL) ejector levers; right angle header with short (-RS) or long (-HL) ejector levers.

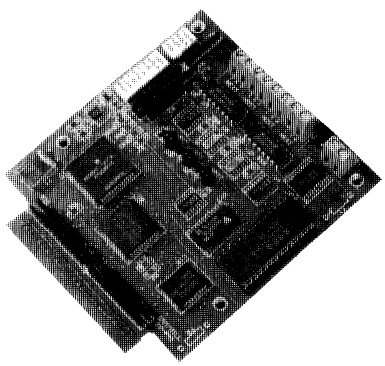
Grayhill INC. Programmable Controller Board

561 HILLGROVE • P.O. BOX 10373 • LA GRANGE, ILLINOIS 60525 • PHONE; (708) 354-1040

PROMUX® CONTROLLER BOARD

- Controls Up to 24 I/O Points Per Board, and 4,096 Points from 1 PC
- Operates as Stand Alone Or Slave to Computer
- Reduces PC Functions With User Defined Ones
- Programs In BASIC, C, Pascal, Plus 86-Ladders, and Genesis (RD1000 Ladders Also Available)
- Uses 300 to 38.4k Baud Rate
- Backed by Telephone Technical Support Hot Line



PROMUX® CONTROLLER BOARD

Programs assembly process, status, equipment, and operations, using an IBM personal computer and racks of Input/Output modules. Programming commands include the following: reading inputs, setting outputs, event timing, event counting, pulse width modulating, timed switching, delayed switching, scanning inputs. Board measures 4.0 x 4.0", plus edge connector. Supply Voltage: 4.5 to 5.5 Vdc. Supply Current (less modules): 0.1 to 0.5A. Operating Temperature Range: 0 to 70°C, 95% Humidity (non-condensing). Format operates as RS-485 or RS-422 bus for distant programming; converter for RS–232 is available. Versions for stand-alone operation or down-loaded programs have 8 kilobytes of EEPROM for user defined functions. Hardware connections are described in the User's Manual. ProMux is available with or without 8KB of EEPROM, with either header or edge card (plug) connector.

PROMUX® USER'S MANUAL

Manual with a choice of BASIC, C, or Pascal software is ordered separately. Manual without software is available for the purpose of evaluating system. Or use it for making hardware connections and determining specifications when using non-GRAYHILL software. For other real time artificial intelligent software, consult GRAYHILL.

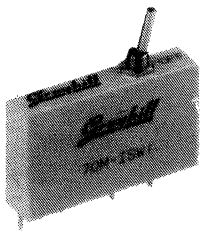
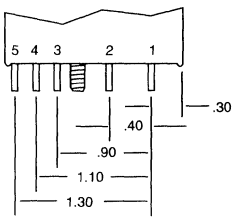
ACCESSORIES

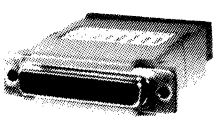


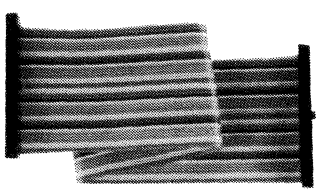


TEST MODULES

Modules fit miniature or standard module mounting racks. They measure 1.0"L, .4"W, and 1.0"H, plus .7" high toggle switch. See also Input/Output Modules page. Only input modules have terminal #5; connections are as follows:

	#5	#4	#3	#2	#1
70M-OSW1	N/A	DC– In	DC+ In	Switched Output	
70M-ISW1	Ground	Switch In	DC+ In	N/C	N/C





RS-232 TO RS-422/485 CONVERTERS

Configured for DTE operation, converters plug into any male RS-232 DB-25 connector and convert signals to RS-485 (RS-422) levels. Supply Voltage (Vps): +8 to +15 Vdc. Supply current (Ips): 62 mA plus output loads. Available with or without optical isolation.

50-PIN RIBBON CABLE ASSEMBLIES

Cables in 2, 4, or 6 feet lengths for connecting the ProMux® board to I/O Module Racks. Available with header-to-header connectors or with header-to-edge-card connectors. For longer cables, contact GRAYHILL for recommendations.

ORDERING INFORMATION

Description	Part Number
Input Test Module	70M-ISW1
Output Test Module, 3A	70M-OSW1
Standard Converter	72-CNV-1
Converter With Optical Isolation	72-CNV-2
2 Ft. Header to Header Cable	72-CHH-2
4 Ft. Header to Header Cable	72-CHH-4
6 Ft. Header to Header Cable	72-CHH-6
2 Ft. Header to Edge Card Cable	72-CHE-2
4 Ft. Header to Edge Card Cable	72-CHE-4
6 Ft. Header to Edge Card Cable	72-CHE-6

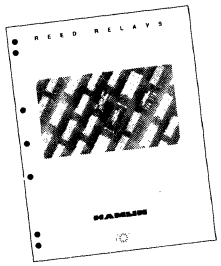
REED RELAYS
HAMLIN
ELEC-TROL



The extensive Hamlin line of standard reed relays represents the merging of the wide range of reed relay products manufactured by Hamlin Inc. and Elec-Trol. The merger provides powerful technical capability and manufacturing capacity that assures customers a reed relay supplier that is totally committed and focused. For your convenience both Hamlin and Electrol model numbers are listed. When ordering, refer to the Hamlin model number.

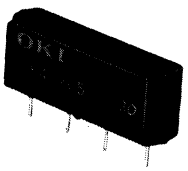
DIP SERIES



SIP SERIES

FEATURES

- De-activated rhodium contacts. for stable contact resistance.
- Standard TO-116 Terminal Grid fits all standard DIP sockets.
- Interface directly with RTL, DTL, TTL, HTL logic.
- Molded epoxy package for environmental immunity.
- Automatic insertion compatible.
- Relay testing services test report available.

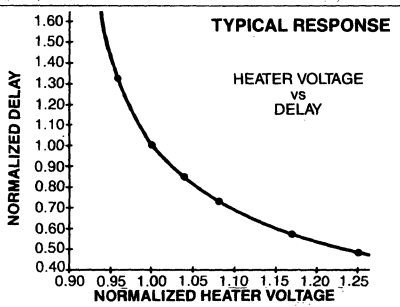
"HOLD-HEET®" PRODUCTS

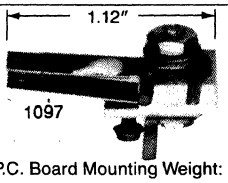
BIMETAL WARP SWITCHES
CUSTOM ENGINEERED • HIGH QUALITY
LOW COST • PRODUCTION QUANTITIES

5011 N. RAVENSWOOD AVENUE
CHICAGO, ILLINOIS 60640
312/728-4454 FAX 312/728-2016
BUSINESS HOURS: 8am-3:30pm
CENTRAL TIME

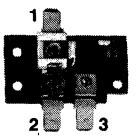
These time delay relays are actuated by heated bi-metallic blade, and thus are
- Immune to transients.
- Independent of wave form.
- Exceptionally low-cost (some models as low as $1.30 in volume).

By using a bi-metallic mating blade, temperature compensation up to −20°F to +150°F can be achieved. All models available with contacts N.O. or N.C. Heater coil can be isolated from contacts, or made common with one contact for greater economy.



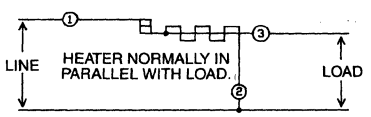


P.C. Board Mounting Weight: 1/5 oz.

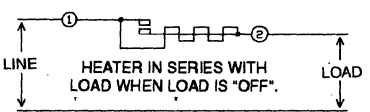


Alternative Package: 1/4" Push-on Tabs

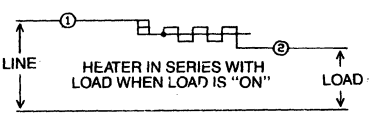
Heater Coil: 4v to 115v AC or DC. 1 1/4 w. continuous to 5 watts momentary
Contacts: (Non-inductive Loads) AC: 6 to 115v, 35 to 350 ma, 2 to 25 w — DC: 6 to 12v, 35 to 350 ma, 2 to 4 w
Delay: 4 to 90 sec., opening or closing
Alternative Arrangements for use as a Flasher:



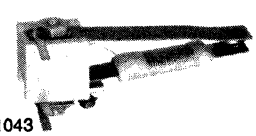
FLASHER OPERATES INDEPENDENT OF LOAD. LOAD IS FULLY "ON" OR "OFF".



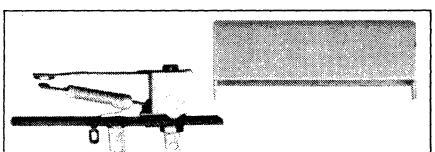
FLASHER IS DEPENDENT ON LOAD. LOAD IS "ON" OR PARTIALLY "OFF".



FLASHEH IS DEPENDENT ON LOAD AND MUST BE MATCHED TO IT. LOAD IS "OFF" OR PARTIALLY "ON"

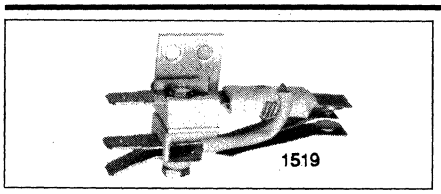


PC Board Mounting

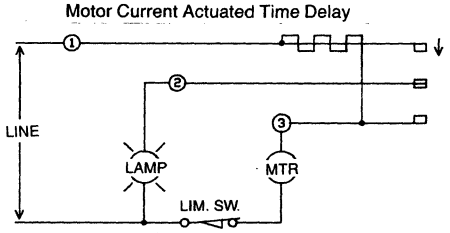


Alternative Package: Protective Can

Heater Coil: 6.3 to 28v AC or DC; 1.5w to 2.25 w. continuous.
Contacts: (Non-inductive Loads) AC: 6 to 115v, 35 to 350 ma, 2 to 40 w — DC: 6 to 12v, 35 to 350 ma, 2 to 4 w
Delay: 20 to 150 seconds, opening or closing



Motor Current Actuated Time Delay



Automatic light time delay switch for use in electric door opener circuits and similar applications. Features include:
- light goes on in a few seconds
- light maintained for 1 1/2 to 2 1/2 minutes
- all 3 blades are same bi-metallic material for good temperature compensation
- shorting blade prevents heater burn-out in case of motor or door malfunction

"Hold-Heet" switches provide service in many applications. Any number of recombinations are possible with component elements. This great versatility can result in tremendous savings over magnetic relays or timing motors. Please direct your technical questions to Gifford Neill, Chief Engineer, at 708/837-7709.

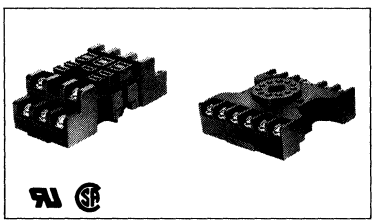
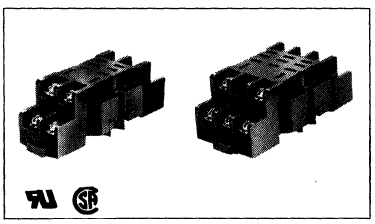
IDEC Selection Guide To Quality "Snap-Mount" Sockets

SR Series



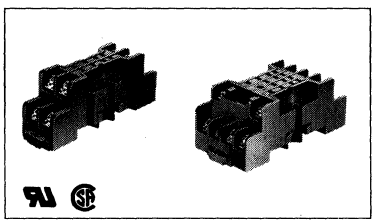
Type: 2-Pole, 8-Pin/Plug-in
3-Pole, 11-Pin/Plug-in
1-3-Pole, 11-Blade/Plug-in
Ratings: 10A 300V-Blade Type
10A 300V-Pin Type
Mounting: DIN Rail, Surface
Compatible IDEC Relay: RR Series

SH Series



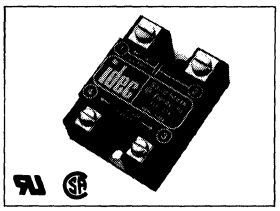
Type: 1-4 Pole, Blade/Plug-in
Ratings: 10A 300V
Mounting: DIN Rail, Surface
Compatible IDEC Relay: RH Series
RH2L Series

SY Series



Type: 2, 4-Pole, Solder/Plug-in
Ratings: 7A 300V
Mounting: DIN Rail, Surface
Compatible IDEC Relay: RM Series
RY Series
RY2L Series

RSS Series Solid State Relays



Input (DC)
Voltage Range: 3–32V DC
Isolation Voltage: 4000V AC (Input to Output)
Output

Current Ratings:	10A	25A	40A
1 Cycle Surge Peak:	100A	250A	650A

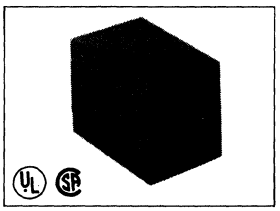
Voltage Range: 24–330V AC

Input (AC)
Voltage Range: 90–280V AC
Isolation Voltage: 4000V AC (Input to Output)
Output

Current Ratings:	10A	25A	40A
1 Cycle Surge Peak:	100A	250A	650A

Voltage Range: 24–330V AC

RTE Series Multi-Function/Range Time Delay Relay

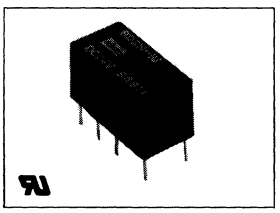


Contacts
Form: 2 Form C, DPDT
Current: 10A
Rating: 10A 240VAC (Res.)
10A, 30VDC
1/6HP 120VAC
1/3HP 240VAC
Operating Voltages
Input: 120VAC
12, 24V AC/DC
Power Consumption: 2.2VA

Timing/Operation
Mode of
Operation: Delay-On-Make/Interval
Delay-On-Break/Single-Shot
Time Range: 1 Sec. to 10 Hrs.
Repeat Accuracy: ±0.25%, 10ms
Reset Time: 100ms or less
Type of Control: Programmable DIP switch and adjustable potentiometer

Operating Temperature
–20°C to +65°C
Mounting
Plug-In
8-Pin, 11-Pin/Blade

RD Series



Contacts
Form: 2 Form C
Current: 1.25A, max.
Material: Silver (Gold-Clad)
Resistance: 100mΩ max.
Surge Withstand Voltage: 1500V (FCC)

Nominal Operating Voltages And DC Coil Resistance (Ω)
3VDC: 22.5
5VDC: 62.5
6VDC: 90
12VDC: 360
24VDC: 1440
48VDC: 5760
Power Consumption: 400mW

Operating Temperature
–30°C to +70°C
Life Expectancy

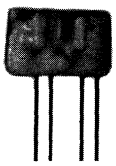
SOLID STATE DELAY TIMERS

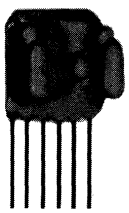
KH Series **Timing Module**/PC Mount

Thick Film Hybrid Circuit, Miniature Size, Thick Conformal Coating,Printed Circuit Mounting, Time Ranges from .1 to 300 sec*, External Adjustable or Fixed Times.

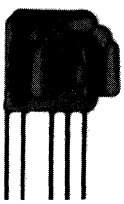
KH 1



KH 2



KH 3



OUTPUT CURRENT RATING: Action 1:10 ma. min,100 max. Actions 2&3:10 ma. min. 500 ma .max.
REPEAT ACCURACY: Fixed conditions = ± 3 %, OVERALL ±10 %. over -10° to 70° C.
SIZE: Action 1 = 1.25"L x .6"W x .3" Thick. Action 2 & 3 = 1.25"L x 1.0" W x .5" Thick.

Ordering Code: KH ___ ___ ___

Timing Actions:

ON Delay	(1).
OFF Delay	(2).
INTERVAL Delay	(3)
N/A in all voltages.	

Timing Ranges:

Standard:		Non-standard:	
.1 to 1 sec.	(1).	1 to 10 sec.	(5).
.5 to 5 sec.	(2).	5 to 50 sec.	(3).
3 to 30 sec.	(7).	6 to 60 sec.	(8).
30 to 300 sec.	(4).	12 to 120 sec.	(6).
		*Special time.	(0).

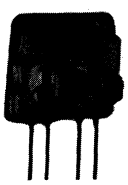
Input Voltages:

Standard:		Non-standard:	
24 VAC	(2).	12 VAC	(7).
120 VAC	(1).	240 VAC	(5).
12 VDC	(8).	48 VDC	(6).
24 VDC	(4).	110 VDC	(3).

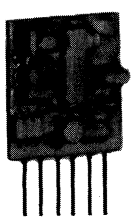
KD Series **Digital Countdown Timer**/PC Mount

Digital Countdown Circuit, Miniature PC Board, Thick Conformal Coating, Printed Circuit Mounting, Time Ranges from .1 sec. to 10 hr.*, External Adjustable or Fixed Times.

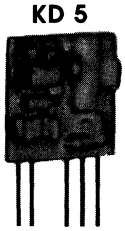
KD 1



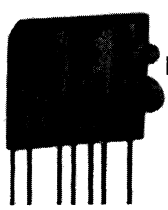
KD 2



KD 3
KD 5



KD 6



OUTPUT CURRENT RATING: 20 ma. min, 500 max.
REPEAT ACCURACY: Fixed conditions = ± .5 %, OVERALL ± 3 %. over -10° to 70° C.
SIZE: Action 1 = 1.25" L x 1.0" W x .5" Thick Action 2, 3, 5 = 1.38" sq. x .5" Thick.
Action 6 = 2.0" L x 1.38" W x .5" Thick.

Ordering Code: KD ___ ___ ___ **Action 6 "ON" time is inserted here.**

Timing Actions:

ON Delay	(1).
OFF Delay	(2).
INTERVAL Delay	(3).
RECYCLE Timer	(5)
(OFF & ON times are equal; single adjustment).	
RECYCLE Timer	(6) (OFF & ON times independently adjustable).

Timing Ranges:

Standard:		Non-standard:	
.1 to 10 sec.	(1).	10 - 600 min.	(3).
1 to 60 sec.	(4).	*Special time	(0).
10 to 600 sec.	(2).		
1 to 60 min.	(5).		

Input Voltages:

Standard:		Non standard:	
24 VAC	(2).	12 VAC	(7).
120 VAC	(1).	240 VAC	(5).
12 VDC	(8).	48 VDC	(6).
24 VDC	(4).	110 VDC	(3).

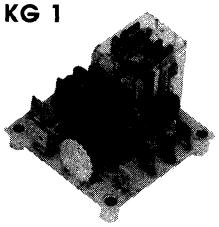
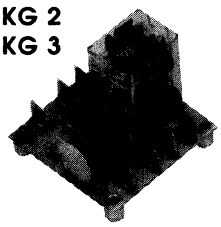
TIME DELAY RELAYS

KG Series **Time Delay Relay**/Chassis Mount

KG 1



KG 2
KG 3



Thick Film Hybrid Timing Element, Heavy Duty Long Life Relay, Stand off for Chassis Mounting, 1/4" Quick Connect Terminals, Time Ranges from .1 to 300 sec*, On Board Time Adjustment Pot.

OUTPUT RELAY RATING: 10 Amps resistive or 1/3 HP @ 120 VAC.
REPEAT ACCURACY: Fixed conditions = ± 3 %, OVERALL ±10%. over -10° to 70° C.
SIZE: 2.1" sq. x 1.8" high, 1/4" Q.C. terminals.

Ordering Code: KG ___ ___ ___

Timing Actions:

ON Delay	(1).
OFF Delay	(2).
INTERVAL Delay	(3)
N/A in all voltages.	

Timing Ranges:

Standard:		Non-standard:	
.1 to 1 sec.	(1).	1 to 10 sec.	(5).
.5 to 5 sec.	(2).	5 to 50 sec.	(3).
3 to 30 sec.	(7).	6 to 60 sec.	(8).
30 to 300 sec.	(4).	12 to 120 sec.	(6).
		*Special time.	(0).

Input Voltages:

Standard:		Non-standard:	
24 VAC	(2).	12 VAC	(7).
120 VAC	(1).	240 VAC	(5).
12 VDC	(8).	48 VDC	(6).
24 VDC	(4).	110 VDC	(3).

OP4 Series **Time Delay Relay/** Plug In

OP41
OP43

Thick Film Hybrid Timing Element, Heavy Duty Long Life Relay, Enclosed Octal Plug In Base, LED Operation Indicator, Time Ranges from .1 to 300 sec*, Built in Time Adjustment Pot with Knob.

OUTPUT RELAY RATING: 10 Amps resistive or 1/3 HP @ 120 VAC.
REPEAT ACCURACY: Fixed conditions = ± 3 %, OVERALL ±10 %. over -10° to 70° C.
SIZE: 2.0 " sq. x 4.0" high, Action 1 & 3= 8 pin octal base. Action 2 = 11 pin round base.

OP42

Ordering Code: OP4 ___ ___ N ___

Timing Actions:

ON Delay	(1).
OFF Delay	(2).
INTERVAL Delay	(3)
N/A in all voltages.	

Timing Ranges:

Standard:		Non-standard:	
.1 to 1 sec.	(1).	1 to 10 sec.	(5).
.5 to 5 sec.	(2).	5 to 50 sec.	(3).
3 to 30 sec.	(7).	6 to 60 sec.	(8).
30 to 300 sec.	(4).	12 to 120 sec.	(6).
		*Special time.	(0).

Input Voltages:

Standard:		Non-standard:	
24 VAC	(2).	12 VAC	(7).
120 VAC	(1).	240 VAC	(5).
12 VDC	(8).	48 VDC	(6).
24 VDC	(4).	110 VDC	(3).

OP4 Series **Recycle Timer/** Plug In

OP45

Digital Countdown Timing Module, Heavy Duty Long Life Relay, Enclosed Octal Plug In Base, LED Operation Indicator, Time Ranges from .1 to 10 hrs*, Built in Time Adjustment Pot with Knob.

OUTPUT RELAY RATING: 10 Amps resistive or 1/3 HP @ 120 VAC.
REPEAT ACCURACY: Fixed conditions = ± .5 %, OVERALL ± 3 %. over -10° to 70° C.
SIZE : Action 5 = 2.0" sq. x 4.0" high, Action 6 = 1.8" W x 2.4" L x 3.6" H, 8 pin octal base.

OP46

Ordering Code: OP4 ___ ___ ___ ___ **For action 5, insert "N" here. For action 6, insert time range here.**

Timing Actions:

RECYCLE Timer	(5)
(OFF & ON times are equal, single adjustment).	
RECYCLE Timer	(6)
(OFF & ON times independently adjustable).	

Timing Ranges:

Standard:		Non-standard:	
.1 to 10 sec.	(A).	10 - 600 min.	(C).
1 to 60 sec.	(D).	*Special time	(0).
10 to 600 sec.	(B).		
1 to 60 min.	(E).		

Input Voltages:

Standard:		Non standard:	
24 VAC	(2).	12 VAC	(7).
120 VAC	(1).	240 VAC	(5).
12 VDC	(8).	48 VDC	(6).
24 VDC	(4).	110 VDC	(3).

MICROELECTRONIC POWER IC RELAYS

ChipSwitch® Solid State Relay

UL, CSA, VDE Rated

The ChipSwitch relays utilize power integrated circuits for AC power line switching while maintaining turn-on at zero voltage crossing and turn-off at zero current crossing. They are a compact, low cost, and highly reliable interface for isolating and switching AC loads such as solenoids, valves, lamps, contactors, small motors, and heaters from low level DC signals.

BOSFET® PhotoVoltaic Relay

International Rectifier Photo-Voltaic Relays utilize a unique power integrated circuit termed a BOSFET to form a solid state replacement for signal level electromechanical relays. They feature high speed, zero offset voltage, low pick-up power, miniaturization, and are widely applied in instrumentation, multiplexing, automatic test equipment, thermocouple switching and telecommunications for general purpose switching of AC/DC analog and digital signals. The PVI isolators provide a DC output with a 2500VAC isolation level for driving MOSFETs, IGBTs and serving as an isolated DC bias.

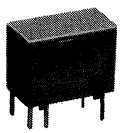
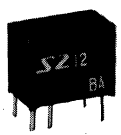
SY/SZ RELAYS

1 Amp SPDT
L — 0.492″,
W — 0.291″,
H — 0.374″





CONTACT DATA

Arrangement — 1 Form C

Material — Gold overlay silver-palladium

Resistance — Max. 100 mΩ (initial value)

Ratings — 0.5A, 120V AC or 1A, 24V DC (resistive) switched
2.0A carrying curent

Life Expectancy — Mechanical: Min. 5 million operations
Electrical: SZ Min. 200,000 operations at rated load
SY Min. 150,000 operations at rated load

COIL DATA

Voltages — 1.5 to 24V DC

Power (at 20°C) —
SZ Operate — 0.15 watt (0.16 watt for 18V coil, 0.18 watt for 24V coil)
Nominal — 0.3 watt (0.32 watt for 18V coil, 0.36 watt for 24V coil)
SY Operate — 0.075 watt
Nominal — 0.15 watt

Operate (at 20°C) — 70% of nominal voltage

Duty — Continuous

GENERAL DATA

Insulation Resistance — 100 MΩ minimum at 500V DC

Dielectric Strength — 500V AC (50, 60 Hz), between open contacts
1000V AC between contacts and coil

Temperature Range — SZ −40°C to +70°C (18V coil: −30°C to +65°C,
25V coil; −30°C to +60°C) (at nominal voltage)
SY −40°C to +90°C

Time Values (approx.) — Operate 1.5 mS, Release 1 mS (at nominal voltage)

Vibration Resistance — 20G (10 ~ 300 Hz) amplitude 3 mm

Shock Resistance — 50G

Mounting — For direct printed circuit mounting on grid spacing
of 2.54 mm (0.1 in.)

Approximate Weight — 1.7 gr (0.06 oz.)

Enclosure — Polybutylene terephthalate (PBT)

Surge Strength — 1000V

Nominal Coil Voltage	Coil Resistance	Operate Voltage	Type No.	List Price

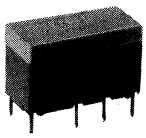
RY RELAY

1 Amp DPDT
L — 0.795″,
W — 0.386″,
H — 0.472″



CONTACT DATA

Arrangement — 2 Form C, 2 Form D

Material — Gold overlay silver-palladium

Resistance — Max. 100 mΩ (initial)

Ratings — 0.5A 120V AC or 1A 24V DC (resistive)

Life Expectancy — Mechanical: Min. 20 million operations
Electrical: Min. 500,000 operations at 1A 24V DC
Min. 200,000 operations at 0.5A 120V AC

COIL DATA

Voltages — 4.5 to 48V DC

Power (at 20°C) —
Operate — 0.075 watt (0.098 watt for 18V, 24V coil, 0.138 watt
for 48V coil)
Nominal — 0.15 watt (0.2 watt for 18V, 24V coil, 0.3 watt for 48V coil)

Operate (at 20°C) — 68 ~ 71% of nominal voltage

Duty — Continuous

GENERAL DATA

Insulation Resistance — 1000 MΩ min. at 500V DC

Dielectric Strength — 500V AC between open contact
1000V AC between all other conductors

Temperature Range — −40°C ~ +85° at nominal voltage

Surge Strength — 1500V between all conductors

Time Values (max.) — Operate 6 ms, Release 3 ms at nominal voltage

Vibration Resistance — 10G (10 ~ 55 Hz)

Shock Resistance — 10G 11 ±1 ms) — Unerror, 100G (6 ±1 ms) —
Destruction

Enclosure — Polybutylene terephthalate (PBT)

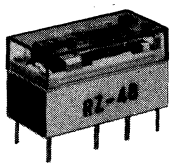
RZ RELAYS



2 Amp DPDT
L — 0.795″,
W — 0.386″,
H — 0.457″

CONTACT DATA

Arrangement — DPDT (B-M) — RZ, RZ( )W Type
Material — Gold overlaid silver-palladium alloy
Max. Switching Power —
30W/60VA — Single Contact
30W/50VA — Bifurcated contact at resistive load
Max. Switching Current —
2A AC or DC — Single Contact
1A AC or DC — Bifurcated contact at resistive load
Max. Switching Voltage —
150V DC/125V AC — Single Contact
100V DC/90V AC — Bifurcated contact at resistive load
Contact Resistance (Pin-pin) — 100mΩ Max.
Capacitance — 1.5PF max. between open contact
0.5PF max. between adjacent change-over contact
Life Expectancy —
Mechanical: 20 million operations — Single Contact
15 million operations — Bifurcated contact
Electrical: 0.5 million operations at 1.25A 24V DC or 0.4A 125V AC at resistive load — Single contact
0.5 million operations at 0.7A 24V DC or 0.25A 125V AC at resistive load — Bifurcated contact

COIL DATA

Nominal Voltage — 3 to 48 V DC — RZ, RZ( )W Type,
3 to 24V DC — RZ1, RZ1( )W Type
Power (at 20°C) — Nominal: 515 ~ 560 mW — RZ, RZ( )W Type,
Operate: 200 ~ 324 mW — RZ, RZ( )W Type
Max: 1050 mV
Temperature Range — −40°C ~ +65°C — RZ RZ( )W Type
(at nominal voltage) −40°C ~ +75°C — RZ1 RZ1( ) Type

GENERAL DATA

Dielectric Strength — 500V AC (50/60 Hz) between open contacts, 1000V AC contact-coil
Insulation Resistance — 1000 MΩ min. at 500V DC
Timing — Operate <4 ms, release <2
Bounce Time — Approx. 1 ms on operate
Approx. 4 ms on release
Vibration Resistance — 10 to 60 Hz amplitude 1.5 mm (10G)
Shock Resistance — Destruction shock: 100G (11 ms ±1 ms)
Unerror shock: 10G (11 ms ± 1 ms)
Surge Strength — 1500V AC between all conductors

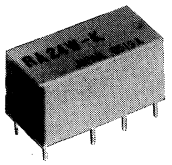
Sub Miniature Printed Circuit Board Relays

RA RELAY



1 Amp DPDT Relay
L — 0.795″
W — 0.394″
H — 0.394″

CONTACT DATA

Arrangement — 2 Form C (DPDT)
Material — Gold overlaid silver palladium alloy vs silver palladium alloy
Resistance — Max. 100 mΩ (Initial)
Rating — 24V DC 1A, or 120V AC 0.5A
Life Expectancy — Mechanical: Min. 20 million operations
Electrical: Min. 500,000 operations at 24V DC 1A
Min. 200,000 operations at 120V AC 0.5A
Max. Carrying Current — 2A

COIL DATA

Voltages — 1.5 to 48V DC
Power (at 20°C) — Operate: Standard 100—200 mW
Single winding latching 35~100 mW
Double winding latching 75~180 mW
Nominal: Standard 200~400 mW
Single winding latching 75~200 mW
Double winding latching 150~360 mW
Operate (at 20°C) — Less than 70% of nominal voltage
Duty — Continuous

GENERAL DATA

Insulation Resistance — 1000 MΩ at 500V DC
(Expect between P & S coil)
Dielectric Strength — 1000V AC between open contact
1500V AC between all other conductors
(Expect between P & S coil)
Temperature Range — −40°C~+80°C (RA-W, RA-WN, RAL-W, RAL-DW, RAL-WP, RAL-DWP)
−40°C~+70°C (RA-WM, RAL-DWM), at nominal voltage, Non carring Contact
Surge Strength — 1500V between coil and contact, adjacent contacts
Time Value (Max.) — Operate: (RA-WM, RAL-DWM) 4 mS
(RA-W, RA-WN, RAL-W, RAL-DWN, RAL-WP, RAL-DWP) 6 mS
Release: (RA-WM) 3 mS
(RA-W, RA-WN, RAL-DWM) 4 mS
(RAL-W, RAL-DWN, RAL-WP, RAL-DWP) 6 mS, at nominal voltage
Vibration Resistance — 30G (10~55 Hz) Unerror
30G (10~55 Hz) Destruction
Shock Resistance — 50G (11 ±1 mS) Unerror
100G (11 ±1 mS) Destruction
Enclosure — Polybutylene terephthalate (PBT)

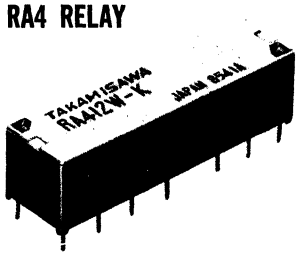
Sub Miniature Printed Circuit Board Relays

RA4 RELAY



1 Amp 4PDT
L — 1.387″,
W — 0.390″,
H — 0.433″

CONTACT DATA

Arrangement — 4 Form C (4PDT)

Material — Gold overlaid silver palladium alloy vs silver palladium alloy

Resistance — Max. 100 mΩ

Ratings — 120V AC 0.5A, 24V DC 1A (Resistive)

Max. Current — 2A

Life Expectancy Mechanical — Min. 20 million operations

Electrical — Min. 500,000 operations at 24V DC
Min. 200,000 operations at 120V AC 0.5A

COIL DATA

Voltages — 1.5 to 48V DC Power (at 20°C)

Type	RA4, RA4L		RA4-M, RA4L-M	
	Operate	Nominal	Operate	Nominal
Single Winding Non Latching	0.1W	0.2W	0.2W	0.4W
Single Winding Latching	0.045W	0.09W		
Double Winding Latching	0.09W	0.18W	0.18W	0.36W

Operate (at 20°C) 70% of nominal voltage
Pulse Length—20ms min.

GENERAL DATA

Insulation Resistance — 1000 mΩ min. at 500V DC

Dielectric Strength — 1000V AC between open contacts
1500V AC btween all other conductors

Temperature Range — −40°C ~ +80°C (RA4, RA4L),
−40°C ~ +70°C (RA4-M, RA4L-M)

Surge Strength — 1500V between coil and contact, adjacent contacts

Time Value — Operate: 6 msec max.
Release: 4 msec max.

Vibration Resistance — 30G (10 ~ 55 Hz) Destructive
20G (10 ~ 55 Hz) Unerring
} reference value

Shock Resistance — 100G (6 ±1 msec) Destructive
30G (11 ±1 msec) Unerring
} reference value

Enclosure — PBT

Notes

- As to the positive (+) symbol of each value, such as working voltage, positive working voltage, open voltage and reverse working voltage, positive (+) electrode of power source should be connected to the positive (+) terminal of pin arrangements.
- Reverse working voltage for wirewound latch type.
  As to the negative (−) symbol, positive (+) electrode of power source should be connected to negative (−) terminal of pin arrangements.

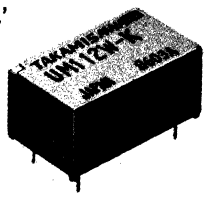
TAKAMISAWA ELECTRIC CO., LTD.

Sub Miniature RF Printed Circuit Board Relays

UM RELAY

0.1 Amp SPDT W — 0.449", L —0.787", H — 0.394"



CONTACT DATA
Arrangement — 1 form C (SPDT bifurcated)
Ratings — 24V DC 10 mA, 1W at 900 MHz
Resistance — 100 mΩ max. (initial value)
Max. Current — 100 mA DC
Max. Voltage — 30V DC
Max. Power — 1W DC, 10W at 900 MHz
Life Expectancy — Mechanical: 1,000,000 operations min.
Electrical: 300,000 operating min. at rated load

COIL DATA
Voltage — 1.5 to 48V DC
Power — (at 20°C)

Type	Operate	Nominal
Single Winding Non Latching	0.1W (0.11W for 48V coil)	0.2W (0.22W for 48V coil)
Single Winding Latching	0.1W	0.2W
Double Winding Latching	0.2W	0.4W

Operate wattage less than 70% of nominal voltage

GENERAL DATA
Insulation Resistance — 1000 MΩ min. at 500V DC (UMIL-D, except between P.S. Coil)
Dielectric Strength — 500V AC between open contacts, between contacts and earth
1000V AC between coil and other terminals
Temperature Range — −30°C ~ +80°C at nominal voltage
Time Value — 6 msec max. at nominal voltage (UMI Release Time 5 ms)
Vibration Resistance — 30G (10 ~ 55 Hz) Destructive
20G (10 ~ 55 Hz) Unerring } reference value
Shock Resistance — 100G (6 msec) Destructive
50G (11 msec) Unerring } reference value

HIGH FREQUENCY CHARACTERISTICS
Isolation — 60 dB min. at 900 MHz
Insertion Loss — 1 dB max. at 900 MHz
V.S.W.R. — 1.2 max. at 900 MHZ
(Impedance of the measuring devices is 75Ω)

Notes • If correct polarity is not applied to the coil terminals, relay does not operate properly. • To release latched contact, polarity to be applied to coil terminals should be reversed. • Since this is the polarized relay, Confirm the relays performance in the actual circuit, prior to use. When relays are expected to be mounted very closely together or to be used under strong magnetic fields.

W — 0.646″
H — 0.583″

CONTACT DATA

Arrangement — 1 Form C

Material — 5A type: Gold overlay silver-nickel alloy (single)
3A type: Gold overlay silver (single)
1A type: Gold overlay silver-palladium alloy (bifurcated)

Load — 5A type: 5A @ 30V DC or 120V AC, 4A @ 240V AC resistive, ⅛ HP
3A type: 3A @ 30V DC or 120V AC, 2.5A @ 240V AC resistive, 1/10 HP
1A type: 1A @ 30V DC or 120V AC, resistive

Life — Mechanical: 20 million operations minimum
Electrical: 0.1 x 10^6 operations minimum at rated load

Timing — Operate: < 5 ms (standard type), < 6 ms (high sensitive type)
Release: < 2 ms

COIL DATA (@ 20°C)

Operate Power — 210 mW (standard type), 150 mW (high sensitive type)

Nominal Power — 450 mW (standard type), 330 mW (high sensitive type)

Maximum Power — 1.4W

GENERAL DATA

Insulation Resistance — 250 MΩ at 500V DC

Dielectric Strength — 750V AC between open contacts
2000V AC between all other points

Temperature Range — standard type −40°C to +70°C
sensitive type −40°C to +80°C

Vibration Resistance — 15G (10-55 Hz)

Shock Resistance — 15G (11 ms ±1 ms)

Approximate Weight — 8 gr (0.28 oz.)

Enclosure — Standard — polycarbonate
Washable or sealed — PBT

Surge Strength — 3000V

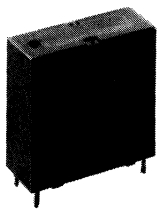
Sub Miniature General Purpose Relays

VE RELAY



CONTACT DATA

Arrangement—1 Form A (SPST-NO)
or 1 Form C (SPDT)

Material & Rating

Type	Material	Contact Rating*	
		N.O.	N.C.
VE-( )H	Gold overlay silver-nickel alloy	5A	3A
VE-( )HE	Silver-nickel alloy		
VE-( )H5	Silver-cadmium oxide alloy	5A	5A

*250 VAC resistive

Resistance (Initial)— 70 mΩ.....VVE-( ) H
100 mΩ (6VDC.1A).....VVE-( ) HE
200 mΩ (6VDC.1A).....VVE-( ) H5

Life Expectancy—Mechanical: 10 million operations
Electrical: 100,000 operations

COIL DATA

Voltage—5 to 48 VDC

Power (at 20°C)—

	Standard	High Sensitive
Nominal Operate	0.36 W 0.18 W	0.25 W 0.13 W

Operate (at 20°C)—70% of nominal voltage

GENERAL DATA

Insulation Resistance—1000 MΩ min, at 500 VDC

Dielectric Strength—750 VAC (50/60 Hz) between open contact (N.C.),
1000 VAC (50/60 Hz) between open contact (N,O)
2000 VAC (50/60 Hz) between all other conductor

Surge Strength—4000 V or 6000 V

Temperature Range—Standard type −40°C ~ +85°C
High sensitive type −40°C ~ +90°C
} Non-carring condition of contacts

Time Value (at nominal voltage)—Operate Max. 10 ms
Release Max. 5 ms

Weight—Approx. 8 gr

Vibration Resistance*—10 ~ 55 Hz (Double amplitude of 3.3mm)
.....Destructive, Unerring

Shock Resistance*—50 G (11±1 ms).....Destructive
(*Reference Value) 10 G (11±1 ms).....Unerring

Enclosure - PBT

Shock Resistance—50G (11 mS)...Unerring
100G (6mS)...Destructive

Enclosure—PBT

Notes:
- Since this is the polarized relay, confirm the relays performance in the actual circuit, prior to use. When relays are expected to be mounted very closely together or to be used under strong magnetic fields.

Single Winding Non-Latching — **Substitute AS Prefix for SMD Type**

JENNINGS MINIATURE MICROWAVE RELAYS

The FL Jennings TOH Series microwave relays are designed to operate from DC to 2.5 GHz and higher. They are used in coaxial transmission lines to open, close, and divert signal paths. Applications where stringent impedance matching and isolation are required include antenna switching, radar, communications, radio telephones, and cable TV systems. Our technology represents the latest developments in materials, performance and flexibility. The TOH series microwave relays are available in coil terminal, PCB terminal, flying lead, and solder lug configurations. Operating voltages of 6, 12, 24, and 28 VDC can be specified.

The TOH Series are built using a new patented method that offers efficiency in manufacture. The result provides reliable, proven relays at lower cost.

JENNINGS VACUUM CONTACTORS

Vacuum Contactors are used to control large amounts of DC power and RF currents with ratings up to 50 kv and currents up to 600 Amperes continuous. These contactors are recommended wherever high voltage capability, small size, and high speed operation with a long and low maintenance life are important. Applications include primary control of power supplies, industrial motors, and induction heating equipment, RF system tap changing, and fault protection of high power transmitters. The 18 page catalog provides complete specifications with a variety of specific applications for 3-pole, high voltage AC and DC, RF contactors and overcurrent relays actuated by solenoid, air or motor drives.

JENNINGS VACUUM/GAS RELAYS

Relay Testing

Jennings operates test facilities to provide all environmental, high voltage, and radio frequency (RF) test parameters. All relays are individually tested prior to shipment for pull-in voltage, timing characteristics, contact resistance, and dielectric strength.

Vibration, shock, humidity, salt spray, temperature effects, current load and reliability tests are regularly performed on a sampling basis.

Mechanical life reliability tests are performed on a sample basis with equipment that only passes relays which cycle with proper sequences of contact operation. Some relay types have been checked to more than 10^8 operations.

JENNINGS VACUUM/COAXIAL RELAYS

Applications for these units include high speed switching from omnidirectional to directional antennas, transmit-receive switching, and switching between transmitters for standby control.

Other applications include crossbar matrices and switching trees, CCTV, CATV, and microwave telemetry and data acquisition links, as well as general coaxial instrumentation.

Jennings vacuum coaxial relays have a recorded history of dependable, maintenance free operation. Because of this, they were chosen for ground and airborne applications for the tracking network of the Apollo program and the Atlantic Missile Range Communications.

High Voltage Relays

THE EXPERTS IN HIGH VOLTAGE RELAYS AND DC POWER SWITCHING DEVICES.

THE WORLD'S LEADING SUPPLIER OF HIGH VOLTAGE SWITCHING DEVICES

For over a quarter century, Kilovac has been dedicated to the design and manufacture of high voltage relays, contactors, and power control devices.

Today, Kilovac is recognized as the world's leading supplier of high voltage switching devices for a broad range of critical applications. Kilovac relays are used in medical and scientific instruments, aircraft power distribution, and sophisticated test equipment. Kilovac relays have been to the moon in the Lunar Rover Vehicle and to the depths of the sea on nuclear submarines.

KILOVAC CAN QUICKLY MEET YOUR REQUIREMENTS

Kilovac can respond quickly to customer requirements by developing special relays or modifications to existing relays or by delivering our standard products quickly.

Call Kilovac's new Application Hot Line at 1-800-253-4560 to discuss your application with one of our Sales Engineers.

Kilovac's extensive manufacturing capability allows us to respond to your needs with a wide variety of special modifications and special relays.

YOU CAN RELY ON KILOVAC

High voltage circuits are often difficult to design and debug. Let us work with you to solve your high voltage isolation and switching problems. We can often supply engineering samples for test and evaluation in your circuit or we can conduct special tests for you in our well-equipped test lab.

Don't experiment with high voltage... rely on the proven experience of Kilovac Corporation.

Call Kilovac's Application Hot Line at 1-800-253-4560.

Kilovac® Corporation

High Voltage Relays

THE EXPERTS IN HIGH VOLTAGE RELAYS AND DC POWER SWITCHING DEVICES.

POWER SWITCHING

For proper relay performance in hot switching applications, the consequences of the circuit conditions must be assessed for each unique application. It is therefore essential that Kilovac be as fully informed as possible when recommending relays for hot switching applications. To select the proper relay, the following information should be supplied to the Kilovac Sales Engineer:

a. Type of Load.

b. Current and voltage values to be switched. If capacitative discharge, peak current and RC time constant values are needed.

c. Repetition rate or frequency of operation desired.

d. Expected life span.

Frequently, the only way to determine whether a relay will survive a particular power switching application is to test it in the circuit. These tests ideally can be performed in the customer's circuit or, if that is not possible, in Kilovac's well-equipped test lab.

270 VDC APPLICATIONS

A new generation of 270 Vdc power systems are now being developed for aerospace and commercial applications. These systems offer improvements in reliability, maintenance costs, fuel consumption, weight, and life-cycle costs over the conventional 28 Vdc and 115 Vac power systems.

Conventional switching devices cannot reliably switch 270 Vdc loads. Kilovac has developed a broad line of products that capitalize on the ability of vacuum switches to interrupt high voltage, direct current loads. Kilovac's 270 Vdc relays, contactors, and power controllers offer substantial improvements in weight, size, performance, and reliability over other switching products.

All Kilovac's 270 Vdc products are also available as power controllers with electronic sensing and control to provide short circuit protection. Whether you need to switch 2 amps or 250 amps at 270 Vdc, Kilovac has the products you need. Call us at 805-684-4560 and request our extensive literature package on 270 Vdc products.

Kilovac® Corporation

High Voltage Relays

THE EXPERTS IN HIGH VOLTAGE RELAYS AND DC POWER SWITCHING DEVICES.

FEATURES OF VACUUM AND GAS-FILLED RELAYS

- Smaller size for a given voltage/ current rating
- Extremely low and stable contact resistance in vacuum relays
- No contact oxidation due to arcing
- Faster operate times
- High resistance to thermal and mechanical shock
- Capable of switching high inrush currents using gas-filled relays
- Safe use in explosive or corrosive atmospheres
- No contact maintenance
- Usable at frequencies above 30 MHz
- Rapid arc extinguishment for power switching in vacuum relays
- Can be mounted in any orientation

High Voltage Relays

THE EXPERTS IN HIGH VOLTAGE RELAYS AND DC POWER SWITCHING DEVICES.

TYPICAL APPLICATIONS

Typical high voltage relay applications are listed below:

COMMUNICATIONS–H.F. SSB radio, digital antenna couplers and tuners, transmit/receive switching.

TEST EQUIPMENT–Electrostatic discharge testing, dielectric testing, cable and harness testing.

AEROSPACE POWER SWITCHING–Aircraft, space systems, submarine, and ground equipment where 48 Vdc, 155 Vdc, 270 Vdc, and 20 KHz switching and control is required.

RADAR–Pulse forming networks, modulators/transmitters, TWT and klystron switching.

GENERAL–Safety interlock applications, high voltage power supplies, polarity reversal, nuclear instrumentation, switching in explosive or corrosive atmospheres.

LASERS–Pulse forming network discharge, safety interlock, simmer circuit isolation, Pockels cell isolation.

SEMICONDUCTOR PROCESSING

PLASMA ETCHING–Multiple target switching.

HIGH INTENSITY LIGHTING SYSTEMS

MEDICAL INSTRUMENTS–Heart defibrillators, surgical lasers, magnetic resonance imaging (MRI), Electrophoresis.

High Voltage Relays

THE EXPERTS IN HIGH VOLTAGE RELAYS AND DC POWER SWITCHING DEVICES.

All Kilovac relays have either a vacuum or gas dielectric. Both have the obvious benefit of providing high voltage isolation in a small package, but each has unique characteristics which should be considered.

VACUUM AS A DIELECTRIC

A vacuum is, in many ways, the ideal dielectric. Since most high voltage arcs are initiated by the ionization of the insulating medium, absence of any such media (i.e., a hard vacuum) produces the greatest possible isolation between contact electrodes. In a vacuum of 10^{-6} mm of mercury, dielectric strengths can be achieved on the order of 2000 V/mil. A vacuum dielectric has the additional advantage of providing an inert, non-oxidizing atmosphere in which high voltage contacts operate.

The chief advantage in using a vacuum relay is that it has low and stable contact resistance over the life of the relay.

Vacuum relays are typically recommended whenever low and stable contact resistance is needed or when power switching that requires load interruption is called for.

GAS AS A DIELECTRIC

Because of the arc suppression characteristics of electronegative gas, gas-filled relays are generally more suitable for power-switching on the "make" or N.O. contacts, as used in the capacitive discharge of heart defibrillator circuits or pulsed lasers.

When the relay is switched, ionization of the gas causes electrical continuity to occur before mechanical continuity is achieved. Thus, contact bounce may occur without interruption of the circuit if circuit voltage is above 3500 volts. This phenomenon contributes to the long life gas-filled relays demonstrate in capacitive discharge circuits.

VOLTAGE: 15 kV — 20 kV — 25 kV

Kilovac® Corporation

High Voltage Relays

THE EXPERTS IN HIGH VOLTAGE RELAYS AND DC POWER SWITCHING DEVICES.

LOW LEAKAGE, HIGH VOLTAGE RELAYS

Kilovac has specialized relays for test equipment and instrument applications which require very low leakage currents and/or very high insulation resistance. We can provide you with standard relays or special relays built for your application with leakage currents in the picoamp range and insulation resistance of 10^{13} or 10^{14} ohms. Call our Application Hot Line at 1-800-253-4560 for more information.

KILOVAC MEDICAL RELAYS

Kilovac has supplied high voltage relays for a number of medical applications ranging from portable heart defibrillators to magnetic resonance imaging equipment. Kilovac relays are used as polarity reversal switches in electrophoresis equipment to analyze DNA and in kidney stone lithotrypters to discharge energy stored in high voltage capacitors which crushes kidney stones with powerful sound waves.

The small size and high reliability of Kilovac relays make them ideally suited for portable, battery operated equipment. Kilovac maintains an on-going reliability test program to ensure that all relays continue to perform reliably time after time. In addition, since medical relays are often considered a "Critical Component" by the FDA, Kilovac maintains the required quality control and configuration control systems necessary to meet these strict standards.

Call our Application Hot Line at 1-800-253-4560 for help with your medical relay application.

LEACH®

SUBMINIATURE RELAYS

Quick Reference Guide

Leach products have been setting the standards in both technology and reliability for more than 70 years. Our products are aboard virtually every major U.S. airborne and commercial program involving aircraft, missiles, satellites and space launch vehicles as well as submarines, ships, tanks, and ground vehicles. This guide describes our relay product line ranging from 5 amp dry circuit subminiatures to 400 amp power contactors, time delay relays and solid state relays.

LEACH® CORPORATION

TIME DELAY RELAYS

6900 ORANGETHORPE AVE., P.O. BOX 5032, BUENA PARK, CA 90622-5032 • (714) 739-0770 • TWX 910-596-2867 • FAX (714) 739-1713

SPECIFYING A FIXED TIME DELAY PERIOD

LEACH and the Military identify the time delay period in the same manner. A four-digit dash number specifies the delay period in milliseconds. The first three numbers are significant figures while the fourth indicates the number of zeroes to follow the first three.

Examples: –1001 = 1,000 milliseconds (1 second)
–2502 = 25,000 milliseconds (25 seconds)
–5000 = 500 milliseconds (0.5 seconds)

In the case of a repeat cycle timer (flasher), a similar method is used. The dash number indicates the length of each cycle. (Note: each cycle is 50% on, 50% off).

Examples: –2500 = 250 milliseconds cycle or 4 cycles/sec.
–1001 = 1,000 milliseconds cycle or 1 cycle/sec.
–6002 = 60,000 milliseconds cycle or 1 cycle/min.

USE AND SELECTION OF ADJUSTABLE TIMERS

Adjustable timers are useful in system prototyping or breadboard circuits where the precise time delay period is unknown. By the use of an external resistor, these devices are adjustable over a specific DECADE RANGE. Although any decade range within the overall timing range can be supplied, the following ranges are offered as standards:

0.1 to 1 seconds	(Specify –1001)
1.0 to 10 seconds	(Specify –1002)
5 to 50 seconds	(Specify –5002)
50 to 500 seconds	(Specify –5003)

Note from the above that in specifying a decade range, the four-digit dash number indicates the high or upper limit of the desired decade range.

The formula below provides the proper resistance value to achieve the desired time delay:

$$R_{ext} = \left(\frac{T_1}{T_0} - 1\right) 100{,}000 \text{ Ohms}$$

Where: R_{ext} = External resistance value (Ohms)
T_1 = Desired time in seconds
T_0 = Minimum time (low end of the decade range) in seconds

As an example, if using a 5 to 50 second adjustable timer and a 30 second delay is desired, the calculation is:

$$R_{ext} = \left(\frac{30}{5} - 1\right) 100{,}000 \text{ or } R_{ext} = 500 \text{ K Ohms}$$

Recommended resistors IAW MIL-R-55182 ⅛ WATT, 1% (RNC6OHXXXXFS).

QPL CROSS REFERENCE — MILITARY P/N TO LEACH P/N

Military P/N	Leach P/N	Operation Mode	Output	Timing Range (seconds)

M83726/29	TDH-8070/8071	Delay On Release – Fixed Time	10A, 2PDT	0.1 to 600[5]
M83726/30	TDH-8060/8061	Delay On Operate – Adjustable	10A, 2PDT	0.1 to 600[5]
M83726/31	TDH-8080/8081	Delay On Release – Adjustable	10A, 2PDT	0.1 to 600[5]

[1] Slash sheets 1, 2, 3 & 4 to MIL-R-83726 have been officially cancelled. DLA specified replacements: /28 replaces /1 and /3 and /29 replaces /2 and /4. Replacement units are smaller and lighter but are electrically and physically compatible with inactivated units.

[2] All adjustable timers use external resistor (not supplied) to adjust timing range.

[3] Each cycle 50% on, 50% off.

[4] "True" time delay on release requires no external power during timing period.

[5] Timing ranges above 500 seconds not MIL qualified.

SOLID STATE RELAY DESCRIPTIONS

LEACH Solid State Relays utilizes state-of-the-art custom integration and power MOSFET technology to provide sophisticated features plus optimized power output switching.

In both the Solid State Relay (LS06051B) and Solid State, True Current Sensing Relay (LS06102C), an isolated status pin is provided which acts as a trip indicator. A low status indicates the output has tripped off due to an over-current condition.

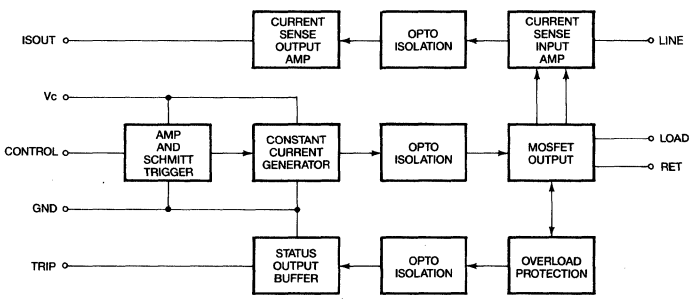
In the Solid State, True Current Sensing Relay (LS06102C), unique and proprietary circuit is used to provide an isolated, analog load current signal. After proper scaling, this signal gives the true load current value.

Both the LS06051B and LS06102C feature integrated short circuit, current overload, and thermal overload protection to protect both the unit and the system wiring. Optical isolation between input and output, while reducing size and cost, helps eliminate EMI and RFI usually present in transformer type isolation circuits. Buffered inputs enable the relay to be driven directly by standard CMOS or open collector TTL Logic. The LS06051B and the LS06102C are housed in a hermetic metal package to maximize heat dissipation.

These are two products from a family of products utilizing LEACH's functional block design concept. Additional features and isolated input/output pins are available.

Solid State Relay
True Current Sensing

BLOCK DIAGRAM



SOLID STATE POWER CONTROLLER DESCRIPTIONS

LEACH Solid State Power Controllers feature reliable, troublefree switching together with short circuit and overload protection. Load current is continuously monitored, and the devices will shutdown within microseconds reacting to an overload condition.

In both Solid State Power Controller Products (LR06014N family and LR06025Q family), the status signal is derived from the load current and is reported via an optically isolated status output.

The LR06014N family is designed for operation in 28 VDC power systems with ratings from 1 to 4 amperes.

The LR06025Q family is designed for operation in 28 VDC power systems with ratings from 2 through 10 amperes.

Both the LR06014N family and LR0625Q family are enclosed in a hermetically sealed metal package to maximize heat dissipation.

POWER PRODUCTS

POWER MONITORS AC & DC VOLTAGE MONITORS

GENERAL INFORMATION

Logitek power monitoring equipment is utilized to monitor incoming power on AC or DC power systems. When the system voltage, frequency or phase characteristics deviate from the predetermined acceptable limits, the relay de-energizes to activate an alarm indicator or system shut-down contactors. Voltage sensing is accomplished with an "RMS" type detector that is relatively insensitive to line distortion.

EQUIPMENT TYPES

Individual units monitor AC or DC voltage and line frequency for both high and low limits, and phase rotation for reversal/loss. Power monitors are also available incorporating any combination of these functions into a single unit. This equipment is available with factory set limits or as field adjustable.

OPERATING CHARACTERISTICS

When the voltage and frequency of the input signal are within prescribed high and low limits, and the phase rotation is ABC, the output relay will energize after the specified "pick-up" time delay. If the high or low voltage limits of any phase are exceeded for a time greater than the specified "drop-out" time delay, the relay de-energizes and remains de-energized until all phase voltages return within limits and remain at normal levels for longer than the specified "pick-up" time delay. If the input frequency exceeds the high or low frequency limits for a time exceeding the "drop-out" time delay, the relay de-energizes and remains de-energized until the frequency returns within limits and remains at normal levels for longer than the "pick-up" time delay. The output relay will not energize if the phase rotation is other than ABC or if any phase is disconnected. When the output relay is energized, loss of any phase will cause the relay to drop out immediately, overriding the time delay circuits.

SPECIAL PRODUCTS

Logitek's engineering department is available to discuss your applications of our product or to design special equipment to satisfy your system requirements.

TYPICAL SPECIFICATIONS

ELECTRICAL

Input Voltage	115 VAC/208 VAC/ 230 VAC
Voltage Transients	MIL-STD-704, Limits 1, 2, 3
Input Frequency	50 / 60 / 400 Hz
Sense Voltage	As required
Sense Frequency	As required
Accuracy	±1%
Phase Sequence	ABC
Time Delay (Pick-Up and Drop Out)	250 milliseconds to 10 seconds factory set or field adjustable
Relay Contacts	DPDT, 3PDT
Contact Rating	2 amp, 10 amp
Contact Life	50,000 operations min.
Power Dissipation	6 watts maximum

PHYSICAL

Finish	Gloss Blue #15177, in accordance with MIL-F-14072
Connector	Glass to metal seal solder hooks, MS3113H-20-16PN Connector
Enclosure	Steel case, hermetically sealed and encapsulated

ENVIRONMENTAL

Temperature	−55°C to +125°C −40°C to +85°C −10°C to +70°C
Vibration	Per MIL-STD 810C, Method 514.2, Procedure I, 10-2000 Hz, 20g's
Shock	Per MIL-STD 810C, Method 516.2, Procedure I, 50g's 11 ±1 millisecond any axis
Acceleration	Per MIL-STD 810C, Method 513.2, Procedure I & II, 10g's
Humidity	Per MIL-STD 810C, Method 507.1, Procedure I
Altitude	Per MIL-STD 810C, Method 504.1, Category 6 equipment, sea level to 70,000 ft.

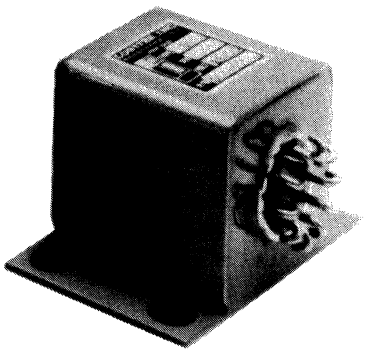
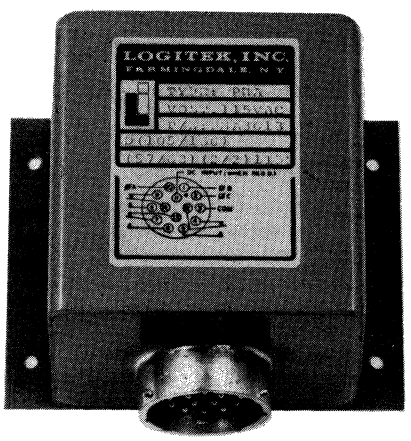
LOGITEK POWER PRODUCTS

THE LOGICAL CHOICE OF THE TECHNICAL MIND

FREQUENCY MONITORS
PHASE MONITORS





GENERAL INFORMATION

Frequency Monitors: Logitek Frequency Monitors are used in applications where electrical systems must be de-energized or alarm devices activated when the power line frequency departs from the predetermined normal range of operations.

Phase Monitors: Logitek Phase Monitors are used to protect three-phase loads, particularly rotating components, from damage resulting from phase reversals or the absence of phase. Contacts may be used to disconnect the load, to operate an alarm, or both.

OPERATING CHARACTERISTICS

Frequency Monitors: Signal voltage from the power line is applied to the designated terminals. If the line frequency is within the specified limits, the output relay energizes. If the frequency deviates from the preset limits for longer than the specified drop-out time delay, the unit de-energizes. After de-energizing, the frequency must return to within the pre-set band for longer than the pick-up time delay to re-energize the output relay.

Phase Monitors: Upon application of power, the output relay energizes if all phases are connected and the phase rotation is abnormal, the relay immediately de-energizes.

LOGITEK

THE LOGICAL CHOICE OF THE TECHNICAL MIND

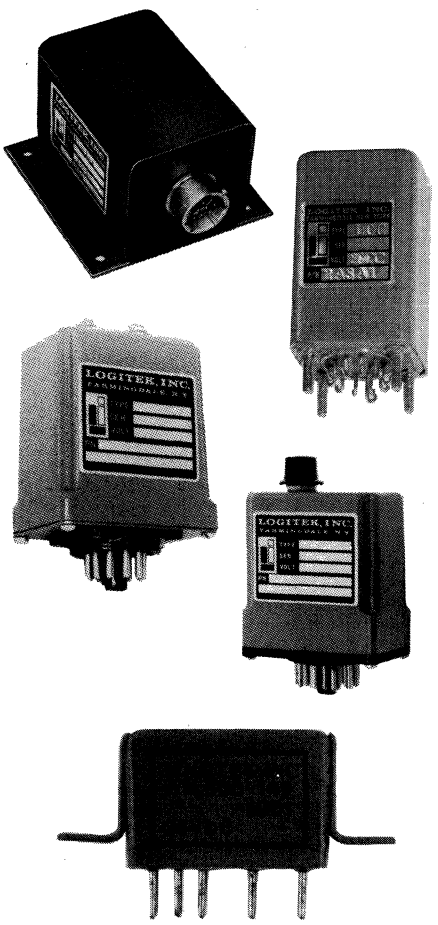
POWER PRODUCTS

TIME DELAY RELAYS
SOLID STATE FLASHERS
REPEAT CYCLE AND INTERVAL TIMERS



GENERAL INFORMATION

The design of complex electrical distribution systems often requires that certain operations be delayed or sustained for a precise interval of time from occurrence of a control or initializing signal. Combinations of various timing devices can be used for sequential startup or shutdown programs, load transfer or shedding, or delayed transfer to avoid race conditions. In addition, pulsers, interval timers, and flashers are used in applications, such as operating instrument panel warning lights or other annunciator devices, landing gear, door open indicators and navigation lights.

QUALITY ASSURANCE

Logitek's facilities are qualified under MIL-Q-9858A and MIL-STD-2000, and maintains a MIL-I-45208 inspection system. These systems, along with Logitek's 100 hour burn-in cycle, contribute substantially to Logiteck's uncompromising product integrity.

OPERATING CHARACTERISTICS

Logitek timing devices are generally CMOS integrated circuits appropriately protected from line transients and other line perturbations and either a solid state or electromechanical relay output circuit. Since there are no large capacitive timing or storage elements in these devices, recycle times (the time after control removal that will cause a new timing cycle within specified accuracy) are very short. In addition, the use of CMOS IC digital counting circuits allows the use of very stable timing elements resulting in excellent stability through wide temperature ranges.

APPLICATIONS

• Aircraft, Electrical Systems • Mobile Radar Systems • Equipment Test Stations • Tanks • Mobile Missile Launchers • Offshore Drilling Rigs • Computer Systems • Shipboard Electrical Systems • Hospital Auxiliary Power Systems

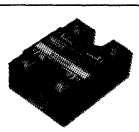
SOLID STATE RELAYS



SS SERIES
SSA — SCR's back to back with A.C. control.
SSC — SCR's back to back with D.C. control.

ST SERIES:
STA — TRIAC with A.C. control.
STD — TRIAC with D.C. control.

SPECIFICATIONS

1. Current Rating: 8 to 90 Amps.
2. Minimum load current: 50 ma.
3. Temperature Range:
   a. Operating: −30°C to +80°C
   b. Storage: −28°C to +100°C
4. Duty: Continuous
5. Contacts: 1 Form A (SPNO)
6. Input control: A.C. Models
   a. Control voltage range: 90 — 280 VAC
   b. Must operate voltage: 90 VAC Max.
   c. Must release voltage: 10 VAC Min.
   d. Input impedance: 40,000 OHMS Min.
   e. Input current: 2mA max @ 120 VAC
7. Input control: D.C. Models
   a. Control voltage range: 3-32 VDC
   b. Must operate voltage: 3 VDC Max.
   c. Must release voltage: 1 VDC Min.
   d. Input impedance: 1,500 OHMS Min.
   e. Input current: 4mA max @ 5 VDC
8. Standard: Zero voltage turn on.
9. UL listed and CSA certified.

Coaxial Relay Module 7000 Series

7100 — Standard

7200 — Self-terminating

7300 — High isolation

7400 — Highest isolation

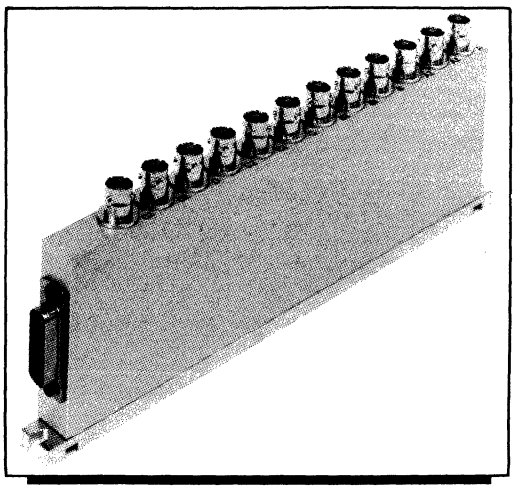
7500 — High power

7600 — Highest isolation self-terminating

7700 — Mercury wetted contacts

7800 — Twinax

7900 — Triax



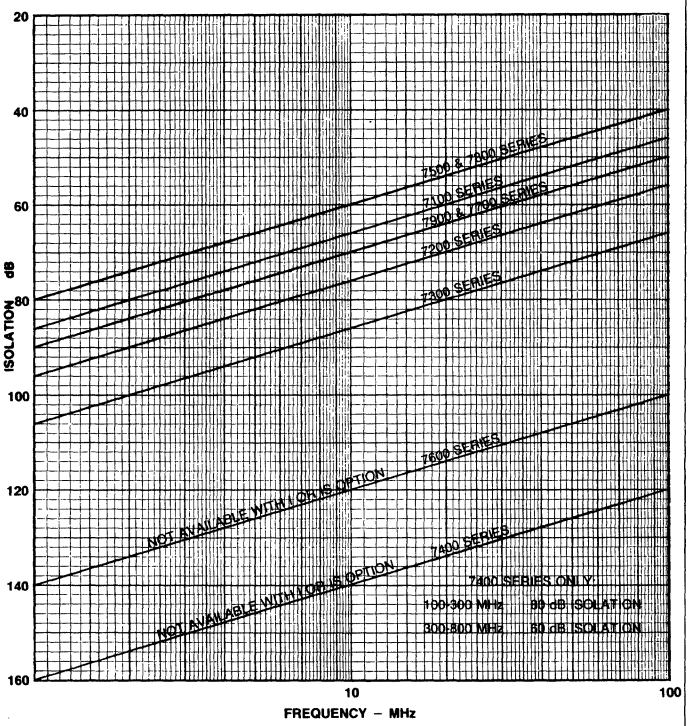
FEATURES:

- DC up to 800 MHz depending on number of throws
- Two to twenty-four throws
- Continuous shield continuity
- Rugged machined aluminum housing
- Crosstalk always lower than isolation
- Switchpoints individually field replaceable
- Extremely low EMI
- Low VSWR
- Matrix configuration easily assembled using 9000 series cross straps
- Signal circuits isolated from control circuitry

MATRIX 7000 Series Relay Modules are designed to maintain coaxial switching continuity over a wider range of critical and high environmental applications. The Relay housings are constructed of precision machined aluminum alloy for structural integrity and hard anodized for durability. All signal shield paths are silver plated with covers gasketed for maximum EMI protection. The basic reed switch elements are hermetically sealed in nitrogen filled gas envelopes and employ rhodium plated contacts to insure non-stick operation. Applications for MATRIX 7000 Series include:

— R.F. and I.F switching where a low VSWR is required.
— CCTV, base band video and pulse switching where low phase distortion and high pulse fidelity are required.
— Applications requiring a high degree of shielding integrity and low contact and induced noise such as pre amp input switching or the switching of high impedance operational amplifier inputs.

Matrix and hybrid switching systems are easily constructed by using Series 9000 (no output), 9100 (one output) or 9200 (two output) push-on cross straps which mate with the BNC connectors on the switch modules. The cross strap output connectors are BNC female type UG 1094/U. The model number of the cross strap is assigned by replacing the two zeros of the series number with the number of inputs desired. For example, a Model 9108 has eight inputs and one output.



MODEL NUMBER ASSIGNMENT

7 X XX — X

Series
Number of throws (N)
Options:
Coil suppression diodes with:
Coil common negative — D
Coil common positive — DR
TNC connectors — T
SMA connectors — S
Self-terminating — Ohms
Insulated shield — I
Insulated and
Switched shield — IS
Expander output — E
Chassis mount — C
Optional voltage — See Factory

SPECIFICATIONS

FREQUENCY RANGE:	(−1dB) 1310 ÷ (N − .13) MHz where N = Number of Throws
FREQUENCY RANGE:	(−3dB) 1760 ÷ (N + .2) MHz where N = Number of Throws
CHARACTERISTIC IMPEDANCE:	50 ohms - 75 ohm optional
SWITCHING CONFIGURATION:	Single or double pole, two thru twenty-four throws
SWITCHING SPEED:	One mS dry contact, three mS mercury wetted
ISOLATION:	See graph See factory for -I or -IS option
CONTROL - CONNECTOR:	28 VDC, 30 mA- D type-mate supplied
SIGNAL CONNECTOR:	BNC, Twinax, Triax, TNC, SMA or F type optional
OPERATING TEMPERATURE AND HUMIDITY RANGE:	−30°F to +150°F, 0 to 98 percent R.H.
OPERATING SHOCK AND VIBRATION:	50 G's - 1 mS, 2 G's p-p 20-2000 Hz
DIMENSIONS:	.625" W × 3.25" H × 1.44" + (.625" × number of throws)
MOUNTING:	Three 6-32 tapped holes in base or option - C

MINIATURE/ GENERAL PURPOSE RELAYS

						SERIES	**190**	**296**	**156**	**158**	**258**	**157**
FEATURES	"The Dipper" Low level switching up to 2 amps. 16 pin dip. Sealed for PC board mounting & immersion.	Economical & reliable designed for low cost PCB switching such as industrial, communications, vending or commercial equipment.	Compact & versatile 2&4 pole industrial relay. Low level switching. Available with many options.	Designed for UL Component Recognition for Motor Controllers through 240 VAC in accordance with UL Std 508, Industrial Control Equipment. Available in Octal Plug-in version.	Economical 2PDT, 10 amp rated relay, available with printed circuit terminals or 3/16", .187 quick connect terminals for plug-in socket capability or direct wiring with flange mounting option.	The 157 is a General Purpose/Industrial control relay, available in 1, 2, or 3 pole versions with multiple contact load capabilities up to 15 amps. All ratings are specified to UL Recognition and CSA Approvals for Industrial Control Equipment. They are approved as motor controllers up to 1/2HP at 240/480/600 VAC (1/3HP at 120 VAC).

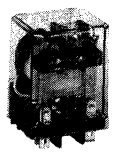
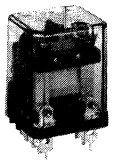
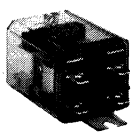
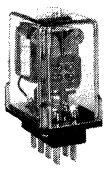
GENERAL PURPOSE RELAYS/ INDUSTRIAL/POWER RELAYS









SERIES	157 MAGNETIC LATCHING SERIES	187	188	136
FEATURES	The magnetic latching relay is ideal for use on applications where there is a need to conserve power, retain logic function during power outages or improve reliability over mechanical latching designs. All electrical specifications of the standard type 157 are retained. No mechanical latches or permanent magnets are used which could result in inadvertent operations. Units are avialble in single, or dual coils. TIMING Latching time: 13 MS nominal with a one second pulse of nominal voltage. Unlatch time: 13 MS nominal with a one second pulse of nominal unlatch voltage after latching with a one second pulse of nominal latch voltage. A latch pulse of 50 MS min. at nominal voltage is recommended to insure positive latching. DESIGN & CONSTRUCTION Insulation material, weight, marking, shock, vibration, dielectric breakdown, insulation resistance and temperature range are identical to the Type 157 relay. UL/CSA	DPDT power relay is rated at 20 amps; DPST-NO and NC contact arrangements are rated at 25 amps. Open stud mounted or dust covered versions with 1/4" quick-connect terminals.	30 Ampere relay is an expanded version of the Type 187 20 amp 2PDT relay, utilizing a common coil/mates structure. The 188 is limited to single-pole switching, in order to provide for the 30 amp contact ratings.	A small power relay that will switch 20 amps for industrial use in multipole configuration and 30 amps in multipole configuration at 120 VAC or 240 VAC for appliance use under UL #508.

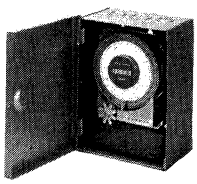
CYCLEMASTER 24-HOUR TIMER



620 SERIES

Program Time Switch-up to 48 ON-OFF operations per day with timing intervals as low as fifteen minutes. 14-day wheel, with Sunday and Holiday Skipper, provides programming for two full weeks. Eliminates operations on unwanted days.

SWITCHING ACTION
SPDT (usable three ways: SPST open; SPST closed; SP transfer)
LOAD CAPACITY
20 amps at 125, 250, or 480 VAC (1 hp at 125 VAC; 2 hp at 250 VAC) (10 amps at 125 VAC inductive)
TERMINALS
Screw terminals conveniently located
METHOD OF PROGRAMMING
Trip pin (12 supplied)
TEMPERATURE RANGE
−40 F to +140 F
Dimensions
With enclosure 8.188" H × 6.375" W × 4.125" D; without enclosure 6⅝" H × 4½" W × 2 13/16" D

TIMING APPLICATIONS

- Lawn sprinkling
- Greenhouse misting
- Irrigation
- Program music
- Chime system
- Oil well pumping
- Programmed heating
- Air conditioning
- Traffic systems
- Industrial processing
- Power plant exercising
- Industrial lubrication systems
- Stoker hold-fire
- Battery charging
- Paint and enamel baking
- Laboratory testing
- Oven purging
- Automatic livestock and poultry feeding systems
- Conveyors, material handling systems
- Ventilating fans
- Elevators and stairways
- Pumps and motors
- Water softening control
- Bulk, milk cooler agitation
- Laundry equipment
- Heat treating
- Plastic molding
- Bakery machinery

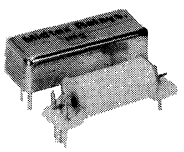
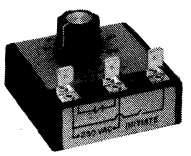
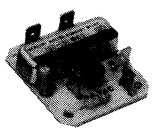
REED RELAYS



The Midtex dry reed relay series offers hermetically sealed, non-position sensitive switching in a small size with rapid response and low actuate power requirements. Available contact forms include A, B, C and D with dry reeds and forms A and B with mercury wetted. Contact arrangements include 1 to 5 Form A, 1 to 4 Form C, and 1 to 3 Form B, or any combination within the 5 pole bobbin. Consult the factory for additional details.

CUSTOM CONTROL PRODUCTS & BOARD ASSEMBLIES





Midtex Relays, Inc. designs and manufactures custom control modules and board assemblies to specific customer applications. A few common applications are listed below:

- True Form D Relay
- 20–25 amp 3/4 hp time delay relay
- 12–96 Hour Timer
- Sequencing Module For Stagger Motor Start Up
- Impulse Relay That Transfers When Voltage Is Removed
- True Off Delay Timers
- Complete Control Systems (Board level, encapsulated & Cabinet)
- Wire Wrapped Relay Control Assemblies
- Interface Modules

Most designs are generated from customers requesting a "Black Box" to solve a system problem, improved performance, lower costs etc. Please call us on our Engineering Hot Line (1-800-MIDTEX1) to discuss your application directly with Midtex Engineering.

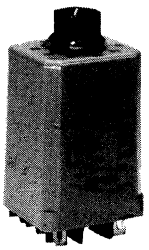
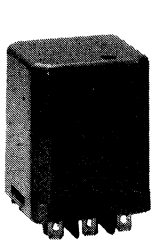
TIME DELAY RELAYS/ LINE MONITORING DEVICES/ CURRENT VOLTAGE/PHASE



612 SERIES

Delay-on-release timer which utilizes an R-C solid state trigger circuit to drive a secondary solid state switch, which in turn controls the integral 10 amp output relay.

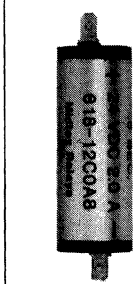
ELECTRICAL/MECHANICAL CHARACTERISTICS
All ratings at 25°C ambient.
Repeatability ±3%
Total timing variation ±10%
Operate time (max.) 100ms
Recycle time (max.) 100ms
Dial scale Ref. only
Input voltage limits—
AC ±10%
DC ±25%
Power requirements—
AC (approx.) 1.5 VA
DC (approx.) 1.2 watts
Switching action 2PDT
Switching rating (max.)
-Fine Silver contact (Gold flash)
5 amp, 28 VDC/120,240 VAC; 80% pf 1/8 hp, 120 VAC
-Silver Cadmium Oxide
10 amp, 28 VDC/120,240 VAC; 80% pf, 1/3 hp, 120 VAC 1/2 hp, 240 VAC
Delay types Delay-on-release
Momentary transfer upon timing cycle interruption.....NO
TEMPERATURE RANGE
-operating: -10°C to +55°C
-storage: 40°C to +85°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)
TIMING SET
Fixed
External Resistor
Knob Adjust



614 SERIES

Identical to the 612 series, except it functions as a **delay-on-operate.** Available with "fixed", "external resistor" adjust time setting, or "knob adjust", through an overall range of 1 to 300 seconds delay.

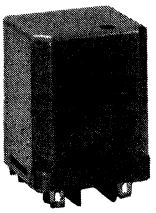
ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset (release) time (max.) 50ms
Recycle time (max.) 100ms
Dial scale Ref. only
Input voltage limits
AC ±10%
DC ±25%
Power requirements—
AC (approx.) 3.0 VA
DC (approx.) 1.2 watts
Switching action 2PDT
Switching rating (max.)
-Fine Silver contacts (Gold flash)
5 amp, 28 VDC/120 VAC, 3 amp, 240 VAC .80% pf 1/8 hp, 120 VAC
-Silver Cadmium Oxide (Gold flash)
10 amp, 28 VDC/120 VAC, 1/3 hp, 120 VAC, 6 amp, 240 VAC .80% pf 1/2 hp, 240 VAC
Delay types Delay-on-operate
Momentary transfer upon timing cycle interruption.....NO
TEMPERATURE RANGE
-operating: -10°C to +55°C
-storage: 40°C to +85°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)
TIMING SET
Fixed
External Resistor
Knob Adjust



618 SERIES

An electronic time delay module that provides a 0.5 or 2 amp SCR output to drive relays, solenoids or lamps. Units are fully encapsulated and are versatile and economic, especially when used in conjunction with power relays in the 30 amp rating category.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset time (max.) 75ms
Recycle time (max.) 25ms
Input voltage limits
+25%. DC must be filtered, max. ripple 5% at nominal voltage
Switching action SPST
Solid State Output, 1.5 V voltage drop max. when on
Switching rating (max.)
-Type 1–0.5 amp at +55°C
-Type 2–2.0 amp at +25°C
1.25 amp at +55°C
TEMPERATURE RANGE
-40°C to +55°C



619 SERIES

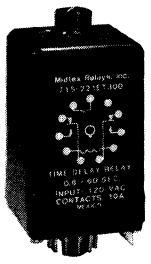
IMPULSE RELAY
An electronically controlled single input latching relay. Repetitive input pulses cause the relay to latch and unlatch alternately up to 1,200 total pulses per minute.

ELECTRICAL/MECHANICAL CHARACTERISTICS
All ratings at 25°C ambient
Pulse width 25 ms. min.
Pulse repetition rate
1200 pulses per minute max.
Duty Continuous
Input voltage
12, 24, 48, 110 VDC (±25%)
Power requirements
1.8 watts
Switching action 2PDT
Switching rating (max.)
-Fine Silver contacts (Gold flash)
5 amp, 28 VDC, 120/240 VAC 1/8 hp, 120 VAC
-Silver Cadmium Oxide
10 amp, 28 VDC, 120/240 VAC
1/3 hp, 120 VAC
1/2 hp, 240 VAC
TEMPERATURE RANGE
-10°C to +55°C
SHOCK
15 g's, 11±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)

719 SERIES

IMPULSE RELAY
Miniature PC style impulse relay that will alternately change states when pulsed at a common input, without changing polarity.

ELECTRICAL/MECHANICAL CHARACTERISTICS (25°C)
LIFE EXPECTANCY:
Mechanical—100 million operations min.
Electrical—100,000 operations min. at rated load
CONTROL VOLTAGES:
5 to 48 VDC standard
Set & Reset time 3ms typical
DIELECTRIC 1500 VAC input to contacts
1000 VAC across open contacts
TEMPERATURE -40°C to +70°C
CONTACTS
-Silver/Gold bifurcated Rating
2.0 amp 30 VDC resistive
0.6 amp 110 VDC resistive
1.0 amp 125 VAC resistive



715 SERIES

Multi-function time delay relay industry standard 8 and 11 pin octal, side terminal strip for flush mounting, and the 11 pin square base to fit the Midtex Type 157 relay sockets.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±2%
Total timing variation ±10%
Reset time—25 ms typical, 50 ms max. (release of delay-on-operate)
Recycle time—50 ms typical. 100 ms. max. (minimum off time between timing intervals)
Input voltage limits
AC ±10%
DC ±25%
Power requirements
AC 2.5VA
DC 1.5watt
Switching action 2PDT
Switching rating (max.)
-Silver Cadmium Oxide
10 amp,28 VDC/120 VAC; 1/3 hp, 120/240 VAC
Delay types
Delay-on-operate, Delay-on-release, Cycle, Interval and Interval-momentary start timing.
Momentary transfer upon timing cycle interruption: NO
TEMPERATURE RANGE
—operating -10°C to +55°C
—storage-40°Cto+85°C
SHOCK
15 g's, 11 ±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10–55 Hz (non-operating test)

655 SERIES

Delay-on-operate timers which use solid state timing circuits to control an integral relay.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±3%
Total timing variation ±10%
Reset time 50 ms
Recycle time (max.) 100 ms
Input voltage limits
AC ±10%
DC ±25%
Power requirements
AC (approx.) 3VA at 120 VAC
DC (approx.) 1.2 watts
Switching action 1,2,4PDT
Switching rating
5 amp, 28 VDC, 120 VAC
10 amp, 28 VDC, 120 VAC
Delay types
Delay-on-operate
Momentary transfer upon timing cycle interruption: NO
TEMPERATURE RANGE
—operating-10°Cto+55°C
—storage-40°C to+85°C
SHOCK
15 g's, 11 ±1 ms, 1/2 sinewave
VIBRATION
10 g's; 10 to 55 Hz
TERMINALS-
Solder, PC, Plug-In.

657 SERIES

Delay-on-operate timer which uses solid state timing circuits to control an integral relay.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±5%
Total timing variation ±10%
Reset time (max.) 100 ms
Recycle time (max.) 100 ms
Input voltage limits
DC ±25
Power requirements
DC (approx.) 0.7 watt
Switching action 2PDT
Switching rating
2 amp, 28 VDC, 120 VAC
Momentary transfer upon timing
cycle interruption: NO
TEMPERATURE RANGE
—operating-10°Cto+55°C
—storage -40°C to +85°C
SHOCK
12 g's, 11 ±1 ms, 1/2 sinewave
VIBRATION 8 g's; 10 to 55 Hz
MAX SIZE IN INCHES (L × W × H)
1.190 × .859 × 1.281
TERMINALS
Solder, PC, Plug-In

753 SERIES

753 series voltage sensor is designed for use in monitoring voltage fluctuations. It is designed to energize and de-energize at predetermined voltage levels that may be fixed or set with adjusting knobs. Packages are available for either direct plug-in or terminal strip connection.

ELECTRICAL CHARACTERISTICS
All ratings at 25°C ambient
Repeatability ±1% max.
Response time 15 ms typical
25 ms maximum
Duty cycle is continuous, maximum input limit of 125% of nominal input voltage.
Switching action SPDT
Switching rating
—100 silver/gold flash
3 amps at 24 VDC or 125 VAC resistive;
1 amp at 24 VDC or 125 VAC inductive;
1.5 amps at 250 VAC resistive;
0.5 amps at 250 VAC inductive
—200 Silver Cadmium Oxide
5 amps at 24 VDC or 125 VAC resistive
2 amps at 24 VDC or 125 VAC inductive
2.5 amps at 250 VAC resistive
1 amp at 250 VAC inductive —300 Silver Cadmium Oxide
10 amps at 24 VDC or 125 VAC resistive
4 amps at 24 VDC or 125 VAC inductive
5 amps at 250 VAC resistive
2 amps at 250 VAC inductive
TEMPERATURE RANGE
—operating -10°C to +55°C
—storage -40°C to +85°C
SHOCK
15 g's, 11 ±1 ms, 1/2 sinewave (non-operating test)
VIBRATION
0.06" DA or 10 g's, 10–55 Hz (non-operating test)

FOR DETAILS ON STRUTHERS-DUNN DISTRIBUTOR-STOCKED RELAYS, REQUEST CATALOG C/1010.

WHY do 40,000 Buyers and Electronic Engineers Keep Calling

MASTER DISTRIBUTORS

● BECAUSE of our excellent Value-Added Service ● BECAUSE of our Just-In-Time Program.

ORDERS PLACED BY 3 P.M. ARE SHIPPED THE SAME DAY

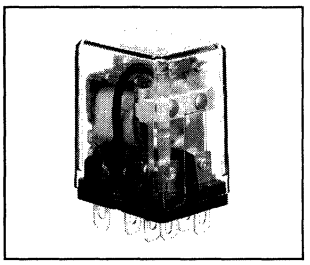
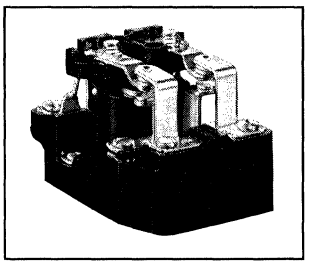
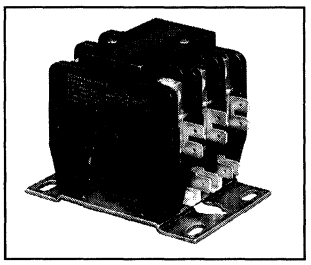
P.C. Board Relays
- Dry circuit to 30A ratings
- Up to 4PDT arrangements
- Open, dust cover and sealed units
- AC and DC coils
- Polarized types
- Latching models



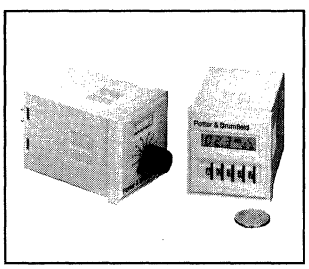
General Purpose Relays
- Dry circuit to 30A ratings
- Up to 8PDT arrangements
- Open, dust cover and sealed units
- AC and DC coils
- P.C. board, socket and panel mount types



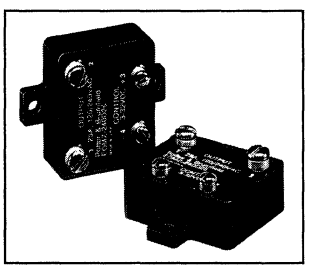
Power Relays
- Ratings to 60A
- Up to 4PDT arrangements
- Available as open relays or with dust covers
- AC and DC coils
- Socket and panel mount types



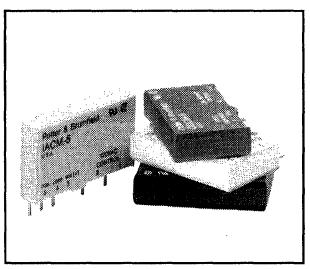
Contactors
- Ratings to 60A
- 1Ø and 3Ø switching
- Up to 4PST-NC-DM arrangements
- AC and DC coils
- Available with universal mounting plates



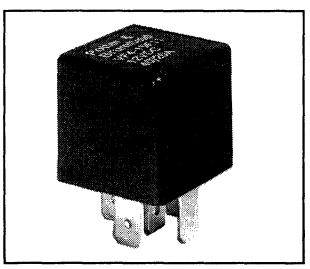
Time Delay Relays
- Ratings to 10A
- Time up to 9,990 hours
- Up to 10 timing modes
- Field programmable types
- AC and DC input
- Knob, resistor, switch and fixed adjustment types
- Socket and P.C. board mountings



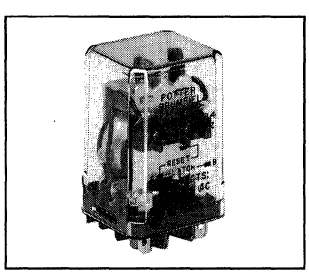
Solid State Relays
- Current ratings to 110A
- Switch voltage to 480VAC
- P.C. board and chassis mount types
- Single, dual and quad output
- AC and DC input
- Triac and inverse parallel SCR output types



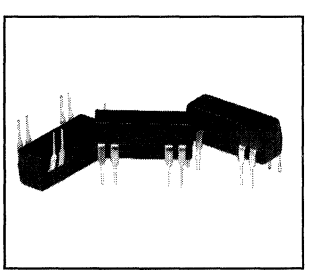
Input/Output Modules
- Standard, slim line, flat pack, quad pack and DIP package styles
- Output ratings to 6A
- Compatible for series operation
- Standard, slim line and quad pack mounting boards available



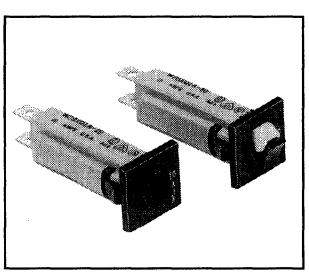
Automotive Relays
- Current ratings to 70A
- Standard and miniature varieties
- Choice of quick connect or PC terminals
- Various package styles and mounting options
- Coil suppression resistors available on some models



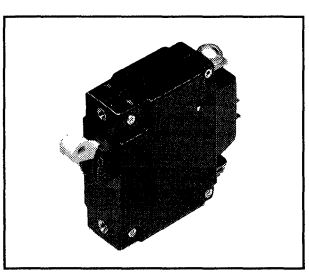
Impulse/Latching Relays
- Mechanical and magnetic latching types
- P.C. board, plug-in and chassis mount types
- Ratings to 20A
- Single and dual coil models
- Up to 16 poles



Reed Relays
- Dry and Hg-wetted types
- P.C. board, plug-in and chassis mount types
- Up to 5 poles
- Ratings to 250VA (with contact protection)
- Coil suppression diodes available on some models



Thermal Circuit Breakers
- Threaded bushing and snap-in mounting options
- Ratings to 50A
- Choice of quick connect or screw terminals
- Toggle, push/pull or push-to-reset actuators
- Series trip



Magnetic Circuit Breakers
- Choice of screw or snap-in mounting
- Ratings to 50A
- Up to 4 poles
- Actuator-per-unit and actuator-per-pole types
- Various circuit functions and time-trip curves

1KV TO 300KV PK TEST

B-1001-G

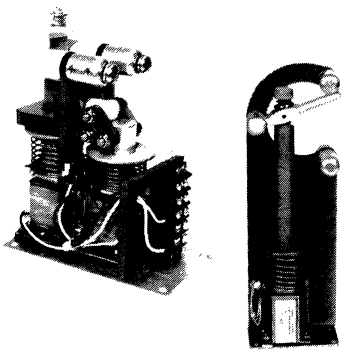
HIGH VOLTAGE RELAYS

HV BASIC RELAYS

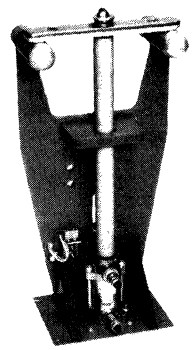
For transfer, safety grounding, tap selection, polarity selection. In the range of 1KV to 200KV DC or PK AC with PK test voltages up to 300KV PK. Most high voltage contacts have full insulation above ground. A higher insulation level to ground is optional. Some units are spring return and can mount in any position, or with gravity return by mounting in the proper position. Also usable in oil or insulating gas. Relays are available with replaceable tungsten alloy contacts for high current capacitor discharge use and with auxiliary contacts for holding, indicating or interlocking.

H.V. LATCHING RELAYS: Loss of control power will not cause an unwanted transfer. Power is not required to maintain position, reducing energy requirments and heat. Pulse actuation may be desirable in some applications.

E40-LC- -



E40-DT-60- -



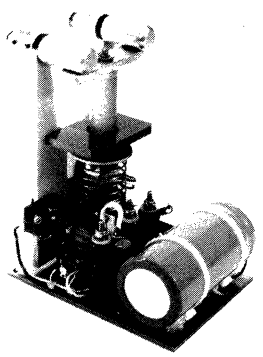
E60-NCP- -

HV AIR OPERATED RELAYS

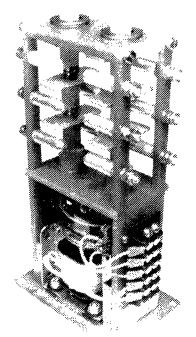
Air operated relays can be actuated with compressed air or other gas pressures of 80 to 120 PSI. Some can be operated at pressures as low as 30 PSI. Some units have spring return with loss of air. Auxiliary air valve type indicators can be provided in place of auxiliary electrical type contacts to provide complete isolation from high voltage, and provide answerback to indicate full open or closed, or other control. Units designed to be submerged in insulating fluid are also available with air exhaust outlets to exterior to avoid contaminating the insulating fluids.

HV DELAYED OPENING AND CLOSING RELAYS

For some high voltage control and safety applications, a delayed action but positive automatic closing (normally closed) or opening (normally open) of high voltage relays upon accidental loss or normal shut down of control power is desirable if not mandatory. These relays are designed for safety shorting and for use with HV power supplies having stored energy which must not be discharged before other control relays operate, or current flow which must not be interrupted too soon. Delay can be initiated either when control voltage is turned on or turned off, or both.



E40-NC- -ZA



ET6-14-6PNO- -

HIGH VOLTAGE MULTI-POLE RELAYS

The Multi-pole E series relays are designed for high voltage applications where 2 or more poles are required. These air insulated relays are constructed using fire retardant, moisture sealed anti-tracking epoxy glass laminate of the highest quality. Environmental resistant materials are standard throughout to assure long life and ruggedness. Applications for these relays include: 3 phase tap or load selection, transfer, polarity reversing, safety grounding, and shorting. These units can be used in air, oil, or other insulating mediums and are designed to be mounted base down. Contacts are available in normally open, normally closed and double throw configurations. Latching units are also available.

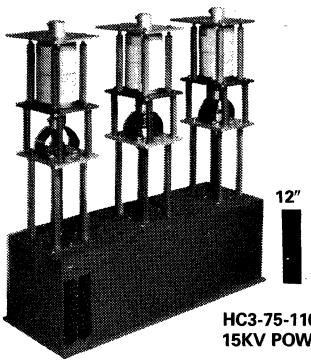
HIGH VOLTAGE DEVICES

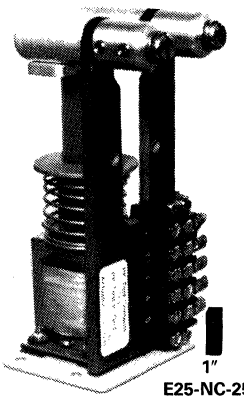
208V to 900KV and 0.01V to 1,000V Instrumentation



HV VACUUM CONTACTORS & 1 CYCLE CIRCUIT BREAKERS

Vacuum switches, single phase, three phase, upright or low profile, for high reliability sealed arc interrupting or crobar shorting. 208V to 200KV RMS operate. 50 to 4,000 amps continuous, 2,000 to 35,000 amps AC, 10 to 20,000 amps DC interrupt, 5,000 to 100,000 amps momentary and capicitor discharge.

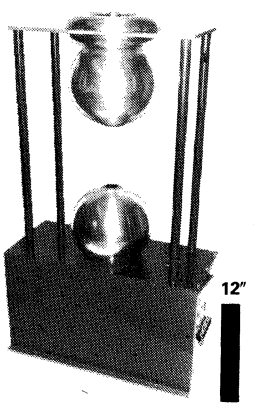
HC3-75-110-600-2-2
15KV POWER CLASS



HV RELAYS 1KV TO 300KV

HV relays of the air insulated type both for low and high current. This series has ratings from .1 to 200 amps continuous, 100 to 100,000 amps momentary and capacitor discharge. Peak test voltages from 5 to 300KV. Single or multipole. NO, NC and DT. Auxiliary contacts optional on all types. Latching extended life and tungsten contacts also available for high current closing. Also usable in oil or insulating gas.

E25-NC-25-1-0,
25KV PK TEST

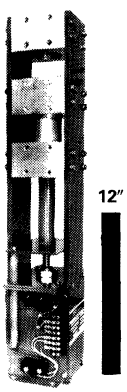


HV SPHERICAL RELAYS

Extra high voltage low corona, transfer, polarity reversing and grounding realys of the air insulated type. Ratings up to 600KV PK at 100 amps continuous. Solenoid, motor or air cylinder operated and spring or gravity return.

SPST, DT, 2PST, DT

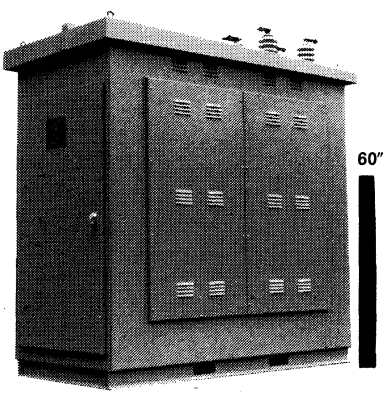
DH-300-NC-40-2-0-1
300KV PK TEST



HIGH CURRENT SWITCHES

Models are available up to 20,000 amps continuous, and over 500,000 amps pulse, with voltage ratings of 6 volts to 300KV peak test. Many are air cylinder or motor operated for high contact force.

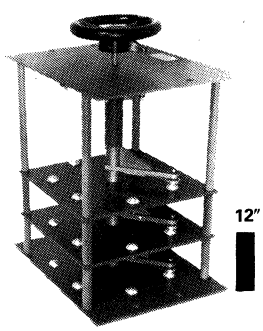
GD-27-DTP-40-1600-2-43,
27KV PK TEST



HIGH POWER HIGH SPEED HIGH VOLTAGE CONTROL AND STEP-START SYSTEMS

½ to 1 cycle sensing and interrupt vacuum circuit breakers. Metal enclosed for indoor or outdoor applications. 5KV-38KV.

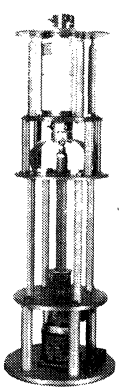
200-1200A CONTINUOUS
2000-28000A INTERRUPT
5-15KV CLASS, 28000A I.C.



HV ROTARY SWITCHES

Ratings from 5 to 150KV, 1 to 200 amps. Either manual or electrical operators, depending upon requirements. Position detents and interlocks to prevent opening under load.

R-60-3P7T-60-1-0-H,
60KV PK TEST



HIGH SPEED HV CONTACTORS AND SOLENOID DRIVERS ENERGY STORAGE UNITS

One Millisecond Contact Opening

For high speed or loss of power automatic circuit breaker trip and for high speed activation of contactor or circuit breaker solenoids. Energy storage up to 400 joules or more at 150 to 700 volts or more, 100 to 4,000 microfarad or more. Instantaneous SCR control available.

VM25-E-ALP6
100V TO 25KV OR 50KV RMS

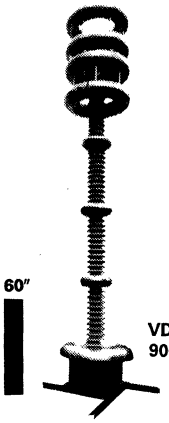
Hi-Ztm HV VOLTMETERS SAFE POWER LINE USE AC/DC FOR UTILITIES, CONTRACTORS & FIRE & SAFETY DEPARTMENTS

Fully safe, portable, all solid state, 2% to 5% accuracy. Taut band shielded high voltage measurement with minimum circuit loading. 0.001V to 50KV AC and DC. Ideal for use with Elbow capacitance tap voltage test points. For cable test point or direct line voltage and phasing, or differential measurement. Digital also available with 0.5%-1% accuracy.

WIDE BAND HV VOLTAGE DIVIDERS DC-10 MHz

Precision compensated resistance-capacitance voltage dividers for 1KV to 900KV, DC up to 10MHz or to 0.02μ Sec rise time pulse. 1,000/1 ratio matched to 1 megohm, 20 to 50 pf display or recorder. Other ratios and loads as required. Accuracy and stability: 0.01% to 0.1% DC. 0.2% to 1% AC 3% DC-1MHz. 3DB 10MHz.

VD60-6.2-B-LB-A
60KV PK OPERATE



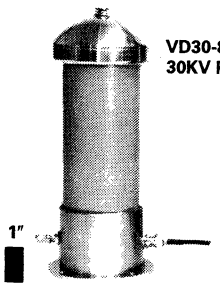
WEATHER PROOF WIDEBAND HIGH VOLTAGE DIVIDERS For Power Line Use

High accuracy 5KV RMS to 345KV RMS power class. 30KV PK to 900KV PK operate. 60KV to 1350KV basic impulse level. DC to 1MHz frequency response. For DC, AC and transient measurement and recording.

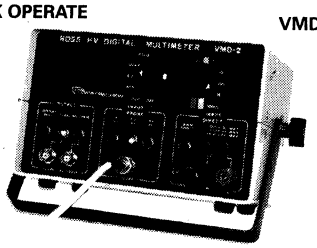
VD900-20-T-KB-E,
900KV PK OPERATE

HV DIGITAL MULTIMETERS

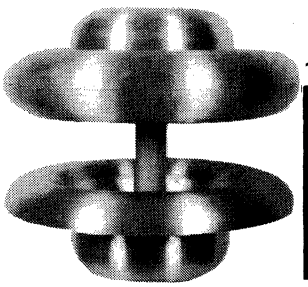
Easy to read, 4½-digit display; 0.1% and 0.01% accuracy. 0.0001 volt to 900KV. Battery/AC with charger. Recorder and scope outputs. DC, AC RMS average, AC RMS true, AC PK Ripple & Wide Band DC—1MHz.



VD30-8.3-A-LB-A,
30KV PK OPERATE



VMD2-FA

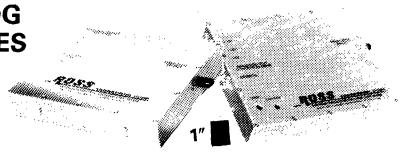


HIGH ACCURACY HV SHIELDED VOLTAGE DIVIDER 0.01% DC, 0.2%-3% AC

Special high accuracy, shielded, compensated resistance-capacitance voltage dividers up to 900KV wideband DC to 1MHz. Matched to 1 megohm, 50 PF or other load. Used for measurement of AC and DC, high frequency, line transients, and smalll differential pulse voltages.

VD150-10-CBD-KL-B,
150KV PK OPERATE

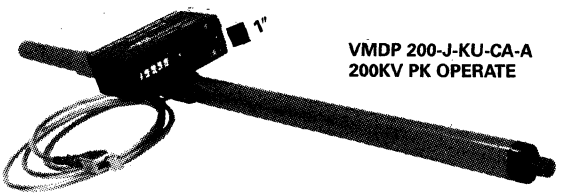
FIBER OPTIC TRANSMITTERS & RECEIVERS ANALOG DC-10MHz MODULES



Ross Engineering Corporation has developed basic wideband shock and vibration resistant analog fiber-optic transmitter and receiver modules. High accuracy output will drive DC-10MHz measurement control and recording instrumentation. Optional input impedances 1 megohm or 10 megohms. ±1V PK input with ±10V PK or +10V PK output. Also AC or 12V battery powered complete variable voltage range systems available. For high voltage they can operate with Ross Engineering Corporation's high accuracy high voltage wideband DC-10MHz Voltage Dividers up to 900KV PK.

HV DIGITAL PROBES

HV DC, AC, & Wideband DC-1HMz Safety Probes for any scope or digital display or VTVM. Also available complete with large 4½-digit display 0.1% to 5% AC/DC accuracy, safety handle digital voltmeter. Battery/AC with charger. Removable Digital Display or Multimeter. 0.0001 volt to 200KV.



VMDP 200-J-KU-CA-A
200KV PK OPERATE

WIDE BAND FIBER OPTIC TRANSMISSION DC-10MHz

AC or rechargeable battery/AC operated. DC to 10MHz System has a maximum output of 10V PK (20V PK to PK) and maximum input of .1V to 1,000V PK direct from signal source. Useful from 0.01V and to over 900KV when used with Ross HV wide band dividers. Single or multiple ranges.

High Accuracy Analog Systems

SCHRACK

—widening the horizons of relay performance

Schrack, founded in 1919, entered the relay business in 1950, and entered the American market in 1963. One of the largest General Purpose Relay manufacturers in the world, we employ over 3,000 people. We have three manufacturing plants in Austria and one each in Brazil and Mexico, with sales and service facilities located worldwide.

Schrack produces industrial and general purpose power relays, signal relays, miniature and PC relays. Printed circuit relays are manufactured under clean room conditions. As with all Schrack products, quality control is an integral part. Quality technicians are located at various production stages in every relay line. Computers provide in-line testing as well as 100% final testing. Schrack relays have most major world approvals including UL, CSA, VDE, Semko, Demko, Nemko. We maintain a modern warehouse in Ronkonkoma, New York and a nationwide network of representatives and distributors.

In addition to relays, Schrack designs and manufactures circuit breakers, street lighting controls, solenoids, power supplies, automotive controls and thick film hybrid components. Our systems group designs, manufactures and installs: telephone equipment and systems, digital radio links, fiber optic transmission equipment, security systems, fire alarm management systems, hospital communications management systems, hotel communication and fire alarm systems, broadcast studio systems, energy distribution systems and data systems.

Our customers expect products and services of the highest quality and at fair prices; continued success is proof of customer satisfaction.

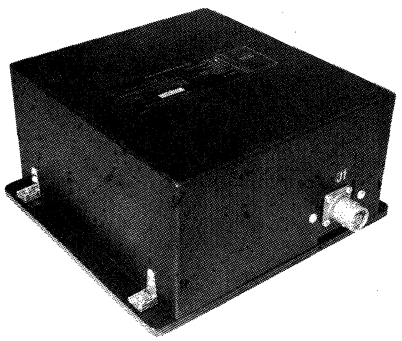
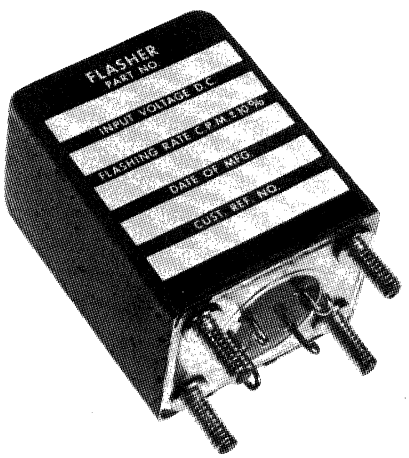
ELECTRIC POWER MONITOR



SPECIFICATIONS
INPUT VOLTAGE: 115 VRMS line to neutral ± 5.8 VRMS, 400 Hz ± 20 Hz, 3 phases plus neutral, phase sequence A-B-C (pins 1, 2, 3 & 8)
NORMAL OUTPUT: 28 VDC ± 2.8V, 4.5 to 5.0 AMP max. (pin 5), voltage regulation and ripple: 10% and 1V peak-to-peak max.
ALARM OUTPUT: 28 VDC nominal, 1.8 to 2.0 AMP max. (pin 7)
RESET SWITCH: Customer will supply a momentary normally open switch to permit normal operation when the switch is activated providing none of the fault conditions exist and the input voltage is applied (switch across pins 6 & 4)
MATERIAL AND FINISH: Housing is aluminum with black anodized finish.
OPERATING TEMP. RANGE: 0°C to +85°C
DIELECTRIC STRENGTH: 1250V, 60 Hz between contacts and case and between isolated circuits
VIBRATION: 5 to 55 CPS with DA of .06 in along any axis.
SHOCK: 20G'S for 11 MS
FAULT CONDITIONS: The monitor will supply the alarm output when any of the following conditions exist:
OVER/UNDER VOLTAGE SENSOR; Voltage is above 126.5 VAC ± 1.5V or below 105.5 VAC ± 1.5V across any one or more of the phases with respect to neutral.
PHASE SENSOR: Improper phase sequence (C-B-A) or if any one phase is open with the remaining phases closed.
FREQUENCY SENSOR: Frequency is above 420 Hz +0 Hz/–5 Hz or below 380 Hz +5 Hz/–0 Hz
VOLTAGE DROP: Any one or more of the phases drop to 95 VAC, the voltage regulation and ripple will be 10% and 1 volt peak-to-peak max. Any one or more of the phases drop to 80 VAC, the voltage regulation and ripple will be 30% and 3 volt peak-to-peak max. Any one phase is open while these conditions exist, the voltage regulation and ripple will be 30% and 6 volt peak-to-peak max.

FLASHERS



FEATURES:
- High reliability
- Rugged
- Hermetically sealed
- Compact and lightweight
- Solid state and relay outputs
- Long life

SPECIFICATIONS
SOLID STATE FLASHER
INPUT VOLTAGE: 18 to 32 VDC
POWER CONSUMPTION: 3 Watts (Not Including Lamp Power).
FLASHER OUTPUT: 200 ma, 500 ma, 2 AMP, or 5 AMP Lamp or Relay Load.
OUTPUT POLARITY: Positive or Negative Types.
NOT DAMAGED BY REVERSE POLARITY.
FLASHING RATES: AS SPECIFIED.
ON:OFF RATIOS ARE: AS SPECIFIED
OPERATING TEMPERATURE RANGE: –55 C to +71 C.
OPERATING LIFE EXPECTANCY: 10,000 Hours Min.
SHOCK: 100 G's for 11 Milliseconds
VIBRATION: 10 G's at 10 to 500 CPS.
HERMETICALLY SEALED.
MOUNTING: Stud or Flange.
SOLDER HOOK TEMINALS.
WEIGHT: 4 Ounces Nominal.
VOLTAGE DROP: 1.5 Volts Maximum.

RELAY TYPE FLASHER
INPUT VOLTAGE: 18 to 32 VDC.
POWER CONSUMPTION: 4 watts (not including lamp power).
FLASHER OUTPUT: 500 ma, 2 AMP, 5 AMP, lamp or relay load.
CONTACTS ARE S.P.S.T. normally open.
NOT DAMAGED BY REVERSE POLARITY.
FLASHING RATES: AS SPECIFIED.
ON: OFF RATIOS ARE: AS SPECIFIED
OPERATING TEMPERATURE RANGE: –55 C to +71 C.
OPERATING LIFE EXPECTANCY: 500,000 cycles minimum at rated load.
SHOCK: 15 G's for 11 milliseconds.
VIBRATION: 10 G's at 10 to 500 CPS
UNIT: Hermetically sealed.
MOUNTING: Studs or flange.
SOLDER HOOK TERMINALS.
WEIGHT: 8 ounces nominal.

PHASE SEQUENCE INDICATORS

DESCRIPTION
A unique passive element circuit within the housing allows the indicator to illuminate only when the phase sequence of power being monitored is A-B-C. The phase sequence indicator will not illuminate when any one or more of the power inputs are opened or if the phase sequence is C-B-A.

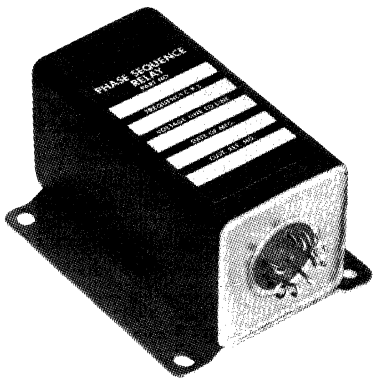
The indicator will provide trouble-free instantaneous indication with no warm-up time required. The units are potted in an aluminum housing with no moving parts. Designed to meet severe environmental requirements of military applications.

SPECIFICATIONS
POWER CONSUMPTION: 2 watts
OPERATING TEMPERATURE: –55 to +125 C
WEIGHT: 2 ounces
MOUNTING: 5/8 inch dia. hole, panel thickness to 3/4 inch
LEADS: 18 inches long, teflon insulated
HOUSING MATERIAL: aluminum, black anodized
FREQUENCY AND VOLTAGE: per customer specifications
INDICATOR: lights up when all input leads are energized and phase sequence is A-B-C

CONTROL COMPONENTS DIVISION 31069 Genstar Road, Hayward, CA 94544 USA
Phone 415/471-9717 FAX: 415/471-9752

SCIENTIFIC TECHNOLOGIES INCORPORATED

PHASE SEQUENCE RELAYS



FEATURES
- Designed for use in severe environmental conditions
- Automatic monitoring of phase sequence
- Solid state sensing circuit
- Hermetically sealed
- Light weight, small size
- Many voltages and frequency combination available

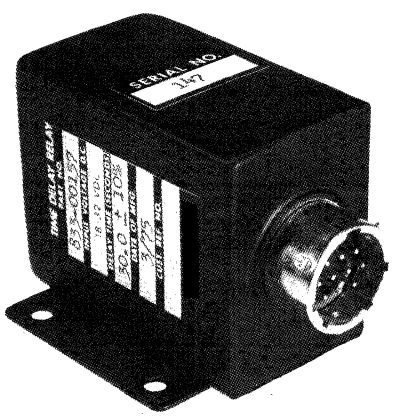
SPECIFICATIONS
Relay picks up when all input terminals are energized and phase sequence is A-B-C.
Relay drops out if one or more power leads are grounded, opened or if the phase sequence is C-B-A.
POWER CONSUMPTION: 10 watts maximum.
OPERATING TEMPERATURE: –55 C + 71 C
CONTACT RATINGS: (Per MIL-C-5757)

28 VDC	Resistive (Form C)	Inductive
2 AMP	2.0 AMPS	1.0 AMPS
3 AMP	3.0 AMPS	1.0 AMPS
10 AMP	10.0 AMPS	5.0 AMPS

115 VAC	Resistive (Form A&B)	Resistive (Form C)
2 AMP	2.0 AMPS	0.2 AMPS
3 AMP	3.0 AMPS	0.2 AMPS
10 AMP	10.0 AMPS	2.0 AMPS

VIBRATION: 10 G's to 500 Hz.
SHOCK: 30 G's for 11 milliseconds stud mount.
100 G's for 11 milliseconds flange mount.
SEAL: Hermetically sealed.
CONTACT RESISTANCE: .08 ohm maximum.
INSULATION RESISTANCE: 100 megohms minimum between terminals and case, between open contacts.
DIELECTRIC STRENGTH: 1000 Vrms 60 Hz, between terminals and **CASE;** 500 Vrms 60 Hz, between open contacts.
LIFE: 100,000 operations minimum.
WEIGHT: 11 ounces maximum.
Relays per MIL-R-5757.
Environmental testing per MIL-E-5272.
Test methods per MIL-STD-202.
Marking per MIL-STD-130.

TIME DELAY RELAYS



FEATURES
- Solid state sensing circuit
- Transient protected
- 2 amp, 3 amp, and 10 amp relay contacts, dpdt.
- Hermetically sealed.
- Light weight (3.5 to 9 oz).
- Choice of 3 operating modes.
- Designed for use in severe environmental conditions.

SPECIFICATIONS
INPUT VOLTAGE: 18 to 32 vdc
POWER REQUIREMENTS AT 28 VDC: 5 watts max, 2 amp relays
6.5 watts max, 10 amp relays
TEMPERATURE RANGE: –65 F to + 185 F
VIBRATION: 20 G's, 10 to 2000 Hz
SHOCK: 100 G's for 11 milliseconds
CONTACTS: DPDT
LIFE: 100,000 cycles minimum at rated load
DROP-OUT TIME: 10 milliseconds max.
DROP-OUT VOLTAGE: 1 volt min.
PULL-IN VOLTAGE: 18 volts max.
INSULATION RESISTANCE: 100 megohms min.
DIELECTRIC STRENGTH: 500 volts 60 Hz case to terminals and across open contacts
CONTACT RATING:
2 amp & 3 amp unit: 2 amp & 3 amp resistive at 32 vdc
1 amp inductive at 32 vdc
10 amp unit: 10 amp resistive at 28 vdc or 115 vac
5 amp inductive at 28 vdc or 115 vac
CONTACT RESISTANCE: 0.050 ohms at rated current
RESET-TIME: 0.050 sec. max.
TRANSIENT PROTECTION: Will not be damaged by transients per Mil-Std-704
INTERNAL RELAYS: Per MIL-R-5757

SHARP Optoelectronics

Solid State Relays

Sharp has a wide product line-up, such as multi-channel types suited for high density mounting, DIP type, SIP type, and TO-220 package type as solid state relays for medium power control of on-state current ranging from 0.6 to 16A.

Model No.	Internal connection diagram	Features	Zero cross circuit	Package	Approved by overseas safety standard		Absolute maximum ratings			Electrical characteristics

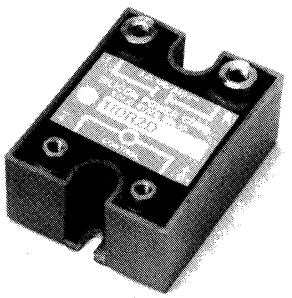
SILICON POWER CUBE

SOLID STATE AC POWER RELAYS

UL Recognized/CSA Certified



FEATURES:

- SPC's Inverse-Parallel SCR Power Hybrid Technology provides highly efficient thermal management for greatly increased cyclic life.
- High performance/low cost circuit design.
- Logic compatible inputs.
- "Zero voltage", and phase controllable "random switching" versions.
- High voltage (1200 Vpk) versions for 480 V_{RMS} service.
- Industry standard "hockey puck" package.
- 4000 V_{RMS} optical isolation.

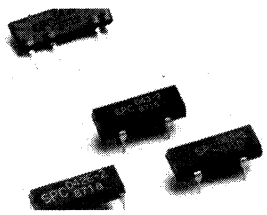
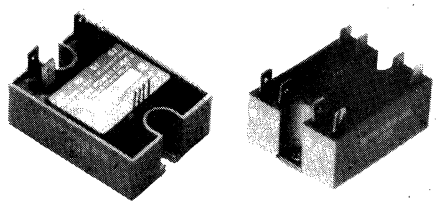
BOARD LEVEL SOLID STATE RELAYS

TO-116 DIP and 4-pin SIP packages employing thick film hybrid circuitry. Includes AC and DC switching versions from signal level to 1 amp output, with switching speeds as low as 1 µsec.

Three industry standard encapsulated PCB mount packages with AC output current ratings of 2.5 to 4 amps. Featuring 4000 Vrms optical isolation, logic compatible 3-32 Vdc input range, and either zero crossing or random phase controllable turn-on.



BOARD LEVEL RELAYS



SPECIAL PURPOSE RELAYS

Part Number	Input Specifications Voltage (VDC)	Input Specifications Current (mA at 5V)	Output/Load Ratings (max.) Current	Output/Load Ratings (max.) Voltage	Output/Load Ratings (max.) AC/DC
D42E-2*	3.5–15	8	1A	280VRMS	AC

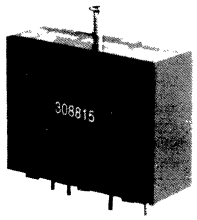
MP240D4SP	3–32	1	4A	280VRMS	AC

* Add "H" suffix to P/N for 600V pk output voltage rating.
** Guaranteed turn-on at 5mA dc. No internal current limiting or regulation.
*** Part numbers shown are zero switching versions. Add suffix N for random turn-on.

IAC/IDC/OAC/ODC SERIES

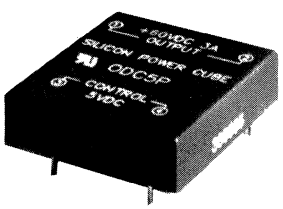


FEATURES

- Color-coded by Function
- 4000 Vrms Optical Isolation
- Industry Standard Package and Pin-out
- High Transient Noise Immunity
- Series Operation Compatibility
- UL Recognized, CSA Certified, SEV Approved Types Available

Industrial environments can subject sensitive microelectronic circuits to undesirable stresses in the form of voltage transients,electrical noise, shock, vibration, etc. These can result in permanent damage, spurious operations or false indications. SPC's I/O modules are designed to provide an electrically clean, photo-isolated, noise-free "output" interface from logic level control systems to external loads such as motors, valves, solenoids, etc., or, and "input" interface from the load or sensors to microprocessor or computer-based logic level systems. Used with SPC's I/O mounting boards, these solid-state modules exhibit long, reliable life in industrial environments.

IACP/IDCP/OACP/ODCP SERIES

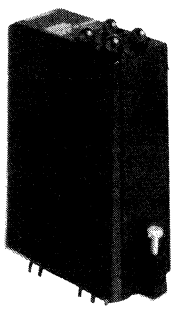


FEATURES

- Low Profile Permits 0.50 inch (12.70mm) PC Board Spacing
- Industry Standard Footprint
- Color-Coded by Function
- 4,000 Vrms Optical Isolation
- High Transient Noise Immunity
- Series Operation Compatibility
- UL Recognized, CSA Certified

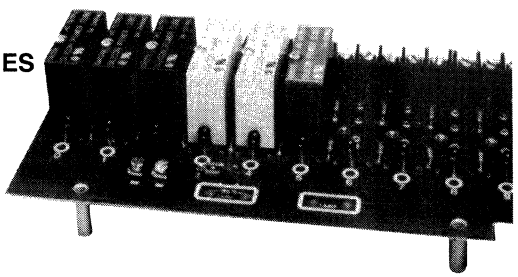
These flat pack modules offer reliable input-output interfacing in a low profile package outline that permits PC board spacing on half-inch centers.

IACQ/IDCQ/OACQ/ODCQ SERIES



Each quad module has four I/O channels of the same type. They provide a high packaging density means of reliably interfacing logic level control systems with external loads such as motors, valves, solenoids, etc., or as an interface from the load or sensors to microprocessor or computer-based logic level control systems.

PB SERIES



These mounting boards will accept input/output modules in any combination of input or output types of the same style (single or quad channel). Modules can be easily and quickly inserted, without disturbing field wiring. the single channel models provide an LED status indicator, plug-in 5 amp fuse and 3.3 Kohm pull-up resistor for each module.

Fig. D

AC POWER CONTRACTORS

Fig. B. Type 75—DPNO: screw power terminals, #8 solid wire max. Quick connect or 13″ lead coil termination. Protective contact cover. Hardware included.
Size: 2 1/2″ × 2 1/8″ × 2 1/4″ overall.

Fig. C. Type 154—3PNO (40 amps type also with DPNO). 20 and 25 amps, screw connectors line and load side for #14 through #8 wire; 1/4″ double quick connect auxiliary and coil terminals. 30 and 40 amps, pressure connectors on line side for #14 through #4 wire: screw connectors on load side (pressure connectors for 40 amps): 1/4″ double quick connect auxiliary and coil terminals. Non-positional type 154 power contractors come with interchangeable mounting: low coil wattage and non-corroding structure. Type 154 has low temperature rise: riveted terminal assemblies. Hardware included in boxed quantity only. **Size:** 3 3/4″ × 3 1/8″ (3 1/4″ for 40 amps) × 2 3/4″ overall.

Fig. D. Type 143—DPNO: screw power terminals #10 solid wire max. Auxiliary quick-connect terminals: straight-thru wiring: double break contacts. Hardware included in boxed quantity only. **Size:** 3 1/4″ × 2 3/8″ × 2 1/2″.

AC Power Contractors

Contact amp ratings listed are continuous unless noted otherwise.

Type	Contact Rating (AC), Inductive
75	1 hp/pole, 115/230 V; 2 pole, 2 hp, 230 V or 18 amps cont. (90 amps inrush): 25 amps, 240 V, pole resistive.

Part No.	Contacts	Coil Volts
75-901	DPNO	24
75-902	DPNO	115 120
75-903	DPNO	208 240

AC-DC Relays

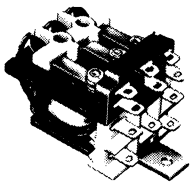

FIG. A

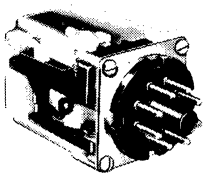

FIG. B

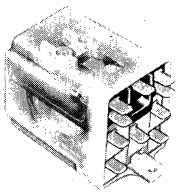

FIG. C

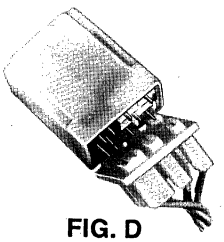

FIG. D

AC-DC GENERAL PURPOSE RELAYS

Contact Rating: Button: Fine silver contacts rated 1/6 hp. inductive. 10 amps, resistive at 120 VAC: 1/3 hp. inductive. 5 amps resistive at 240 VAC. Crossbar: Gold alloy contacts rated 1/10 hp. inductive. 5 amps, resistive at 120 VAC: 1/8 hp. inductive. 3 amps, resistive at 240 VAC. Both types rated 5 amps resistive at 28 VDC. **Breakdown Voltage:** 1500 V rms, 60 Hz. opposite polarity or to ground: 1500 V rms. 60 Hz, open contacts with same polarity. **Coil Rating:** 1.5 watts DC: 3.0 watts nominal AC (4 watts maximum, 4.5 watts inrush). **Pick-Up:** 75% DC, 85% AC. **Maximum Temperature:** 160°F ambient. **Electrical Life:** 100,000 operations at rated load. **Mechanical Life:** 10 million operations, no load (60 per minute).

OPEN TYPE SOLDER TERMINALS (FIG. A)

Designed for front mounting. Suitable also for single-hole screw or stud rear mounting. All terminals out front. One-piece molded bobbin and terminal board construction. Highly resistant to arc tracking. **Size:** 1 15/16" x 1 5/16" x 1 5/16".

WITH 10-AMP BUTTON CONTACTS

Part No.	Coil Voltages (50/60 Hz)	Contacts
93-905	24 VAC	DPDT
93-909	120 VAC	3PDT
93-911	208/240 VAC	DPDT
93-912	208/240 VAC	3PDT

ENCLOSED TYPE PLUG-IN TERMINALS (FIG. B)

With 8-pin octal base for SPDT and DPDT poles; 11-pin base for 3PDT poles. **Size:** 2 1/8" x 1 7/16" x 1 9/16".

WITH 10-AMP BUTTON CONTACTS

Part No.	Coil Voltages (50/60 Hz)	Contacts
93P-908	120 VAC	DPDT

- Max. Pick-Up 70% rated coil voltage.
- Design Ambient—40°C to 65°C
- Maximum Continuous coil watts. 12 @ rated voltage.
- Recommended Mounting Position: Unit in vertical plane with coil terminals up. Horizontal plane is acceptable.
- Design meets U.L. 583 Industrial Truck Standard. Dust and splash proof cover.
- Application: Controlling D.C. starting motors on gasoline engine driven auxilaries. Battery charging power circuits, motor reversing circuits as found in winch applications.
- The 124 is also applicable where ruggedness and high current capacity is required for D.C. mobile equipment such as: in-plant lifts, industrial equipment, recreational vehicle—golf carts, camp trailers, motor homes.
- Contact Termination: 5/16"-24 UNC-2A stud.
- Coil Termination: #10-32 UNF-2A tread.

TYPE 586

Sealed Solenoid is Dust and Splash Proof

4 TERMINAL Continuous Duty Coil Silver Contacts
Pole Form: SPNO, SPDT

Incorporates double-make or double-break contacts

Type 568 coil is rated approximately 12 watts continuous duty. Contact rating 200 Amps.

QUALIFIED PRODUCT LIST
Mil P/N CROSS REFERENCE
SD/Hi-G Company vs Military Part Numbers

The part numbers listed which refer to MIL-R-6106, and associated M.S. sheets, for Type I ER relays show current qualification levels at time of this publication.

The Part Numbers Listed refer to MIL-R-39016 and MIL-R-28776 Level "L". To specify Level "M" or Level "P" Relays, change the suffix "L" to both Hi-G Company and Military Part Numbers to "M" or "P". (Example: "M" Level version of M39016/7-013M, Hi-G P/N J1MAW-5XM)
Note: All Relays Listed are qualified to Levels "L", "M" and "P".

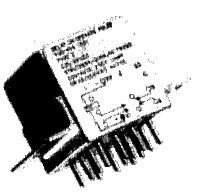
MIL SENSORS FOR VOLTAGE, CURRENT OR FREQUENCY



Struthers-Dunn custom designs and manufactures various sensors, to monitor AC and DC circuits and detect and signal when the parameters of voltage, or current, or frequency deviate from the required nominal range. All are designed to meet the environmental specifications for military and aerospace applications.

These sensors typically employ some appropriate version of our extensive line of MIL-approved relays, combined with the sensing and relay control circuitry. A time-delay option can be added, to hold off relay operation when an abnormal condition is transient or can be tolerated for some longer preset time.

Sensor relay contacts are available in many configurations, from S.P.D.T. reed contacts, suitable for control of signal lights, to 4-pole 10 amp or 3-pole 25 amp power contacts, to control 3-phase circuits. Magnetic latching relays can be provided for all contact arrangements.

Enclosures are hermetically sealed with terminals for socket plug-in, circuit-board mounting, or solder hooks.

Three enclosure types suitable for sensor assemblies are dimensioned below: No. 1 can provide up to D.P.D.T., 10 amps; Nos. 2 and 3 up to 4PDT, 10 amps; and No. 3 3 PST-NO, 25 amps plus auxiliary S.P.D.T. 2 ampere contacts, or 3PDT, 25 amps.

Dimensions in inches ± .010 and (MM ± .25) except as noted.

AC & DC VOLTAGE SENSORS

SERIES	1310 & 1350
Applicable Mil-Spec	Designed to meet environmental requirements of MIL-R-83726
FEATURES	• AC 1350 Series • DC 1310 Series
ELEC.	
Pull-In Voltage	50 to 150 Vac, 10 to 150 Vdc
Drop Out Voltage	1.5 Vac, 0.25 Vdc below pull-in
Sensing Function	Relay energized above pull-in voltage
Current Drain	100 ma. AC, 15 ma. DC max. @ 25°C
% Accuracy	±2.5%
Max. Voltage	150% of pull-in voltage
Auxiliary Voltage	—
Operate Time	50 ms. max.
Release Time	50 ms. max.
Contact Rating	2A res. @ 30 Vdc
No. of Cycles	100K
Contact Form	D.P.D.T.
Dielectric Strength	1,000 Vrms, 60 Hz, all terminals to case
MECH. Dimensions (LxWxH)	1.250" x 1.000" x 2.000" max.
Weight	3.5 oz. (99g) max.
Terminals	J-type solder hooks
ENVIR Temperature	*–55°C to +125°C
Shock	50G, 1 ms.
Vibration	20G, 10 to 2,000 Hz

FREQUENCY SENSORS

SERIES	7000
Applicable Mil-Spec	Designed to meet environmental requirements of MIL-R-83726
FEATURES	—
ELEC.	
Input Voltage	95 to 135 Vac
Input Frequency Range	40 to 480 Hz
% Accuracy	±2%
Contact Form	D.P.D.T.
No. of Cycles	100K min.
Contact Rating	4A res. @ 30 Vdc
Dielectric Strength	1,000 Vrms, 60 Hz, all terminals to case
Insulation Res.	1,000 MΩ min. @ 500 Vdc
Current Drain	150 ma. max.
Hysteresis	0.5% from Trip Point
Sensing Function	Relay energizes above frequency set point
	S.P.D.T. available, 125°C Frequency Band Sensing available.
MECH. Dimensions (LxWxH)	1.790" x 1.284" x 2.419" max.
Weight	8.5 oz. (241g)
Terminals	J-type solder hooks
ENVIR Temperature	*–55°C to +85°C
Shock	50G, 1 ms.
Vibration	20G, 10 to 2,000 Hz

PHASE SENSORS

SERIES	1400
Applicable Mil-Spec	Designed to meet environmental requirements of MIL-R-83726
FEATURES	• P-type for static loads • Q-type for motor loads • Available in commercial plug-in unit • Consult factory for custom units
ELEC.	
Input Voltage	115 or 208 Vac
Input Frequency	50, 60 or 400 Hz
Operate Time	75 ms. max.
Release Time	100 ms. max.
Contact Form	S.P.D.T.
No. of Cycles	100K
Contact Rating	2A res. @ 30 Vdc
Dielectric Strength	1,000 Vrms, 60 Hz, all terminals to case.
Insulation Res.	1,000 MΩ min. @ 500 Vac
Sensing Function	Relay energizes for phase sequence A, B & C
MECH. Dimensions (LxWxH)	2.640" x 1.740" x 4.000" max.
Weight	12 oz. (350) max.
Terminals	"J" type solder hooks
ENVIR Temperature	*–55°C to +85°C
Shock	50G, 1 ms.
Vibration	20G, 10 to 2,000 Hz

TELEDYNE RELAYS

Centigrid® Military Relays

- **General purpose 114 Series**
- **Sensitive 134 Series**

The Centigrid® 114 Series relays are subminiature, hermetically sealed, armature relays featuring low profile, .275" (6.99mm) high by .370" (9.4mm) square, with .100" grid spaced terminals. The sensitive 134 Series is .375" (9.5mm) high and features ultra-low coil power dissipation. Both Centigrids® feature all-welded construction, hermetic sealing, and high force/mass ratios for excellent resistance to environmental extremes. Gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low intercontact capacitance provide RF switching capability well into the UHF spectrum. The 114 Series and 134 Series are qualified to L, M and P levels of MIL-R-39016.

CMOS Compatible Centigrid® Military Relays

- **CMOS compatible general purpose 116C Series**
- **CMOS compatible sensitive 136C Series**
- **CMOS compatible magnetic latching 122C Series**

CMOS compatible Centigrid® relays are subminiature, hermetically sealed, armature relays capable of being directly driven by most IC logic families. Their low profile height and .100" grid spaced terminals, which precludes the need for spreader pads, make them ideal for applications where extreme packaging density and/or close PC board spacing are required. The 116C and 136C Series are qualified to L and M levels of MIL-R-28776 and incorporate internal silicon planar epitaxial type diodes for coil suppression, zener diodes to protect the MOSFET gate inputs, and N-channel enhancement-mode MOSFET chips. The 122C, which incorporates the same interface circuitry as the 116C and 136C, is a magnetic latching relay which is actuated by a short duration voltage pulse. The magnetic "memory" of this device precludes the need for constant bias and or battery backup in the event of system power failure.

TELEDYNE RELAYS

Surface Mount Centigrid® Military Style Relays

- **General purpose S114 Series**
- **Sensitive S134 Series**

Teledyne Relays' S114 and S134 Series are subminiature, hermetically sealed, surface mountable relays, which combine the proven reliability of the Centigrid® Series relays with pre-tinned leads specifically formed in compliance with MIL-STD-454 to make them ideal for all types of surface mount reflow processes. The basic design and internal construction are identical to the 114 & 134 Series Centigrid® relays (as described on Page 2) and meet the requirements of MIL-R-39016.

Low Cost 172 Series Centigrid® Commercial/Industrial Relays

Low cost commercial versions of the DPDT MIL qualified Centigrid® relays. Hermetic sealing, all welded construction, and gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low intercontact capacitance provide RF switching capability well into the UHF spectrum.

TELEDYNE RELAYS

High Environmental Military Style TO-5 Relays

Designed to withstand severe environmental conditions of shock, vibration, or elevated temperature in excess of normal military specification levels. The following versions are available, all of which meet other requirements of MIL-R-39016:

412H Series—High Temperature (200°C)
412K Series—High Shock (4000 g's/0.5ms)
412V Series—High Vibration (380 g's @ 200 Hz)
432H Series—High Temperature (200°C)
432V Series—High Vibration (380 g's @ 200 Hz)
422H Series—High Temperature (200°C)
422K Series—High Shock (2000 g's/0.5ms)

RF Relays

- **RF120 Series Military Style Centigrid® Relays**
- **RF170 Series Commercial Centigrid® Relays**

The RF120 and RF170 Series relays are subminiature, hermetically sealed Centigrid® relays featuring extremely low intercontact capacitance that have been optimized to provide exceptional RF performance over the full UHF spectrum. These Series combine microwave switching capability with Teledyne Relays' superior all-welded construction, proven magnetic-latching design, and high force/mass ratios for ruggedness and performance stability in severe environments. Gold plated precious metal contacts ensure reliable DC switching from low-level to ½ amp, as well as low, stable insertion loss.

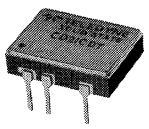
TELEDYNE SOLID STATE

Military Solid State Relays

CD Series — Low Cost — Short Circuit Protected
Status Indication — Optically Isolated — 60 Vdc Power FET Output



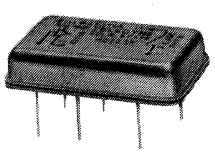
The CD Series is a family of low cost military solid state relays with all the features of our standard solid state relays.

PART NUMBER*	DESC DRAWING NUMBER	RELAY TYPE	MAXIMUM LOAD CURRENT (25°C)
CD00CFW	90091-007	Basic Solid State Relay (SSR)	2.0 Adc
CD00CFY	90091-008		
CD01CFW	90091-005	SSR with Control Status	2.0 Adc
CD01CFY	90091-006		
CD20CDW	90091-003	SSR with Short Circuit Protection	1.0 Adc
CD20CDY	90091-004		
CD21CDW	90091-001	SSR with Short Circuit Protection and Control Status	1.0 Adc
CD21CDY	90091-002		

* The W or Y suffix denotes the screening level of MIL-R-28750.

- **TTL/CMOS Logic Compatible Control**
- **Integrated Short Circuit/Current Overload Protection**
- **Status Indication Provides System Built-In-Test Capability**
- **Low Profile Hermetically Sealed Ceramic Package**
- **Meets MIL-STD-704 Surge and Spike Requirements for 28 Vdc Systems**

HD Series — Short Circuit/Current Overload Protected
True Output Status Feedback — Optically Isolated



PART NUMBER*	DESC DRAWING NUMBER	RELAY TYPE	MAXIMUM LOAD CURRENT (25°C)
HD00CFW	88062-007	Basic Solid State Relay (SSR)	2.1 Adc
HD00CFY	88062-008		
HD02CFW	88062-005	SSR with Switch Status	2.1 Adc
HD02CFY	88062-006		
HD20CFW	88062-003	SSR with Short Circuit Protection	2.1 Adc
HD20CFY	88062-004		
HD22CFW	88062-001	SSR with Short Circuit Protection and Switch Status	2.1 Adc
HD22CFY	88062-002		
HD24CFW		SSR with Short Circuit Protection and Trip Status	2.1 Adc
HD24CFY			

* The W or Y suffix denotes the screening level of MIL-R-28750.

- **TTL/CMOS Logic Compatible Control**
- **Optically Isolated Switch Status Indicates True Output State**
- **Integrated Short Circuit/Current Overload Protection**
- **60 Vdc Power FET Output**
- **Low Profile Hermetic Package**
- **Meets MIL-STD-704 Surge and Spike Requirements for 28 Vdc Systems**
- **Available with Short Circuit Trip Status (HD24CF)**

TELEDYNE SOLID STATE

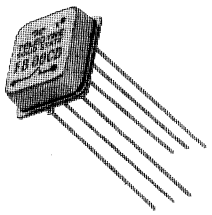
Military Solid State Relays

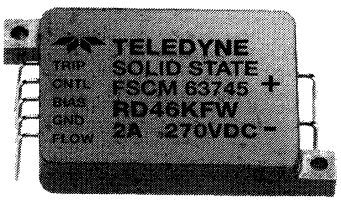
FB Series — Bi-directional Power FET Output
Low Leakage — Optically Isolated — Fast Switching Speed

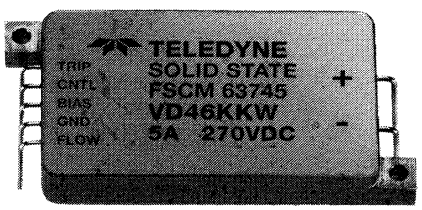


PART NUMBER*	DESC DRAWING NUMBER	RELAY DESCRIPTION	MAXIMUM TURN-ON TIME	MAXIMUM TURN-ON TIME
FB00CDW	89116-005	Basic Solid State Relay ±1.0 A @ ±80 Vdc Output	800 μs	500 μs
FB00CDY	89116-006			
FB00FCW	89116-001	Basic Solid State Relay ±0.5 A @ ±180 Vdc Output	800 μs	500 μs
FB00FCY	89116-002			
FB00KBW	89116-003	Basic Solid State Relay ±250 mA @ ±350 Vdc Output	500 μs	500 μs
FB00KBY	89116-004			

* The W or Y suffix denotes the screening level of MIL-R-28750.

- **High Voltage Power FET Output**
- **Low Leakage Current (< 200 Nanoamperes)**
- **Third Output Pin Doubles Load Current Capability**
- **Adjustable Turn-on Times**
- **Low Profile 6 Pin Mini-DIP Package**





RD/VD Series — Solid State Relays
28 and 270 Vdc Remote Power Controllers

PART NUMBER*	RELAY DESCRIPTION
RD46CF	Solid State Relay 28 Vdc, 2A Power Controller
RD46CK	Solid State Relay 28 Vdc, 5A Power Controller
RD46CL	Solid State Relay 28 Vdc, 7.5A Power Controller
VD46CM	Solid State Relay 28 Vdc, 10A Power Controller
VD46CN	Solid State Relay 28 Vdc, 15A Power Controller
RD46KD	Solid State Relay 270 Vdc, 1A Power Controller
RD46KF	Solid State Relay 270 Vdc, 2A Power Controller
VD46KK	Solid State Relay 270 Vdc, 5A Power Controller

* A suffix, W or Y, denoting the screening level of MIL-R-28750 must be added to the part number.

- **Temperature-independent Current Rating and Overload Protection**
- **Integrated Short Circuit Protection**
- **Surge Tolerant Overcurrent Protection Prevents Nuisance Tripping**
- **Optically Isolated Output and Status Lines**
- **Output Capable of Sourcing and Sinking Load Current**
- **Extremely Low ON Resistance**
- **Flow and Trip Status**
- **TTL-CMOS Compatible Control**
- **Meets Surge and Spike Requirements of MIL-STD-704**
- **Low Profile Hermetic Package Designed for MIL-STD-2000 compliance**

TELEDYNE SOLID STATE

Commercial/Industrial Solid State Relays

Subminiature Solid State Relays in Standard DIP Packages

Features all solid state circuitry with hybrid microcircuit construction, and high input/output isolation (up to 2500 Volts/10^9 Ohms). Fourteen models available providing choice of output: bi-directional, AC (zero or non-zero switch) and DC. The 640 Series, 643 Series and C46/47 Series are direct pin-for-pin replacements for standard TO-116 DIP reed relays.

- **641/645 Series and 645V-2H are UL recognized (File #55197) and CSA certified (File #31043)**
- **645V-2H is VDE approved to VDE 0883/6.80**
- **645 Series meets VDE and FCC Class A conducted emission limits**
- **C46/C47, and 645 Series are patented**

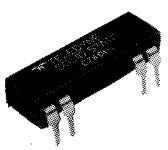
Solid State Computer Input/Output Interface Modules

C76 DIP I/O™ System
Optically Isolated — TTL/CMOS Logic Compatible Control



- **Enable Function on Inputs**
- **High Noise Immunity**
- **Meets VDE Voltage and Spacing Requirements**
- **TO-116 DIP Package (16 pin)**

PART NUMBER	TYPE	CHARACTERISTICS
C76AO-1	AC Output	3.8-16 Vdc Input 5-250 Vrms, 1 A Output
C76AI-1	AC Input	90-135 Vrms and 180-250 Vrms Inputs
C76DO-1	DC Output	3.8-16 Vdc Input 3-60 Vdc, 0.6 A Output
C76DI-1	DC Input	9-60 Vdc Input

Teledyne Solid State C76 DIP I/O™ Modules are designed for use in computerized control systems for noise-free isolated interfacing of computer logic elements to harsh industrial environments. Modules employ custom microcircuits in a TO-116 DIP. Eliminates mounting tracks for low "per-point" cost. Meets VDE requirements. Features CMOS and TTL compatibility, optical isolation, high noise immunity and an ENABLE function on input modules. For use in robotics, computerized process control, machine tool control, programmable controllers and ATE.

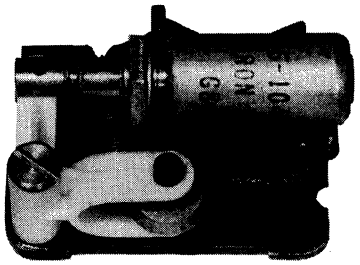
LINEAR MOTION SOLENOIDS

INFORMATION



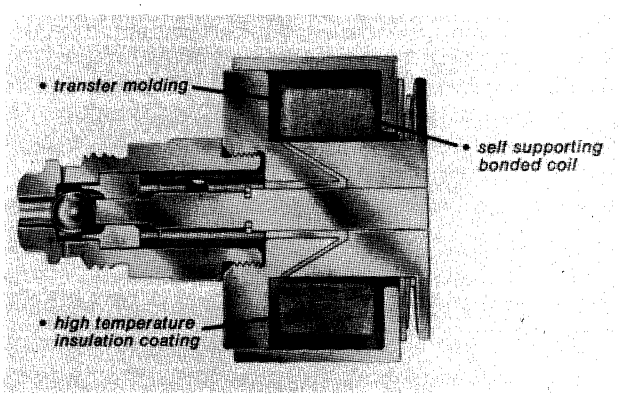
BICRON™

"Excellence Through Teamwork"

IMPORTANT ADVANTAGES FOR YOUR PRODUCT

- High Performance at High/Continuous Duty—Power Levels
- Tough—Durable—Dependable
- Exceptional Force vs. Size
- Harsh Environment Applications
- Mil-S-4040 Capability
- Value Priced
- ISO 9001 Quality System

QUALITY/RELIABILITY DESIGNED INTO BICRON SOLENOIDS:



FOR YOUR DESIGN

- Custom Designed Configurations to
- Your Requirements
  - Power
  - Envelope
  - Temperature
  - Submersible
- Your Construction
  - Box Frames
  - C Frames
  - Tubular Frames
  - Poppet Valves
- Your Insulation Systems
  - Including Class H

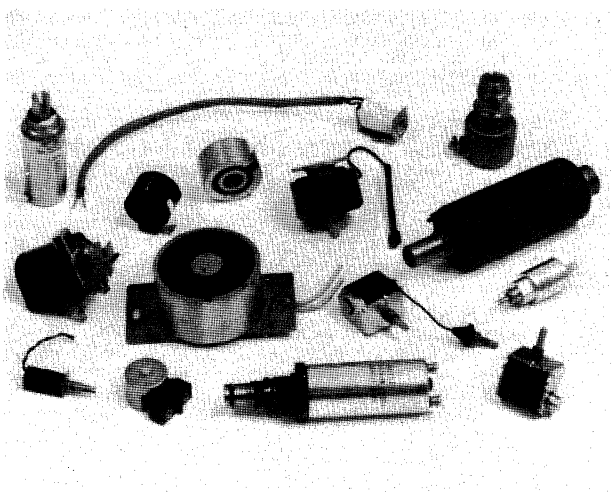
BICRON, established in 1964, is a manufacturer of "Modified Standard" and "Special Solenoids". Our products have found application in the Aerospace, Automotive, Door Hardware, Medical, Military, Off-highway and Trucking markets. The Total Quality Management process at BICRON has enabled us to be certified by numerous customers.

WITH BICRON

- Custom Designed Products at Standard Product Prices
- Personal Indepth Commitment
- Design Engineer Assigned to Your Project Until Completion
- Fast Prototype Deliveries
- Capacity to Meet Your Most Demanding Production Runs
- Proven Computer Aided Designs
- State of the Art Machining and Tooling Facilities
- 25 Years Solenoid Product Know-How

CUSTOM SOLENOIDS

We provide the expertise you expect and the delivery you require.



A selection of products produced for many of our OEM customers.

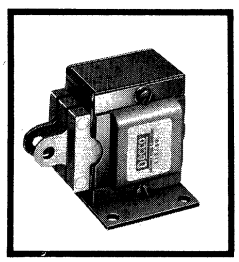
Decco® Solenoids

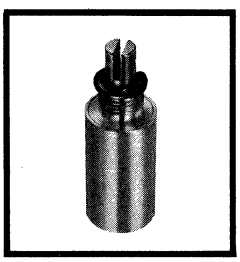
The standard by which all others are measured!

Today's leading designers and manufacturers of high-tech machinery and equipment look to Decco for top quality solenoids that perform flawlessly and dependably. Detroit Coil Company is a pioneer in the development of AC, DC, push and pull solenoids for use in virtually every conceivable industrial application. Solenoids are our only product, and we're proud of our technological advances. Our experienced staff's many years of accumulated know-how is yours for the asking. Standard models or specials, we'll help you solve your actuation problems.

INDUSTRIAL AC SOLENOIDS

Our "O" Series, Teen Series, 20 & 50 Series AC solenoids generate forces from 1.7 to 30 lbs. with strokes up to 1 inch. Push or pull models, horizontal or vertical mounting.



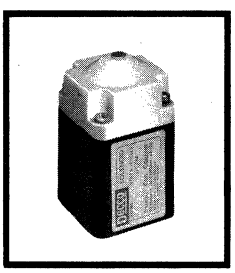


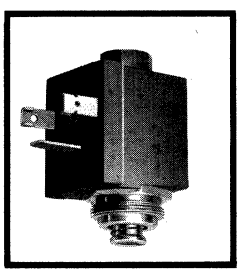
TUBULAR DC SOLENOIDS

For limited space applications. Fast and powerful, 3 sizes, 3 duty cycles, push or pull. 5/8", 7/8" & 1-1/8" diameter. Customized models available on request.

M-LINE AC SOLENOIDS

These sealed, molded "O" and "OO" Series push solenoids dissipate heat quickly for cooler operation. 2.6 to 4.2 lbs. force. .25 inch max. stroke. 6" leads are standard; plug-in connections optional on "O" Series.



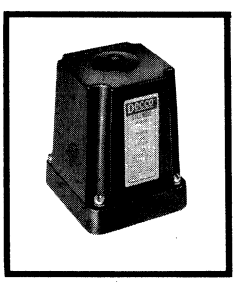


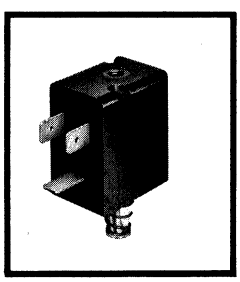
THE "PILOT" VALVE OPERATOR

For OEM valves. Compact, low wattage, long service life. AC or DC models. DIN, Pipe spud or wire lead connections. Threads into valve body.

"PACKAGED" AC SOLENOIDS

Our Series 710 solenoids are standard Teen Series models in a die cast zinc alloy cover. Forces from 4.50 to 10.25 lbs. Max. stroke .50 inch. Plug-in connection.



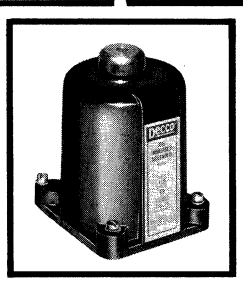


ECONOMY PILOT

An improved valve operator — simple in design, easy to install, economically priced. AC or DC. Standard ISO electrical connections.

OIL IMMERSED AC SOLENOIDS

Sealed in oil within a die cast housing. Provides high power and cool performance in dirty or corrosive atmospheres. 7 models. .31 to .50 inch max. strokes. 4.5 to 10.25 lb. force.



CUSTOMIZED SOLENOIDS

We will gladly give you experienced assistance in developing special AC or DC models to meet your special requirements.

Decco®

MADE IN USA

DORMEYER INDUSTRIES

3418 N. Milwaukee Ave., Chicago, IL 60641 / Tel: (1-312) 283-4000 Fax: (1-312) 283-4927

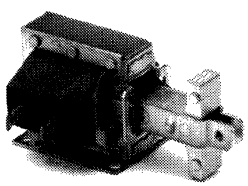
Laminated AC Solenoids

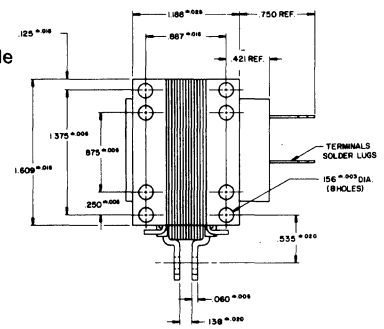
Standard Voltages 24 to 480 VAC
Stroke Length 0 to 1¼"
Pull Force up to 23 lbs.

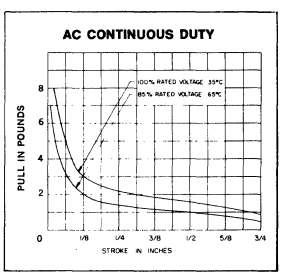
Super "T" Laminated Solenoids are designed to meet high pull force AC applications.

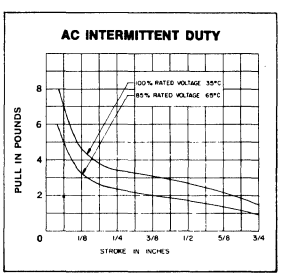
SERIES 1000 – 1/2" STACK

Standard Voltages:
AC: 240, 120, 48 and 24
Other AC voltages available on request.



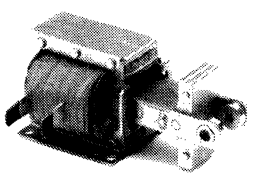


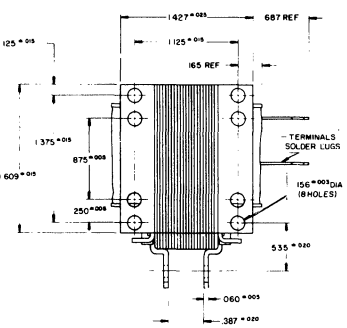


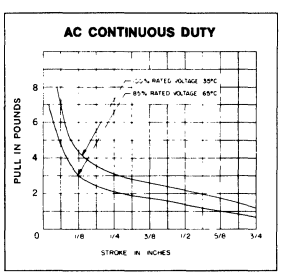


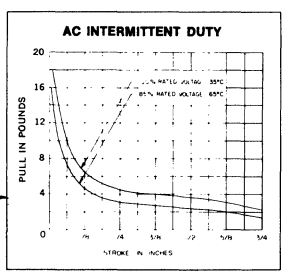
SERIES 1000 – 3/4" STACK

Standard Voltages:
AC: 240, 120, 48 and 24
Other AC voltages available on request.



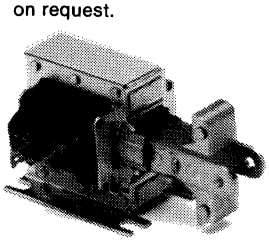


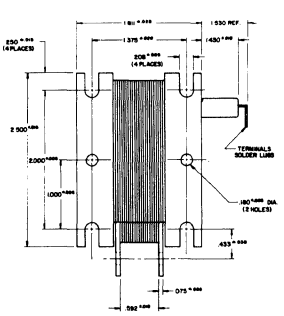


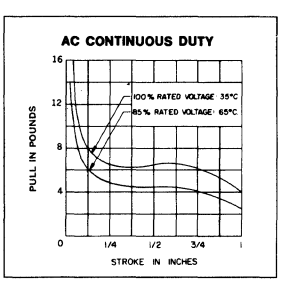


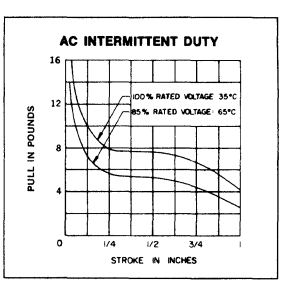
SERIES 2000 – 3/4" STACK

Standard Voltages:
AC: 240, 120, 48 and 24
Other AC voltages available on request.



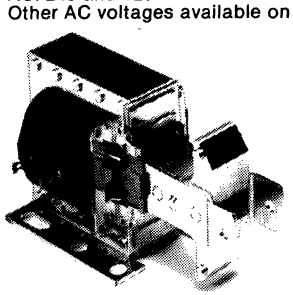


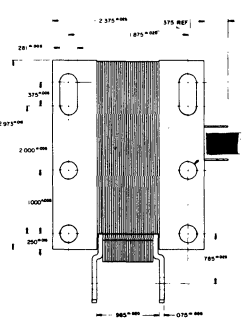


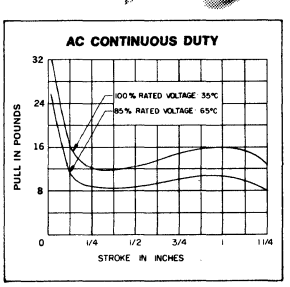


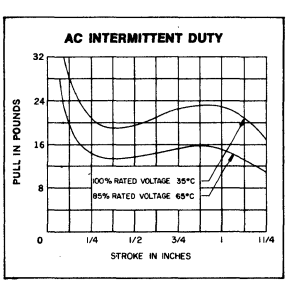
SERIES 3000 – 1" STACK

Standard Voltages:
AC: 240 and 120
Other AC voltages available on request.









DORMEYER INDUSTRIES

3418 N. Milwaukee Ave., Chicago, IL 60641 / Tel: (1-312) 283-4000 Fax: (1-312) 283-4927

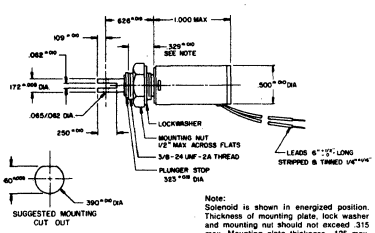
DC Tubular Solenoids

Standard Voltages: 12 to 24 VDC
Stroke Length: 0 to ½" pull,
0 to 3/16" push
Force - pull: up to 70 oz.
Force push: up to 50 oz.

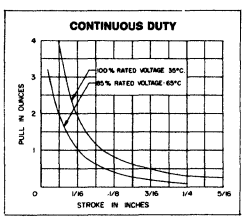
Tubular solenoids are designed to offer very high reliability and exceptionally high cycle life. Both push and pull models are available.

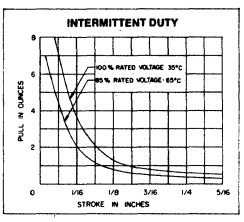
P-2 PULL TYPE

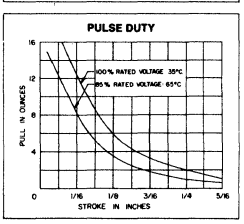
Standard Voltages:
DC: 12 and 24
Other DC voltages available on request.



Note:
Solenoid is shown in energized position. Thickness of mounting plate, lock washer and mounting nut should not exceed .315 max. Mounting plate thickness, .125 max.

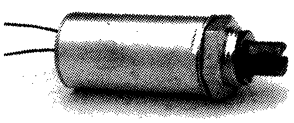


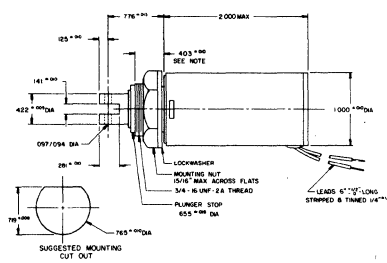




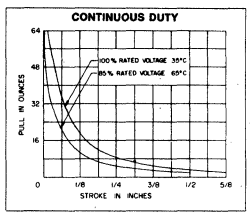
P-6 PULL TYPE

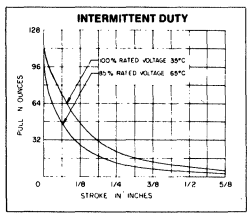
Standard Voltages:
DC: 12 and 24
Other DC voltages available on request.

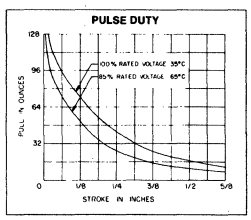




Note:
Solenoid is shown in energized position. Thickness of mounting plate, lock washer and mounting nut should not exceed .390 max. Mounting plate thickness, .125 max.

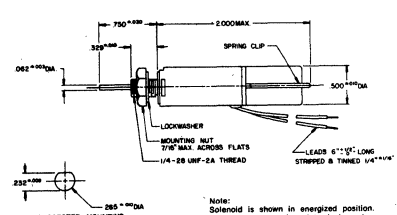




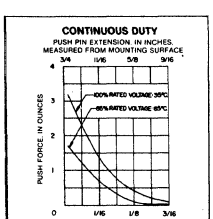


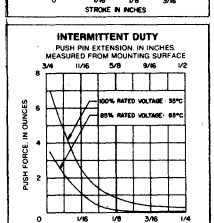
P-8 PUSH TYPE

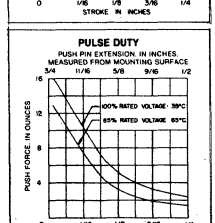
Standard Voltages:
DC: 12 and 24
Other DC voltages available on request.



Note:
Solenoid is shown in energized position. Thickness of mounting plate, lock washer and mounting nut should not exceed .315 max. Mounting plate thickness, .125 max. Solenoid stroke .250: intermittent and pulse duty. Solenoid stroke .187: continuous duty.

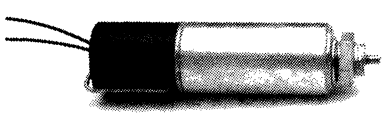


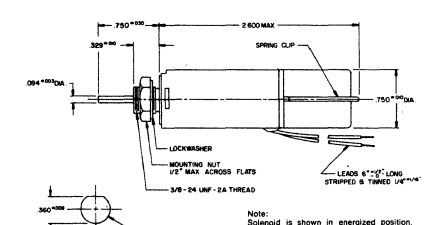




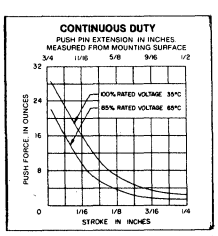
P-10 PUSH TYPE

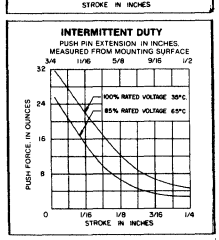
Standard Voltages:
DC: 12 and 24
Other DC voltages available on request.

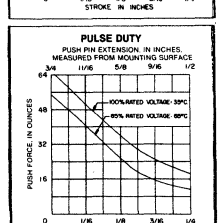




Note:
Solenoid is shown in energized position. Thickness of mounting plate, lock washer and mounting nut should not exceed .315 max. Mounting plate thickness, .125 max. Solenoid stroke .250







OTHER SIZES ALSO AVAILABLE

Frame Solenoids

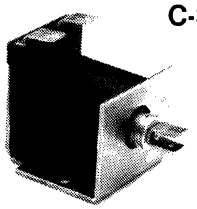
Dormeyer SOLENOIDS

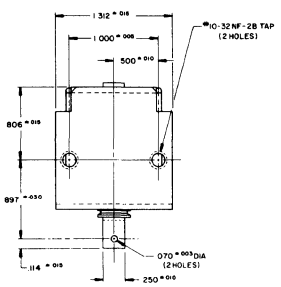
C FRAME SERIES

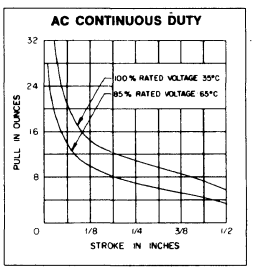
Standard Voltages: 12 to 240 VAC and 6 to 115 VDC
Stroke Length: 0 to ¾"
Pull Force: up to 45 oz.

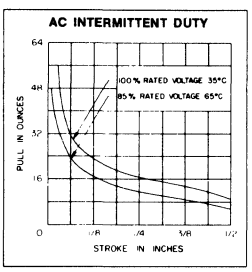
The C Frame Series is our lowest cost line of solenoids. We are tooled for high volume production. Mounting hole locations and dimensions, terminals styles , as well as plunger configurations, are easily modified with our existing tooling to meet **custom** customer requirements.

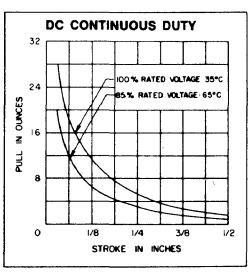
C-33

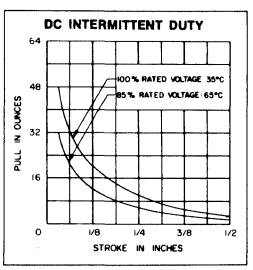












C Frame Range of Sizes:

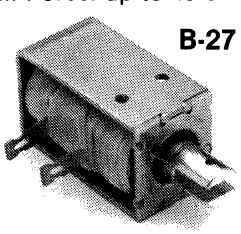
From –
.812 H .750 W 1.125 L
To –
2.125 H 1.312 W 1.657 L

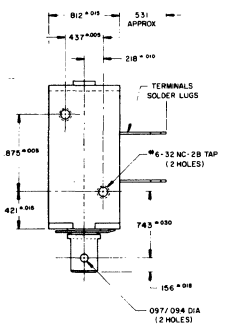
BOX FRAME SERIES

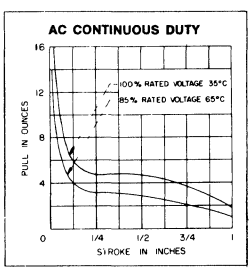
Standard Voltages: 12 to 240 VAC and 6 to 115 VDC
Stroke Length: 0 to 1¾"
Pull Force: up to 45 oz.

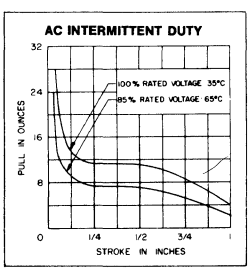
The Box Frame Series provides a longer stroke length than the C Frame Series along with a measureable increase in operational pull force. As with all of our products, tooling for high volume production is in place. Mounting hole locations and dimensions, terminal styles, as well as plunger configurations, are easily modified with our existing tooling to meet **custom** customer requirements.

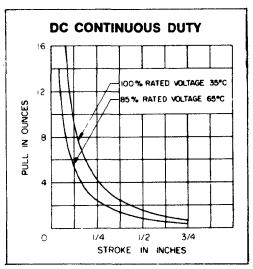
B-27

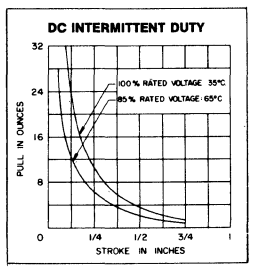












B Frame Range of Sizes:

From –
.750 H .750 W .765 L
To –
2.045 H 1.742 W 3.06 L

SPECIALS

ELECTRO-MECHANISMS, INC., is completely equipped, both engineering and production wise, to supply you with variations of our solenoids that you might need for your application. We are also capable of designing special types that you might need within the size range of our products. We would appreciate the opportunity to help you solve design and application problems you may have in the area of miniature solenoid actuators.

The force charts below represent three different duty cycles.

Nominal voltage represents continuous duty.

2X Nominal voltage represents a 25%, intermittent duty cycle 4X Nominal voltage represents a 6% intermittent duty cycle.

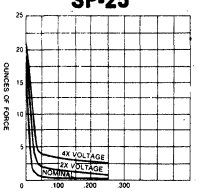
The duty cycle consists of two factors:

1. Percentage of time solenoid is energized in one complete operating cycle.

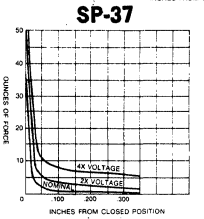
(Ref: DUTY CYCLE = $\frac{\text{Time On}}{\text{Time On} + \text{Time Off}}$ X 100)

2. Length of time of the longest single energization in one complete operating cycle.

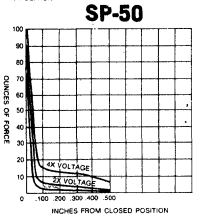
SP-25



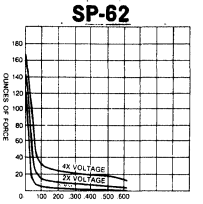
SP-37



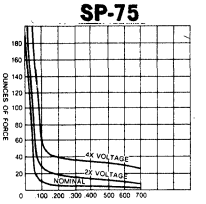
SP-50



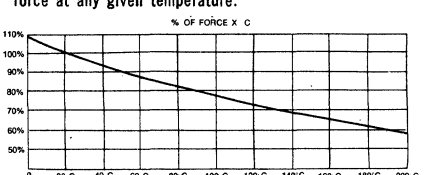
SP-62



SP-75



All forces shown are at 25° ambient. For use at higher ambient temperatures use the chart below to determine force at any given temperature.



FEATURES

ELECTRO-MECHANISMS micro-miniature solenoids offer you static and impact forces equal to standard solenoids 2 to 3 times the size of these units.

Because of their small size, they have extremely fast reaction time. As fast as 2 msec at 4x nominal voltage.

The unique design of PUSH or PULL action, offers many applications beyond the conventional pull type solenoid.

A complete line of 15 solenoids from 3/16″ O.D. to 1.250″ O.D. allows you to choose the correct solenoid with the force you require, from stock items.

The units are highly reliable with life of many millions of operations.

The solenoids are also available with coils in Class F and Class H for high temperature requirements.

Simplicity of design helps keep the costs down and allows us to pass these savings on to you, our customer.

TYPICAL APPLICATIONS

- Hammers for high speed printers
- Camera shutter actuators
- Locking mechanisms for switches, adding machines and typewriters
- Interpossers for card punching and tape perforation
- Cam actuation
- Pen lifters for plotters
- Event markers for chart recorders
- Key actuators for numerical readouts on typewriters and adding machines
- For life testing different devices
- For indicator flags
- Sensing devices
- Remote switching and actuation

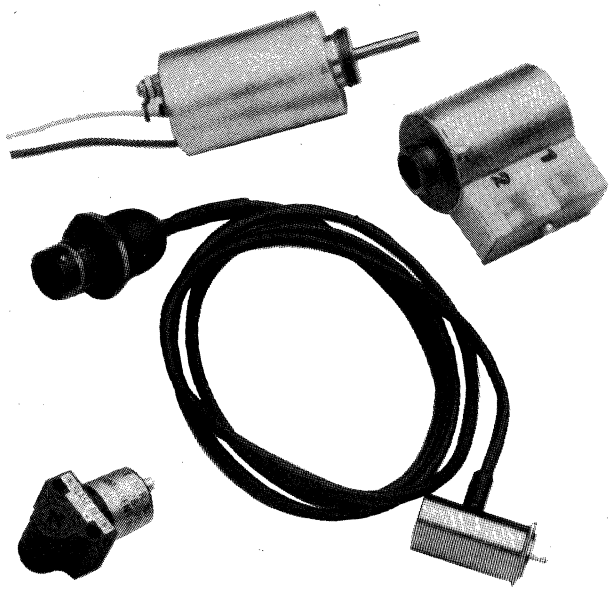
SOLENOIDS...

ENGINEERING•QUALITY•DELIVERY
MILITARY GRADE

Hard to find all these in one company?

NOW YOU CAN!



Our engineers design only solenoids and relays. Their years of experience save you money and shorten your manufacturing lead time.

Complete designs from start to finish or slight modifications to existing products. We know our capabilities and if we can't design and build a cost-effective unit, we'll let you know immediately!

Quality: At Electronic Specialty quality is consistent.
Our in-house environmental and dynamic testing lab gives us control of product quality and keeps our lead times to a minimum.

Delivery: Our sale engineers can help you with your particular application. Slight variations, or a totally new design, they give you answers on price and design quickly. Because we've supplied these kinds of components for years we are equipped to build and deliver your order when you need it.

Design capability, fast delivery of quality products with the assurance they are what you need. That's what Electronic Specialty Corporation offers you. Whether your orders are large or small we never forget the customer is what keeps us in business.

Call us, let us give you a competitive quote quickly and accurately.

PHYSICAL CHARACTERISTICS
Push or pull type

CASE SIZE
1/2″ diameter case O.D. to 3″ diameter case O.D.

STROKE RANGE
.01″ to .5″

WEIGHT
4 oz. to 48 oz.

ELECTRICAL CHARACTERISTICS
AC & DC Operation

Coil Voltages	AC	5 VRMs to 240 VRMs from 50 hz to 800 hz
	DC	5 VDC to 600 VDC

Coil resistance-Commensurate with required power and voltage requirements.
Dielectric to 1500 VDC or VRMs
Insulation resistance 100 meg at 5000 VDC

OPERATING CHARACTERISTICS
Force curves matched to customer requirements or use existing designs.
Plunger strokes from .001 to .5 inches.

ENVIRONMENTAL CHARACTERISTICS

Temperature ranges – 65F to 300F	Vibration
Pressure range	Shock
Fluid compatibility	Salt Spray

CONNECTIONS

Stud screw terminal	Twist lock
Quick connect	Wire leads
Mil Spec multiple connectors

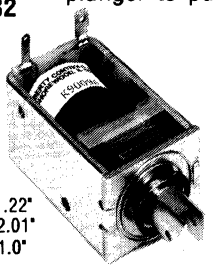
Magnetic Latching Solenoid

New! A pulse voltage applied to the coil causes the plunger to pull-in and latch. The plunger remains energized without continous voltage being applied. To release the plunger, apply a pulse voltage of opposite polarity.

M82

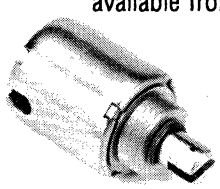


H = 1.22"
L = 2.01"
W = 1.0"

Standard Voltages: 12, 24, 110 VDC
Holding Force @ 0V: 76 -160 oz.
Insulation: UL ClassB
Options: Spring return
Pull & Push types
Wire leads, .187 QC tabs

Tubular Solenoids

New! A complete line of Tubular Soleniods is now available from Liberty Controls. All standard models may be customized to fit your application exactly. For engineering assistance and complete details, please contact us at the factory.



Standard Sizes: $^1/_2$, $^3/_4$, 1-$^1/_2$" dia.

CUSTOM SOLENOIDS

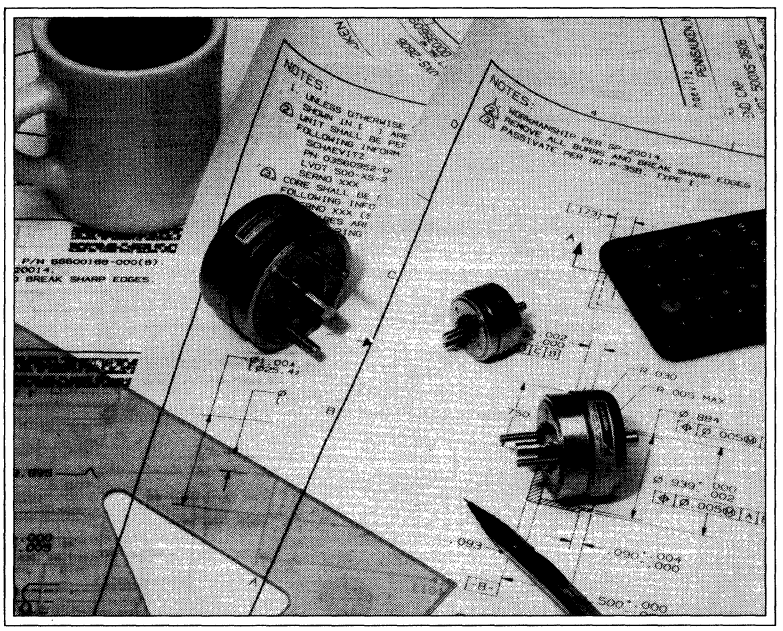
Linear Motions Company specializes in CUSTOM D.C. and Rectified A.C. Solenoids. The solenoids illustrated are a sampling of solenoids that have been designed for specific applications. It is not necessary to sift through numerous catalogs to find a solenoid that might fit your design; send us your specifications and we will design a solenoid to fit your application or send us your obsolete or unknown solenoid and we will reproduce it.

DESIGN FEATURES AVAILABLE

- Plunger return spring
- Pull, Push or Push-Pull actuation
- Long Stroke (5 inches & up)
- Choice of Leadwires, Quick disconnect, Screw type and Solder Terminals
- Built-in or external full wave rectifier
- Any voltage available
- Save assembly cost with unassembled solenoid components (i.e. built-into your enclosure)

Problem:

Need a solenoid for a project, and you're out of time.



Solution:

Lucas Ledex stock prototypes

- *The industry's largest variety of solenoids*
- *Over 400 designs*
- *Same day delivery*

Don't rely on design guide procedures to evaluate a solenoid for your project. Use the quick, cost-effective way– order a stock prototype from Lucas Ledex.

We offer over 400 stock models to cover almost any solenoid application:

- **Rotary solenoids–** up to 117 lb-in. Choose from hundreds of stock models or custom designs for prototype work.
- **Tubular solenoids–** force ratings to 11.5 lbs at 0.30". Push models rated life is +50 million actuations; pull models offer +100 million.
- **Low profile solenoids–** force to 30 lbs at 0.30" stroke. Push/pull, flat face, or conical designs built for high force to size, and fast response.
- **Brushless Torque Actuators–** field proven at over 100 million cycles. Quick, shock-free operation.
- **Soft Shift® solenoids–** proportional control as well as on-off. Rated for up to 50 lbs of force.
- **Open frame solenoids–** pull force to 7.5 lbs at 1.0 in stroke. 42 models offer economical, long-term service.
- **Magnetic latching solenoids–** maintain energized position without current draw.

More than inventory...

Lucas Ledex provides the added services that give you the exact product you want– fast, easy, economically.

Unique customer specifications

- 80% of the solenoids manufactured at Lucas Ledex are designed to customer specifications
- We offer a short order prototyping service which can deliver custom prototypes in 2 weeks or less, for a small service charge

Quick Delivery

- Same day delivery on most stock models

No credit hassels

- Use your Visa or Mastercard and save time

Quality...our measure of leadership

- Lucas Ledex has received numerous awards for exceeding on-time deliveries with zero rejects
- Our manufacturing goal is to achieve zero defects

Turn to the following pages for more details and specifications on many Lucas Ledex solenoid designs.

Lucas Ledex Solenoids

Rotary Solenoids

- For millisecond-fast, high torque actuation • Nine sizes • Right or left hand strokes from 10° to 110°
- Torque output to 117 lb-in
- Life of 100 million plus cycles
- Modifications available

Non-Axial Rotary Solenoids

- Produce high torque with no axial displacement • Severe environmental operating capability including shock and vibration in aerospace applications • 100 million plus cycle life • Low noise
- Features balanced armature mounted on ball bearings • 4 standard sizes up to 2.42" diameter
- Standard angular strokes: 30°, 45° and 60° (90° optional), either CW or CCW • Output torques to 50 in-oz • 5 to 400 VDC input

Magnetic Latching Solenoids

- Utilize permanent magnets coupled with conventional rotary, tubular, low-profile or open frame solenoids to hold the plunger position open or closed without current drain • A momentary pulse releases the latch • Memory is retained during power loss

Soft Shift® Solenoids

- Provide variable speed control, from snap action to quiet variability
- Variable positioning with electronic control • Starting force 3 to 5 times greater than that of other solenoids

Low Profile Solenoids

- Force to 30 lbs at 0.30" stroke
- Push/pull, flat face, or conical designs built for high force to size
- Fast response

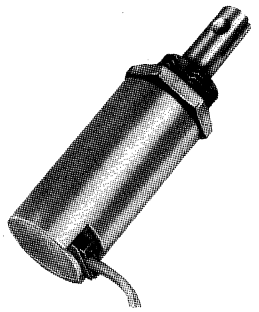
Lucas Ledex Solenoids

Tubular Solenoids

• Provide 50 million actuations, quiet operation, push or pull actuation, and economy • Low friction bobbin assembly for long life • Metal-to-plastic bearing surface construction eliminates powdered metal flaking • Rugged construction for accurate repeatability over extended use • Ideal for applications where field servicing is prohibitive such as business machines, computer peripherals, door inter-locks, interposers and gate releases



Tubular Solenoids

O.D. (in)	Height (in)	Force (0.25" stroke)	Shaft Dia. (Push) (in)	Weight (oz)
1/2	1	1-8.5 oz	0.062	0.84
3/4	1-1/2	0.25-2.5 lb	0.094	2.60
1	2	0.75-5.5 lb	0.125	6.00

Brushless Torque Actuator

• Controlled velocity and position • Quiet, shock-free operation • 100 million plus cycle life • High-speed cycle rate • No axial stroke • Low power consumption • Ball bearing construction

BTA® Brushless Torque Actuator Size 4EX (Model #195500-0)**

For Solenoids Made In The U.S.A.

With experience in thousands of custom design applications, we can design solenoids for your special requirements.

Regdon solenoid types include:

- Cylindrical
- U Frame
- Box Frame
- Miniature
- AC Operated
- DC Operated
- Magnetic Latch
- Air Damped
- Push or Pull Action
- Heavy Duty
- Custom Types for Special Requirements

regdon
SOLENOID, INC.

QUALITY SINCE 1912

Part of worldwide **Magnet-Schultz**, specialists in electromagnetic devices

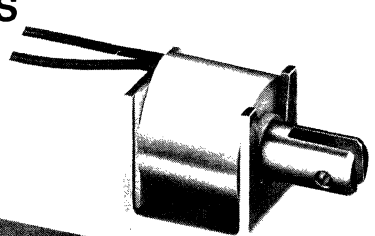
NO POWER REQUIRED

DOES YOUR DESIGN REQUIRE HOLDING FORCE FOR LONG PERIODS OF TIME?

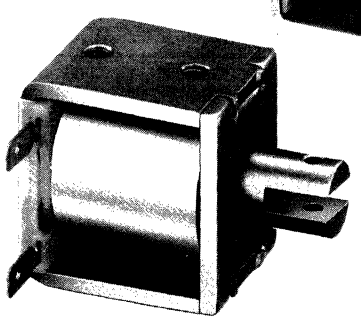
A MAGNETIC LATCHING SOLENOID ALLOWS CONTINUOUS HOLDING WITHOUT REQUIRING CONTINUOUS POWER.

INTERFACING WITH YOUR ELECTRONICS CAN BE ACCOMPLISHED IN 3 WAYS

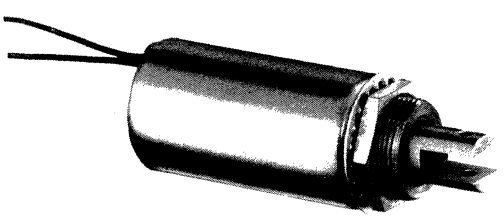
SINGLE COIL DESIGN
Release with Pulse, Pull-In with Reversed Polarity



TWO COIL DESIGN
Release with Pulse to Coil 1, Pull-In with Pulse to Coil 2



MANUAL RESET DESIGN
Release with Pulse Manually Reset



- **Holding Force up tp 60lbs.**
- **Stroke up to 1.0 in.**
- **No Heat Rise**
- **Push or Pull Operation**
- **Made in the U.S.A.**
- **Magnetic Latching Option is Available on Any Regdon Frame Size (See Page B 1636)**

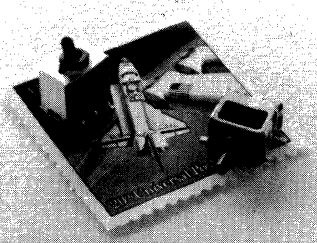
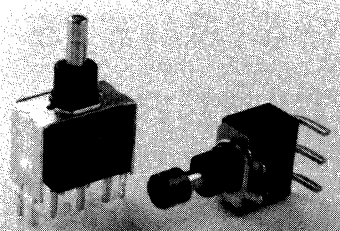
nkk switches

WORLD'S SMALLEST



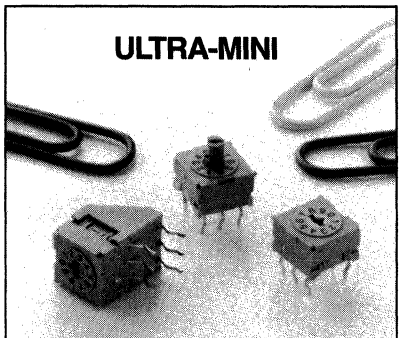
NKK introduces the surface mount G3T with patented STC contacts, gull-wing terminals. VPS or infrared reflow solderable.

EASY DOES IT



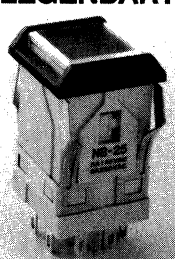
Washable M2B subminiature pushbuttons feature very-light-touch, snap-acting contacts. Straight, right angle, vertical PC terminals.

ULTRA-MINI

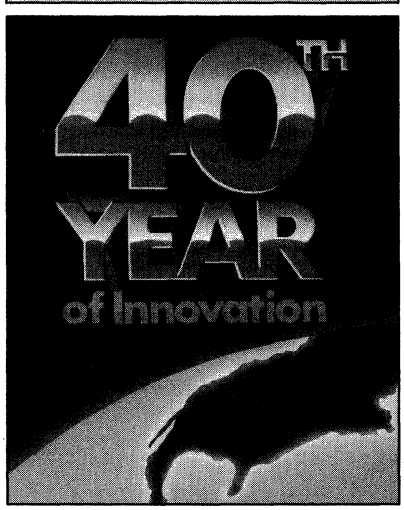


New ND switch is half the size of ordinary binary coded DIP rotaries. Washable and universal footprint pattern.

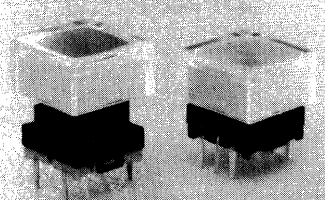
LEGENDARY



New compact, industrial-grade NB snap-in LED pushbutton with split legend up to 4 ways. Built-in resistor. Numerous options.

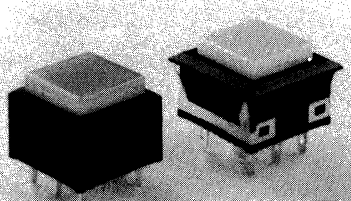


WORTH A MILLION



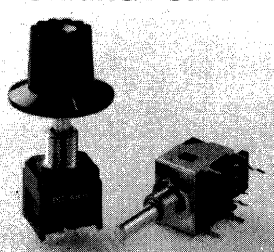
Million operations from unique LED illuminated JB keypad switch. Red, green or yellow LED options.

DOUBLE DUTY



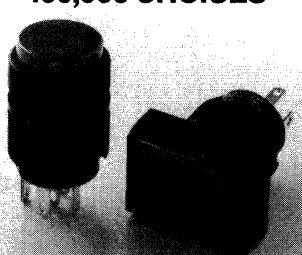
Logic-level for PCB or power rating for snap-in panel mounting, from very low-profile UB pushbuttons with full-face LED illumination.

TURNING POINT



Washable Binary Coded DIP rotary DR-A switch can be PC or panel mounted. Crisp operation. Right angle or straight terminals.

100,000 CHOICES



YB pushbutton yields literally 100,000+ part numbers with variations in mounting, illumination, circuitry and color.

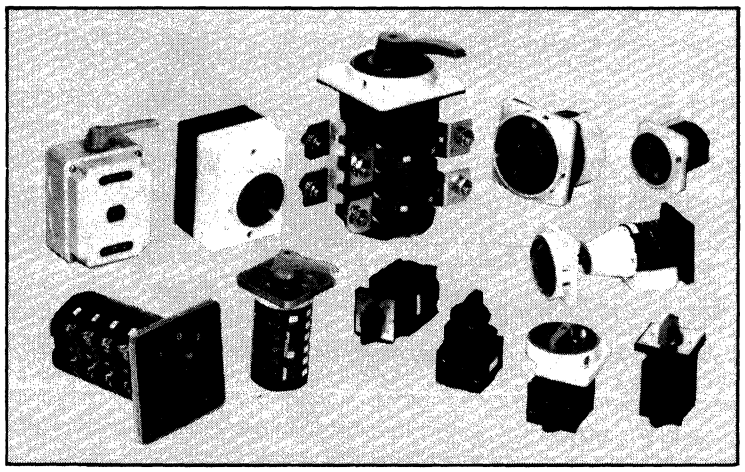
Power Switches

Rugged, safe, reliable switches for industrial control applications...

Automation, Machine Tools, Instrumentation
Material Handling, Railways, Marine

Altech's comprehensive line includes switches for diverse applications and environments, and provides cost effective solutions for any switching problem. Worldwide approvals include UL, CSA, IEC, VDE.



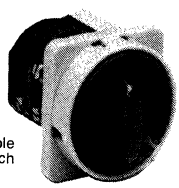
CM Series

- Space Saving Modular Construction
- Up to 25 Amps
- Self-Extinguishing Materials
- Panel, Base or DIN Rail Mount

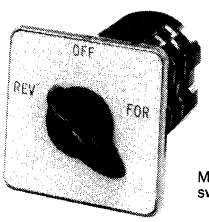
Power Disconnect

Superior performance for use as load and motor disconnects, emergency, and isolator switches.

- Thru-The-Door Interlocks
- Capability Range to 75 KW or 100 HP at 600 VAC.



Pad lockable safety switch



Motor reversing switch

Metering/Selection

Selector switches simplify voltage and current measuring circuits, reducing the need for multiple meters. Compact, they can be mounted side-by-side without installation interference.

- Save Valuable Panel Space
- Ratings at 12A, 16A, 20A, 25A/600VAC

CAM Series

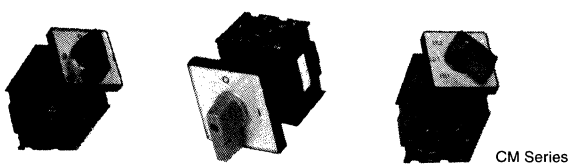
- Assembled From Standard Parts
- Multiple Positioning Mechanism
- Above 25 Amps
- Steel-Thru Shafts & Bolts
- Self-Extinguishing Materials
- Panel, Base or DIN Rain Mount

CAM Series

Motor Control

Start-up, reverse, change speeds with rotary CAM switches, single to three-phase motor control. Control and sequence motors with one modular multiple CAM switch.

- Power Supply Selectors
- Transformer Tap Selectors

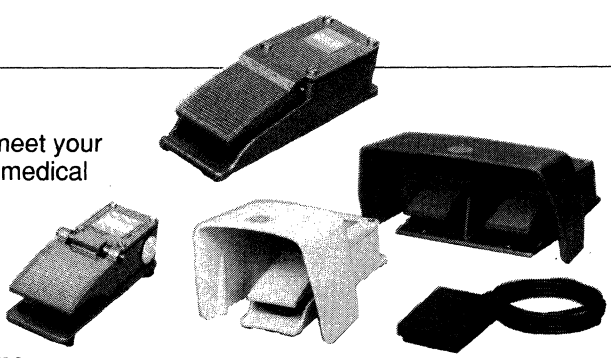


CM Series

Foot Switches

Altech offers attrractive, heavy duty Foot Switches that will meet your design and performance requirements for industrial, electro-medical and commercial applications.

- Single, Double, Triple Pedal
- Sturdy, Rugged Design
- Reliability, Precision
- Potentiometers
- Long Life
- Reset Buttons
- Foot Shields
- Customization
- Water/Oil Tight Versions



Ask about other switches available from Altech: • Safety Trip Cable • Magnetic • Limit

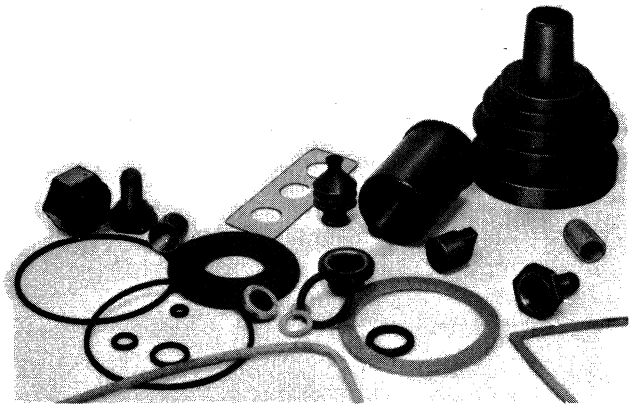
AME SWITCH SEALS



Backed by over 25 years of engineering solutions — for an ever-changing and demanding market.

The wide demand for custom-molded panel and switch seals, threaded inserts bonded to rubber, O-rings, boots and seals, etc., translated is really a demand for talent and know-how to handle the engineering and molding of particularly thorny or unusual custom requirements that frequently plague industry. AME meets the demand. . . with experience, service and unique production techniques.

CUSTOM ENGINEERED PRECISION MOLDED ELASTOMERS

- Color filters for incandescent lamps
- Rubber to metal bonding
- Clear silicone products
- Self-sealing hex nuts
- Self-sealing washers
- Extrusions
- O-rings
- Boots
- Gaskets
- Seals
- Conductive rubber
- Die cutting

FOR A COMPLETE LISTING OF ALL STYLES AVAILABLE, INCLUDING ROUND BASE SEALS, PLEASE CONTACT THE FACTORY.

MANY OTHER SIZES AND TYPES AVAILABLE

Pressure capabilities: Internal Pressure
1 Atmosphere, 15 psi (103.4 kPa)

External Pressure
2 Atmospheres, 30 psi (206.8 kPa)

For Part #1106 — Internal pressure
.7 Atmosphere, 10 psi (69 kPa)

External pressure
1.4 Atmospheres, 20 psi (138 kPa)

Endurance: Exceeds 100,000 actuations (depending on environment).

Useful life: 20 years to unlimited (depending on environment).

Switch Seals are designed and manufactured to meet or exceed applicable military specifications.

Switch Seals

An elastomeric boot which seals, thus protecting a switch and internal components against hazardous foreign elements. AME's one piece switch seal is constructed of a flexible rubber boot element bonded during molding to a threaded metal insert that fully encapsulates the switch and bushing to the panel.

This assembly replaces the panel mounting nut and seals the mounting hole making it watertight. It protects against moisture, oil, dirt, dust, most solvents, many acids (see elastomer selection guide).

Switch seals provide vibration resistant mounting and act as double insulation with no interference to switch movement.

CAST URETHANE & SILICONE

AME supplies cast urethane and silicone products precision engineered to meet your most demanding requirements.

If you need high tensile/tear strength, excellent resistance to abrasion and high impact capability, our cast urethane is ideally suited for the job. Superb temperature resistance to the damaging sub-zero cold or searing heat extremes is found in the cast silicone custom engineered by AME Corporation.

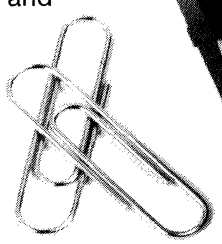
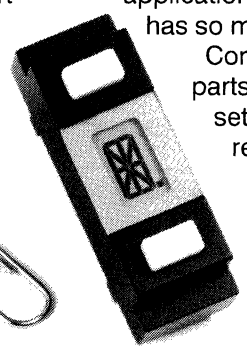
SWITCH SEALS

The world's first intelligent man/machine interface in a DIP . . .

Provides all of the display and switch functions you'll ever need in a single compact device. Stackable and cost-effective.

The secret? A single LSI chip with state-of-the-art CMOS logic. Developed jointly with GE/RCA. Logic that combines a single-character alpha-numeric display, thumbwheel switch and pushbutton switch functions in one easy-to-use component. A true peripheral device with a RAM-like CPU interface.





An intelligent thumbwheel switch that will put you miles ahead of the competition. With capabilities they can only dream about. Unless, of course, you tell them.

In a simple application you might directly replace those out-dated mechanical thumbwheel switches. A typical cookbook design. And without a host CPU.

In a more sophisticated application you might use a host processor to provide programmable control over man/machine interactions. Such as formula selection and entry, display of messages, user friendly menus, or a mix of some or all of these capabilities. The possibilities are limited only by your imagination.

No matter how simple or how complex your application is, no other interactive component has so much to offer and is so easy to use.

Concerned about availability? Standard parts are typically off-the-shelf. We've even set up a second source so that you'll receive an uninterrupted supply.

Got a deadline to meet? Our technical support team will help get you on the air in record time. Or maybe one of our off-the-shelf intelligent thumbwheel assemblies will fit the bill.

Whether you need to make a decision fast, or you're just thinking about down the road. Our microcontroller-based evaluation kit will provide you with instant evaluation, complete documentation and everything else you need to get started. Order one right now and experience intelligent interaction.

To place an order or for more information call: (708) 426-6780.

EVALUATION/DESIGNER'S KIT

This handy low-cost kit will save you weeks of time. The kit includes everything you need for evaluating, prototyping and designing with this new technology. A MUST for your engineering lab.

Includes a microcontroller programmed to demonstrate the many functions and capabilities of these devices.

The kit includes:

- 15 assorted intelligent thumbwheels
- A microcontroller-based evaluation board with all components (includes a preprogrammed Signetics S87C751 microcontroller)
- Technical data sheets and specifications
- Application notes

Order # EVAL-SST-KIT $245

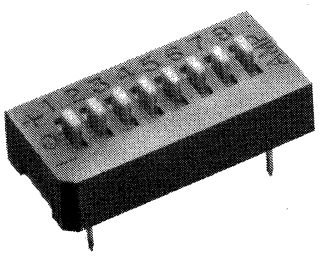
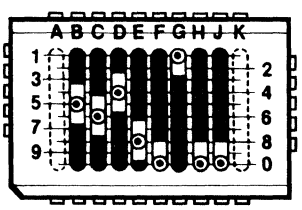
Trinary Slide Switch 7800 Series

Materials:
Case and Base—Glass-filled polyester, 94V-0 rated
Slide—Polyester, 94V-0 rated
Spring Contacts and Leads—Copper alloy, plating in accordance with AMP Product Specification 108-7047

8 Pos. Part No. 436172-3



AMP Mini-Matrix Slide Switches



Materials:
Structural Plastic—Glass-filled thermoplastic, 94V-0 rated
Column and Row Buses—Copper alloy, contact areas gold plated
Slide Springs and Contacts—Beryllium copper, gold plated

Switch Configuration	Switch Part Number
10 x 10	436270-1

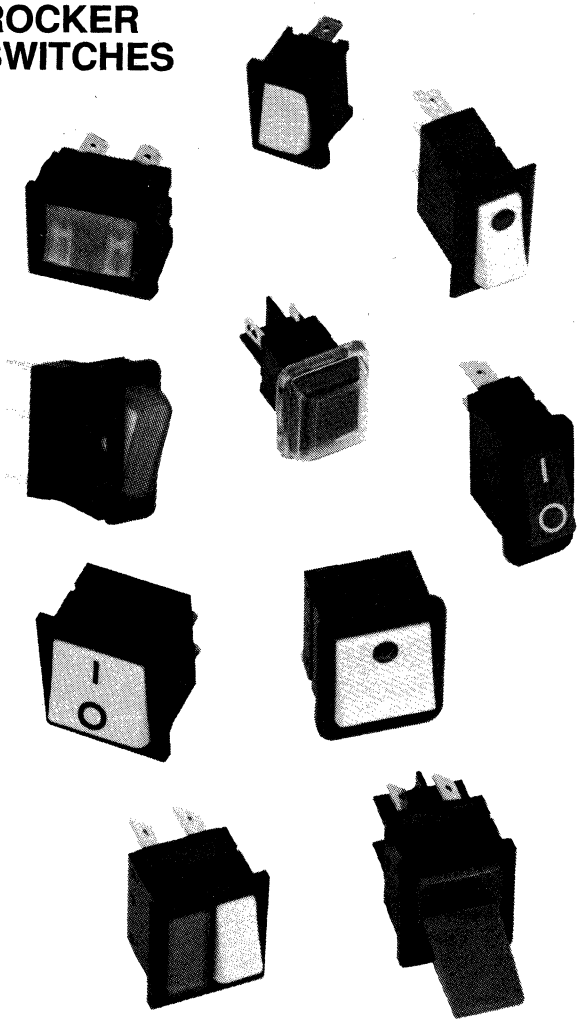
Arcolectric

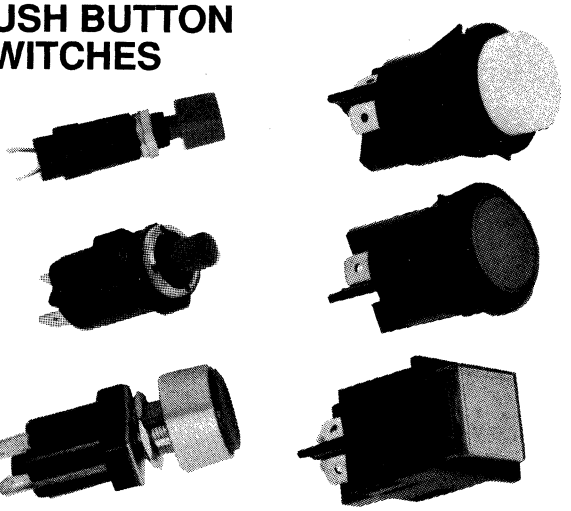
ROCKER--PUSH BUTTON--SLIDE--TOGGLE SWITCHES

ROCKER SWITCHES



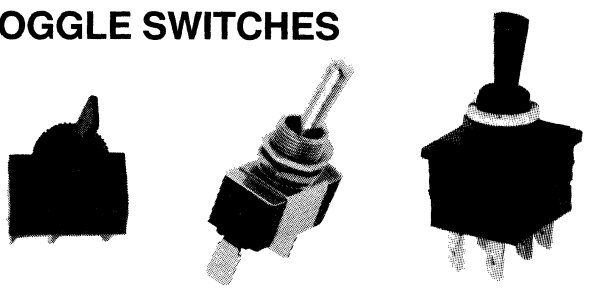
Single and double pole • Maintained, momentary circuits • Lighted and nonlighted • Twin switches in one body • Special colors and legends • Numerous cut out sizes • Isolated lamp circuits • Water resistant versions • Protective front cover boots • Electrical ratings up to16a 250vac 1HP 200a In-rush • Most of these ranges are fully automated offerings, low cost, consistant quality and 100% testing

PUSH BUTTON SWITCHES



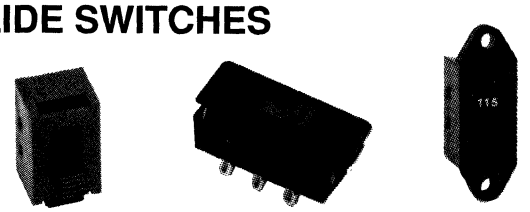
Single, double pole, momentary, alternate action, lighted and non-lighted circuits. Ratings up to 16a 250vac 1HP.

TOGGLE SWITCHES



Single and double pole circuits. Ratings up to 20a 250vac 1 3/4HP

SLIDE SWITCHES



Single and double. Ratings to 12a 250vac

Most products are UL, CSA and VDE etc approved.
Complete details supplied on request.

QUALITY FEATURES... ARIES® DIP SWITCHES
Competitively Priced!

FEATURES:

- Number of positions available: 4 thru 10 and 12.
- Top Quality Materials:
  - Base, Cover and Slider: UL94VO rated glass filled high temperature thermoplastic. PPS Base and Cover rated at 500°F (260°C).
  - Slider Contact: Beryllium Copper Alloy w/selective gold plating over nickel plating.
  - Terminal: Copper Alloy w/selective gold plating over nickel plating and tin plating on leads.
- Fully sealed assembly:
  - Molded cover ultrasonically welded to base with insert molded and dual sealed terminals.
  - Slider contact with insert molded slider.
  - KAPTON* (polyimide) sealing tape.
- Redundant bifurcated slider contacts—self cleaning wiping action.
- 20μ gold in contact area.
- Compatible with auto-insertion equipment.
- End stackable.
- Recessed slider travel = .045″ (1,14)
- Low profile height of .170″ (4,31) for all three styles.
- Preprogramming available.
- Tape and Reel packaging as per EIA-481-A available.
- Fully automated assembly and 100% tested.
- Competitively priced.

SPECIFICATIONS

1. Contact ratings

Voltage	Silver alloy contact type		Gold-clad contact type	
			Triple layer	Double layer
	Resistive load	Inductive load	Resistive load	Resistive load
125 V AC	2 A	2 A	0.1 A	—
250 V AC	2 A	2 A	0.1 A	—
30 V DC	2 A	2 A	0.1 A	0.1 A
125 V DC	0.4 A	0.05 A	—	—

Rated voltage	Resistive load
6 V DC	5 mA
12 V DC	2 mA
24 V DC	1 mA

2. Characteristics

Mechanical life (O.T.: Specified value)		Min. 5×10^5 (at 60 cpm)*
Electrical life at rated load (O.T.: max.)	Silver alloy contact type	Min. 5×10^4 (at 20 cpm)
	Gold-clad contact type	Min. 2×10^5 (at 20 cpm)
Insulation resistance		Min. 100 MΩ (at 500 V DC)
Dielectric strength Between non-continuous terminals Between each terminal and other exposed metal parts Between each terminal and ground		 1,000 Vrms 1,500 Vrms 1,500 Vrms
Vibration resistance (Pin plunger type)		10 to 55 Hz at single amplitude of 0.75 mm (Contact opening: max. 1 msec.)
Shock resistance (Pin plunger type)		Min. 30 G (Contact opening: max. 1 msec.)
Contact resistance (Initial)	Silver alloy contact type	Dust protected type: Max. 50 mΩ Immersion protected type: Max. 100 mΩ (By voltage drop 1 A 6 to 8 V DC)
	Gold-clad contact type	Dust protected type: Max. 100 mΩ Immersion protected type: Max. 150 mΩ (By voltage drop 0.1 A 6 to 8 V DC)
Allowable operating speed (at no load)		0.1 to 500 mm/sec.
Max. operating cycle rate (at no load)		120 cpm
Ambient temperature		−40°C to +85°C −40°F to +185°F
Ambient humidity		Max. 95% R.H.
Unit weight		Approx. 2 g .071 oz (IP50 type)

*Long mechanical life types (min. 5×10^6 operations) are available.

3. Operating characteristics

The products shown here are a brief selection of our wide range of quality switches.

Sub-Miniature and Sub-Ultra Miniature
Features: 10 million cycle life, 7 terminal options, gold cross-point or silver contacts, full overtravel, fully sealed & process compatible models w/without leads, mounting holes or pegs, standard/low force models, wide variety of clip-on levers, snap-on terminal covers, high temp. versions.

Reference	Actuator	Dimensions L	W	H	Actuating Force N	OZ	Max. Rating 125/250 VAC	Terminals
F1N	Plunger	15	5	6	2.0	7.0	5	Side PCB
F1NS	Sealed Plunger	15	5	6	2.0	7.0	5	Side PCB

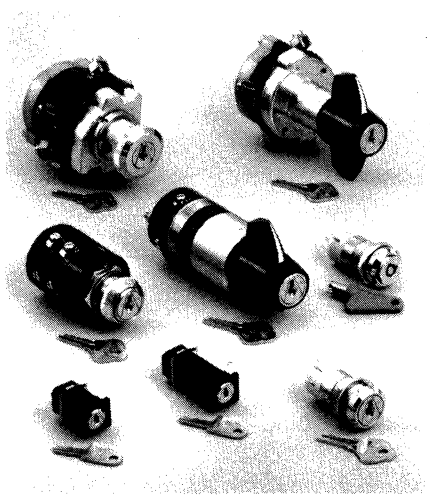
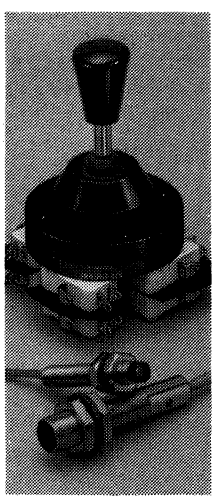
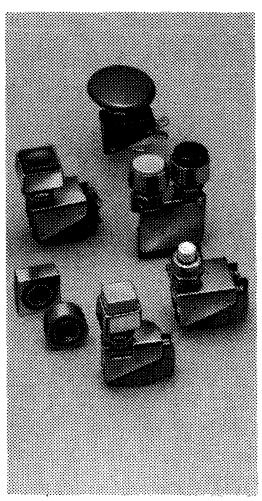
CR – CT Basics – Single-pole, changeover, snap-action with moulded cases and lids, sensitive beryllium copper trident spring mechanisms, flat base with 3 solder tag terminals version, stepper base fitted with 6-32 UNC screw and cup washer terminal version, explosion proof models, 15A 125/250 VAC rating, broad selection of actuators, sealed models.

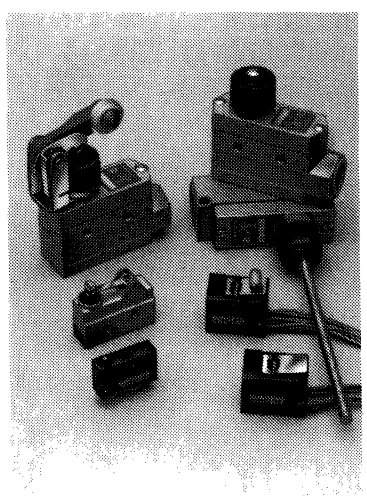
XG Miniatures – Single-pole, double or single throw, seven force/current variations 320 cN/45cN - 20A ½ hp/10A 1/6 hp, up to 100 million cycles mechanical life. Silver, gold, or silver-cadmium-oxide contacts, high temperature versions up to 150° C. Wide selection of terminals including PCB mount, large variety of integral lever actuators.
International approvals - UL/CSA, BEAB, VDE, SEMKO, SEV, DEMCO, NEMCO, KEMA, UTE.

XP, XT, XS Multi-pole Security Switches – Intended for use in locations within equipment where doors and covers are opened and personnel are to be protected. XP Single Pole, XT Double Pole and XS Triple Pole versions are available.
Electrical breaking capacity ranges from 0.3A 30 VAC for low-voltage to 16A 125/250 VAC for electrical mains or power contact. Contact gaps in excess of 3mm for use in main isolation, contact gaps creepage and air gaps up to 8mm for UL / CSA, VDE, BEAB, SEV SEMKO, NEMKO, DEMKO, SETI, KEMA, IMQ, BEAB, and CEBEC approvals. Normally open, normally closed and changeover version, – 20° C. to + 85° C. and + 140° C. on some models.
Contact material or range varies from silver nickel, silver palladium, pure silver, gold-plated and other materials on request.
Accessories include a multiplug terminal housing connection and a service key for the XT Series.









Tok Switches – Key and rotary operated switches from a wide range of styles, sizes, and options for many security applications.
From the miniature "M" and "E" series key switches with low level switching applications and electrical rating of 100 mA at 30 VDC maximum... ideal for high volume OEM applications.
P 5 knob operated switches are small size where space is a premium. The normal electrical rating of a P 5 is 7 A at 250 VAC.
P 13 and P 25 switches are heavy-duty switches with nominal rating of 15 A AC and 25 A AC respectively.

Joysticks – 40 standard options with latching, momentary, lift-to or normal operation, V3 or V4 switching, 2 or 4 gate or 360° stirring action, panel sealing to IB65, accurate down to – 50° C., designed for scientific installations and industrial applications.

EUROPA – Proximity Sensors – Over 300 models, sensing ranges from under 1mm up to 20mm, AC, DC and NAMUR, N/O, N/C and universal outputs, housed in rugged nickel plated brass in compact or standard lengths, models to meet CENELEC EN, plug and socket types for easy installation.
Push-Buttons – 3 to 25A 125/250 VAC, reliability over a long life with positive, nonfatiguing operation, single and double pole versions with momentary or alternate actions, a two button version, an emergency stop button unit, and a wide variety of bezels including a sealed bezel.
Protected Switches – A versatile selection of switches for difficult environments, from 15A 250 VAC metal housed with conduit entry and industrial actuators down to 10A 250 VAC compact, and 5A 250 VAC miniature single and double pole pre-wired sealed and preserve tested to 6 p.s.i. Mechanical life up to 10 million cycles, NEMA Type 6 IP 67 enclosures.

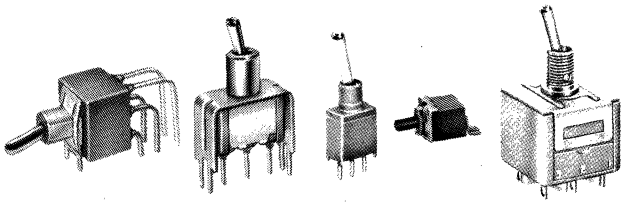
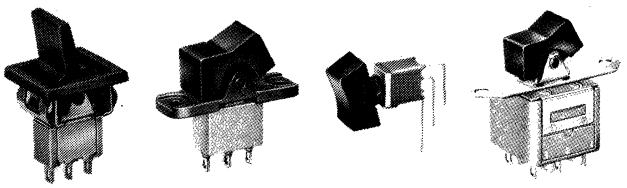
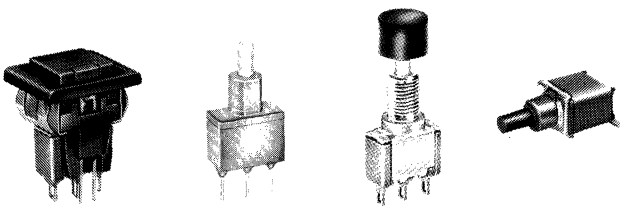
NEWTON DIVISION PRODUCTS



Toggle Switches
A full range of miniature, tiny and ultraminiature models for panel and P.C. mounting, including sealed/process compatible and surface mount. SP thru 4P models with many styles and options available.



Rocker and Lever Handle Switches
A full range of miniature and tiny models for panel and P.C. mounting, including anti-static and sealed/process compatible designs. SP thru 4P models and many options available.

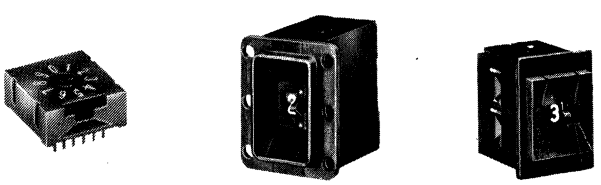


Pushbutton Switches
A complete line of miniature, tiny, subminiature and microminiature switches with momentary, snap-acting and alternate action functions—SP thru 4P. Surface mount and sealed/process compatible models available.

Slide Switches
A full range of miniature, tiny and ultraminiature models with many available options.

Half-Inch Rotary Switches
A full range of miniature instrument grade rotary switches in one and two pole models with 30 degree indexing (12 positions max) or 36 degree indexing (10 positions max).

Membrane Keypads
Available in 4 x 4 and 3 x 4 arrays with either embossed detented or flat nontactile keys.



Thumbwheel Switches
A full range of miniature, sub-miniature and mini-thumbwheel switches with snap-in front or rear panel mounting and P.C. mounting.

DIP Switches
LD Series available in 4, 6 and 8 positions. Low profile, machine insertable, surface mount or thru-hole P.C. terminations. Fully sealed/process compatible. BD Series available in 1 through 12 positions (except 11 pos.). The washable design can be wave soldered.

C&K COMPONENTS, INC. 15 Riverdale Ave. Newton, MA 02158-1082 Tel: (617) 964-6400, Telex: 92-2544, Fax: (617) 527-3062

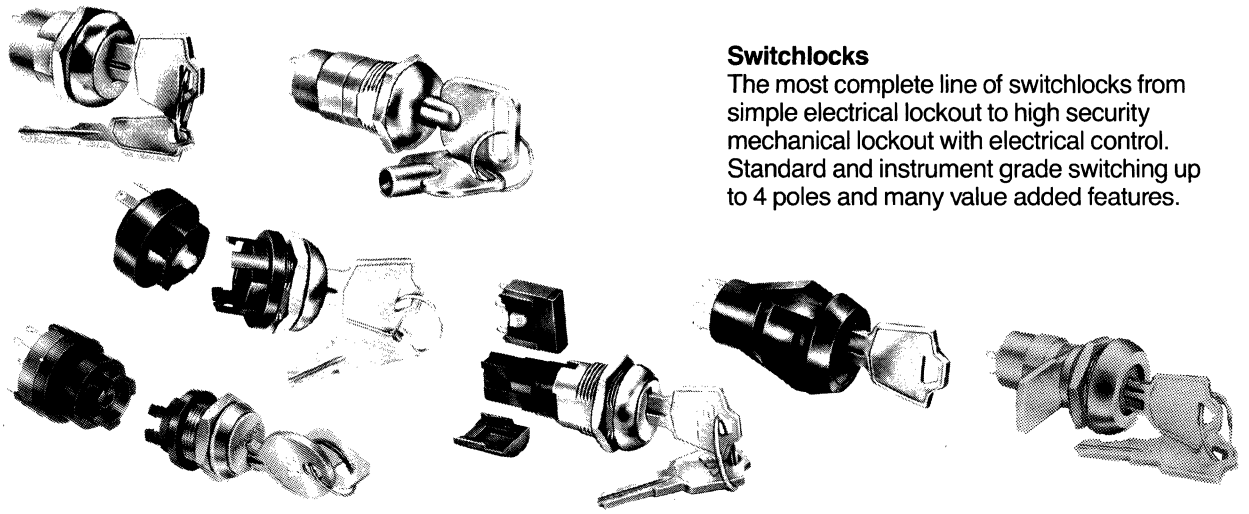
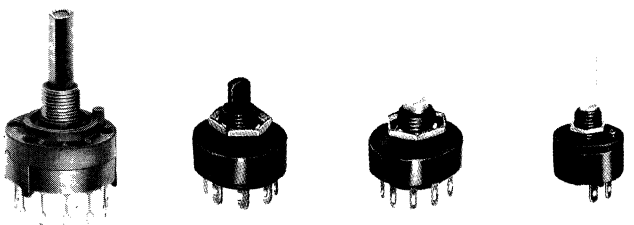
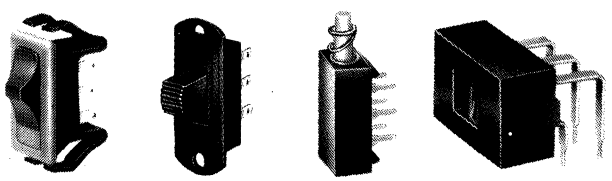
CLAYTON DIVISION PRODUCTS



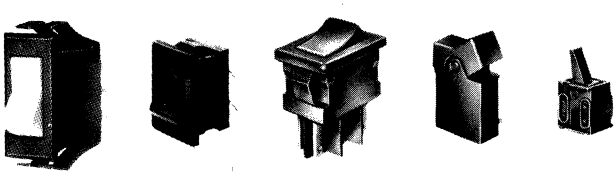
Switchlocks
The most complete line of switchlocks from simple electrical lockout to high security mechanical lockout with electrical control. Standard and instrument grade switching up to 4 poles and many value added features.



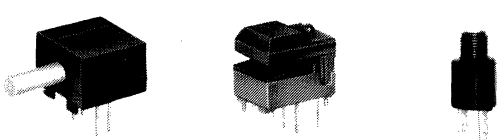
Rotary Switches
All plastic rotary switches adjustable from 2 to 12 positions. ROTA-SLIDE,® Power ROTA-SLIDE and Miniature ROTA-SLIDE rotary switches.



Slide Switches
Power and Line Voltage Select Slide Switches. Miniature and Snap-In Slide Switches.



Rocker and Lever Handle Switches
A full range of miniature power rocker and lever handle switches.



Pushbutton Switches
Pushbutton and mechanical pushbutton models and options for panel and P.C. mounting.

Illuminated Pushbutton Switches
Seven different styles of illuminated and non-illuminated pushbutton snap-acting switches with modular snap-together construction.

CAPITOL SWITCH INC.

Your Solution Company.

Why Have Problems!!

Use CAPITOL SWITCH to provide economical solutions where reliability — long life — improved quality and M.T.B.F. are of paramount concern.

40 Years of Proven Experience with Demanding Customers Like

AT&T, IBM, GE, BOEING, UNISYS, ROCKWELL, FAA, U.S. NAVY, U.S. AIR FORCE AND MANY OTHERS WHERE QUICK RESPONSE AND FLEXIBLE APPROACHES ARE MANDATORY. WE CAN OFTEN SUPPLY A PROTOTYPE FASTER THAN COMPETITORS CAN DECIDE ON SUPPLYING A QUOTATION!

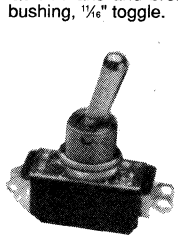
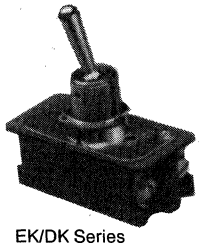
CARLINGSWITCH SWITCHES

GENERAL PURPOSE AC-DC TOGGLE SWITCHES

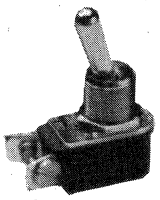
Quick make and break AC-DC rated. UL recognized and CSA certified 15/32" bushing, 1/16" toggle.



2B Series



EK/DK Series



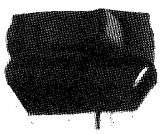
110 Series

CURVETTE® SNAP-IN SWITCHES

Slow make and break action, .250 quick connect terminals. 16 amps 125 VAC – 10 amps 250 VAC, 10(4) amps—250VAC. UL recognized, CSA and VDE certified. Rated life 50 M cycles @ rated load. Also features our unique Visi-Rocker®, two-color molded curved rocker for low cost "ON" indication.

R Series

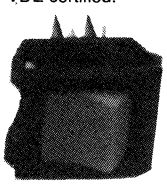
LR Series



Visi-Rocker R Series

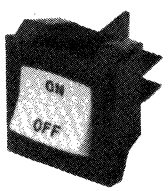
SC HIGH INRUSH CURVETTE SNAP-IN SWITCHES

Designed to handle current surges over 100 amps. UL recognized and CSA certified for 20 amps 125 VAC—15 amps 250 VAC, 16(6) amps 250 VAC, VDE certified.



LRGSC Series

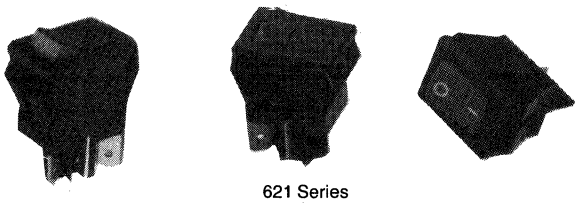
RSC Series



RGSC Series

MINIATURE CURVETTE SNAP-IN SWITCHES

These miniature switches are rated @ 4 amps 250 VAC—8 amps 125 VAC, 6(4) amps 250 VAC. UL recognized, CSA and VDE certified. Also features our unique Visi-Rocker two-color molded rocker for low cost "ON" indication.



621 Series

HEAVY DUTY ROCKER SWITCHES

These full-size rocker switches are designed for AC and low voltage DC applications. They include a slow-make, slow-break contact mechanism, nylon snap-in brackets. They are rated at 15 amps 125 VAC, 10 amps 250 VAC, ¾ H.P. UL recognized and CSA certified. Suitable for 20 amp 28 VDC.

CARLINGSWITCH, Inc., 60 Johnson Avenue, Plainville, CT 06062-1156
(203) 793-9281 • FAX: (203) 793-9231 • 1-800-243-8556

In fact, it's a whole family of commercial grade switches, evolved from COLE's 3600 Series MIL-S-3786, QPL flux and contaminant proof switches—the head of the family.

The all new 3900 Series half-inch rotary switches are made from the same ultra clean materials, and fabricated in the same clean room facilities as our MIL switches; only the level of documentation is different. *And,* the 3900 Series offer new improvements and features of their own. For example, as shown in the photo, they're available with solder lugs or PC terminations that allow the switch to be plugged directly into PCB's, motherboards, or flex circuits for instant substitution or replacement. The *Add-a-Pot* version permits ganging of pots or linear switches on the same shaft. High security *Keylock* versions are part of the new line. All of this quality is now available to designers at competitive commercial pricing. But if you are spec'd in to MIL-S-3786, the 3900 Series is offered in full MIL, QPL form.

THIS IS A COMMERCIAL

Also new from COLE, an addition to the 1800 Series half-inch MIL switches—the *Model 1830,* a 30 degree rotation single deck precision switch.

A final word about *flux and contaminant proof* switches. Other manufacturers say they offer them—at considerable cost. Most do not offer this feature—they can't. COLE Instrument Corp. invented flux proof switches, literally. *U.S. Patent #4,910,364* has just been awarded to R.L. Garcia, COLE Instrument Corp. The word on flux proof switches is COLE . . . period.

New things are happening at COLE. Call or FAX for updated specs or application engineering assistance.
